1. When proposals for new changes to old projects, plans, and programs are being considered which may cause significant adverse environmental effects;
2. Upon completion of assessments;
3. At the finding of no significant impact;
4. Before preparation of an EIS is begun;
5. Upon completion of a draft EIS;
6. Upon evaluation of comments and completion of final EIS.

The decisionmaking process will not be concluded until a record of decision is prepared and made available to the public. (1502.2)

All environmental documents, including supplements, will be made part of the Administration Actions File (APHIS Directive 131.2), which is the APHIS formal administrative record. This file will be available for public evaluation of the alternatives considered. Appendix I is a flow chart which graphically portrays the decisionmaking process.

IV. EIS Preparation

A. *Requirement.* The NEPA requires an EIS with every proposal for legislation or other major Federal action which significantly affects the quality of the human environment. Executive Order 12114, January 4, 1979, extends these requirements to environmental effects abroad of major Federal actions.

B. Preparation of EIS for APHIS Actions.

1. APHIS will use no categorical exclusions from the NEPA process other than those listed in the USDA regulations (7 CFR 3100.22). (1508.4)

2. Because APHIS projects, plans and programs do not lend themselves to the kind of classification that would be necessary to designate categories of actions for which EIS's will always be prepared, no such designations will be made. (1507.3)

3. APHIS officials will make an environmental assessment for legislative proposals originating in APHIS, for each proposed new action and for each significant change to ongoing projects, plans and programs. The assessment will be the basis for the Agency's determination to prepare an EIS or to publish a finding of no significant impact. In addition, APHIS officials will schedule for environmental assessments those ongoing projects or programs

which, because of their age and unchanging nature, have not been reviewed for environmental impact in the past five years. It is the Agency goal that every project or program be reviewed for environmental impact at least every five years.

4. The following criteria will be considered by APHIS officials in making the environmental assessment:

- a. Degree of environmental disturbance; both onsite and offsite should be recognized.
- b. Irreversible effects on basic resources; short-term and long-term commitments.
- c. Cumulative effects of many small actions.
- d. Chain reactions or secondary effects of interrelated activities.
- e. National, state, and local importance.
- f. Uniqueness or rareness of resources being affected.
- g. Scope of anticipated public involvement and controversy anticipated.
- h. Interaction with other Federal projects and actions of the private sector.

C. *Tiering.* A broad EIS would be prepared for repetitive program action as specified in CEQ NEPA Regulations. (1502.20, 1508.28)

D. Supplemental Statements.

1. APHIS officials will prepare supplements to an EIS if the program for which it was prepared and approved undergoes significant changes. (7 CFR 3100.28)

2. Supplemental EIS's, when required, will be prepared according to CEQ NEPA Regulations. (1502.9(c))

V. Format

APHIS officials will follow the format recommended in the CEQ NEPA Regulations (1502.10). The cover sheet will conform to the format in Appendix II (1502.11).

VI. Emergency Procedures

Where circumstances require immediate action to prevent spread of exotic or domestic animal or plant diseases or pests, and that action has significant environmental impact, the provisions of section 1506.11 of the CEQ NEPA Regulations will take effect. APHIS officials will notify the Department's Office of Environmental Quality Activities in consulting with CEQ about alternate arrangements.

VII. Public Involvement

A. APHIS officials shall inform and involve the public when (1506.6):

1. substantive changes in programs have significant adverse effects on the human environment;
2. they intend to prepare an EIS and request participation in the scoping process; (1501.7)
3. a draft EIS, final EIS, or finding of no significant impact is available; and

4. the record of decision is available. (1505.2, 1506.1)

B. APHIS officials will maintain distribution lists of interested persons (e.g., Federal, State, and local agencies, interested industry representatives, national and local organizations, and private citizens, etc.). The lists will be amended as additional interested persons are identified. Mailings to those on the distribution list will be made early and at critical stages in the NEPA process where public input is appropriate (7 CFR 3100.29). In addition, APHIS will make timely use of direct verbal contact, meetings, printed materials, news media, public notices and hearings, and any other appropriate means of increasing public participation in evaluating the environmental impact of agency actions.

C. Whenever APHIS officials inform the public in compliance with paragraph A of this section, a specific address where additional material and information may be obtained will be published in whatever informational media is used. General inquiries concerning APHIS environmental activities may be addressed to the Administrator, Animal and Plant Health Inspection Service, USDA, Washington, D.C. 20250.

VIII. Responsibilities

A. The Deputy Administrators are responsible for preparation of EIS's within their respective functional areas.

B. Interdisciplinary work groups have been established in APHIS to review all environmental assessments prepared by APHIS officials. These work groups will make recommendations to the Deputy Administrators concerning the requirements for EIS's. The groups are also responsible for monitoring programs which have been the subject of an EIS to assure that environmental safeguards and planned mitigating factors are followed. In addition, each of these groups will bring to the attention of the appropriate APHIS official any project or program which has not been formally reviewed for environmental impact during the previous five years.

C. APHIS officials conducting field operations are responsible for reporting any unusual environmental conditions to their respective regional directors. If necessary, regional directors will obtain guidance from the responsible APHIS staff officer. Except for emergency situations, the field official should report the unusual condition before taking any action.

IX. Reference Sources for EIS Preparation

Actions taken under these supplemental procedures are subject to the provisions of applicable laws and authorities. The following authorities, directives, and regulations have been published and are the principal reference sources for preparing and processing EIS's:

- A. Section 102(2), National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321-4347).
- B. Executive Order 11514, dated March 5, 1979, as amended by Executive Order 11441, dated July 1, 1970, and as further amended by Executive Order 11991, dated May 24, 1977.
- C. Executive Order 12088, October 13, 1978, Federal Compliance with Pollution Control Standards.
- D. Environmental Protection Agency Regulations on the Preparation of Environmental Impact Statements (40 CFR 6).
- E. CEQ Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act (40 CFR 1500-1508).
- F. Clean Air Act (42 U.S.C. 1857 *et seq.*).
- G. Clean Water Act (33 U.S.C. 1251 *et seq.*).
- H. Solid Waste Disposal Act of 1976 (42 U.S.C. 3251 *et seq.*).
- I. Noise Control Act of 1972 (42 U.S.C. 4901 *et seq.*).
- J. Federal Insecticide, Fungicide, and Rodenticide Act as amended by the Federal Environmental Pesticide Control Act of 1972 (7 U.S.C. 135 *et seq.*).
- K. Secretary's Memorandum No. 1662, Supplement 8, June 28, 1978.
- L. Secretary's Memorandum No. 1695, May 24, 1970, and Supplements.
- M. Safe Drinking Act (42 U.S.C. 300f).
- N. National Historic Preservation Act (16 U.S.C. 4701).
- O. Executive Order 12044, "Improving Government Regulations"; Secretary's Memorandum No. 1955.
- P. Endangered Species Act of 1973, as amended (16 U.S.C. 1531-1543).
- Q. Executive Order 12114, "Environmental Effects Abroad of Major Federal Actions," January 4, 1979.

This notice has been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulations." A determination has been made that this notice should not be classified "significant" under those criteria. A Final Impact Analysis has been prepared and is available from the Office of the Administrator, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Done at Washington, D.C., this 22nd day of August 1979.

James O. Lee, Jr.,
Acting Administrator, Animal and Plant
Health Inspection Service.

(FR Doc. 79-26668 Filed 8-27-79; 8:45 am)

BILLING CODE 3410-34-M

Office of Safety and Health Management

Occupational Safety and Health Program

AGENCY: Department of Agriculture,
Office of Safety and Health
Management.

ACTION: Solicitation of public comment.

SUMMARY: This document seeks public
comment on the Department of
Agriculture's proposed Occupational
Safety and Health Program.

DATES: Comments must be received by
close of business October 1, 1979.

ADDRESS: Comments should be sent to:
U.S. Department of Agriculture, Office of
Safety and Health Management, Room
48-W, 14th and Independence Avenue,
S.W., Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:
Julius C. Jimeno, Director, OSHM, U.S.
Department of Agriculture, 14th and
Independence Avenue, S.W.,
Washington, D.C. 20250, telephone: 202-
447-8247.

SUPPLEMENTARY INFORMATION: The
proposed Occupational Safety and
Health Program responds to the
requirements of Section 19 of the
Occupational Safety and Health Act of
1970, Executive Order 11807, and 29 CFR
Part 1960. A number of resource
documents were reviewed prior to
developing this proposed program. This
resource material included: (1)
Evaluations of the safety and health
program conducted by the Office of
Federal Agency Safety and Health
Programs, Occupational Safety and
Health Administration; (2) safety and
health audits performed by the General
Accounting Office; (3) an evaluation
performed by a USDA task force
appointed by the Assistant Secretary for
Administration; (4) comments made by
the House of Representatives
Subcommittee on Health and Safety;
and (5) a draft proposed new Executive
Order on occupational safety and health
sent by OMB to agencies for review.

A task force was established to
provide guidance in developing this
proposed program. The task force was
composed of USDA safety and health
specialists, representatives of
employees, and high level management
officials. Prior to finalizing this program,

it is believed that although the policies
are internal in nature, comment from the
private sector will be beneficial.
Following public comment, the final
program will be codified in Title 13 of
the USDA Administrative Regulations
and read as follows:

Title 13—Occupational Safety and Health Management

Chapter 1—Occupational Safety and Health Section 1—General

11. *Purpose.* This Title contains the
Occupational Safety and Health Program of
the U.S. Department of Agriculture (USDA).

12. *Authority.* The authority for the USDA
occupational safety and health program is
contained in Section 19 of the Occupational
Safety and Health Act of 1970, Executive
Order 11807, and 29 CFR Part 1960.

13. *Occupational Safety and Health Act of
1970.* Section 19 of the Act contains special
provisions to assure safe and healthful
working conditions for Federal employees.
Pursuant to Section 19, it is the responsibility
of the Agency Head to establish and maintain
an effective and comprehensive occupational
safety and health program which is
consistent with the safety and health
standards promulgated by the Occupational
Safety and Health Administration (OSHA)
pursuant to Section 6 of the Act.

14. *Executive Order 11807.* Section 2 of
Executive Order 11807 defines the
responsibilities and outlines the duties of the
Agency Head for Federal occupational safety
and health programs, including observation
of "guidelines" published by the Secretary of
Labor.

15. *29 CFR Part 1960.* 29 CFR Part 1960 is
the "guidelines" of the Secretary of Labor
and contains the safety and health provisions
which the Agency Head is expected to
observe in establishing and maintaining
occupational safety and health programs for
Federal employees.

16. *Designated Safety and Health Official.*
The Secretary of Agriculture has delegated
the authority of the USDA occupational
safety and health program to the Assistant
Secretary for Administration (7 CFR 2.25.f)
who in turn has delegated the authority for
the occupational safety and health program
to the Director, Office of Safety and Health
Management (7 CFR 2.76). The Assistant
Secretary reserved the authority to exercise
final judgments in all safety and health
matters, including individual cases, that
involve the jurisdiction of more than one
General Officer in USDA.

17. *U.S. Department of Agriculture
Occupational Safety and Health Committee.*
The U.S. Department of Agriculture
Occupational Safety and Health Committee
is established to advise the Assistant
Secretary for Administration in carrying out
the responsibilities of this Title.

A. The committee consists of 12 members
appointed by the Secretary and includes 8
representatives of the Program Assistant
Secretaries and 6 employee representatives
who are full-time employees of USDA.

B. The Assistant Secretary, or a designee,
serves as the Chairperson of the committee

and prescribes rules for the conduct of
business as are necessary and appropriate.

C. The Director, Office of Safety and
Health Management, serves as Secretariat of
the committee.

18. *Explanation for use of terms agency
and agency head.* Use of the term Agency
Head in this section refers to the Head of an
Executive Department, as defined in 5 U.S.C.
101. Use of the term Agency Head beyond
section 1 of this chapter refers to the head of
USDA Agencies and staff offices.

Section 2—Office of Safety and Health Management (OSHM) Responsibilities in Occupational Safety and Health Program Management

21. *Establishment of the Office of Safety
and Health Management (OSHM).*
Secretary's Memorandum 1940 dated March
27, 1978, established OSHM as a staff office
reporting to the Assistant Secretary for
Administration. The establishment of OSHM
resulted in the transfer of the functions of the
Safety Manager, Medical Officer, and Health
Units from the Office of Personnel to OSHM.

22. *Authority.* OSHM is authorized to:
A. Adopt or develop, after consultation
with the Secretary of Labor, occupational
safety and health standards necessary to
comply with Section 19 of the OSH Act of
1970, Executive Order 11807, and 29 CFR Part
1960.

B. Grant waivers, after consultation with
the Secretary of Labor, to USDA agencies for
alternate safety and health standards which
provide equal or greater protection to USDA
employees.

C. Inspect and evaluate, without advance
notice to operating units, any installation
where USDA employees perform official
duties to determine the status of any
reported, alleged, or suspected unsafe/
unhealthful working conditions and issue
reports which include conclusions and
recommendations for action.

D. Evaluate reported acts of discrimination
or reprisal which result from an employee's
participation in the activities of the
Department's or Agency's safety and health
program and issue reports which include
conclusions and recommendations for action.

23. *Responsibilities.* OSHM provides
Department-wide leadership and
coordination of occupational safety and
health programs for USDA by:

A. Assuring that representatives of USDA
employees are consulted or negotiated with
as appropriate in the activities of USDA
occupational safety and health programs,
including but not limited to:

1. Development of safety and health
policies.

2. Development of safety and health
standards.

3. Inspections and evaluations of
installations.

4. Membership on safety and health
committees.

B. Promulgating Department-wide policies
for the uniform development and
implementation of occupational safety and
health programs.

C. Promulgating or adopting, in
consultation with the Secretary of Labor,
occupational safety and health standards

which ensure that USDA employees are
provided safe and healthful working
conditions.

D. Evaluating the occupational safety and
health programs of USDA agencies to
determine compliance with Department
policies and standards and issue reports
which include conclusions and
recommendations for action.

E. Coordinating the delivery of specialized
technical resources to Department agencies
to resolve complex safety and health
problems.

F. Coordinating the development and/or
conduct of human resources development
activities for Agency Heads, safety and
health specialists/managers, and collateral
duty safety and health personnel.

G. Coordinating the development of safety
and health program and procedure manuals
for managers, supervisors, and employees.

H. Coordinating the development and/or
conduct of safety and health training
programs and materials for managers,
supervisors, and employees.

I. Developing and maintaining a Safety and
Health Management Information System
(SHMIS) for gathering, analyzing, and
disseminating information and data on the
causes and extent of job-related injuries,
illnesses, and property damage incidents.

J. Coordinating implementation of
Department-wide promotional programs
generated by OSHA or developed by OSHM.

K. Providing Department-wide liaison of
safety and health activities with the
Department of Labor, Department of Health,
Education and Welfare, Environmental
Protection Agency, Department of Commerce,
Department of Transportation, Office of
Personnel Management, General Services
Administration, and safety and health
components of state and local governments
and universities.

L. Reporting serious incidents as defined in
para. 36B.4 to the Secretary of Labor.

Section 3—Agency Responsibilities in Occupational Safety and Health Management

31. *Purpose.* This section describes the
responsibilities of Agency Officials in the
establishment and implementation of
occupational safety and health programs.

32. *Responsibilities of agency personnel in
establishing and implementing occupational
safety and health programs.* All managers
and supervisors are to be assigned
responsibilities in the establishment and
implementation of occupational safety and
health programs. Each manager and
supervisor is to have safety and health
responsibilities considered in his/her annual
performance appraisal.

A. Agency Heads are to ensure that the
requirements of this Title are implemented in
agency program activities and design safety
and health programs specifically to reduce
the human, financial and productivity losses
due to job-related injury, illness, and property
damage incidents. To ensure the exercise of
this responsibility, each Agency Head shall
designate an Agency Safety and Health
Manager with appropriate subordinate
staffing to develop and manage these
programs (see paragraph 34).

B. Safety and Health Managers are to
develop and implement programs which are
consistent with the requirements of this Title.

C. Management and supervisory officials
are to be evaluated for their effectiveness in
providing employees safe and healthful
working conditions under their jurisdiction.
Managers and supervisors are not to subject
an employee to restraint, interference,
coercion, discrimination, or reprisal by virtue
of employee's participation in the safety and
health program.

D. Employees are to conduct their job
assignments in a safe and healthful manner
and observe all Department and agency
safety and health policies and regulations.
Employees are to report any suspected
unsafe/unhealthful working conditions to
their supervisor for corrective action.

33. *Organization of the safety and health
function.* Agency Heads are to ensure that the
safety and health of their employees are a
fundamental part of all program decisions. To
ensure proper exercise of this responsibility,
Agency Heads are to organize the safety and
health function as a staff entity which has
direct access to all top level agency officials.
Within 60 days of final publication of this
Title, Agency Heads are to submit the
Director, OSHM, the organizational plan for
placement of the safety and health functions
at Headquarters and field locations. The plan
is to identify delegations of authority for the
Agency safety and health manager,
assignment of functions to the safety and
health staff, and the Agency organizational
chart, identifying the safety and health
functions from Headquarters to the field
level. The submission must include the
rationale and justification for the
organization plan.

34. *Staffing for safety and health.* Agency
Heads are to provide appropriate
Headquarters and field staffing to effectively
develop, implement, and evaluate their
occupational safety and health programs.

A. Agencies with 1,500 or more employees
are to employ a full-time qualified safety and
health professional to manage the agency
safety and health program. By "qualified" it
is meant that he/she meets the Office of
Personnel Management's qualification
requirements of the Safety and Health
Management series (GS-018), Safety Engineer
series (GS-803), or Industrial Hygienist series
(GS-690). In addition, agencies are to employ
additional safety and health specialists based
on the agency's mission; size; potential
exposure to hazardous conditions; injury,
illness, property damage experience; and
workers' compensation costs.

B. Agencies with less than 1,500 employees
may assign the safety and health program
responsibilities to an employee on a
collateral duty basis. The employee's annual
performance appraisal must document the
amount of time spent in safety and health
duties, and the employee shall meet either the
Office of Personnel Management's
requirements for the Safety and Health
Management series (GS-018), Safety Engineer
(GS-803), or Industrial Hygienist (GS-690)
series or be provided the training in order to
qualify the individual for their safety and
health management responsibilities within 1
year of the appointment.

35. *Consultation with representatives of
employees.* Agency Heads are to consult or
negotiate as appropriate with employees and
representatives of employees and provide for
employee participation in the operation of the
agency safety and health program.

36. *Minimum requirements for
development of agency safety and health
programs.* Agency safety and health
programs shall be action oriented and geared
to the reduction of human, financial, and
productivity losses due to job-related injuries,
illnesses, and property damage incidents.

A. Investigation of Injury, Illness, and
Property Damage Incidents.

1. All job-related injury, illness, and
property damage incidents are to be
thoroughly investigated by the agency to
identify causes and initiate corrective action.

2. Boards of inquiry are to be established
by the agency to identify the causes of all
serious incidents (see para. 36B.4 for
definition of serious incidents) and to
recommend corrective actions to prevent
similar occurrences. The number of members
and makeup of the board is to be determined
by the Agency Head. A report of the findings
of the board is to be sent to the Director,
OSHM, within 15 days of the adjournment of
the board.

3. OSHM is to be provided with a copy of
the Agency's written plan for determining the
expertise and depth of investigation for all
types of injury, illness, and property damage
occurrences.

B. Reporting of Injury, Illness, and Property
Damage Incidents.

1. The AD-278, "Supervisor's Report of
Accident," is to be used for the collection and
summarization of information for injury,
illness, and property damage incidents.

2. Agencies are to establish review and
routing procedures to ensure that information
collected on the AD-278 is accurate and that
responsible management officials and field
safety and health committees review and
initiate corrective action to prevent similar
occurrences. Completed AD-278's are to be
sent to the processing center within 15
calendar days of the incident. Copies of the
completed form are to be retained by the
originating office for a period of at least 5
years beyond the calendar year of
occurrence.

3. AD-278's are completed whenever: (1) a
"Notice of Traumatic Injury and Claim for
Continuation of Pay/Compensation" (CA-1)
is completed; (2) a "Federal Employee's
Notice of Occupational Disease and Claim for
Compensation" (CA-2) is completed; or (3)
\$100 of property damage results from official
activities of the agency. This includes
accidental damage to property resulting from
fires, materials handling, etc., even though no
injury or illness occurred.

4. Serious incidents are to be reported
immediately by telephone or telegraph to
OSHM whenever there is: (1) an employee
fatality; (2) hospitalization of five or more
employees; and/or (3) \$100,000 or more
property damage (Government or private). A
followup written report shall be forwarded to
OSHM within 24 hours of notice and shall
include: (1) date of accident; (2) names of
persons involved; (3) location of accident; (4)
extent of injury or illness; (5) brief narrative

explaining how it happened; (6) type of investigation being conducted; (7) corrective actions taken; and (8) amount of property damaged. Agencies are also to report serious incidents involving non-Federal employees in the performance of agency official duties.

C. Data Analysis. Agencies are to regularly analyze data produced by the Safety and Health Management Information System (SHMIS) in order to:

1. Establish necessary management initiatives to reduce or eliminate the causes of injury, illness, or property damage incidents;
2. Determine the need for onsite safety and health inspections;
3. Establish training priorities; and
4. Allocate human and financial resources for safety and health program.

D. Safety and Health Committees.

1. Agencies are to establish a safety and health committee at the Headquarters level and include representation of employees. The committee is to advise the Agency Head in carrying out his/her responsibilities and review and evaluate the effectiveness of the agency safety and health activities. The chairperson of the committee is to submit minutes of its meetings to the Agency Head and the Director, OSHM.

2. Agencies are to establish field safety and health committees and include representation from management and employees. The field committees review safety and health inspection reports; report of findings for serious incidents; injury, illness, and property damage statistics; and safety and health management activities. The committees are to recommend preventive activities such as, but not limited to, the following:

a. Discussing safety and health information at staff meetings and developing training activities.

b. Developing awareness programs to reduce high injury, illness, and property damage losses.

c. Developing safety and health policy recommendations and evaluating effectiveness of operating policies.

3. Existing interagency committees at the state and local levels (e.g. state administrative or county administrative committees) should be utilized to address safety and health issues where this approach is most practical (e.g. for collocated offices).

E. Safety and Health Promotion.

1. Agencies are to establish a variety of methods of promoting safety and health awareness to all employees. These programs ensure that employees are aware of (a) the extent and causes of occupational injury, illnesses, and property damage incidents which are occurring in their work units, (b) procedures for requesting workplace inspections and reporting suspected safety and health hazards, (c) procedures for employee involvement in activities of agency safety and health programs, and (d) agency and Department procedures for conducting inspections and reporting/investigating injury, illness, and property damage incidents.

2. Agencies that develop safety and health awards programs are to have these programs approved by the Office of Personnel as required by Department Personnel Manual Chapter 451.

3. Agencies are to post and keep posted a notice informing employees of the protections and obligations provided for in the OSHA Act of 1970, Executive Order 11807, as well as the Department and agency safety and health programs. Posters supplied by the Department of Labor may be used to accomplish this requirement. The poster is to identify, by name and title, the agency's designated safety and health official and the safety and health coordinator for that unit.

F. Safety and Health Training.

1. Managers, supervisors, and employees are to be provided education and training activities which ensure that every employee:

- a. Can demonstrate an understanding of the operation and requirements of the Department and agency's safety and health programs.

b. Possess the skills necessary to carry out his/her responsibilities in effective management of agencies safety and health programs.

2. Collateral duty personnel and employee representatives are to be provided specialized education and training activities which ensure that they possess the skills to manage or participate in the following activities:

a. Organizing and participating in safety and health committees.

b. Scheduling, conducting, and documenting safety and health inspections.

c. Conducting investigations and documenting causes of injury, illness, and property damage incidents.

d. Developing safety and health information materials to keep employees aware of safety and health problems in their job activities.

e. Initiating corrective action for identified safety and health hazards.

f. Utilizing community resources for safety and health program activities.

G. Safety and Health Inspections.

1. Agencies are to conduct annual safety and health inspections of all its facilities and equipment. The frequency, depth of inspection, and technical expertise required for inspections of facilities and equipment is to be determined by the nature of the operation; potential and incidence of injury/illness; equipment and machinery used; and the potential exposure to toxic substances.

2. Agencies are to develop and submit to OSHM within 60 days of final publication of this Title a Safety and Health Inspection Plan which includes the following features:

a. Criteria used to determine the frequency and scheduling of inspections (announced and unannounced).

b. Technical competence and/or training of individuals who conduct inspections of high hazard operations.

c. Participation of representatives of employees in inspection activities.

d. Abatement procedures used to initiate corrective action in (i) agency-owned facilities, (ii) CSA-managed buildings, (iii) leased buildings and facilities, and (iv) private industry facilities.

e. Method of documenting the results of safety and health inspections.

f. Employees' rights to request inspection of unsafe and unhealthy working conditions.

g. Review and approval procedures of all new space and renovation projects prior to acquisition or occupancy.

h. Means to notify employees of identified safety and health hazards in their workplace.

i. Evacuating employees from facilities where imminent dangers are identified.

H. Safety and Health Standards.

1. The Department of Labor's occupational safety and health standards, as promulgated under Section 6 of the OSHA Act, are the U.S. Department of Agriculture standards. These standards are published in Title 29, Chapter XVII, Parts 1910 (Occupational Safety and Health Standards); 1925 (Safety and Health Standards for Federal Service Contracts); 1926 (Safety and Health Regulations for Construction); and 1928 (Safety and Health Standards for Agriculture).

2. Agencies may request to adopt an alternate standard that provides equal or greater protection than the applicable OSHA standard. A request for a waiver from the applicable OSHA standard is to be made in writing to the Director, OSHM. The request is to include a justification for the waiver along with the agency's proposed plan to provide safety and health protection to employees that equals or exceeds the OSHA standard. The Director, OSHM, in consultation with OSHA officials, will determine if the proposed waiver provides an acceptable level of safety and health for employees.

3. Special work situations within agencies may be outside the scope of existing or future OSHA standards. In these cases, Agency Heads will develop specific agency-wide standards which are consistent with the OSH Act requirements. Proposed standards are to be submitted to the Director, OSHM, for concurrence prior to adoption by the agency. The Director, OSHM, in consultation with OSHA officials, will determine if an adequate level of safety and health for employees is provided by the standard. Whenever an approved supplemental standard is applicable to more than one agency, it will be considered for approval as a Department-wide standard.

4. Agencies that identify conflicts in application of safety and health standards are to submit a description of these conflicts to the Director, OSHM, for interpretation and resolution.

5. Agencies may adopt such emergency standards as necessary for the safety and health of employees. The Director, OSHM, shall be notified immediately of the adoption of that standard. Emergency standards adopted by OSHA or OSHM on the same subject shall replace the agency emergency standard.

1. Field Federal Safety and Health Councils.

1. Agencies are to encourage all field safety and health specialists and collateral duty safety and health officers to support the activities of their local Field Federal Safety and Health Council.

2. Agencies are to provide representatives of agency employees the opportunity to participate in the activities of the Field Federal Safety and Health Council.

37. Responsibilities of agency heads in evaluating the effectiveness of their occupational safety and health programs. Agency Heads are to evaluate the

effectiveness of their occupational safety and health programs in field locations. Agency Heads are to submit a written report of each field evaluation to OSHM within 30 days of the evaluation visit.

38. Responsibilities of agency heads in reporting the status of their occupational safety and health programs. Agency Heads are to report to the Director, OSHM, by February 1 of each year the status of the agency's development and implementation of each requirement in Section 3, Chapter 1, Title 13, of the USDA Administrative Regulations.

Julius C. Jimeno,

Director, Office of Safety and Health Management.

BILLING CODE 3410-72-M

Rural Electrification Administration

Cajun Electric Power Cooperative, Inc.; New Roads, La.; Proposed Loan Guarantee

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 20-22 (Guarantee of Loans for Bulk Power Supply Facilities), notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the amount of \$452,000,000 to Cajun Electric Power Cooperative, Inc., of New Roads, Louisiana. These loan funds will be used to finance the construction of a 540 MW coal-fired steam electric generating unit.

Legally organized lending agencies capable of making, holding, and servicing the loan proposed to be guaranteed may obtain information on the proposed project, including engineering and economic feasibility studies and proposed schedule for the advances to the borrower of guaranteed loan funds from Mr. James R. Smith, Manager, Cajun Electric Power Cooperative, Inc., P. O. Box 578, New Roads, Louisiana 70760.

In order to be considered, proposals must be submitted (on or before September 27, 1979) to Mr. Smith. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received as Cajun and REA deem appropriate. Prospective lenders are advised that the guaranteed financing for this project is available from the Federal Financing Bank under a standing agreement with the Rural Electrification Administration.

Copies of REA Bulletin 20-22 are available from the Director, Information Services Division, Rural Electrification

Administration, Washington, D. C. 20250.

Dated at Washington, D.C., this 20 day of August, 1979.

Robert W. Feragen,

Administrator, Rural Electrification Administration.

Science and Education Administration

Committee of Nine; Meeting

In accordance with the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Science and Education Administration, Cooperative Research, announces the following meeting:

Name: Committee of Nine.

Dates: September 11 and 12, 1979.

Time: 8:30 a.m., both days.

Place: Conference Room, Baileys Harbor Yacht Club, Baileys Harbor, Wisconsin.

Type of Meeting: Open to the public. Persons may participate in the meeting as time and space permit.

Comments: The public may file written comments before or after the meeting with the contact person listed below.

Purpose: To evaluate and recommend proposals for cooperative research on problems that concern agriculture in two or more States, and to make recommendations for allocation of regional research funds appropriated by Congress under the Hatch Act for research at the State agricultural experiment stations. Contact Person, for Agenda and More Information: Dr. Estel H. Cobb, Recording Secretary, U.S. Department of Agriculture, Science and Education Administration, Cooperative Research, Washington, D.C. 20250, telephone: 202/447-4329.

Done at Washington, D.C., this 23rd day of August, 1979.

John D. Sullivan,

Acting Deputy Director for Cooperative Research.

BILLING CODE 3410-22-M

Soil Conservation Service

Construction Area 1 of Upper Tri-County Watershed, Arkansas; Intent Not To Prepare an Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for Construction Area 1 of the Upper Tri-County Watershed

Project in Sharp, Lawrence, and Independence Counties, Arkansas.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. M. J. Spears, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan to reduce flooding and provide for watershed protection within Construction Area 1 of the Upper Tri-County Watershed. This construction area encompasses a 16,077-acre subwatershed of the 95,694-acre Upper Tri-County Watershed. Planned works of improvement include three floodwater retarding structures and technical assistance for accelerated application of land treatment measures. The Upper Tri-County Watershed project was approved for operations on August 27, 1969.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, 5029 Federal Building, 700 West Capitol, Little Rock, Arkansas. All inquiries should be addressed to M. J. Spears, State Conservationist, Soil Conservation Service, P.O. Box 2323, Little Rock, Arkansas 72203; 501-378-5445. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication (September 27, 1979).

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program—Public Law 83-566, 16 U.S.C. 1001-1006.)

Joseph W. Haas,

Assistant Administrator for Water Resources, Soil Conservation Service.

[FR Doc. 79-26701 Filed 8-27-79; 8:45 am]
BILLING CODE 3410-16-M

Buffalo Creek Watershed, Ohio; Intent Not To File an Environmental Impact Statement for Deauthorization of Federal Funding

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of

1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the deauthorization of Federal funding of the Buffalo Creek Watershed, Guernsey and Noble Counties, Ohio.

The environmental assessment of this action indicates that deauthorization of Federal funding of the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Clifton A. Maguire, Acting State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this action.

Project deauthorization involves not constructing any of the structural measures which included three reservoirs, one with multipurpose uses, and 8.7 miles of channel work. The municipal water supply included in dam 1 is not crucial since the village of Sarahsville has piped water in form another source. Three hundred acres of cropland and 29 acres of woodland will not be disrupted by project construction. Two thousand and thirty-four acres of flood plain and about 400 individuals will not receive the benefits of reduced flooding. The estimated project costs would have exceeded benefits.

The notice of intent not to file an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Clifton A. Maguire, Acting State Conservationist, Soil Conservation Service, 200 North High Street, Columbus, Ohio 43215, telephone number 614-489-6932. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until 60 days after the date of this publication in the Federal Register (October 29, 1979).

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program—Public Law 83-566, 16 U.S.C. 1001-1008.)

Dated: August 21, 1979.

Joseph W. Haas,
Assistant Administrator for Water Resources,
Soil Conservation Service.

CIVIL AERONAUTICS BOARD

[Docket 34242]

Florida Airlines, Inc. Fitness Investigation; Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that the hearing in the above-entitled proceeding presently scheduled to be held on September 16, 1979, is hereby postponed to September 20, 1979, at 10:00 a.m. (local time) in Room 1003, Hearing Room D, Universal Building North, 1875 Connecticut Avenue NW., Washington, D.C., before the undersigned Administrative Law Judge.

For details of the issues involved in this proceeding, interested persons are referred to the Prehearing Conference Report, served on July 26, 1979, and other documents which are in the docket of this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C., August 22, 1979.

William H. Dapper,
Administrative Law Judge.

BILLING CODE 3510-07-M

Industry and Trade Administration

NYS Department of Health, et al.; Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before September 17, 1979.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments. A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 735 at 666-11th Street N.W., Washington, D.C.

Docket number: 79-00349. Applicant: NYS Department of Health, Division of Laboratories and Research, Empire State Plaza, Albany, NY 12201. Article: MS 5074/DS55 Gas Chromatographic/Mass Spectrometer Data System and Accessories. Manufacturer: Kratos Inc., United Kingdom. Intended use of article: The article is intended to be used in a variety of projects ranging from research

and development of new methods for health related compound identification to the application of some of these methods in identifying eminent biological and environmental agents threatening the health of many residents in New York State. The capabilities of the article will support research in:

1. Developing new methods of organic extraction and concentrations in the presence of interferences such as PCB.
2. Toxicologic and metabolic studies of ingestion of various tetrachlorodioxin isomers (22 isomers of varying toxicity) by mammals.
3. Identification of other dioxin isomers with one to eight chlorines, which are now overlooked.
4. Development of new mass spectrometry techniques to increase the sensitivity and specificity of the MS5074. These will include negative ion chemical ionization, and secondary ion decomposition.
5. Detection of tetrachlorodibenzofuran which has tentatively been identified in fish in the Hudson River.
6. Analysis of N-alkyl nitrosamines in vaginal fluids using both capillary column chromatography and high resolving power.
7. Metastable ion analysis of polynucleararomatics.
8. Computer acquisition of metastable spectra and matrix identification mixtures.
9. Peptide sequencing.

Application received by Commissioner of Customs: July 13, 1979.

Docket number: 79-00350. Applicant: Southern Illinois University—Edwardsville, Edwardsville, IL 62026. Article: JNM/FX-90Q(II) High Resolution Fourier Transformation Multi-Nuclear Magnetic Resonance Spectrometer System and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article will be used in studies entitled:

1. The Structure of Metal—Chelating Glycopeptide Antibiotics (^1H , ^{13}C , ^{55}Mn)
2. The Role of Metal Ions in the Structure and Function of Plant Lectins, (^1H , ^{13}C , ^{15}N , ^{19}F , ^{31}P).
3. The Chemistry of Natural Bithienyl Acetylenes. (^1H , ^{13}C).
4. The Chemistry of Strained-Ring Heterocycles (^1H , ^{13}C , ^{19}F , ^{15}N , ^{17}O).
5. Interpretation of Host-Guest Interactions in Macrocylic O and N Bridged Compounds (^1H , ^{13}C , ^{23}Na , ^7Li , ^{17}O , ^{15}N) which will require the determination of the molecular structure or conformational states of synthetic and natural organic molecules, metal sites of metallobiopolymers, and metal complexing materials will be sought from NMR data. In addition, the projects intend to seek information on the dynamics of conformational interchange processes, metal-ligand exchange rates, and metal-protein interactions, and some thermodynamic and structural information will be obtained in the course of the experimentation.

Application received by Commissioner of Customs: July 13, 1979.

Docket number: 79-00351. Applicant: University of North Dakota School of Medicine, Department of Anatomy, Grand Forks, North Dakota 58202. Article: Electron Microscope, Model JEM 100S and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The foreign article will be used for studying the ultrastructure of biological specimens to include, in part: (1) developing retina and choroid (ocular tissues), (2) brain (development, trace element deficiencies and retrograde degeneration), (3) subarachnoid space, (4) cardiac muscle, (5) tissues within regenerating limbs, (6) reproductive tract, (7) connective tissues and (8) biopsies of pathological tissues. Some experiments to be conducted involve the ultrastructural characterization of these biological specimens in normal health, under experimental conditions and during disease. The foreign article will also be used in training 12 to 16 graduate students in the basic medical sciences in the techniques of conventional transmission electron microscopy. Application received by Commissioner of Customs: July 13, 1979.

Docket number: 79-00354. Applicant: New Mexico Institute of Mining and Technology, Campus Station, Socorro, NM 87801. Article: TH 600 Fluid Inclusion Heating Stage and Control Unit. Manufacturer: Linkam Scientific Instruments, United Kingdom. Intended use of article: The foreign article will be used for microscopic study of fluid inclusions which may yield the temperature of the mineral depositing fluids, the pressure (or depth) at which deposition occurred and some knowledge of the chemistry of the depositing fluids. Fluid inclusion studies will also be used to study hydrothermal ore deposits and metamorphic rocks to determine temperature and pressure during metamorphism. The foreign article will also be used for the education of graduate students in ore deposits in their thesis research. Application received by Commissioner of Customs: July 13, 1979.

Docket number: 79-00355. Applicant: University of Texas Medical Branch, UMB 9-12970, Galveston, TX 77550. Article: LKB 2088 Ultratome V Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The foreign article is intended to be used for the following:

- (1) Studies on *pathologic human tissues* where it is expected that *softer tissues* (such as renal or striated muscle) as well as *harder tissues* (such as collagen-rich tendon or epidermis) will be encountered frequently.
- (2) Studies on *normal and pathologic animal tissues* which include, for example,

experimental identification, localization, and modification of the surface charge present in the capillary loops of rat kidney glomeruli, and

(3) Studies on *host-parasite interfaces* which include, for example, the progressive (in time) examination of schistosome egg maturation in liver tissue of host animals. Host animals bearing infections of known age will be periodically sacrificed and areas of suspected parasite infestation located, dissected, and prepared for various assays, including electron microscopic examination.

The objectives are to contribute to basic knowledge of cell and tissue ultrastructure in normal and pathologic tissues. One objective is to reveal what, if any, diagnostic correlates exist between light and electron microscopic examination of pathologic tissues. Moreover, the study of host-parasite interactions will reveal at the ultrastructural level morphological alterations in cellular and subcellular components as a result of parasite infestation. The objective pursued in the course of these investigations is to understand early pathological alterations in tissues (as induced in animal models) and to correlate these changes with clinical alterations seen in human pathologic tissues. By understanding early alterations we may begin to formulate preventative treatments in human diseases. The foreign article will also be used in the residency training program offered by the Pathology Department and in the graduate training program of the School of Biomedical Sciences wherein the residents and graduate students will be taught techniques of electron microscopy. Application received by Commissioner of Customs: July 13, 1979.

Docket number: 79-00358. Applicant: Johns Hopkins University, Charles and 34th Streets, Baltimore, MD. 21218. Article: Electron Microscope, Model JEM-100CX (Standard Side Entry Type) and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The foreign article will be used in studies of the structures of naturally occurring cells, tissues, cell organelles, macromolecules, macromolecular assemblies, and viruses which are isolated by cell fractionation and biochemical purification to relate the molecular architecture of biological specimens to their function. The foreign article will also be used for education in a course entitled "Optical Methods in Biology" and in students' thesis research. Application received by Commissioner of Customs: July 27, 1979.

Docket number: 79-00357. Applicant: The Johns Hopkins University, The Good Samaritan Hospital, Section of Orthopaedics, Charles and 31st Streets, Baltimore, Md. 21218. Article:

Microtome, Model 1140 and Accessories. Manufacturer: Waldemar Jung GmbH, West Germany. Intended use of article: The foreign article will be used in research to study cellular detail and micro vasculature of bone altered by experimentally produced ischemia on dog models. Application received by Commissioner of Customs: July 27, 1979.

Docket number: 79-00358. Applicant: Hospital for Joint Diseases—Orthopaedic Institute, 301 East 17th Street, New York, New York 10003. Article: Electron Microscope, Model JEM-100CX (Standard Side Entry Type) and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The foreign article is intended to be used to study human cells and tissues of skeletomuscular diseases including soft tissue, cartilage, bone and other related tissues such as blood cells and bone marrow. Ultrastructural studies of benign and neoplastic conditions of the skeletomuscular system from both human and animal specimens are included. Investigation of the morphological characteristics of the musculoskeletal tissues in different diseases of humans at the ultrastructural level, as well as comparative studies of normal tissue, will be undertaken. The foreign article will also be used in education to train pathology residents, fellows, and medical students in tissue evaluation in Pathology. Application received by Commissioner of Customs: July 27, 1979.

Docket number: 79-00359. Applicant: The Research Foundation of SUNY, Upstate Medical Center, 117 Monroe Street, Syracuse, NY 13210. Article: Cryogenic Probe. Manufacturer: Louis Rochon, France. Intended use of article: The article is intended to be used to explore systems of the brain that are related to the temporal lobe with animals trained on tasks that are used as measures of memory and that are sensitive to temporal lobe injury. An independent variable will be the different brain structures in which reversible lesions are placed by localized cooling. Application received by Commissioner of Customs: July 27, 1979.

Docket number: 79-00360. Applicant: The University of Texas Health Science Center at San Antonio, Department of Anatomy, 7703 Floyd Curl Drive, San Antonio, Texas 78284. Article: Cryoultramicrotome System, Complete; Consisting of Ultramicrotome, LKB 2088 Ultratome V, CryoKit, LKB 14800-1, Cryotools, LKB 14860-1. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to study all kinds of tissue and

cells of interest to individual investigators. The morphology and elemental content and elemental distribution of the natural substances in the tissues will also be studied. Experiments will be conducted to prepare tissue and preserve its natural morphology and elemental content in order to subsequently be able to investigate the tissue using the technique of electron probe X-ray microanalysis. In addition, the article will be used as a teaching tool for specimen preparation in a graduate course (Anatomy 60385, X-ray Microanalysis, 3 semester hours credit). Application received by Commissioner of Customs: July 27, 1979.

Docket number: 79-00361. Applicant: University of Florida, College of Pharmacy, Box J-4, J. Hillis Miller Health Center, Gainesville, FL 32610. Article: JASCO Model MCD-1B electromagnet with power supply and Accessories. Manufacturer: JASCO, Japan. Intended use of article: The foreign article is intended to be used in two main areas (a) development of the magnetic circular dichroism technique as an analytical tool and (b) to understand drug macromolecule interactions. A variety of drugs alone and in conjunction with albumin, nucleic acid and other macromolecules will be examined. Application received by Commissioner of Customs: July 27, 1979.

Docket number: 79-00362. Applicant: University of California—Lawrence Livermore Laboratory, P.O. Box 5012, Livermore, CA 94550. Article: Imacon Model 790 Streaking and Framing Camera with extra large S-20 Photocathode and Accessories. Manufacturer: John Hadland, United Kingdom. Intended use of article: The article is intended to be used for interferometric measurements of free surface velocity of shocked surfaces, fast multiframe photography of rapid events studied in surface fluff ejection, and high-speed intensified flash X-ray diagnostics. Experiments will be conducted to measure the thermodynamic properties of materials under shock-loading conditions, and to measure very high time resolution velocity histories and surface qualities under high magnification. In addition, the article will be used to understand more fully the thermodynamic properties of matter at high pressure and temperature. Application received by Commissioner of Customs: July 27, 1979.

Docket number: 79-00363. Applicant: University of Delaware, Evans Hall, Room 229, Newark, Delaware 19711. Article: Electron Microscope, Model EM 400 HTG and Accessories.

Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for studies of a wide variety of metals, ceramics, polymers and marine organisms. All of the experiments to be conducted can be classified into one or more of the following types:

(1) Production of images and analyses of the internal or surface defect structure of metals, ceramics, and polymers.

(2) Normal and micro electron diffraction analyses of the constituents of metallic alloys, ceramics and polymers.

(3) Examination and photographic recording of tissue sections from marine organisms, both normal and experimentally altered.

(4) Microanalysis of constituents of metallic alloys, ceramics, polymers, and shells from marine organisms.

The article will also be used for educational purposes in the courses Metallurgy 302 Material Science for Engineers, Metallurgy 401 Structure of Materials, and Metallurgy 801 Diffraction of Radiation by Matter. Application received by Commissioner of Customs: July 27, 1979.

BILLING CODE 3510-25-M

University of Houston; Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket number: 79-00216. Applicant: University of Houston, 4800 Calhoun, Houston, TX 77004. Article: 12kW RU-200 Constant Potential Rotating Anode X-Ray Generator and Accessories. Manufacturer: Rigaku Corp., Japan. Intended use of article: the article is intended to be used for the study of atomic arrangements in metals, semiconductors and insulators in order to understand the relation of structure to properties. The article provides a very high intensity source of x-rays incident upon weakly scattering materials. The article will also be used for individual

graduate instruction in x-ray methods. Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a high power (12 kilowatts) high intensity source. The National Bureau of Standards advises in its memorandum dated July 24, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Docket number: 79-00217. Applicant: Dept. of Health, Education, and Welfare—National Institutes of Health, National Cancer Institute, Division of Cancer Biology and Diagnosis, Building 31, Room 3A-05, Bethesda, Maryland 20014. Article: Accessories for Small Animal Irradiator consisting of Gammacell-40 Sample Cavity Collimator, Set of 3 Attenuators and Sample Drawer Tray. Manufacturer: Atomic Energy of Canada Ltd., Canada. Intended use of article: the article is intended to be used for investigation of immunologic functions of various types from the administration of relatively low doses (200-300 rads) which permits the

transplantation of foreign neoplasms to lethal doses in the 800-900 rad range followed by the transplantation of hematopoietic cells. Since the hematopoietic system is relatively sensitive to ionizing irradiation, animals may be rendered deficient in certain types of cells by exposure to lethal irradiation and replacement of only the desired hematopoietic cell types, e.g., immunologists study various functions of the immune systems by producing T-cell or B-cell deficient animals. Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The application relates to accessories for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes. The National Bureau of Standards (NBS) advises in its memorandum dated July 26, 1979 that it knows of no domestic instrument of equivalent scientific value to the article for its intended uses. The Department of Commerce knows of no other similar accessories being manufactured in the United States, which are interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

BILLING CODE 3510-25-M

Louisiana State University; Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00050. Applicant: Louisiana State University, Institute for Environmental Studies, 42 Atkinson Hall, Baton Rouge, LA 70803. Article:

Triaxial Equipment, Oedometer with swelling attachment, Electric unconfined apparatus, and Lab. Penetrometer. Manufacturer: Geonor, Norway. Intended use of article: The foreign article is intended to be used in the investigation of geotechnical parameters such as density, residual stress and stress history, existence of discontinuities, temperature, time etc. requiring drained or undrained triaxial, direct shear, and consolidation tests for in situ methods evaluation on borings, standard penetration, core penetration, vane shear and pressuremeter to investigate the utility of Gulf Coast Salt Domes for the storage or disposal of radioactive wastes.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a combination of swell potential capability, self-recording, penetrometer capability and slow testing speeds (from 2 to 8 hours per strain rate test and up to 8 hours per shearing test). The National Bureau of Standards advises in its memorandum dated June 15, 1979 that (1) combination of the capabilities of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

National Radio Astronomy Observatory—Tucson; Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No.: 79-00223. Applicant: National Radio Astronomy Observatory, Associated Universities, Inc., 2010 N. Forbes Blvds., Suite 100, Tucson, AZ 85705. Article: Repair of Klystron Model VRB2113A30 and Accessories. Manufacturer: Varian Associates of Canada Ltd., Canada. Intended use of article: The article is intended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver. The receiver is used in conjunction with a microwave antenna to measure the intensity, polarization, frequency and direction of cosmic radiation.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a frequency in the range between 80-110 gigahertz. The National Bureau of Standards (NBS) advises in its memorandum dated July 25, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

National Aeronautics and Space Administration; Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00162. Applicant: National Aeronautics and Space Administration, Langley Research Center, Mail Stop 267, Hampton, Virginia 23655. Article: Air to Water Cross Flow Heat Exchanger. Manufacturer: GEA Luftkühlergesellschaft Happel GmbH and Co., West Germany. Intended use of article: The article is intended to be used in the national Transonic Facility (NTF) for the study of High Reynolds Number Aerodynamic phenomena as related to defense and commercial aircraft.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a low turbulence level of 2.6 percent in existing gas (dry air or nitrogen) using its elliptically shaped tubes. The National Bureau of Standards advises in its memorandum dated July 11, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration; Modification of Marine Mammals Permit

Notice is hereby given that, pursuant to the provisions of Sections 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Public Display Permit No. 227 issued to Mystic Marineland Aquarium on March 28, 1978, is modified in the following manner:

Section B is modified by deleting Section B-8 and substituting therefor the following: "8. This Permit is valid with respect to the taking authorized herein until December 31, 1981."

This modification is effective on the date of publication of this Notice in the Federal Register.

The permit, as modified, and documentation pertaining to the modification is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930; Regional Director, National Marine Fisheries Service, Northwest Region, 1700 Westlake Avenue North, Seattle, Washington 98109; and Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99802.

Dated: August 21, 1979.

Winfred H. Meibohm,
Associate Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Correction of Notice of Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Federal Register notices of August 17, 1979, found on pages 48313-48314, announcing public meetings on the Mollusk Fishery Management Plan and Deep-Water Reef Fishes Fishery Management Plan should be amended to reflect that they are being conducted as "scoping meetings" under NEPA and satisfy the Notice of Intent to Prepare Environmental Impact Statements. Work plans, as indicated, will be prepared as a result of the scoping meeting.

EFFECTIVE DATE: This correction is effective August 23, 1979.

FOR FURTHER INFORMATION CONTACT: Caribbean Fishery Management Council, Suite 1108, Banco de Ponce Building, Hato Rey, Puerto Rico 00918, Telephone: (809) 753-4926.

Signed at Washington, D.C., this 23rd day of August 1979.

Winfred H. Meibohm,
Executive Director, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Department of the Army

Chief of Engineers Environmental Advisory Board; Open Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the next meeting of the Environmental Advisory Board (EAB) of the Chief of Engineers will be held September 19-20, 1979 in the Commonwealth Room, (Center) of the Olde Colony Motor Lodge at the corner of North Washington and First Streets, Alexandria, Virginia 22313. All 19-20 September sessions of the meeting are open to the public. Time and subjects of each session follow:

P.M. Session, 19 September

1330-1350 hours—Opening remarks.
1350-1420 hours—Review of corps plan formulation process.
1420-1435 hours—Discussion.
1435-1535 hours—The integration of environmental considerations in the plan formulation and decisionmaking process.
1550-1630 hours—Discussion.
1630-1645 hours—Summary of discussion.
1645 hours—Meeting adjourned.

A.M. Session, 20 September

0830 hours—Meeting reconvenes.
0830-1130 hours—Previous day's discussion continued.

P.M. Session

1300-1500 hours—Workshop to draft conclusions and recommendations.
1515-1600 hours—Workshop to scope future meetings
1600 hours—Meeting adjourns.

Seating in the meeting room is limited to approximately 20 persons. Written statements, to be made part of the minutes, may be submitted prior to, or up to 10 days following, the meeting. Persons planning to attend or desiring further information should contact LTC George F. Boone, Assistant Director of Civil Works, Environmental Programs, Office of the Chief of Engineers, telephone 202 272-0103.

By authority of the Secretary of the Army.
Dated: August 22, 1979.

George A. Bailey,
Colonel, U.S. Army, Director, Administrative Management, TAGCEN.

[FR Doc. 79-26643 Filed 8-27-79; 8:45 am]

BILLING CODE 3710-08-M

Coastal Engineering Research Board; Open Meeting

Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Coastal Engineering Research Board to be held on 25-27 September 1979.

The meeting will be held in the President's Room, University Towers Hotel, 4507 Brooklyn, NE., Seattle, Washington, from 0800 hours to 1430 hours on 25 September 1979 and from 0800 hours to 1200 hours on 27 September 1979. The entire day of 26 September will be devoted to an aerial inspection of various projects in the North Pacific Division.

The 25 September session will be devoted to a report on action items from previous meeting; Status Report on the Field Research Facility, Duck, N.C.; Wave Data Collection Program on the West Coast; Navigation Channel Design; the Danish Hydraulic Institute Agreement; presentations on projects in the North Pacific Division; and North Pacific Division Research Needs.

The 27 September session will be devoted to CERB discussion of the field inspection trip; CERB's FY 80, 81, and 82 Budget; the Field Monitoring Program; the West Coast Ecological Program; Status of Civil Works; and CERB recommendations.

Participation by the public is scheduled for 0810 to 0840 hours on 27 September. The meeting will be open to the public subject to the following limitations:

a. As the seating capacity of the conference room is limited, it is desired

that advance notice of intent to attend be provided. This will assure adequate and appropriate arrangements for all attendants.

b. Written statements, to be made a part of the minutes, may be submitted prior to, or up to 30 days following the meeting, but oral participation by the public is limited because of the time schedule. Inquiries may be addressed to Colonel Ted E. Bishop, Executive Secretary, U.S. Army Coastal Engineering Research Board, Kingman Building, Fort Belvoir, Virginia 22060, telephone (202) 325-7000.

By Authority of the Secretary of the Army.

Dated: August 23, 1979.

George A. Bailey,
Colonel, U.S. Army, Director, Administrative Management, TAGCEN.

BILLING CODE 3710-06-M

Military Traffic Management Command

Military Personal Property Symposium; Open Meeting

Announcement is made of a meeting of the Military Personal Property Symposium. This meeting will be held on 27 September 1979 at the Ramada Inn, 1-395 and Seminary Road East, Alexandria, VA, and will convene at 0900 hours and adjourn at approximately 1500 hours.

PROPOSED AGENDA: The purpose of the Symposium is to provide an open discussion and free exchange of ideas with the public on procedural changes to the Personal Property Traffic Management Regulation (DOD 4500.34-R), and the handling of other matters of mutual interest relating to the movement and/or storage of household goods and unaccompanied baggage, as well as proposed changes and innovations in the Department of Defense Personal Property Movement and Storage Program.

All interested persons desiring to submit topics to be discussed should submit them in writing to the Commander, Military Traffic Management Command, ATTN: MT-PPM, Washington, DC 20315. Topics to be discussed should be received on or before 20 September 1979.

Dated: August 23, 1979.

John J. Durant,
Colonel, GS, Director of Personal Property.

[FR Doc. 79-28642 Filed 8-27-79; 8:45 am]

BILLING CODE 3710-06-M

Corps of Engineers

Intent to Prepare a Draft Environmental Impact Statement (DEIS) for Proposed Flood Control and Related Water Resource Problems as Part of the Sacramento-San Joaquin Delta Investigation in Alameda, Contra Costa, Sacramento, San Joaquin, Solano, and Yolo Counties, California.

AGENCY: U.S. Army Corps of Engineers, Department of Defense.

ACTION: Notice of Intent to prepare a draft environmental impact statement (DEIS).

SUMMARY: 1. *Proposed Action.*—At the request of the State of California and in response to resolutions of the Congress of the United States, the Corps of Engineers and the California Department of Water Resources are jointly investigating the feasibility of providing flood control, recreation facilities, and water quality improvement in the Sacramento-San Joaquin River Delta.

2. *Alternatives.*—Alternatives being considered include: no action, non-structural measures, and structural measures. The structural measures consist of: Rehabilitation of individual island levees, construction of master levees (polders), construction of downstream barriers, and construction of upstream dams. Each structural measure is being further evaluated at three levels of flood protection and two levels of levee freeboard. Three levels of recreation development are being evaluated for each flood control plan.

3. *Scoping of the DEIS.*—All interested parties are being invited to participate in a public meeting and scoping conference to be held at 7:30 p.m. on August 30, 1979 in the South Hall, Civic Memorial Auditorium, Civic Center, Fremont and Center Streets, Stockton, California. The purpose of the meeting is to present the alternatives under investigation and to identify significant environmental concerns to be presented in detail in the environmental impact statement and less significant issues to be presented in less detail.

4. *Estimated Date of DEIS.*—A DEIS is expected to be circulated for public review in August 1980.

ADDRESS: Questions about the proposed action and DEIS can be answered by Mr. Ray Williams, Planning Engineer, Sacramento District, Corps of Engineers, 650 Capitol Mall, Sacramento, CA 95814, telephone (916) 440-3429 (FTS-448-3429).

Dated: August 16, 1979.

Paul F. Kavanaugh,

Colonel, CE District Engineer.

[FR Doc. 79-28698 Filed 8-27-79; 8:45 am]

BILLING CODE 3710-04-M

Office of the Secretary

Per Diem, Travel and Transportation Allowance Committee

AGENCY: Per Diem, Travel and Transportation Allowance Committee, DoD.

ACTION: Publication of Changes in Per Diem Rates.

SUMMARY: The Per Diem, Travel and Transportation Allowance Committee is publishing Civilian Personnel Per Diem Bulletin Number 88. This bulletin lists changes in per diem rates prescribed for U.S. Government employees for official travel in Alaska, Hawaii, Puerto Rico, the Canal Zone, and possessions of the United States. Bulletin Number 88 is being published in the Federal Register to assure that travelers are paid per diem at the most current rates.

EFFECTIVE DATE: August 21, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Frederick W. Weiser, 325-8330.

SUPPLEMENTARY INFORMATION: This document gives notice of changes in per diem rates prescribed by the Per Diem, Travel and Transportation Allowance Committee for non-foreign areas outside the continental United States. Distribution of Civilian Per Diem Bulletins by mail was discontinued effective June 1, 1979. Per Diem Bulletins published periodically in the Federal Register now constitute the only notification of changes in per diem rates to agencies and establishments outside the Department of Defense.

The text of the Bulletin follows:

Civilian Personnel Per Diem Bulletin Number 88

To the Heads of Executive Departments and Establishments

SUBJECT: Table of Maximum Per Diem Rates in Lieu of Subsistence for United States Government Civilian Officers and Employees for Official Travel in Alaska, Hawaii, the Commonwealth of Puerto Rico, the Canal Zone, and Possessions of the United States

1. This bulletin is issued in accordance with Memorandum for Heads of Executive Departments and Establishments from the Deputy Secretary of Defense dated August 17, 1966, SUBJECT: Executive Order 11294, August 4, 1966, "Delegating Certain Authority of the President to Establish

Maximum Per Diem Rates for Government Civilian Personnel in Travel Status" in which this Committee is directed to exercise the authority of the President (5 U.S.C. 5702(a)(2)) delegated to the Secretary of Defense for Alaska, Hawaii, the Commonwealth of Puerto Rico, the Canal Zone, and possessions of the United States. When appropriate and in accordance with regulations issued by competent authority, lesser rates may be prescribed.

2. The maximum per diem rates shown in the following table are continued from the preceding Bulletin Number 87 except in the case identified by an asterisk which rate is effective on the date of this Bulletin. The date of this Bulletin shall be the date the last signature is affixed hereto.

3. Each Department or Establishment subject to these rates shall take appropriate action to disseminate the contents of this Bulletin to the appropriate headquarters and field agencies affected thereby.

4. The maximum per diem rates referred to in this Bulletin are:

FUA became effective on May 8, 1979. FUA prohibits the use of natural gas as a primary energy source in certain existing powerplants and also authorizes an exemptions procedure in regard to that and other prohibitions.

ERA intends to issue proposed orders which would grant temporary public interest exemptions to all of the petitioners enumerated above. These proposed orders would grant a temporary exemption from the prohibition against natural gas use, contained in Section 301(a)(2) and (3) of FUA, to the subject powerplants. Those proposed orders to grant temporary public interest exemptions are issued under the authority of Section 311(e) of FUA and 10 CFR 508, published by ERA on April 9, 1979, (44 FR 21230).

ERA is publishing this notice of petitions filed and its proposed order to grant these exemptions, to invite interested persons to submit written comments pursuant to the requirements of FUA. In addition, any interested person may request that a public hearing be convened in regard to these petitions under the provisions of Section 701(d) of FUA.

DATES: Written comments relating to these petitions and the proposed order are due on or before October 10, 1979. Requests for a public hearing are also due on or before October 10, 1979.

ADDRESSES: Requests for a public hearing and/or 10 copies of written comments shall be submitted to: Department of Energy, Case Control Unit, Box 4629, Room 2313, 2000 M Street, NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

William L. Webb (Office of Public Information), Economic Regulatory Administration, Department of Energy, Room B-110, 2000 M Street, NW., Washington, D.C. 20461, (202) 634-2170.
Elmer Lee (Office of Fuels Conversion), Economic Regulatory Administration, Department of Energy, Room 7219-F, 2000 M Street, NW., Washington, D.C. 20461, (202) 254-5436.

Robert L. Davies (Office of Fuels Conversion), Economic Regulatory Administration, Department of Energy, Room 3128, 2000 M Street, NW., Washington, D.C. 20461, (202) 254-7442.
James H. Heffernan (Office of General Counsel), Department of Energy, Room 7134, 12th & Pennsylvania Avenue, NW., Washington, D.C. 20461, (202) 633-8820.

SUPPLEMENTARY INFORMATION: On April 9, 1979, ERA issued a final rule implementing the authority granted to DOE by Section 311(e) of FUA. This final rule, set forth in 10 CFR Part 508, establishes the policy ERA has adopted in implementing its authority under

Section 311(e) of FUA and the eligibility criteria, which petitioners for the temporary exemption must demonstrate. This temporary exemption will allow certain existing electric powerplants to use natural gas as a primary energy source in excess of the amounts which are mandated by Section 301(a)(2) and (3) of FUA.

The use of natural gas, permitted under these temporary exemptions, will allow existing electric powerplants to displace distillate and residual fuel oils as their primary energy source.

This expanded use of natural gas in these powerplants will be a significant step toward reducing our short term oil consumption and will help the United States in meeting its goals to reduce its demand for imported oil, protect the Nation from the effects of any oil

shortages, and will serve to cushion the impact of increasing world oil prices.

The above listed owners/operators have filed petitions with ERA to request a temporary public interest exemption for their existing electric powerplants. ERA has reviewed their petitions and has found that the powerplants meet the eligibility criteria established in Part 508.2 of the final rule (44 FR 21230).

ERA, intends in its proposed order, to grant temporary public interest exemptions for the above listed powerplants.

This is not the final notice of petitions and proposed orders under the special rule. ERA will continue to comply with the requirements of Section 701(c) of FUA and will publish further notices as petitions are received.

Issued in Washington, D.C. on August 21, 1979.

Robert L. Davies,
Acting Assistant Administrator, Office of Fuels Conversion, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Proposed Order Granting Special Temporary Public Interest Exemptions

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby sets forth its Order proposing to grant a special temporary public interest exemption from the prohibitions of Section 301(a)(2) and (3) of the Powerplant and Industrial Fuel Use Act of 1978 (FUA or the Act), 42 U.S.C. 8301 *et seq.*, pursuant to Section 311(e) of FUA, 10 CFR 501.68, and 10 CFR 508, to the following powerplant(s):

50782-1743-31-41.		St. Clair	CT-11	East China Township, Mich.

I. The above listed powerplants are prohibited by Section 301(a)(2) of FUA from using natural gas as a primary energy source, or are prohibited from using natural gas as a primary energy source in excess of the average base year proportions allowed in Section 301(a)(3) of the Act.

II. *Eligibility.* The existing powerplants listed above have submitted petitions to ERA for a Special Temporary Public Interest Exemption and have asserted that:

- (a) Each existing powerplant is:
- (1) Prohibited on May 8, 1979 from using natural gas as a primary energy source by

Section 301(a)(2) of FUA, or

(2) Prohibited from using natural gas in excess of the average base year proportions allowed in Section 301(a)(3) of FUA.

(b) The proposed use of natural gas as a primary energy source, to the extent that such use would be prohibited by Section 301(a) (2) or (3) of FUA:

(1) Will displace consumption of middle distillate or residual fuel oil; and

(2) Will not displace the use of coal or any other alternate fuel in any facility of the owner/operator utility system, including the powerplant for which the exemption was submitted.

III. *Rationale.* To the extent that the near-term choice of fuels for certain existing powerplants is limited to petroleum or natural gas, the use of natural gas is preferred over petroleum. The expanded use of natural gas in these powerplants will be a significant step toward reducing our short-term oil consumption. This increased use of natural gas will help the United States meet its commitment to reduce its demand for imported petroleum products, protect the Nation from the effects of any oil shortages, and will cushion the impact of increasing world oil prices, which have had a detrimental effect on the Nation's balance of payments and domestic inflation rate.

To the extent that this increased use of natural gas will accomplish these goals, it will reduce the importation of petroleum and further the goal of national energy self-sufficiency. This is in keeping with purposes of FUA and is in the public interest.

Since the increased use of natural gas is in keeping with the purposes of FUA and is in the public interest, and since the petitioners have demonstrated that they have met the eligibility criteria established in Section 508.2 of the Special Rule (April 9, 1979, 44 FR 21230), ERA proposes to grant the exemptions.

IV. *Duration.* ERA proposes to grant these temporary public interest exemptions generally for a period of two years and may extend them from one to three additional years. Certain petitioners have requested that they be granted exemptions for a period of greater than two years but less than five

years, the maximum period allowed under FUA, and to the extent that these requests are in the public interest ERA will consider them.

These proposed exemptions are subject to termination by ERA, upon six months written notice, if ERA determines such termination to be in the public interest.

V. *Terms and Conditions.* Pursuant to the authority of Section 314 of FUA and 10 CFR 508.6, ERA will require the order recipient upon issuance of a final order to: (1) Complete a Form ERA 316 (Temporary Public Interest Exemption for Use of Natural Gas by Existing Powerplants Form), (2) report the actual monthly volumes of natural gas used in each exempted powerplant and the estimated number of barrels of each type of fuel oil displaced during the exemption period, (3) submit a system-wide fuel conservation plan to include the two-year period covered by the temporary exemption, and (4) submit annually to ERA a report on progress achieved in implementing the system-wide fuel conservation plan.

Issued in Washington, D.C., on August 21, 1979.

Robert L. Davies,
Acting Assistant Administrator, Office of Fuels Conversion, Economic Regulatory Administration.

Office of Energy Research

Price of Americium-241

AGENCY: Department of Energy;

ACTION: Additional Information on Price Increase for Americium-241.

A notice effecting a price increase for Americium-241 was published in the

Federal Register on July 26, 1979 (44 FR 43806). One comment was received in response to the proposed price increase notice published on May 16, 1979 (44 FR 28707), suggesting that the price increase be instituted in increments over a 2-year period. This comment was rejected because to adopt such a proposal would not be consistent with the Department of Energy policy of full recovery of costs.

FOR FURTHER INFORMATION CONTACT:

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10423; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before September 17, 1979. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. T-3775-2, T-2885-13, T-2884-10, T-3553-2 and T-2880-17.

Filing Party: Mr. John C. Barnett, Assistant Chief, Leases & Operating Agreements Division, The Port Authority of NY and NJ, One World Trade Center, New York, New York 10048.

Summary: The above agreements, between the Port Authority of NY and NJ and respective lessees, viz: Farrell Lines, Inc. (T-3775-2), Universal Maritime Service Corp. (T-2885-13 and T-2884-10), International Terminal Operating Co., Inc. (T-3553-2), and John W. McGrath Corporation (T-2880-17), amend the basic lease agreements by

providing for an increase in the rate per revenue ton payable by the lessees under a minimum-maximum rental formula. Each of the agreements also changes the definition of "revenue ton" with respect to certain specifically enumerated types of cargo.

Agreement No. T-3738-1.

Filing Party: H. H. Wittren, Manager, Waterfront Real Estate, Port of Seattle, P.O. Box 1209, Seattle, Washington, 98111.

Summary: Agreement T-3787-1, between the Port of Seattle (Port) and Hapag-Lloyd AG, Hamburg, Bremen (HL), modifies the parties' basic agreement which provides for the Port's lease to HL of certain premises at Terminal 18, Seattle, Washington, together with the preferential use of ships' berth and pier apron, two Port-owned container cranes and eight straddle carriers. The purpose of the modification is to amend paragraph 45(a) of the basic agreement, "use of Premises," to include Evergreen Line vessels in addition to the lines already permitted to use the facilities.

Agreement No. T-3844.

Filing Party: H. H. Wittren, Manager, Waterfront Real Estate, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Summary: Agreement No. T-3844, between the Port of Seattle (Port) and Associated Transportations, Inc. (Associated) provides for the month-to-month lease of 56,882 square feet of warehouse space and an office trailer at Terminal 106-W in the Port of Seattle for use in container freight station activities. As compensation, Associated will pay the monthly rental of \$9,251.12, plus any applicable taxes. By Order of the Federal Maritime Commission.

Dated: August 22, 1979.

Francis C. Harvey,
Secretary.

BILLING CODE 5730-01-M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest,

or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than September 17, 1979.

A. Federal Reserve Bank of Boston, 33 Pearl Street, Boston, Massachusetts 02106:

Old Stone Corporation, Providence, Rhode Island (consumer finance and credit-related insurance activities; Florida): to engage *de novo*, through its indirect subsidiary, UniCredit Corporation; in the origination, acquisition and servicing of consumer finance installment contracts; and in connection with extensions of credit by UniCredit, making available to borrowers credit-related life insurance. These activities will be conducted from an office in Miami, Florida, serving Dade and Broward Counties.

B. Federal Reserve Bank of Richmond, 701 East Byrd Street, Richmond, Virginia 23261:

Union Trust Bancorp., Baltimore, Maryland (consumer finance and insurance activities; North Carolina): to engage, through its subsidiary Landmark Financial Services, Inc., in making personal installment loans; purchasing sales finance contracts executed in connection with the sale of personal, family or household goods and services; acting as agent in the sale of credit life and credit accident and health insurance directly related to its extensions of credit; acting as agent in the sale of insurance protecting collateral held against the extensions of credit; and making second mortgage loans secured in whole or part by mortgage or other lien on real estate. These activities would be conducted from offices in Winston-Salem, North Carolina, serving the City of Winston-Salem and its adjacent environs.

C. Federal Reserve Bank of San Francisco, 400 Sansome Street, San Francisco, California 94120:

1. Orbanco, Inc., Portland, Oregon (finance company, loan servicing, personal property leasing, and insurance activities; Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia): to engage, through its subsidiary, Northwest Acceptance Corporation, in making or acquiring loans or other extensions of credit such as would be made or acquired by a commercial finance company; servicing loans or participations in loans and other extensions of credit; leasing personal property in accordance with the Board's Regulation Y; and acting as broker or agent for the sale of life insurance in connection with such extensions of credit. The loans and other extensions of credit will be secured by machinery and equipment, inventory, accounts receivable, or other assets. The proposed activities would be conducted from an office in Lake Success, New York, serving Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia.

2. First Hawaiian, Inc., Honolulu, Hawaii (insurance activities; Hawaii): to engage, through its subsidiary Hawaii Thrift and Loan, Inc., in selling as agent or broker, property damage and liability insurance directly related to extensions of credit by Hawaii Thrift and Loan. This activity will be conducted from the offices of Hawaii Thrift and Loan, located in: Honolulu, Haleiwa, Kahala, Keeaumoku, Moiliili, Kailua, Waipahu and Kaneohe, serving the island of Oahu; Lihue, serving the island of Kauai; Kahului, serving the island of Maui; and Hilo, serving the island of Hawaii.

D. Other Federal Reserve Banks: None.

Board of Governors of the Federal Reserve System, August 17, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

Federal Open Market Committee; Domestic Policy Directive of July 11, 1979

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on July 11, 1979.¹

The information reviewed at this meeting suggests that real output of goods and services declined somewhat in the second quarter, as slackening in demands was intensified by reduced supplies and sharply higher prices of motor fuels. During the quarter, the dollar value of retail sales

¹The Record of Policy Actions of the Committee for the meeting of July 11, 1979, is filed as part of the original document. Copies are available on request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

declined, and in real terms, sales in June were substantially below those of last December. Growth in nonfarm payroll employment slowed during the quarter to a pace considerably below that in the preceding six months, but the unemployment rate in June, at 5.6 percent, was somewhat lower than earlier in the year. Industrial production recovered in May, after having declined in April in large part because of a work stoppage. Over the first half of this year, broad measures of prices increased at a much faster pace than during 1978, although producer prices of foods declined in the second quarter. The rise in the index of average hourly earnings has slowed in recent months.

Downward pressure on the dollar in foreign exchange markets emerged in mid-June after several months of strength, and since then the trade-weighted value of the dollar against major foreign currencies has declined about 3 percent. The U.S. trade deficit for April and May combined widened somewhat from the first-quarter rate.

M-1 expanded sharply in June, after having increased little in May, and M-2 and M-3 also grew rapidly. Inflows of interest-bearing deposits included in M-2 grew rapidly in June, as net flows into money market certificates at commercial banks expanded further and savings deposits increased for the first time since last September. At nonbank thrift institutions, inflows of deposits picked up from the sharply reduced pace in May. On a quarterly average basis, M-1 grew at an annual rate of about 7½ percent in the second quarter, compared with a decline at a rate of about 2 percent in the first quarter; M-2 and M-3 grew at rates of about 8½ percent and 7½ percent respectively in the second quarter, compared with rates of about 1½ percent and 4½ percent in the first quarter. Market interest rates in general have declined substantially over the past several weeks, but mortgage interest rates have risen further.

Taking account of past and prospective developments in employment, unemployment, production, investment, real income, productivity, international trade and payments, and prices, it is the policy of the Federal Open Market Committee to foster monetary and financial conditions that will resist inflationary pressures while encouraging moderate economic expansion and contributing to a sustainable pattern of international transactions. The Committee agreed that these objectives would be furthered by growth of M-1, M-2, and M-3 from the fourth quarter of 1978 to the fourth quarter of 1979 within ranges of 1½ to 4½ percent, 5 to 8 percent, and 6 to 9 percent respectively, the same ranges that had been established in February. Having established the range for M-1 in February on the assumption that expansion of ATS and NOW accounts would dampen growth by about 3 percentage points over the year, the Committee also agreed that actual growth in M-1 might vary in relation to its range to the extent of any deviation from that estimate. The associated range for bank credit is 7½ to 10½ percent. The Committee anticipates that for the period from the fourth quarter of 1979 to the fourth quarter of 1980, growth may be

within the same ranges, depending upon emerging economic conditions and appropriate adjustments that may be required by legislation or judicial developments affecting interest-bearing transactions accounts. These ranges will be reconsidered at any time as conditions warrant.

In the short run, the Committee seeks to achieve bank reserve and money market conditions that are broadly consistent with the longer-run ranges for monetary aggregates cited above, while giving due regard to the program for supporting the foreign exchange value of the dollar and to developing conditions in domestic financial markets. Early in the period before the next regular meeting, System open market operations are to be directed at maintaining the weekly average federal funds rate at about the current level. Subsequently, operations shall be directed at maintaining the weekly average federal funds rate within the range of 9½ to 10½ percent. In deciding on the specific objective for the federal funds rate the Manager shall be guided mainly by the relationship between the latest estimates of annual rates of growth in the July-August period of M-1 and M-2 and the following ranges of tolerance: 2½ to 6½ percent for M-1 and 6½ to 10½ percent for M-2. If, with approximately equal weight given to M-1 and M-2, their rates of growth appear to be close to or beyond the upper or lower limits of the indicated ranges, the objective for the funds rate is to be raised or lowered in an orderly fashion within its range.

If the rates of growth in the aggregates appear to be above the upper limit or below the lower limit of the indicated ranges at a time when the objective for the funds rate has already been moved to the corresponding limit of its range, the Manager will promptly notify the Chairman, who will then decide whether the situation calls for supplementary instructions from the Committee.

Note: On July 27, the Committee modified the domestic policy directive adopted at its meeting on July 11, 1979, by raising the upper limit of the intermeeting range for the federal funds rate to 10½ percent and by instructing the Manager to aim for a weekly average rate within a range of 10½ to 10½ percent, depending on subsequent projections of growth of M-1 and M-2 over the July-August period, on conditions in foreign exchange markets, and on the current Treasury financing.

By order of the Federal Open Market Committee, August 17, 1979.

Murray Altmann,
Secretary.

First American Bancshares, Inc.; Formation of Bank Holding Company

First American Bancshares, Inc., Baytown, Texas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares (less

directors' qualifying shares) of the successor by merger to First American Bank & Trust of Baytown, Baytown, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 20, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

BILLING CODE 6210-01-M

First Antlers Bancshares, Inc.; Formation of Bank Holding Company

First Antlers Bancshares, Inc., Antlers, Oklahoma, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares (less directors' qualifying shares) of The First National Bank at Antlers, Antlers, Oklahoma. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

First Antlers Bancshares, Inc., Antlers, Oklahoma, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to engage *de novo* through its indirect subsidiary, First Antlers Insurance Agency, Inc., Antlers, Oklahoma. First Antlers Insurance Agency, Inc., is a wholly-owned subsidiary of First Antlers Business Trust, Antlers, Oklahoma which is a wholly-owned subsidiary of Applicant.

Applicant states that the proposed subsidiary would engage in the sale of credit life and accident and health insurance in connection with extensions of credit by Bank. These activities would be performed from offices of Applicant's subsidiary in Antlers, Oklahoma, and the geographic area to be served is the same as that area to be served by Bank which is approximated

by Pushmataha County, Oklahoma. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 21, 1979.

Board of Governors of the Federal Reserve System, August 21, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(1) of the Board's Regulation Y (12 CFR § 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than September 21, 1979.

A. Federal Reserve Bank of San Francisco, 400 Sansome Street, San Francisco, California 94120:

First Hawaiian, Inc., Honolulu, Hawaii (industrial loan and insurance activities; Hawaii): to engage, through a *de novo* office of its subsidiary, Hawaii Thrift and Loan, Incorporated, in operating an industrial loan company as authorized by Hawaii law, with activities including lending money upon individual credit, or the pledge or mortgage of real or personal property.

and issuing and selling certificates for the payment of money at any time; and selling, as agent or broker, property, casualty, life, accident and health insurance, directly related to extensions of credit by Hawaii Thrift and Loan, Incorporated. These activities will be conducted from an office to be located in Pearl City, Hawaii, serving the towns of Pearl City and Aiea on the island of Oahu, Hawaii.

B. Other Federal Reserve Banks:
None.

Board of Governors of the Federal Reserve System, August 21, 1979.

BILLING CODE 6210-01-M

Citicorp; Proposed Acquisition of Citishare Corp.

Citicorp, New York, New York, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire voting shares of Citishare Corporation, New York, New York.

Applicant states that the proposed subsidiary would:

1. Provide data processing for the internal operations of applicant and its subsidiaries;
2. Engage in developing, assembling, storing, processing, and distributing financial, economic and banking data, such as selected income statement and balance sheet items, economic time-series, securities prices, and foreign exchange rates;
3. Engage in computer "time sharing" activities, which involve providing customers with access to data of the type listed in (2) above and packaged financial systems via computer terminals in the customers' offices. According to Applicant, such packaged financial systems would permit customers to obtain the benefit of its financial information systems and financial analysis expertise with respect to such applications as financial modeling, loan analysis, accounting and bookkeeping, budget and profitability analysis, portfolio recordkeeping and analysis, foreign exchange exposure, general ledger, and bond analysis;
4. Provide packaged financial systems for installation at a customer's site and packaged systems for installation at other financial institutions;
5. Make available to others excess computer processing capacity as may from time to time be available, on the condition that the only involvement by

Citishare is furnishing the facility and necessary operating personnel, and perform other incidental activities necessary to carry on the permissible activities in this area, as specified by the Board in its interpretation on data processing activities in 12 CFR § 225.123.

Applicant states that these activities have been specified by the Board, in section 225.4(a)(8) of Regulation Y (12 CFR § 225.4(a)(8)), as being permissible for bank holding companies as activities "so closely related to banking or managing or controlling banks as to be a proper incident thereto," within the meaning of section 4(c)(8) of the Bank Holding Company Act, or, in a Board interpretation (12 CFR § 225.123(e)), as incidental activities necessary to carry on such activities. These activities would be performed from offices of applicant's subsidiaries in New York, New York, and the geographic areas to be served are the continental United States, Puerto Rico, and various cities in Australia, Canada, England, France, and Mexico.

Interested persons may express their views on the question of whether the proposed activities are "so closely related to banking or managing or controlling banks as to be a proper incident thereto," or are incidental to "closely related" activities.

Interested persons may also express their views on the question of whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."

Any request for a hearing on these questions must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 21, 1979.

Board of Governors of the Federal Reserve System, August 21, 1979.

Edward T. Mulrenin,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Community Bancorporation, Inc.; Formation of Bank Holding Company

Community Bancorporation, Inc., Bristow, Oklahoma, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 80 percent of the voting shares (less directors' qualifying shares) of Community Bank, Bristow, Oklahoma. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Community Bancorporation, Inc., Bristow, Oklahoma, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire 100 percent of the voting shares of Community Business Trust, Bristow, Oklahoma, which will own 100 percent of Community Insurance Agency, Inc., Bristow, Oklahoma.

Applicant states that the proposed subsidiary would engage *de novo* in the activities of selling credit life insurance and credit accident and health insurance. These activities would be performed from offices of Applicant's subsidiary in Bristow, Oklahoma serving the Bristow area. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party

commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 20, 1979.

Board of Governors of the Federal Reserve System, August 21, 1979.

BILLING CODE 6210-01-M

Farmer City Agency, Inc.; Acquisition of Additional Shares of Bank

Farmer City Agency, Inc., Farmer City, Illinois, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire additional voting shares of Farmer City State Bank, Farmer City, Illinois, thereby increasing Farmer City Agency, Inc.'s ownership from 40.75 percent to 50.05 percent of the voting shares of Farmer City State Bank. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 21, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 21, 1979.

Edward T. Mulrenin,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Turon Banc Shares, Inc.; Formation of Bank Holding Company

Turon Banc Shares, Inc., Turon, Kansas, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding

company by acquiring 94 per cent of the voting shares (less directors' qualifying shares) of The Turon State Bank, Turon, Kansas. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Turon Banc Shares, Inc., Turon, Kansas, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to engage, *de novo*, as agent or broker, in the sale of credit life and credit accident and health insurance that is directly related to extensions of credit by Bank. These activities would be performed from offices of Applicant's subsidiary in Turon, Kansas, and the geographic areas to be served are Turon, Kansas, and surrounding areas. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests or unsound banking practices." UBT Bancorp, Inc.; Formation of Bank Holding Company

UBT Bancorp, Inc., Bartlesville, Oklahoma, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 80 percent, or more, less directors' qualifying shares of the voting shares of Union Bank & Trust ("Bank"), Bartlesville, Oklahoma. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

UBT Bancorp, Inc., Bartlesville, Oklahoma, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire indirectly voting shares of UBT Insurance Agency, Inc.

Applicant states that the proposed subsidiary would engage in the activities of selling credit life and credit accident and health insurance directly related to extensions of credit of Bank. These activities would be performed from offices of Applicant's subsidiary in Bartlesville, Oklahoma, and the geographic areas to be served are the cities of Bartlesville and Dewey in Oklahoma. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve

System, Washington, D.C. 20551, not later than September 21, 1979.

GENERAL SERVICES ADMINISTRATION

[E-79-3]

Delegation of Authority to the Secretary of Defense

1. *Purpose.* This delegation authorizes the Secretary of Defense to represent, in conjunction with the Administrator of General Services, the consumer interests of the executive agencies of the Federal Government in proceedings before the New Jersey Board of Public Utilities involving an energy adjustment clause and the establishment of a new energy adjustment factor.

2. *Effective date.* This delegation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Service Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the Federal executive agencies before the New Jersey Board of Public Utilities involving the application of the Jersey Central Power and Light Company for an establishment of a new energy adjustment factor. The authority delegated to the Secretary of Defense shall be exercised concurrently with the Administrator of General Services.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

Dated: August 16, 1979.

R. G. Freeman III,

Administrator of General Services.

1. On page 49012, in the eleventh line, "Place: Conference Room C . . ." should be corrected to read "Place: Conference Room G . . .";

2. On page 49013, in the first column, the File Line after the signature, [FR Doc. 79-25969 . . .] should be corrected to read [FR Doc. 79-25959 . . .].

BILLING CODE 1505-01-M

Office of Education

Graduate and Professional Opportunities Program; Closing Date for Transmittal of Applications for Fiscal Year 1980

Applications are invited for new projects under the Graduate and Professional Opportunities Program.

Authority for this program is contained in Title IX Parts A and B of the Higher Education Act of 1965, as amended.

(20 U.S.C. 1134 et seq.)

This program issues awards to individual institutions of higher education or to combinations of these institutions.

The purpose of the awards is to develop training programs at institutions of higher education by providing fellowships for graduate and professional study to members of groups, particularly minorities and women, that have traditionally been underrepresented among recipients of graduate and professional degrees.

Closing Date for Transmittal of Applications: An application for a grant must be mailed or hand delivered by October 17, 1979.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Office of Education, Application Control Center, Attention: 13.580, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service Postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Commissioner of Education.

If an application is sent through the U.S. Postal Service, the Commissioner does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8 a.m. and 4:30 p.m. (Washington, D.C., time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information: Preference will be given to training programs that speak directly to those academic or professional studies of high national priority in which minorities and women are most particularly underrepresented (except those, such as medicine, which receive substantial funding under other Federal programs). Generally, no fewer than three to five new fellowships will be allocated to each approved program; institutions may receive support in a total of no more than five such program areas. In instances where only one academic or professional area is approved for support, this area should have the capacity to accept no fewer than 5 fellowships. Institutional grant awards under Part A are intended to be used in conjunction with fellowship awards to augment or provide special services in such related fields as recruitment, orientation programs before or during the academic year, and efforts at retention which include a variety of supportive services.

Subject to the availability of funds, requests for the renewal of fellowship support to those continuing Fellows in good academic standing are not subject to the competitive process and will, therefore, be automatically granted.

Available Funds: A budget request of \$15.0 million was made to continue this

program during 1980-1981. If appropriated, this amount would provide support for those individuals in good standing to continue their studies and for approximately 925 new fellowships at some 125 institutions. Of the total amount, about \$1.5 million would be used to support institutional grants at 55 institutions of higher education where evidence indicates strong ties with the fellowship program, especially in such areas as recruitment and retention. A smaller appropriated amount would reduce these estimates proportionately.

These estimates, however, do not bind the U.S. Office of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Application Forms: Application forms and program information packages are available and may be obtained by writing to the Graduate Training Branch, U.S. Office of Education (Room 3060, Regional Office Building 3), 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information packages. The Commissioner strongly urges that the narrative portion of the application not exceed 40 pages in length. The Commissioner further urges that applicants not submit information that is not requested.

Special Procedures: An application for an institutional grant shall provide assurance that the institution has notified the appropriate State Commissioner (established or designated under Section 1202 of the Higher Education Act of 1965, as amended) and that the State Commission has been given the opportunity to offer recommendations on the application to the institution and to the Commissioner.

Applicable Regulations: Regulations applicable to this program include the following:

- (a) Regulations governing the Graduate and Professional Opportunities Program (45 CFR Part 179); and
- (b) General Provisions Regulations for Office of Education Programs (45 CFR Parts 100 and 100a).

Note.—The proposed Education Division General Administrative Regulations (EDGAR) were published in the Federal Register on May 4, 1979 (44 FR 26298). When EDGAR becomes effective, it will supersede the General Provisions Regulations for Office of Education Programs.

If EDGAR takes effect before grants are made under this program, those grants will be subject to the following provision of EDGAR:

Subpart A (General); Subpart E (What Conditions Must be Met by a Grantee?); Subpart F (What Are the Administrative Responsibilities of a Grantee?);

Subpart G (What Procedures Does the Education Division Use to Get Compliance?).

Applicants should note that an amendment to §§ 179.50(a) and 179.51 is contemplated. A notice of the proposed change will be published in the Federal Register soon.

Further Information: For further information contact Dr. Donald N. Bigelow, Bureau of Higher and Continuing Education, U.S. Office of Education, (Room 3060, Regional Office Building 3) 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 245-2347.

(20 U.S.C. 1134 et seq.)
(Catalog of Federal Domestic Assistance Number 13.580 Graduate Professional Opportunities Program)

Dated: August 23, 1979.

John Ellis,
Executive Deputy Commissioner for Educational Programs.

BILLING CODE 4110-03-M

Isocarboxazid; Drugs for Human Use; Drug Efficacy Study Implementation; Permission for Drugs to Remain on the Market; Amendment

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: This notice amends the previously published conditions for marketing isocarboxazid, a drug used in the treatment of depression.

DATE: Protocols due on or before September 27, 1979. Studies must be completed by August 28, 1981.

ADDRESS: Communications in response to this notice should be identified with the NDA number (if any) and the following in a box in the upper portion of the cover letter: "PARAGRAPH XIV DRUG—CATEGORY XX 'ISOCARBOXAZID'," and directed to the attention of the appropriate office name below.

Abbreviated new drug applications: Division of Generic Drug Monographs (HFD-530), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Requests for opinion of the applicability of this notice to a specific drug product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

All other submissions required by this notice: Division of Neuropharmacological Drug Products, Psychopharmacology Unit (HFD-120), Rm. 10B-40, Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary E. Catchings, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: A notice published in the Federal Register of July 14, 1978 (43 FR 30351) specified the conditions under which isocarboxazid and tranlycypromine sulfate may remain on the market pending completion and review of clinical studies to determine effectiveness in the treatment of depression. Among the conditions for marketing was that each manufacturer label its product as "probably effective for severe reactive or endogenous depression in hospitalized or closely supervised patients who have not responded to other antidepressant therapy." Inadvertently, the notice failed to state the correct labeling requirement for isocarboxazid; the notice is now being amended to include that labeling. The July 14, 1978 notice is not otherwise changed by this amendment except that the time limits for submitting protocols and for completing studies on isocarboxazid are extended:

Accordingly, section A. of the July 14, 1978 notice as it pertains to isocarboxazid is amended to read as follows:

A. Requirements for Products now Subjects of Approved NDA's

Proceedings to withdraw approval of any NDA that has a "deemed-approved" status on August 28, 1979, will not be initiated provided that:

1. The drug is labeled as probably effective for the treatment of depressed patients who are refractory to tricyclic antidepressants or electroconvulsive therapy and depressed patients in whom tricyclic antidepressants are contraindicated.

2. On or before September 27, 1979, any applicant who intends to conduct clinical studies of effectiveness has submitted protocols to the Division of Neuropharmacological Drug Products, Psychopharmacology Unit (HFD-120) for at least two adequate and well-

controlled studies by independent investigators or a multiclinic study in which the data of at least three investigators can be evaluated independently, to determine whether or not the product is effective. The Bureau of Drugs will review the submitted protocols within a 30-day period and will provide the applicant notice of approval or comments.

3. Within 60 days after receipt of the Bureau's approval or comments on the protocol, studies are in progress and the applicant so notifies the Division of Neuropharmacological Drug Products in writing.

4. At 6-month intervals after studies have begun, the applicant submits a progress report stating the number of patients and investigators in the studies, the number of studies completed, and the number continuing.

5. By August 28, 1981, the applicant submits data on the completed studies to the Division of Neuropharmacological Drug Products. If the studies are completed before the time, the applicant submits the results within 30 days after their completion.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 505, 701, 52 Stat. 1052-1053), as amended, 1055-1056, as amended (21 U.S.C. 355, 371) the Administrative Procedure Act (5 U.S.C. 553, 554), and under authority delegated to the Commissioner (21 CFR 5.1).

Dated August 22, 1979.

Joseph P. Hile,
Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[Docket No. 79N-0252; DESI 8173]

Monobenzene Topical Ointment; Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice states the conditions for marketing monobenzene topical ointment for the indication for which it is not regarded as effective and offers an opportunity for a hearing concerning other indications reclassified to lacking substantial evidence of effectiveness. The drug is used for depigmentation in extensive vitiligo.

DATES: Hearing requests due on or before September 27, 1979, supplements to new drug applications and data in support of hearing requests due on or before October 29, 1979.

ADDRESSES: Communications in response to this notice should be identified with the reference number DESI 8173, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Supplements to full new drug applications (identify with NDA number): Division of Anti-Infective Drug Products (HFA-140), Rm. 12B-45, Bureau of Drugs.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Requests for hearing (identify with docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFD-305), Rm. 4-65.

Requests for the report of the National Academy of Sciences-National Research Council: Public Records and Documents Center (HFI-35), Rm. 12A-12.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT: John H. Hazard, Jr., Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 8173), published in the Federal Register of September 18, 1970 (35 FR 14629), the Food and Drug Administration (FDA) announced that monobenzene is possibly effective for its recommended use in the treatment of severe freckling, hyperpigmentation from photosensitization following the use of certain perfumes, melasma of pregnancy, and hyperpigmentation following skin inflammation, and for final depigmentation in disseminated vitiligo.

Subsequently, in a notice published in the Federal Register of July 11, 1973 (38 FR 18477), monobenzene topical preparations were temporarily exempted (as Category XIII) from the time limits established for completing certain phases of the Drug Efficacy Study Implementation (DESI) program. The exemption was granted because no alternative depigmenting agents are available. Benoquin Lotion and Ointment were permitted to remain on

the market pending completion of scientific studies. After the sponsor informed FDA that studies were not being conducted on Benoquin Lotion, the agency revoked the exemption for that product in a notice published in the Federal Register of March 21, 1975 (40 FR 12829) and withdraw approval of the application September 15, 1975 (40 FR 42590), leaving only the following product exempted in Category XIII:

NDA 8-173; Benoquin Ointment containing 20 percent monobenzene; Elder Pharmaceuticals, 705 East Mulberry St., P.O. Box 31, Bryan, OH 43508.

Two clinical studies submitted by Elder support the effectiveness of Benoquin Ointment in extensive vitiligo. Accordingly the September 18, 1970 notice is amended to read as follows with respect to Benoquin Ointment.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the product specifically named above, this notice applies to any drug product that is not the subject of an approved new drug application and is identical to the product named above. It may also be applicable, under 21 CFR 310.6, to a similar or related drug product that is not the subject of an approved new drug application. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product that the person manufactures or distributes. Such person may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address given above.)

A. Effectiveness classification. The Food and Drug Administration has reviewed all available evidence and concludes that the drug product is effective for the indication in the labeling conditions below. The drug product now lacks substantial evidence of effectiveness for all other indications.

B. Conditions for approval and marketing. The Food and Drug Administration is prepared to approve abbreviated new drug applications and supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* The drug product is in ointment form suitable for topical administration.

2. *Labeling conditions.* a. The label bears the statement, "Caution: Federal

law prohibits dispensing without prescription."

b. The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The Indication is as follows:

For depigmentation in extensive vitiligo.

3. *Marketing status.* a. Marketing of such drug products that are now the subject of an approved or effective new drug application may be continued provided that, on or before October 29, 1979, the holder of the application has submitted (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide full updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)).

b. Approval of an abbreviated new drug application (21 CFR 314.1(f)) containing full information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H must be obtained before marketing such product. Marketing before approval of an abbreviated new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

C. Notice of opportunity for hearing. On the basis of all the information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5), that demonstrates the effectiveness of the drug for the indications lacking substantial evidence of effectiveness referred to in paragraph A of this notice.

Notice is given to the holder of the new drug application and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application and all amendments and supplements thereto providing for the indications lacking substantial evidence of effectiveness referred to in paragraph A of this notice on the ground that new information before him with respect to the drug

product, evaluated together with the evidence available to him when the application was approved, shows there is a lack of substantial evidence that the drug product will have all the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling. An order withdrawing approval will not issue with respect to any application supplemented, in accord with this notice, to delete the claims lacking substantial evidence of effectiveness.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act under the exemption for products marketed before June 25, 1938, contained in section 201(p) of the act, or under section 107(c) of the Drug Amendments of 1962 or for any other reason.

In accordance with section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant and all other persons who manufacture or distribute a drug product which is identical, related, or similar to the drug product named above (21 CFR 310.6), are hereby given an opportunity for a hearing to show why approval of the new drug application should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug product named above and of all identical, related, or similar drug products.

An applicant or any other person subject to this notice under 21 CFR 310.6 who decides to seek a hearing shall file (1) on or before September 27, 1979, a written notice of appearance and request for hearing, and (2) on or before October 29, 1979, the data, information, and analyses relied on to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or

denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other persons subject to this notice under 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes and election by the person not to make use of the opportunity for a hearing concerning the action proposed with respect to the product and constitutes a waiver of any contentions concerning the legal status of any such drug product. Any such drug product labeled for the indications lacking substantial evidence of effectiveness referred to in paragraph A of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analysis in the request for hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgement against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice must be filed in quintuplicate. Such submissions, except for information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053 as amended (21 U.S.C. 355)), and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: August 14, 1979.

Jerome A. Halperin,
Acting Director, Bureau of Drugs.
[FR Doc. 79-26651 Filed 8-27-79; 8:45 am]
BILLING CODE 4110-03-M

[Docket No. 79N-0252; DESI 8173]

Monobenzene Topical Ointment; Drugs for Human Use; Drug Efficacy Study Implementation; Revocation of Exemption

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: This notice revokes the temporary exemption for continued marketing of monobenzene topical ointment. The exemption is no longer needed because the question of the drug's effectiveness has been resolved. The drug has now been found to be effective. Under the exemption, the drug was allowed to remain on the market for continued study beyond the time limit scheduled for implementation of the Drug Efficacy Study.

EFFECTIVE DATE: August 28, 1979.

FOR FURTHER INFORMATION CONTACT: John H. Hazard, Jr., Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice appearing elsewhere in this issue of the Federal Register, the Food and Drug Administration is reclassifying one of the possibly effective indications for monobenzene topical ointment described below to be effective and the remaining indications to lacking substantial evidence of effectiveness. This product has been allowed to remain on the market beyond the time limit established for implementing the Drug Efficacy Study (DESI) on the condition that the manufacturer undertake additional clinical studies to determine the product's effectiveness. The temporary exemption to permit continued marketing as exempt Category XIII was announced in a notice published in the Federal Register July 11, 1973 (38 FR 18477).

The agency has reviewed data that the manufacturer submitted for the ointment form of monobenzene, and the question of the product's effectiveness has now been resolved. Therefore, the temporary exemption granted by the July 11, 1973 notice, as it pertains to the following product in the Drug Efficacy Study is hereby revoked.

NDA 8-173: Benoquin Ointment containing 20 percent monobenzene; Elder Pharmaceuticals, 705 East Mulberry St., P.O. Box 31, Bryan, OH 43506.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053 as amended (21 U.S.C. 352, 355)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1).

Dated: August 22, 1979.

Joseph P. Hile,
Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[Docket No. 79N-0322]

Safety of Certain Food Ingredients; Opportunity for Public Hearing

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces an opportunity for public hearing on the safety of vitamin A, vitamin A acetate, and vitamin A palmitate to determine if they are generally recognized as safe (GRAS) or subject to a prior sanction. This action accords with procedures of a comprehensive safety review that the agency is conducting. Interested persons are invited to give their views on the safety of these substances.

DATE: Requests to make oral presentations at the public hearing must be received by or postmarked on or before September 27, 1979.

ADDRESSES: Written requests to the Select Committee on GRAS Substances, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014, and to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: In the Federal Register of July 26, 1973 (38 FR 20053), FDA issued a notice advising the public that an opportunity would be provided for oral presentation of data, information, and views at public hearings to be conducted by the Select Committee on GRAS Substances of the Life Sciences Research Office, Federation of American Societies for Experimental Biology (the Select Committee), about the safety of ingredients used in food to determine if they are GRAS or subject to a prior

sanction. The agency now announces that the Select Committee is prepared to conduct a public hearing on the following categories of food ingredients: vitamin A, vitamin A acetate, and vitamin A palmitate for direct food use. The public hearing will provide an opportunity, before the Select Committee reaches its final conclusions, for any interested person(s) to present scientific data, information, and views on the safety of these substances, in addition to those previously submitted in writing under notices published in the Federal Register of July 26, 1973 (38 FR 20051, 20053), April 17, 1974 (39 FR 13798), and March 28, 1978 (43 FR 12941).

The Select Committee has reviewed all the available data and information on the categories of food ingredients listed above and has reached one of the five following tentative conclusions on the status of each:

1. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future. (This finding does not apply to the substances covered by this notice.)

2. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current and in the manner now practiced. However, it is not possible to determine, without additional data, whether a significant increase in consumption would constitute a dietary hazard.

3. Although no evidence in the available information demonstrates a hazard to the public when it is used at levels that are now current and in the manner now practiced, uncertainties exist

requiring that additional studies be conducted. (This finding does not apply to the substances covered by this notice.)

4. The evidence is insufficient to determine that the adverse effects reported are not deleterious to the public health when it is used at levels that are now current and in the manner now practiced. (This finding does not apply to the substances covered by this notice.)

5. The information available is not sufficient to make a tentative conclusion. (This finding does not apply to the substances covered by this notice.)

The following table lists each ingredient, the Select Committee's tentative conclusion (keyed to the five types of conclusions listed above), and the available information on which the Select Committee based its conclusions:

Substance	Select Committee tentative conclusion	Scientific literature review (order No.; price code; price)*	Animal study report (order No.; price code; price)*	Other information (order No.; price code; price)*
Vitamin A.....	2	PB-241-849/AS (vitamin A).....	Mutagenicity evaluation of FDA 75-79 vitamin A acetate crystals submitted by Lito Bionetics, Inc. (PB-278-479/AS; A03; \$4.50).	1. Wade, M. J. 1977. Review of the recent literature on the health aspects of vitamin A, vitamin A acetate and vitamin A palmitate as food ingredients. (PB-275-754/AS; A03; \$4.50.)
Vitamin A Acetate.....	2	A-99; \$27.75.....		2. Human intake data taken from "A Comprehensive Survey of Industry on the Use of Food Chemicals Generally Recognized as Safe (GRAS)," available from the National Technical Information Service, PB-Nos. 221-921 through 221-949; —.
Vitamin A Palmitate.....	2			3. Letters January 16, February 2, and March 7, 1979, from K. R. Fulton, National Research Council, Washington, DC.

Reports in the table with "PB" Prefixes may be obtained from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161.

In addition to the information contained in the documents listed in the table above, the Select Committee supplemented, where appropriate, its reviews with specific information from specialized sources as announced in a previous hearing opportunity notice published in the Federal Register of September 23, 1974 (39 FR 34218).

The Select Committee's tentative report on vitamin A, vitamin A acetate, and vitamin A palmitate is available for review at the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-56, 5600 Fishers Lane, Rockville, MD 20857, and also at the Public Information Office, Food and Drug Administration, Rm. 3807, 200 C St. SW., Washington, DC 20204. In addition, all reports and documents used by the Select Committee to review the

ingredients are available for review at the office of the Hearing Clerk.

To schedule the public hearing, the Select Committee must be informed of the number of persons who wish to attend and the time requested to give their views. Accordingly, any interested person who wishes to appear at the public hearing to make an oral presentation should inform the Select Committee in writing addressed to The Select Committee on GRAS Substances, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014. A copy of each request will be sent to the Hearing Clerk (address above) and all requests will be placed on public display in that office. Any such request must be received by or postmarked on or before September 27, 1979, must state the substance(s) on which an opportunity to present oral views is requested, and must state how much time is requested for the presentation. Requests should specify the docket number found in

brackets in the heading of this notice. As soon as possible after the request deadline, a notice announcing the date, time, place, and scheduled presentations for any public hearing that may be requested will be published in the Federal Register.

The purpose of the public hearing is to receive data, information, and views not previously available to the Select Committee about the substances listed above. Information already contained in the scientific literature reviews and in the tentative Select Committee report shall not be duplicated, although views on the interpretation of this material may be presented.

Depending on the number of requests for opportunity to make oral presentations, the Select Committee may reduce the time requested for any presentation. Because of time limitations, individuals and organizations with common interests are urged to consolidate their presentations.

Any interested person may, in lieu of an oral presentation, submit written views, which will be considered by the Select Committee. Three copies of such written views identified with the docket number found in brackets in the heading of this notice, are to be addressed to the Select Committee at the address noted above, and must be received by or postmarked not later than 10 days before the scheduled date of the hearing. A copy of any written views is to be sent to the Hearing Clerk, Food and Drug Administration, and will be placed on public display in that office.

A public hearing will be presided over by a member of the Select Committee. Hearings will be transcribed by a reporting service, and a transcript of such hearing may be purchased directly from the reporting service and will be placed on public display in the office of the Hearing Clerk (HFA-305), Food and Drug Administration.

Dated: August 22, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26649 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[Docket No. 79N-0269]

Safety of Iron and Iron Salts; Opportunity for Public Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces an opportunity for public hearing on the safety of iron and iron salts to determine whether they are generally recognized as safe (GRAS) or subject to a prior sanction. This action is in accordance with procedures of a comprehensive safety review that the agency is conducting. Interested persons are invited to give their views on the safety of these substances.

DATE: Requests to make oral presentations at the public hearing must be received by or postmarked on or before September 27, 1979.

ADDRESS: Written requests to the Select Committee on GRAS Substances, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014, and to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: In the Federal Register of July 26, 1973 (38 FR 20053), FDA issued a notice advising the public that an opportunity would be provided for oral presentation of data, information, and views at public hearings to be conducted by the Select Committee on GRAS Substances of the Life Sciences Research Office, Federation of American Societies for Experimental Biology (hereinafter, the Select Committee), about the safety of ingredients used in food to determine whether they are GRAS or subject to a prior sanction.

FDA now gives notice that the Select Committee is prepared to conduct a public hearing on the following categories of food ingredients: Reduced iron, electrolytic iron, carbonyl iron, ferric citrate, ferric phosphate, ferric pyrophosphate, ferrous fumarate, ferrous carbonate, ferrous ascorbate, ferrous citrate, ferrous gluconate, ferrous lactate, ferric ammonium citrate, iron peptonate, iron polyvinyl pyrrolidone, sodium ferric EDTA, sodium ferricitropyrophosphate, and sodium ferric pyrophosphate for direct food use; ferrous sulfate and ferric oxide for direct food use and for use in paper and paperboard products; elemental iron, ferric chloride, ferric sulfate, iron caprylate, iron linoleate, iron tallate, and oxides of iron for use in paper and paperboard products; and iron naphthenate for use as a drier in can coatings. The public hearing will provide an opportunity, before the Select Committee reaches its final conclusions,

for any interested person(s) to present scientific data, information, and views on the safety of these substances, in addition to those previously submitted in writing under notices published in the Federal Register of July 26, 1973 (38 FR 20053), April 17, 1974 (39 FR 13798), and March 28, 1978 (43 FR 12941).

The Select Committee has reviewed all the available data and information on the categories of food ingredients listed above and has reached one of the five following tentative conclusions on the status of each:

1. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future.

2. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current and in the manner now practiced. However, it is not possible to determine, without additional data, whether a significant increase in consumption would constitute a dietary hazard.

3. Although no evidence in the available information demonstrates a hazard to the public when it is used at levels that are now current and in the manner now practiced, uncertainties exist requiring that additional studies be conducted. (This finding does not apply to the substances covered by this notice.)

4. The evidence is insufficient to determine that the adverse effects reported are not deleterious to the public health when it is used at levels that are now current and in the manner now practiced. (This finding does not apply to the substances covered by this notice.)

5. The information available is not sufficient to make a tentative conclusion.

The following table lists each ingredient, the Select Committee's tentative conclusion (keyed to the five types of conclusions listed above), and the available information on which the Select Committee based its conclusions:

Reports in the table with "PB" prefixes may be obtained from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Rd., Springfield, VA 22161.

In addition to the information contained in the documents listed in the table above, the Select Committee supplemented its reviews, where appropriate, with specific information from specialized sources as announced in a previous hearing opportunity notice published in the *Federal Register* of September 23, 1974 (39 FR 34218).

The Select Committee's tentative report on ingredients that are the subject of this notice of opportunity for a hearing is available for review at the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-56, 5600 Fishers Lane, Rockville, MD 20857, and also at the Public Information Office, Food and Drug Administration, Rm. 3807, 200 C St. SW., Washington, DC 20204. In addition, all reports and documents used by the Select Committee to review the ingredients are available for review at the office of the Hearing Clerk.

To schedule the public hearing, the Select Committee must be informed of the number of persons who wish to attend and the amount of time requested to give their views. Accordingly, any interested person who wishes to appear at the public hearing to make an oral presentation should inform the Select Committee in writing addressed to: The Select Committee on GRAS Substances, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014. A copy of each such request will be sent to the Hearing Clerk, address noted above, and all requests shall be placed on public display in that office. Any such request must be received by or postmarked on or before September 27, 1979, shall state the substance(s) on which an opportunity to present oral views is requested, and shall state how much time is requested for the presentation. Requests shall specify the docket number found in brackets on the heading of this notice. As soon as possible after the request deadline, a notice announcing the date, time, place, and scheduled presentations for any public hearing that may be requested will be published in the *Federal Register*.

The purpose of the public hearing is to receive data, information, and views not previously available to the Select Committee about the substances listed above. Information already contained in the scientific literature reviews and in the tentative Select Committee report shall not be duplicated, although views on the interpretation of this material may be presented.

Depending on the number of requests for opportunity to make oral presentations, the Select Committee may reduce the time requested for any presentation. Because of time limitations, individuals and organizations with common interests are urged to consolidate their presentations. Any interested person may, in lieu of an oral presentation, submit written views, which shall be considered by the Select Committee. Three copies of such written views identified with the docket number found in brackets in the heading of this notice shall be addressed to the Select Committee at the address noted above, and must be received by or postmarked not later than 10 days before the scheduled date of the hearing. A copy of any written views shall be sent to the Hearing Clerk, Food and Drug Administration, and shall be placed on public display in that office.

A public hearing will be presided over by a member of the Select Committee. Hearings will be transcribed by a reporting service, and a transcript of each hearing may be purchased directly from the reporting service and will be placed on public display in the office of the Hearing Clerk (HFA-305), Food and Drug Administration.

Dated: August 22, 1979.

Joseph P. Hile,
Associate Commissioner for Regulatory Affairs.

Bureau of Land Management

[M 44302-M 44303]

Montana; Right-of-Way Applications for Pipeline

August 20, 1979.

Notice is hereby given that pursuant

to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Continental Pipe Line Company has filed two (2) applications for rights-of-way for a 3-inch crude oil pipeline to hook up Manning and May S&L 23-24 and Juniper 12-X oil wells across 0.12 miles of public land in Musselshell County:

Principal Meridian, Montana
T. 8 N., R. 24 E., Sec. 1, Lot 5.
T. 9 N., R. 25 E., Sec. 34, NE 1/4 SW 1/4.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, Drawer 1160, Lewistown, Montana 59457.

Roland F. Lee,
Chief, Branch of Lands and Minerals Operations.

Bureau of Reclamation

[INT FES 79-35]

Proposed Enlargement of Bumping Lake, Yakima Project, Washington; Availability of Final Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement for the Enlargement of Bumping Lake, Yakima Project, Washington.

The environmental statement concerns replacing the existing Bumping Lake Dam with a larger structure and creating an enlarged Bumping Lake with an active capacity of 458,000 acre-feet for the purpose of providing (a) improved streamflows and new passage and hatchery facilities for enhancement of resident and anadromous fish resources, (b) supplemental water supplies for irrigated lands, (c) flexibility in the Yakima Project storage system to strengthen flood control operations, (d) opportunity to develop recreational potential of the Bumping Lake area in a manner compatible with adjacent

natural values, and (e) modification of the spillway gates in Tieton Dam to improve winter operation for flood control.

Copies are available for inspection at the following locations:

Office of Environmental Affairs, Department of the Interior, Bureau of Reclamation, Room 7622, Washington, DC 20240, Telephone (202) 343-4991.

Division of Management Support, General Services, Denver Federal Center, E&R Center, Library Section, Code 950, Denver, CO 80225, Telephone (303) 234-3019.

Office of the Regional Director, Bureau of Reclamation, 550 West Fort Street, Box 043, Boise, ID 83724, Telephone (208) 384-1208.
Yakima Project Office, Bureau of Reclamation, 1917 Marsh Road, Box 1377, Yakima, WA 98901, Telephone (509) 575-5848.

Single copies of the final environmental statement may be obtained on request to the Commissioner of Reclamation or the Regional Director. Copies will also be available for inspection in libraries in south-central Washington. Please refer to the statement number above.

Dated: August 23, 1979.

Larry E. Meierotto,
Assistant Secretary of the Interior.

BILLING CODE 4510-26-M

NUCLEAR REGULATORY COMMISSION**Privacy Act of 1974; New System of Records**

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notification of proposed new system of records.

SUMMARY: The NRC is proposing to establish a new system of records, subject to the Privacy Act. The purpose of the system is to enable the agency to maintain document control for all documents originated by and received by the NRC and to serve as an information source for these documents. The system will incorporate existing system NRC-26. Upon publication of the new system, existing system NRC-26 will be deleted.

COMMENT DATE: Comments are due on or before September 27, 1979.

ADDRESS: Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

FOR FURTHER INFORMATION CONTACT: Ellen Whitlow, FOIA/PA Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492-8133.

SUPPLEMENTARY INFORMATION: The new system is identified as Document Control System. It will consist of correspondence and related documents originated by or received by the NRC.

A new system report was filed with the President of the Senate, the Speaker of the House and the Office of Management and Budget on August 20, 1979. The Prefatory Statement containing General Routine Uses applicable to the NRC's systems of records was published at 42 FR 49082, 9/26/77.

All interested persons who desire to submit written comments or suggestions for consideration in connection with the

proposed new system of records should send them to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing & Service Branch, by September 27, 1979. Copies of comments received will be available for inspection and copying at the Commission's Public Document Room, 1717 H Street NW., Washington, DC.

Dated at Bethesda, MD, this 13th day of August 1979.

For the Nuclear Regulatory Commission,
Lee V. Gossick,
Executive Director for Operations.

NRC-29**SYSTEM NAME:**

Document Control System—NRC.
Pursuant to 5 U.S.C. 552a(k), the Commission has exempted portions of this system of records from 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), (I), and (f). This exemption rule is contained in section 9.95 of the NRC regulation (10 CFR 9.95).

SYSTEM LOCATION:

Primary system—
Record Facilities Branch, Office of Administration, NRC, 7920 Norfolk Avenue, Bethesda, Maryland.
Duplicate System—duplicate systems exist, in whole or in part, at the locations listed in Addendum I, Parts 1 and 2, the NRC Local Public Document Rooms (LPDR's) and at the TERA Advanced Services Corporation, 7101 Wisconsin Avenue, Suite 1400, Bethesda, Maryland.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NRC staff, contractors, and sub-contractors licensees, Congressional offices, and other correspondents with the NRC.

CATEGORIES OF RECORDS IN THE SYSTEM:

Documents both received by and originated by the NRC.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

a. 44 U.S.C. 3101;
b. Sec. 201, Energy Reorganization Act of 1974, 42 U.S.C. 5841.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. To refer, where appropriate, inquiries to Federal agencies or persons for their reply or action;
b. To provide information to persons or agencies requesting this information, including provision of Daily Accession Lists in the NRC and Local Public Document Rooms.

c. To prepare a monthly "Title List of Documents Made Publicly Available", and

d. For any of the routine uses specified in the Prefatory Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**STORAGE:**

Maintained on microfiche, disks, tapes, and paper in file folders. Classified documents are maintained in locked safes; proprietary and sensitive safeguards documents are maintained in secured facilities.

RETRIEVABILITY:

Accessed by name (author or recipient), corporate source, title of document, subject matter, or other identifying document or control number.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties required such access. Information not exempt from disclosure under the Freedom of Information Act (FOIA) will be publicly available in the PDR and LPDR's.

RETENTION AND DISPOSAL:

Retained and destroyed in accordance with approved records disposal schedules for the various types of records involved.

SYSTEM MANAGER(S) AND ADDRESSES:

Director, Division of Technical Information and Document Control, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

NOTIFICATION PROCEDURE:

Director, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure". Information which is classified or otherwise exempt from public disclosure under the FOIA and will not be disclosed.

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Information in this system of records comes from the correspondence to and from the NRC, contractors, and NRC employees.

SYSTEMS OF RECORDS EXEMPT FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.S.C. 552a(k), the Commission has exempted portions of this system of records from 5 U.S.C.

552a(c)(3), (d), (e)(1), (e)(4) (G), (H), (I), and (f). This exemption rule is contained in section 9.95 of the NRC regulation (10 CFR 9.95).

BILLING CODE 7590-01-M

[Docket No. PRM-140-1]

Public Citizen Litigation Group Critical Mass Energy Project; Filing of Petition for Rule Making

Notice is hereby given that representatives of the Public Citizen Litigation Group and the Critical Mass Energy Project, by petition dated July 24, 1979, have requested that the Nuclear Regulatory Commission (NRC) find, pursuant to the procedures and criteria in the NRC's regulation's (Subpart E of 10 CFR Part 140), that the nuclear accident commencing on March 28, 1979 at the Three Mile Island, Unit 2 nuclear power plant constitutes an "extraordinary nuclear occurrence" (ENO). The petition also requested that the NRC amend Subpart E of 10 CFR Part 140 to make less stringent the criteria used by the Commission for determination of whether or not an ENO has occurred.

The Commission intends to treat the first part of the petition as a response to its July 23, 1979, Federal Register notice (44 FR 43128) announcing its decision to initiate "the making of a determination as to whether or not the recent accident at Three Mile Island constitutes an extraordinary nuclear occurrence" and inviting interested persons to submit to the Commission on or before August 22, 1979 "any information in their possession relevant to this determination."

The Commission intends to treat the second part of the petition as being a petition for rule making filed in accordance with 10 CFR 2.802 of the Commission's regulations. This part of the petition states, in relevant part, as follows:

Whether or not the Commission finds that the criteria currently set out in its regulations indicate that the accident at Three Mile Island was an extraordinary nuclear occurrence, petitioners request that the Commission alter or amend those criteria to bring them more into line with the clear intent of Congress on this matter.

Under these criteria, there is no question that the accident at Three Mile Island is of the size and type Congress was led to believe would be considered an extraordinary nuclear occurrence. However, from the inception of the concept of an extraordinary nuclear occurrence, the Commission also contemplated criteria establishing an accident of much smaller proportions than Three Mile Island as an extraordinary nuclear occurrence.

Inasmuch as the Commission has the power and discretion to make the definition of an extraordinary nuclear occurrence responsive to the circumstances and needs of the public, and inasmuch as accidents of far smaller size could be designated extraordinary nuclear occurrences in conformity with the legislative intent of the Price-Anderson Act as amended, it is appropriate and necessary that the criteria for the determination of an extraordinary nuclear occurrence be revised, altered or amended so as to respond effectively to those circumstances and demonstrated needs. In order that the assurances to the public and to Congress not prove to be empty promises, petitioners urge the Commission to alter or amend its criteria for an extraordinary occurrence through appropriate rulemaking procedures, whether or not the current criteria are satisfied by the accident at Three Mile Island.

A copy of the petition for rule making is available for public inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. A copy of the petition may be obtained by writing to the Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

All persons who desire to submit written comments or suggestions concerning the petition for rule making should send their comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 Attention: Docketing and Service Branch by October 29, 1979.

FOR FURTHER INFORMATION CONTACT: Joseph M. Felton, Director, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone: 301-492-7211.

Dated at Washington, DC this 22nd day of August, 1979.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 79-26676 Filed 8-27-79; 8:45 am]

BILLING CODE 7590-01-M

POSTAL RATE COMMISSION

[Docket No. MC79-4]

Mail Classification Schedule— Merchandise Return Service, 1979; U.S. Postal Service Filing of Request for Recommended Decision on Establishing a Special Service for Merchandise Return

August 22, 1979.

Notice is hereby given that on August 13, 1979, the United States Postal

Service ("Postal Service"), pursuant to section 3623 of the Postal Reorganization Act (39 U.S.C. 3623), filed a request with the Postal Rate Commission for a recommended decision on establishing a special service for merchandise return. This filing has been assigned Docket No. MC79-4.

The Postal Service states that its request contains such information and data which explain the nature, scope, significance and impact of the proposed special service for merchandise return. Further, the Postal Service states that this proposed service would answer the need of businesses to permit customers to return merchandise without prepaying the postage. The proposed service is to be available to mailers of all classes;¹ however, the Postal Service anticipates that the special service will be used primarily for single piece third-class, special rate fourth-class and parcel post mail.

The merchandise return service would utilize a two-part label printed by the business shipper.² If the customer recipient wishes to return merchandise that has been shipped, the customer would notify the shipper who would then send the customer the two-part label. The customer would re-wrap the parcel and take it to the post office. An employee at the post office would compute the postage, writing it on both parts of the label; that employee would separate the parts of the label, affixing the top portion to the parcel and putting the bottom portion in the first-class mailstream. When the bottom portion arrived at the destination post office, the amount due for each shipper would be computed and the trust-fund account adjusted. The merchandise-return labels, together with the appropriate billing forms, would be put in an envelope for delivery to the shipper.

Hearings will be held on the proposal submitted by the Postal Service in Docket No. MC79-4. Any person desiring to be heard with reference thereto and to become a party to the proceeding, or to participate as a party in any hearing thereon, should file a petition for leave to intervene. Petitions for leave to intervene must be filed with the Secretary, Postal Rate Commission, Washington, D.C. 20268 on or before September 11, 1979, and must be in

accordance with § 20 of the Commission's rules of practice (39 CFR 3001.20). We direct specific attention to § 20(b) which provides that petitions for leave to intervene shall affirmatively state whether or not petitioner requests a hearing or, in lieu thereof, a conference; and further, whether or not the petitioner intends to participate actively in the hearing.³ Alternatively, persons seeking limited participation, but who do not wish to become parties may, on or before September 11, 1979, file a written request for leave to be heard as a "limited participant," pursuant to § 19a of the Commission's rules of practice (39 CFR 3001.19a). In addition, persons wishing to express their views informally, and not desiring to become a party or limited participant, may file comments pursuant to § 19b of the Commission's rules, 39 CFR 3001.19b.

At the same time as it filed its Proposal, the Postal Service, under Commission rule 64(h)(3), filed a motion for "waiver of rule 64(e), of rule 64(h)(2)(i) insofar as it incorporates rules 54(f) (2), (3) and 54(j) (5), (6), and of rule 64(d) (ii), (iii)." The Postal Service says that rule 64(h)(2)(i) insofar as it incorporates rules 54(f) (2), (3) and 54(j) (5), (6), and rule 64(d) (ii), (iii) should be waived because the Postal Service's rates and fees and the cost-revenue relationship would not be significantly affected. The Postal Service further argues that waiver should be granted because no accurate volume forecast of the proposed service can be projected. Finally, the Postal Service says rule 64(e) should be waived because no interclass changes are contemplated. Parties who wish to address the Postal Service's motion should file their answers by September 11, 1979.

The request of the Postal Service for a recommended decision on establishing a special service for merchandise return and the motion for waiver of certain filing provisions of the rules of practice and procedure are on file with the Commission and are available for public inspection during regular business hours.

³ In this regard, parties who intend to participate actively in this proceeding are encouraged informally and promptly to inform the Postal Service of desired preliminary clarifications of the Postal Service's presentation wherever the participant believes such clarification will expedite this proceeding.

¹ The specific additions to the mail classification schedule are set out, in legislative format, in Attachment A to the Postal Service's Request.

² The service would be available to all shippers. The Postal Service predicts that only businesses would incur the expenses involved.

Further, the Commission designates Stephen L. Sharfman, Assistant General Counsel, Litigation, as the Officer of the Commission in Docket No. MC79-4.

David F. Harris,

Secretary.

BILLING CODE 7715-01-M

PRESIDENTIAL COMMISSION ON WORLD HUNGER

Meeting

The eighth meeting of the Presidential Commission on World Hunger will be held on Friday, September 7, 1979, in Room 2010 of the New Executive Office Building, 726 Jackson Place, N.W., Washington, D.C. The meeting will begin at 9:30 a.m. and conclude at approximately 4:30 p.m.

The agenda for the meeting will include discussion of draft portions of the Commission's Report.

The meeting will be open to observation by the public to the extent space is available. Reservations are required and requests should be addressed to Presidential Commission on World Hunger, 734 Jackson Place, N.W., Washington, D.C. 20006. Reservations will be honored on the basis of the earliest postmarks of requests.

Donald B. Harper,

Administrative Officer, Presidential
Commission on World Hunger.

DEPARTMENT OF STATE

Office of the Secretary

(CM-8/219)

Study Group 1 of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that Study Group 1 of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on September 19, 1979 at 9:30 a.m. in Room A-110 (Annex) of the Federal Communications Commission, 1229 20th Street, NW., Washington, D.C. This Study Group deals with U.S. Government regulatory aspects of international telegraph and telephone operations and tariffs.

The Study Group will discuss international telecommunications questions relating to telegraph, telex, new record services, data transmission and leased channel services in order to develop U.S. positions to be taken at international CCITT meetings.

Members of the general public may attend the meeting and join in the discussion subject to instructions of the Chairman. Admittance of public members will be limited to the seating available.

Requests for further information should be directed to Richard H. Howarth, State Department, Washington, D.C. 20520, telephone (202) 632-1007.

Richard H. Howarth,

Chairman, U.S. CCITT National Committee.

August 17, 1979.

BILLING CODE 4710-07-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 79-6]

Commerce in Explosives; List of Explosive Materials

Pursuant to the provisions of section 841(d) of Title 18, United States Code, and 27 CFR 181.23, the Director, Bureau of Alcohol, Tobacco, and Firearms, must publish and revise at least annually in the Federal Register a list of explosives determined to be within the coverage of 18 U.S.C. Chapter 40, Importation, Manufacture, Distribution and Storage of Explosive Materials. This Chapter covers not only explosives, but also blasting agents and detonators, all of which are defined as explosive materials in section 841(c) of Title 18, United States Code.

Accordingly, the following is the 1979 List of Explosive Materials subject to regulation under 18 U.S.C. Chapter 40, which includes both the list of explosives (including detonators) required to be published in the Federal Register and blasting agents. The list is intended to also include any and all mixtures containing any of the materials in the list. Materials constituting blasting agents are marked by an asterisk. While the list is comprehensive, it is not all inclusive. The fact that an explosive material may not be on the list does not mean that it is not within the coverage of the law if it otherwise meets the statutory definitions in Section 841 of Title 18, United States Code. Explosive materials are listed alphabetically by their

common names followed by chemical names and synonyms in brackets. This revised list supersedes the List of Explosive Materials dated July 27, 1978 (43 FR 32492).

List of Explosive Materials

A

Acetylides of heavy metals.
Aluminum containing polymeric propellant.
Aluminum ophorite explosive.
Amatex.
Amatol.
Ammonal.
Ammonium nitrate explosive mixtures (cap sensitive).
*Ammonium nitrate explosive mixtures (non cap sensitive).
Aromatic nitro-compound explosive mixtures.
Ammonium perchlorate having particle size less than 15 microns.
Ammonium perchlorate composite propellant.
Ammonium picrate [picrate of ammonia, Explosive D].
Ammonium salt lattice with isomorphously substituted inorganic salts.
*ANFO [ammonium nitrate-fuel oil].

B

Baratol.
Baronol.
BEAF [1, 2-bis (2, 2-difluoro-2-nitroacetoxyethane)].
Black powder.
Black powder based explosive mixtures.
*Blasting agents, nitro-carbo-nitrates, including non cap sensitive slurry and water-gel explosives.
Blasting caps.
Blasting gelatin.
Blasting powder.
BTNEC [bis (trinitroethyl) carbonate].
BTNEN [bis (trinitroethyl) nitramine].
BTTN [1,2,4 butanetriol trinitrate].
Butyl tetryl.

C

Calcium nitrate explosive mixture.
Cellulose hexanitrate explosive mixture.
Chlorate explosive mixtures.
Composition A and variations.
Composition B and variations.
Composition C and variations.
Copper acetylide.
Cyanuric triazide.
Cyclotrimethylenetrinitramine [RDX].
Cyclotetramethylenetetranitramine [HMX].
Cyclotol.

D

DATB [diaminotrinitrobenzene].
DDNP [diazodinitrophenol].
DEGDN [diethyleneglycol dinitrate].
Detonating cord.
Detonators.
Dimethylol dimethyl methane dinitrate composition.
Dinitroethylenurea
Dinitroglycerine [glycerol dinitrate].
Dinitrophenol.
Dinitrophenolates.
Dinitrophenyl hydrazine.
Dinitroresorcinol.
Dinitrotoluene-sodium nitrate explosive mixtures.

DIPAM.

Dipicryl sulfone.
Dipicrylamine.
DNBP [dinitropentano nitrile].
DNPA [2, 2-dinitropropyl acrylate].
Dynamite.

E

EDNA.
Ednatol.
EDNP [ethyl 4, 4-dinitropentanoate].
Erythritol tetranitrate explosives.
Esters of nitro-substituted alcohols.
EDGN [ethylene glycol dinitrate].
Ethyl-tetryl.
Explosive conitrates.
Explosive gelatins.
Explosive mixtures containing oxygen releasing inorganic salts and hydrocarbons.
Explosive mixtures containing oxygen releasing inorganic salts and nitro bodies.
Explosive mixtures containing oxygen releasing inorganic salts and water insoluble fuels.
Explosive mixtures containing oxygen releasing inorganic salts and water soluble fuels.
Explosive mixtures containing sensitized nitromethane.
Explosive mixtures containing tetranitromethane (nitro form).
Explosive nitro compounds of aromatic hydrocarbons.
Explosive organic nitrate mixtures.
Explosive liquids.
Explosive powders.

F

Fulminate of mercury.
Fulminate of silver.
Fulminating gold.
Fulminating mercury.
Fulminating platinum.
Fulminating silver.
Gelatinized nitrocellulose.
Gem-dinitro aliphatic explosive mixtures.
Guanyl nitrosamino guanyl tetrazene.
Guanyl nitrosamino guanylidene hydrazine.
Guncotton.

H

Heavy metal azides.
Hexanite.
Hexanitrodiphenylamine.
Hexanitrostilbene.
Hexogen or octogene and a nitrated H-methylaniline.
Hexolites.
HMX [cyclo-1, 3, 5, 7-tetramethylene-2, 4, 6, 8-tetranitramine; Octogen].
Hydrazinium nitrate/hydrazine/aluminum explosive system.
Hydrazoic acid.

I

Igniter cord.
Igniters.

K

KDNBF [potassium dinitrobenzo-furoxane].

L

Lead azide.
Lead mannite.
Lead mononitroresorcinol.
Lead picrate.
Lead salts, explosive.

Lead styphnate [styphnate of lead, lead trinitroresorcinol].
Liquid nitrated polyol and trimethylolethane.
Liquid oxygen explosives.

M

Magnesium ophorite explosives.
Mannitol hexanitrate.
MDNP [methyl 4, 4-dinitropentanoate].
Mercuric fulminate.
Mercury oxalate.
Mercury tartrate.
Minol-2 [40% TNT, 40% ammonium nitrate, 20% aluminum].
Mononitrotoluene-nitroglycer in mixture.
Monopropellants.

N

NIBTN [nitroisobutametrial trinitrate].
Nitrate sensitized with gelled nitroparaffin.
Nitrated carbohydrate explosive.
Nitrated glucoside explosive.
Nitrated polyhydric alcohol explosives.
Nitrates of soda explosive mixtures.
Nitric acid and a nitro aromatic compound explosive.
Nitric acid and carboxylic fuel explosive.
Nitric acid explosive mixtures.
Nitro aromatic explosive mixtures.
Nitro compounds of furane explosive mixtures.
Nitrocellulose explosive.
Nitroderivative of urea explosive mixture.
Nitrogelatin explosive.
Nitrogen trichloride.
Nitrogen tri-iodide.
Nitroglycerine [NG, RNG, nitro, glyceryl trinitrate, trinitroglycerine].
Nitroglycide.
Nitroglycol [ethylene glycol dinitrate, EGDN].
Nitroguanidine explosives.
Nitroparaffins and ammonium nitrate mixtures.
Nitronium perchlorate propellant mixtures.
Nitrostarch.
Nitro-substituted carboxylic acids.
Nitrourea.

O

Octogen [HMX].
Octol [75 percent HMX, 25 percent TNT].
Organic amine nitrates.
Organ nitramines.

P

PBX [RDX and Plasticizer].
Pellet powder.
Penthrinite composition.
Pentolite.
Perchlorate explosive mixtures.
Peroxide based explosive mixtures.
PETN [nitropentaerythrite, pentaerythrite tetranitrate, pentaerythritol tetranitrate].
Picramic acid and its salts.
Picramide.
Picrate of potassium explosive mixtures.
Picratol.
Picric acid (explosive grade).
Picryl chloride.
Picryl fluoride.
PLX [95 percent nitromethane, 5 percent ethylenediamine].
Polynitro aliphatic compounds.
Polyolpolynitrate-nitrocellulose explosive gels.
Potassium chlorate and lead sulfocyanate explosive.

Potassium nitrate explosive mixtures.
Potassium nitroaminotetrazole.

R

RDX [cyclonite, hexogen, T4, cyclo-1,3,5-trimethylene-2,4,6-trinitramine; hexahydro-1,3,5-trinitro-S-triazine].

S

Safety fuse.
Salts of organic amino sulfonic acid explosive mixture.
Silver acetylide.
Silver azide.
Silver fulminate.
Silver oxalate explosive mixtures.
Silver styphnate.
Silver tartrate explosive mixtures.
Silver tetrazene.
Slurried explosive mixtures of water, inorganic oxidizing salt, gelling agent, fuel and sensitizer (cap sensitive).
Smokeless powder.
Sodatol.
Sodium amatol.
Sodium dinitro-ortho-cresolate.
Sodium nitrate-potassium nitrate explosive mixture.
Sodium picramate.
Squibs.
Styphinc acid.

T

Tacot [tetranitro-2,3,5,6-dibenzo-1,3a,4,6a-tetrazapentalene].
TATB [Triaminotrinitrobenzene].
TEGDN [triethylene glycol dinitrate].
Tetrazene [tetracene, tetrazine, 1(5-tetrazolyl)-4-guanyl tetrazene hydrate].
Tetranitrocarbazole.
Tetryl [2,4,6 tetranitro-N-methylaniline].
Tetrytol.
Thickened inorganic oxidizer salt slurried explosive mixture.
TMETN (trimethylolethane trinitrate).
TNEF [trinitroethyl formal].
TNEOC [trinitroethylorthocarbonate].
TNEOF [trinitroethyl orthoformate].
TNT [trinitrotoluene, trotyl, trilit, trilon].
Torpex.
Tridite.
Trimethylol ethyl methane trinitrate composition.
Trimethylolthane trinitrate-nitrocellulose.
Trimonite.
Trinitroanisole.
Trinitrobenzene.
Trinitrobenzoic acid.
Trinitrocresol.
Trinitro-meta-cresol.
Trinitronaphthalene.
Trinitrophenol.
Trinitrophenolglucoside.
Trinitroresorcinol.
Tritonal.

U

Urea nitrate.

W

Water bearing explosives having salts of oxidizing acids and nitrogen bases, sulfates, or sulfamates (cap sensitive).

X

Xanthamons hydrophilic colloid explosive mixture.

Signed: July 11, 1979.
J. R. Dickerson,
Director.

BILLING CODE 4810-31

Customs Service

Malleable Pipe Fittings of Iron From Japan; Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: United States Customs Service, Treasury Department.

ACTION: Initiation of Countervailing Duty Investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been initiated to determine if benefits which constitute the payment of a bounty or grant within the meaning of the countervailing duty law are conferred by the Government of Japan upon the manufacture, production or exportation of malleable pipe fittings of iron. A preliminary determination will be made no later than December 26, 1979, and a final determination in accordance with section 102(a)(2) of the Trade Agreements Act of 1979, will be made no later than March 17, 1980.

EFFECTIVE DATE: August 28, 1979.

FOR FURTHER INFORMATION CONTACT: Stephen Nyschot, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229, telephone (202) 566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on June 26, 1979, on behalf of the American Pipe Fittings Associates alleging that benefits conferred by the Government of Japan upon the manufacture, production or exportation of malleable pipe fittings of iron from Japan constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930 as amended (19 U.S.C. 1303).

The products covered by this investigation are malleable pipe fittings of iron used as fittings and junctions in water, steam and gas piping systems. These products are classified under item no. 610.7400, TSUSA, as cast iron fittings, malleable, advanced in condition by operations or processes subsequent to the casting process.

The petitioner alleges that financial assistance for small and medium sized enterprises under legislation enacted February 14, 1978 entitled "Law Concerning Temporary Measures for Medium and Small Enterprises Related to Steep Revaluation of Yen Rates" (High Yen Measures Law) constitutes

bounties or grants. Under this law, qualified enterprises have access to low interest loans for the stabilization of business and for the establishment of facilities required for a change of business, liberalized repayment terms for loans used for modernization, liberalized terms for government sponsored credit guarantees and extended carry forward and carry back periods for net losses when computing taxable corporate income.

Other programs which petitioner alleges constitute bounties or grants are:

- (1) Access to a special credit fund sponsored by the government of Japan for the disposition of idle facilities in depressed industries.

- (2) Tax deferral on part of previous year's export earnings and current year deduction of all outlays for new market development under the Overseas Market and Development Reserve Program (OMDR).

- (3) Export promotion assistance through overseas market research, introductory advertising, foreign credit investigations and overseas trade fairs by the Japan External Trade Organization (JETRO).

- (4) Loans granted on concessionary terms by the Japan Development Bank (JDB).

The high yen measures and the tax deferral aspects of OMDR listed above been found to constitute a bounty or grant in prior investigations.

The alleged bounty concerning Government of Japan guarantees of repayment of certain loans to depressed industries has not been the subject of prior countervailing duty determinations. It is currently under investigation in the case of *Valves and Parts Thereof from Japan*, 44 FR 18780 (1979). While this program on its face is not export oriented, its effect could be to provide bounties or grants and therefore will be investigated with respect to the malleable pipe fitting industry.

The assistance rendered by JETRO is general in nature and not oriented towards the export promotion of specific products. Treasury has, in past determinations, concluded that this program results in the payment or bestowal of a bounty or grant on the grounds that these activities, at least indirectly, defray costs which would otherwise be incurred by the exporters involved and to that extent may subsidize the industry under consideration. However, information has been presented indicating that JETRO has altered its activities to include the promotion of imports into Japan. The changed nature of JETRO's overall mission, particularly its activities relating to import assistance

and promotion, has led Treasury to reconsider whether JETRO expenditures are countervailable. Pending resolution of this question, this program will be included in the investigation, and the Treasury invites public comment as to the appropriate resolution of this issue.

Preferential financing by the JDB (No. 4) was found to constitute a bounty or grant in *Certain Consumer Electronic Products from Japan*, 41 FR 1298 (1976), although in that case its effect was found to be *de minimis* in size.

Each of these programs will, therefore, be investigated in the proceedings hereby initiated.

Pursuant to section 303(a)(4) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of the statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. Under section 102(a)(2) of the Trade Agreements Act of 1979, a final determination will be made within 75 days of the coming into force of the law on January 1, 1980.

Therefore, a preliminary determination regarding this petition will be made no later than December 26, 1979, as to whether or not the alleged payments or bestowals conferred by the Government of Japan upon the manufacture, production, or exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be made no later than March 17, 1980.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and § 159.47(c) of the Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order No. 101-5, May 16, 1979, the provisions of Treasury Department Order No. 165, revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

David R. Brennan,
Acting General Counsel of the Treasury.

BILLING CODE 4810-40-M

Office of Revenue Sharing

Final Date of Adjustments; Demands for Entitlement Period Nine

AGENCY: Office of Revenue Sharing, Department of the Treasury.

ACTION: Data Notice.

SUMMARY: This notice announces that allocation payments to State and local governments for Entitlement Period Nine (October 1, 1977—September 30, 1978) of general revenue sharing will be final unless a demand for adjustment has been received by September 30, 1979.

FOR FURTHER INFORMATION CONTACT: Matthew Butler, Manager, Data and Demography Division, Office of Revenue Sharing, 2401 E Street, N.W., Washington, D.C. 20226, telephone 202-634-5166.

SUPPLEMENTARY INFORMATION: Section 102(b) of the State and Local Fiscal Assistance Amendments of 1976(e)(2) of the State and Local Fiscal Assistance Amendments of 1976 (Pub. L. 94-488; 90 Stat. 2347; 31 U.S.C. 1221) provides that for entitlement periods beginning after December 31, 1976, no adjustment shall be made in a government's payments for an entitlement period unless a demand for adjustment has been made by the recipient government or the Secretary of the Treasury within one year after the end of that entitlement period. A demand by the Director or the Deputy Director of the Office of Revenue Sharing will be treated as a demand for adjustment by the Treasury.

An entry in the Federal Register of April 20, 1977 (42 FR 20525) originally gave notice that the Office of Revenue Sharing will honor adjustment demands for Entitlement Period Nine received from a government or the Secretary of the Treasury by September 30, 1979. Thus, this notice finalizes the

Entitlement Period Nine allocations to recipient governments for which demands for adjustment are not pending with the Office of Revenue Sharing on September 30, 1979. A demand accompanied by adequate supporting documentation pending at the close of business on the September 30, 1979 deadline will be researched and a written decision on the data challenge will be rendered. Any resulting adjustment to a government's allocation due to a pending adjustment will be made by the Office of Revenue Sharing.

Dated: August 22, 1979.
Bernadine Denning,
Director, Office of Revenue Sharing.

VETERANS ADMINISTRATION

Voluntary Service National Advisory Committee; Meeting

The Veterans Administration gives notice that the annual meeting of the Veterans Administration Voluntary Service National Advisory Committee, composed of representatives of 45 national voluntary organizations, will be held at the Ramada Inn Rosslyn, 1900 North Fort Myer Drive, Arlington, Va., October 24-26, 1979.

Registration of the conferees and preliminary meetings on procedural matters will be held beginning at 8:30 a.m. on October 24, 1979. The meeting will officially convene with a Plenary Session at 9 a.m., October 25, in the Rosslyn Room A and B of the hotel and will conclude at noon on October 26, 1979.

The purposes of the meeting are to instruct committee members and officials of their organizations in obligations they have accepted for volunteer recruitment, communications and program interpretation, and to seek the advice of the committee in further developing volunteer participation in the care and treatment of veteran patients throughout the Agency's nationwide medical program.

Dated: August 20, 1979.
By direction of the Administrator:
John J. Leffler,
Associate Deputy Administrator.

Assignment of Hearings

August 22, 1979

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 138882 (Sub-180F), Wiley Sanders Truck Lines, Inc., MC-138882 (Sub-183F), Wiley Sanders Truck Lines, Inc., now assigned for hearing on September 11, 1979 (2 days), in Room 13216-C, 450 Golden Gate Avenue, San Francisco, CA.

MC 145633F, Walter B. Maki, DBA Maki International & Company, now assigned for hearing on October 15, 1979 (1 week), at Miami, Florida in a hearing room to be later designated.

MC 31389 (Sub-271F), McLean Trucking Company, now assigned for hearing on October 15, 1979 (1 week), at Chicago, IL, in a hearing room to be later designated.

MC 129537 (Sub-24F), Reeves Transportation Co., now assigned for hearing on October 15, 1979 (1 week), at Montgomery, AL, in a hearing room to be later designated.

MC 138100 (Sub-2F), Mellow Truck Express, Inc., now being assigned for hearing on November 27, 1979 (2 days), at Portland, OR in a hearing room to be designated later.

MC 146231 F, Seaton Smithson Flegel and Jerry Dean Flegel, DBA S. S. Flegel Trucking, now being assigned for hearing on November 29, 1979 (2 days), at Portland, OR in a hearing room to be designated later.

MC 83635 (Sub-153F), Wales Transportation, Inc., now being assigned for hearing on December 3, 1979 (1 week), at Portland, OR in a hearing room to be designated later.

MC 103926 (Sub-86F), W.T. Mayfield Sons Trucking Company, a Corporation, now being assigned for hearing on October 15, 1979 (1 day), at Atlanta, GA in a hearing room to be designated later.

MC 146102 F, Tamway Corporation, now being assigned for hearing on October 17, 1979 (1 day), at Atlanta, GA in a hearing room to be designated later.

MC 116254 (Sub-250F), Chem-Haulers, Inc., now being assigned for hearing on October 18, 1979 (1 day), at Atlanta, GA in a hearing room to be designated later.

MC 41404 (Sub-156F), Argo-Collier Truck Lines, Corporation, now being assigned for hearing on October 19, 1979 (1 day), at

Atlanta, GA in a hearing room to be designated later.
 MC 730 (Sub-428), Pacific Intermountain Express Co., a Nevada Corporation, now being assigned for hearing on October 16, 1979 (9 days), at Hawthorne, CA will be held at the Cockatoo Inn, 4334 West Imperial Highway, Hawthorne, CA.
 MC-C-10300 Fogarty Van Lines, Inc.—Investigation and Revocation of Certificates, now assigned for hearing on September 10, 1979 at Atlanta, GA will be held in Conference Room No. 556, 275 Peachtree Street.

MC 144041 (Sub-19F), Downs Transportation Co., Inc., now assigned for hearing on September 5, 1979, Atlanta, GA will be held in Conference Room No. 556, 275 Peachtree Street.

MC-F-12184, Nebraska-Iowa Xpress, Inc.—Control Chappell Freight Lines, Inc., now assigned for hearing on September 6, 1979 at Denver, CO is postponed indefinitely.

AB-102 (Sub-8F), Missouri-Kansas-Texas Railroad Company Abandonment at Burkburnett, TX and Altus, OK in Wichita County, TX and Cotton, Tillman, and Jackson Counties, OK now assigned for hearing on September 8, 1979 at Wichita Falls, TX, will be held at the City Hall, City Council Chambers, 1300-6th Street.

MC 115904 (Sub-130F), Grover Trucking Co., now assigned September 11, 1979 at Salt Lake City, UT is cancelled and transferred to Modified Procedure.

MC 46829 (Sub-12F), Allard Express, Inc., now being assigned for hearing on November 27, 1979 (2 weeks) at Chicago, IL, location of hearing room will be designated later.

MC 116254 (Sub-224F), Chem-Haulers, Inc., now assigned for hearing September 11, 1979 at Nashville, TN is cancelled and transferred to Modified Procedure.

MC 141804 (Sub-161F), Western Express, Division of Interstate Rental, Inc. A Nevada Corporation, now assigned for hearing on September 17, 1979 at Los Angeles, CA will be held in Room No. 8544, Federal Bldg, 300 N. Los Angeles St. Los Angeles, CA.

MC 141804 (Sub-162F), Western Express, Division of Interstate Rental, Inc., now assigned for hearing on September 18, 1979 at Los Angeles, CA will be held in Room No. 8544, Federal Bldg, 300 N. Los Angeles St. Los Angeles, CA.

MC 134501 (Sub-34F), Incorporated Carriers, Ltd., now assigned for hearing on September 19, 1979 at Los Angeles, CA will be held in Room No. 8544, Federal Bldg, 300 N. Los Angeles St. Los Angeles, CA.

MC 103490 (Sub-75F), Provan Transport Corp., transferred to Modified Procedure.

MC 115841 (Sub-655F), Colonial Refrigerated Transportation, Inc., now assigned September 17, 1979 (5 days), at Los Angeles, CA is canceled and reassigned to September 17, 1979 (2 days) at Los Angeles, CA, in Room 203, U.S. County Court House, 111 North Hill Street and September 19, 1979 (3 days) at the Monterey Civic Center, Fisherman's Wharf, Monterey, Calif.

MC 127840 (Sub-84F), Montgomery Tank Lines, Inc., now being assigned for continued hearing on October 16, 1979 (4

days) at Chicago, IL, location of hearing room will be by subsequent notice.
 AB-6 (Sub-60F), Burlington Northern, Inc. Abandonment near St. Joseph, MO, and Humeston, IA, in Buchanan, Andrew, DeKalb, Gentry and Harrison Counties, MO and Decatur and Wayne Counties, IA, now being assigned for hearing on October 15, 1979 (1 week) at Chicago, IL, location of hearing room will be by subsequent notice.
 MC 117786 (Sub-48F), Riley Whittle, Inc., transfer to Modified Procedure.

Agatha L. Mergenovich,
 Secretary.

 BILLING CODE 7035-01

[Finance Docket No. 28934 F]

Chicago and North Western Transportation Company Construction of a Line of Railroad in Niobrara and Gosheen Counties, WY and Sioux and Scotts Bluff Counties, NE

AGENCY: Interstate Commerce Commission, Office of Policy and Analysis, Energy and Environment Branch.

ACTION: Notice that in considering the above-entitled application for approval of a planned rail construction project, the Interstate Commerce Commission's Energy and Environment Branch will entertain any comments made at public hearings recently scheduled by the Federal Railroad Administration.

SUMMARY: The Federal Railroad Administration's (FRA) Office of Federal Assistance recently announced that it would hold two public hearings to receive oral comments on the draft environmental impact statement prepared jointly by FRA, the ICC and other agencies with respect to the Chicago and North Western Transportation Company's proposed Coal Line Project. These hearings will be held at Niobrara County High School Auditorium, Lusk, Wyoming on August 28, 1979 at 8:00 p.m. and at Gering High School Auditorium, Gering, Nebraska on August 28, 1979 at 7:00 p.m. Comments will be received from persons who indicate to FRA by August 27, 1979 an intention to testify. The purpose of this notice is to indicate that the Commission's Energy and Environment Branch will give consideration to any comments made at these hearings to the extent that they bear on the application for approval of construction now pending before the Commission.

FOR FURTHER INFORMATION CONTACT: Steve Botts, Energy and Environment Branch, Interstate Commerce Commission, 12th and Constitution

Avenue, Washington, DC 20423, Tel. (202) 275-7917.

[Docket No. AB 7 (Sub No. 86 F)]

Stanley Hillman, Trustee of the Property of Chicago, Milwaukee, St. Paul and Pacific Railroad Company—Abandonment—Portions of Pacific Coast Extension in Montana, Idaho, Washington, and Oregon

AGENCY: Interstate Commerce Commission, Office of Policy and Analysis, Energy and Environment Branch.

ACTION: Notice of intent to prepare an environmental impact statement in the above-entitled proceeding.

SUMMARY: The Commission's Energy and Environment Branch (Branch) intends to prepare an environmental impact statement (EIS) with respect to the action contemplated in the above-entitled proceeding. Although, in light of the expedited procedure adopted by the Commission, no formal scoping meeting has been held, a proposed outline for the Draft Environmental Impact Statement (DEIS) is set forth as an appendix. Comments on the proposed outline are invited.

COMMENTS AND DATES: Written comments should be submitted to the Energy and Environment Branch (Room 5377), Interstate Commerce Commission, 12th and Constitution Ave., NW., Washington, DC, 20423 on or before September 21, 1979.

FOR FURTHER INFORMATION CONTACT: Paul S. Mushovic, telephone nos. 202-275-7916 or 202-347-5298.

Agatha L. Mergenovich,
 Secretary.

Appendix—Preliminary Outline

- i. Cover Sheet.
- ii. Summary (ICC Responsibility).
- iii. Table of Contents.
- iv. List of Appendices.
- 1.0 Description of Proposed Action.
- 1.1 Introduction—General Background.
- 1.11 General Description Entire MILW System.
- 1.12 Reason for Action.
- 1.121 General Update—Status in Court.
- 1.123 BN Inclusion.
- 1.124 UP Acquisition.
- 1.2 Description of Action—Miles City West.
- 1.21 History of Pacific Coast Extension.
- 1.22 Rationale for Development of Regional & Sub-Regional Analysis.¹

¹ The environmental description and analysis will be broken down into four major regions. Sub-regional analyses will be conducted where applicable. The four regions include: Miles City to

Footnotes continued on next page

- 1.221 Cedar Falls & West.
- 1.222 Plummer Jct. to Garcia.
- 1.223 Butte to Spokane.
- 1.224 Miles City to Newcomb.
- 2.0 Discussion of Alternatives to the Proposed Action.

2.1 Introduction to Types of Alternatives Available.

- 2.2 Milwaukee Alternatives.
- 2.21 Continued Operation of Subject Line.
- 2.22 Partial Abandonment.
- 2.23 Liquidation.
- 2.24 Continued Operation of Subject Line and sale/abandonment of other Milwaukee lines.

2.3 Other Alternatives.

- 2.31 Acquisition.
- 2.311 SORE.
- 2.312 Other Carriers.
- 2.3121 UP.
- 2.3122 BN.
- 2.31 Trackage Rights.
- 2.32 Subsidy.
- FRA—State Shipper Interaction.
- 2.33 401 Market Swaps.
- 2.34 USRA—nationalization.
- 3.0 Description of Affected Environment by Region.

3.1 Regional Land Use and Socio Economics of Miles City West.

- 3.11 Old West—Montana.
- 3.12 Pacific Northwest—Idaho and Washington.
- 3.2 General Discussion of Transportation Within Entire Region.

- 3.21 Rail.
- 3.22 Highway.
- 3.23 Barge.
- 3.3 Cedar Falls and West.
- 3.31 Description of Lines.
- 3.311 Condition of line (lengths and weights).

- 3.312 Right-of-Way Acreage.
- 3.313 Communities and Stations.
- 3.314 Significant Structures.
- 3.32 Description of Service (Frequency and Type of Operation).

- 3.33 Discussion of Traffic.
- 3.331 Commodities Moved.
- 3.332 O&D Origin and Destination (General).

3.333 Traffic Volumes (Detailed where appropriate).

- 3.334 Interchange and Overhead Traffic.
- 3.34 Regional and Local Environment.
- 3.341 Socio-Economic.
- 3.3411 Economic Base or Principal Activity.

- 3.3412 Direct Employment From Railroads.

Permanent Authority Decisions Applications; Decision-Notice

The following applications, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's Rules of Practice (49 CFR 1100.247).

- 3.3442 Endangered Flora and Fauna.
- 3.3443 Major Waterways.
- 3.3444 Significant Aquatic and Terrestrial Habitats.

3.4 Plummer Jct to Garcia.

3.5 Butte to Spokane (Same Detail as Above).

3.6 Miles City to Newcomb.

4.0 Description of Impacts of Proposed Action (by Region).

4.1 Introduction—Types of Impacts to be Anticipated.

4.2 Discussion of Cumulative Transportation Impacts.

4.21 General Overview of Energy Impacts.

4.3 Cedar Falls and West (Specific Impact Section).

4.311 Land Use and Development Plans.

4.312 Transportation.

4.313 Employment.

4.314 Economic Base—Taxes, Etc.

4.315 Historic Archaeological and Cultural Resources.

4.32 Natural Environment.

4.321 Air Quality.

4.322 Sound Levels/Noise.

4.323 Water Quality and Waterways.

4.324 Significant Aquatic and Terrestrial Habitats—Endangered Flora and Fauna.

4.4 Plummer Jct to Garcia.

4.5 Butte to Spokane (Same Detail as Above).

4.6 Miles City to Newcomb.

5.0 Alternatives—Discussions of Detailed Impacts.

5.1 MILW's Alternatives.

5.11 Continued Operation of Subject Line.

5.12 Partial Abandonment.

5.121 Contiguous to Core.

5.122 Truncated from Core.

5.2 Other Alternatives.

5.21 Acquisition.

5.211 SORE.

5.212 Other Carriers.

5.2121 UP.

5.2122 BN.

5.22 Trackage Rights.

5.3 Subsidy.

FRA State Shipper.

5.4 401 Market Swaps.

6.0 Mitigating Measures.

6.1 Introduction.

6.2 Directed Service.

6.3 Other Mitigating Measures.

6.31 Suitability for Alternative Public Use.

6.32 Rail Banking, etc.

7.0 Discussion of Adverse Impacts Which Cannot be avoided.

8.0 Relationship Between Short Term Uses and Long Term Productivity.

9.0 Irreversible and Irrecoverable Commitment of Resources.

10.0 List of Preparers.

Name-Title-Area of expertise and section responsibility.

[FR Doc. 79-26662 Filed 8-27-79; 8:45 am]
 BILLING CODE 7035-01-M

These rules provide, among other things, that a petition for intervention, either in support of or in opposition to the granting of an application, must be filed with the Commission within 30 days after the date notice of the application is published in the Federal Register. Protests (such as were allowed to filings prior to March 1, 1979) will be rejected. A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that it (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(l) setting forth the specific grounds upon which it is made, including a detailed statement of petitioner's interest, the particular facts, matters, and things relied upon, including the extent, if any, to which petitioner (a) has solicited the traffic or business of those supporting the application, or, (b) where the identity of those supporting the application is not included in the published application notice, has solicited traffic or business identical to any part of that sought by applicant within the affected marketplace the extent to which petitioner's interest will be represented by other parties, the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, and the extent to which participation by the petitioner would broaden the issues or delay the proceeding.

Petitions not in reasonable compliance with the requirements of the rules may be rejected. An original and one copy of the petition to intervene shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named.

Section 247(f) provides, in part, that an applicant which does not intend to timely prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If an applicant has introduced rates as an issue it is noted. Upon request, an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broader amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administrative acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the present and future public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a petitioner, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. 10101 subject to the right of the Commission, which is expressly reserved, to impose such terms, conditions or limitations as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient petitions for intervention, filed within 30 days of publication of this decision-notice (September 26, 1979) (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of the decision-notice. To the extent that

the authority sought below may duplicate an applicant's other authority, such duplication shall be construed as conferring only a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

[Volume No. 111]

Decided: June 29, 1979.

By the Commission, Review Board Number 1, Members Carleton, Joyce and Jones.

MC 25869 (Sub-150F), filed March 23, 1979. Applicant: NOLTE BROS. TRUCK LINE, INC., 6217 Gilmore Avenue, Omaha, NE 68107. Representative: Irwin Schwartz, P.O. Box 7184 South Omaha Sta., Omaha, NE 68107. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except articles of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, in tank vehicles, and those requiring special equipment), from the facilities of Montgomery Ward and Company, at or near Chicago, IL, to Kansas City, MO, Albuquerque, NM, and points in IA, restricted to the transportation of traffic destined to the facilities of Montgomery Ward and Company. (Hearing site: Chicago, IL, or Omaha, NE.)

MC 78118 (Sub-43F), filed March 28, 1979. Applicant: W. H. JOHNS, INC., 35 Witmer Road, Lancaster, PA 17602. Representative: Christian V. Graf, 407 North Front Street, Harrisburg, PA 17101. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *iron and steel articles*, and (2) *materials, equipment, and supplies* used in the manufacture and distribution of the commodities in (1) above, between Downingtown and Coatesville, PA, on the one hand, and, on the other, points in MD, restricted to the transportation of traffic originating at the named origins and destined to the indicated destinations. (Hearing site: Washington, D.C.)

MC 78118 (Sub-44F), filed April 3, 1979. Applicant: W. H. JOHNS, INC., 35 Witmer Road, Lancaster, PA 17602. Representative: Christian V. Graf, 407 North Front St., Harrisburg, PA 17101. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *thermal blankets, undergarments, and cotton underwear*, from Tamaqua, Tower City,

Williamstown, Phoenixville, Gilbertsville, and Hometown, PA, to points in NJ, DE, PA, MD, VA, NC, SC, OH, and DC; and (2) *thread, yarn, elastic, and polyethylene bags*, in the reverse direction, restricted to the transportation of traffic originating at the named origins and destined to the indicated destinations. (Hearing site: Washington, DC, or Harrisburg, PA.)

MC 108119 (Sub-134F), filed April 4, 1979. Applicant: E. L. MURPHY TRUCKING COMPANY, a corporation, P.O. Box 43010, St. Paul, MN 55164. Representative: Andrew R. Clark, 1000 First National Bank Building, Minneapolis, MN 55402. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *vehicle wheel alignment equipment*, between Englewood, CO, on the one hand, and, on the other, points in the United States (except AK and HI); and (2) *parts and attachments* for the commodities in (1) above, from Englewood, CO, to points in the United States (except AK and HI). (Hearing site: Denver, CO, or Minneapolis, MN.)

MC 113528 (Sub-39F), filed April 3, 1979. Applicant: MERCURY FREIGHT LINES, INC., P.O. Box 1247, Mobile, AL 36601. Representative: Joy Stephenson (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *iron and steel articles* (except those which because of size or weight require the use of special equipment), from points in Georgetown County, SC, to points in GA, KY, NC, MS, TN, and those in AL on and north of U.S. Hwy 278. (Hearing site: Columbia, SC, or Birmingham, AL.)

MC 113678 (Sub-78F), filed March 28, 1979. Applicant: CURTIS, INC., 4810 Pontiac Street, Commerce City, CO 80022. Representative: Roger M. Shaner (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *foodstuffs* (except commodities in bulk), and (2) *meats, meat products, meat byproducts, and articles distributed by meat-packing houses*, except foodstuffs and commodities in bulk, from points in CO, to points in the United States (except AK, HI, and CO). (Hearing site: Denver, CO.)

Note.—By this application applicant seeks, in part, to consolidate its existing certificates, and, in part, to convert present joint-line service to single-line service. Not a "substitution" application under Ex Parte MC-109.

MC 117439 (Sub-2F), filed March 28, 1979. Applicant: BULK TRANSPORT,

INC., 550 Florida Boulevard, P.O. Box 1429, Baton Rouge, LA 70821. Representative: Edward A. Winter, 235 Rosewood Drive, Metairie, LA 70005. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *dry fertilizer*, from the facilities of Monsanto Company, at or near Luling, LA, to points in AL, GA, and MS. (Hearing site: Baton Rouge or New Orleans, LA.)

MC 118959 (Sub-207F), filed March 28, 1979. Applicant: JERRY LIPPS, INC., 130 South Frederick Street, Cape Girardeau, MO 63701. Representative: Donald B. Levine, 39 South LaSalle Street, Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *such merchandise* as is dealt in or used by grocery and food business houses, between the facilities of Ralston Purina Company, at or near Clinton and Davenport, IA, on the one hand, and, on the other, points in IL, IN, KS, MI, MN, MO, ND, NE, OH, SD, and WI. (Hearing site: St. Louis, MO, or Chicago, IL.)

MC 118959 (Sub-208F), filed March 28, 1979. Applicant: JERRY LIPPS, INC., 130 South Frederick Street, Cape Girardeau, MO 63701. Representative: Donald B. Levine, 39 South LaSalle Street, Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *canned and preserved foodstuffs*, from the facilities of Heinz USA, at or near Muscatine and Iowa City, IA, to points in KS, MO, and IL, restricted to the transportation of traffic originating at the named origins and destined to the indicated destinations. (Hearing site: Washington, DC, or Pittsburgh, PA.)

MC 119789 (Sub-564F), filed March 27, 1979. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 226188, Dallas, TX 75266. Representative: James K. Newbold, Jr. (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *candy and chewing gum* (1) from Holland, MI, to Dallas, TX, Kansas City, MO, San Jose, CA, Milwaukee, OR, Atlanta, GA, Charlotte, NC, Jacksonville, FL, Baltimore, MD, and North Bergen, NJ and (2) between Holland, MI, and Canajoharie, NY. (Hearing site: New York, NY.)

MC 119789 (Sub-565F), filed April 3, 1979. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 226188, Dallas, TX 75266. Representative: James K. Newbold, Jr.

(same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *such commodities* as are dealt in by grocery stores, drug stores, and hardware stores (except commodities in bulk), and (2) *materials and supplies* used in the manufacture of the commodities in (1) above, (except commodities in bulk), between the facilities of Boyle-Midway, at or near (a) Atlanta, GA, and (b) Dallas, TX (Hearing site: New York, NY.)

MC 119789 (Sub-601F), filed April 3, 1979. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 226188, Dallas, TX 75266. Representative: James K. Newbold, Jr. (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *electrical capacitors and parts for electrical capacitors*, from Pickens, SC, to points in NE. (Hearing site: Greenville, SC.)

MC 125708 (Sub-160F), filed March 27, 1979. Applicant: THUNDERBIRD MOTOR FREIGHT LINES, INC., 425 West 152d Street, East Chicago, IN 46312. Representative: Anthony C. Vance, 1307 Dolley Madison Boulevard, McLean, VA 22101. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *fertilizer and fertilizer materials*, between points in IL, IN, MO, KY, and TN. (Hearing site: St. Louis, MO.)

MC 127579 (Sub-19F), filed April 4, 1979. Applicant: HAULMARK TRANSFER, INC., 1100 North Macon Street, Baltimore, MD 21205. Representative: Glenn M. Heagerty (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *books*, between points in CT, MD, NJ, NY, and PA, on the one hand, and, on the other, points in AZ, CA, CO, CT, ID, MD, MT, NJ, NY, NV, NM, OR, PA, UT, TX, WA, and WY. (Hearing site: Washington, DC.)

Note.—Dual operations may be involved.

MC 133689 (Sub-266F), filed April 2, 1979. Applicant: OVERLAND EXPRESS, INC., 719 First Street, Southwest, New Brighton, MN 55112. Representative: Robert P. Sack, P.O. Box 6010, West St. Paul, MN 55118. (Hearing site: Minneapolis, MN, or Kansas City, KS.)

MC 111401 (Sub-557F), filed April 6, 1979. Applicant: GROENDYKE TRANSPORT, INC., P.O. Box 632, 2510 Rock Island Blvd., Enid, OK 73701. Representative: Victor R. Comstock (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over

irregular routes, transporting (1) *petroleum products*, in bulk, in tank vehicles, from Woodriver, IL, to points in AR, OK, LA, MS, and TX; (2) *petroleum lubricating oil*, in bulk, in tank vehicles, from Good Hope, LA, to Price, UT; and (3) *inedible tallow*, in bulk, in tank vehicles, from Roswell, NM, to Houston, TX. (Hearing site: New Orleans, LA, or Houston, TX.)

MC 115181 (Sub-38F), filed April 9, 1979. Applicant: HAROLD M. FELTY, INC., R. D. #1, Box 148, Pine Grove, PA 17963. Representative: John W. Dry, 541 Penn St., Reading, PA 19601. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *coal*, from points in Schuylkill and Northumberland Counties, PA, to points in Charles, Calvert, and St. Marys Counties, MD, VA, and DC; (2) *coal*, from points in Dauphin, Carbon, and Luzerne Counties, PA, to points in MD, VA, and DC; (3) *cinders*, from points in Schuylkill, Lebanon, Lancaster, Berks, Northumberland, and Snyder Counties, PA, to points in DE, MD, NJ, NY, VA, and DC; (4) *brick and clay products*, from Gonic, NH, to points in DE, MD, NJ, PA, VA, and DC; (5) *brick*, from Perry Township (Berks County), PA, to points in WV; and (6) *brick*, from Wyomissing, PA, to points in MD, ME, NH, RI, VA, VT, WV, and DC. (Hearing site: Reading or Philadelphia, PA.)

MC 115311 (Sub-350F), filed April 9, 1979. Applicant: J. & M. TRANSPORTATION CO., INC., P.O. Box 488, Milledgeville, GA 31061. Representative: K. Edward Wolcott, P.O. Box 872, Atlanta, GA 31061. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *plastic pipe and plastic fittings*, and (2) accessories used in the installation of the commodities in (1) above, from the facilities of Phillips Driscopipe, Inc., at or near Startex, SC, to those points in the United States in and east of MI, IL, KY, TN, AR and LA; and (3) *materials and supplies* used in the manufacture and distribution of the commodities in (1) and (2) above (except commodities in bulk), in the reverse direction. (Hearing site: Atlanta, GA.)

MC 119741 (Sub-168F), filed April 11, 1979. Applicant: GREEN FIELD TRANSPORT COMPANY, INC., 1515 Third Ave. NW., P.O. Box 1235, Fort Dodge, IA 50501. Representative: D. L. Robson (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *foodstuffs* (except in bulk, in tank vehicles), from the facilities of

Lloyd J. Harris Pie Co., at Louisville, KY, to points in CO, IA, KS, MN, MO, NE, ND, OK, and SD, restricted to the transportation of traffic originating at the named origin and destined to the indicated destinations. (Hearing site: Detroit, MI.)

MC 124170 (Sub-119F), filed April 9, 1979. Applicant: FROSTWAYS, INC., 3000 Chrysler Service Dr., Detroit, MI 48207. Representative: William J. Boyd, 600 Enterprise Dr., Suite 222, Oak Brook, IL 60521. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *meats, packing-house products, and commodities used by packing houses*, as described in Appendix I to the Report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except dairy products, hides, and commodities in bulk), between the facilities of (a) Lauridsen Foods, Inc., at or near Britt, IA, and (b) Armour and Company, at or near Mason City, IA, on the one hand, and, on the other, points in AL, CT, DE, FL, GA, IL, IN, KY, LA, MA, MD, ME, MI, MS, NH, NJ, NY, NC, OH, PA, RI, SC, TN, VA, VT, WV, and DC, restricted to the transportation of traffic originating at or destined to the named facilities. (Hearing site: Chicago, IL, or Washington, DC.)

MC 126111 (Sub-10F), filed April 6, 1979. Applicant: SCHAETZEL TRUCKING COMPANY, INC., 520 Sullivan Drive, Fond du Lac, WI 54935. Representative: Richard C. Alexander, 710 N. Plankinton Ave., Milwaukee, WI 53203. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *sweetened condensed milk*, from Fond du Lac, WI, to points in IL and IN, under continuing contract(s) with Galloway-West Company, a division of Borden Company, Inc., of Fond du Lac, WI. (Hearing site: Milwaukee, WI.)

MC 135070 (Sub-44F), filed April 9, 1979. Applicant: JAY LINES, INC., P.O. Box 30180, Amarillo, TX 79120. Representative: Gailyn L. Larsen, P.O. Box 82816, Lincoln, NE 68501. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *foodstuffs*, from (a) Kansas City, MO, and (b) the facilities of Banquet Foods Corporation, at or near Milan, Carrollton, Macon, and Marshall, MO, to points in AR, LA, NM, OK, and TX. Hearing site: Kansas City or St. Louis, MO.)

Note.—Dual operations may be involved.

MC 135410 (Sub-54F), filed April 12, 1979. Applicant: COURTNEY J.

MUNSON, d.b.a. MUNSON TRUCKING, P.O. Box 266, Monmouth, IL 61462. Representative: Stephen H. Loeb, Suite 200, 205 West Touhy Ave., Park Ridge, IL 60068. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *meats, meat products and meat byproducts, and articles distributed by meat-packing houses*, as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the facilities of Fischer Packing Co., a subsidiary of Wilson Foods Corporation, at Louisville, KY, to points in CT, DE, MA, MD, ME, NH, NJ, NY, PA, RI, VT, VA, and DC, restricted to the transportation of traffic originating at the named origin and destined to the indicated destinations. (Hearing site: Dallas, TX, or Kansas City, MO.)

MC 138420 (Sub-35F), filed April 13, 1979. Applicant: CHIZEK ELEVATOR & TRANSPORT, INC., P.O. Box 147, Cleveland, WI 53063. Representative: Wayne W. Wilson, 150 East Gilman St., Madison, WI 53703. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *paper and paper products*, from Ashland, Green Bay, Menasha, Neenah, and Wausau, WI, to points in IN, KY, MI, MN, MO, OH, and those in IL on and south of U.S. Hwy 136, restricted to the transportation of traffic originating at the facilities of American Can Company. (Hearing site: Madison or Neenah, WI.)

MC 139171 (Sub-4F), filed April 6, 1979. Applicant: CONTROLLED DELIVERY SERVICE, INC., P.O. Box 1299, City of Industry, CA 91749. Representative: Patricia M. Schnegg, 707 Wilshire Boulevard, Suite 1800, Los Angeles, CA 90017. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and articles requiring special equipment), between points in CA, UT, and TX, on the one hand, and, on the other, points in the United States (except AK and HI), under continuing contract(s) with Wasatch Shippers Association, Inc., of Salt Lake City, UT. (Hearing site: Los Angeles, CA.)

MC 143701 (Sub-8F), filed April 9, 1979. Applicant: HODGES FREIGHT LINES, INC., 5733 Airline Highway OFC 805, Metairie, LA 70003. Representative: Lester C. Arvin, 814 Century Plaza Bldg.,

Wichita, KS 67202. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *prepared animal food and pet supplies*, and (2) *materials and supplies* used in the manufacture and distribution of the commodities in (1) above (except commodities in bulk), between the facilities of Hills Division of Riviana Foods, Inc., at or near (a) Topeka, KS, (b) Commerce City and Hayward, CA, and (c) Miami, FL, on the one hand, and, on the other, points in the United States (except AK, CT, DE, HI, ME, NH, NY, MA, and VT). (Hearing site: Kansas City, MO, or New Orleans, LA.)

MC 145330 (Sub-1F), filed April 9, 1979. Applicant: GILMER ALLISON, d.b.a. ALLISON TRUCKING, Route 3, Box 123A, Lawndale, NC 28090. Representative: W. C. Mauldin, 417 Old Post Rd., Cherryville, NC 28021. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *bone meal, meat meal, fish meal, crab meal, cracker meal, gluten meal, and soybean meal*, between points in GA, MD, NC, SC, and VA. (Hearing site: Charlotte or Raleigh, NC.)

MC 145601 (Sub-2F), filed March 29, 1979. Applicant: MORGAN COUNTY TRUCKING, INC., 1010 East Nutter Street, Martinsville, IN 46151. Representative: Warren C. Moberly, 777 Chamber of Commerce Building, 320 North Meridian Street, Indianapolis, IN 46204. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *brick, clay, sewer pipe and fittings, and clay products*, (a) from points in Warren, Tippecanoe, Clinton, Hamilton, Madison, Henry, Rush, Hancock, Marion, Boone, Hendricks, Montgomery, Fountain, Putnam, Parke, Vermillion, Vigo, Clay, Owen, Morgan, Johnson, Shelby, Decatur, Bartholomew, Brown, Monroe, Greene, Sullivan, Knox, Daviess, Martin, Lawrence, Jackson, Jennings, Scott, Washington, Orange, Dubois, Pike, Gibson, Posey, Vanderburgh, Warrick, Spencer, and Crawford Counties, IN, to points in OH, PA, IL, MI, KY, NC, SC, VA, TN, GA, AL, AR, CT, DE, IA, KS, MD, MA, MN, MS, MO, NE, NH, NJ, NY, ND, OK, RI, SD, VT, WV, and WI, and (b) from points in PA, IL, OH, IA, GA, KS, KY, NE, NC, SC, TN, VA, and WV, to the origin points named in (1)(a) above, and (c) from points in AL, KY, MS, TN, and VA, to points in IL; and (2) *sand*, in bags, from Ottawa, IL, to Brazil, IN. (Hearing site: Indianapolis, IN, Chicago, IL, or Washington, DC.)

MC 146631 (Sub-2F), filed April 9, 1979. Applicant: WILLIAM W. BLAUVELT, d.b.a. BILLY B TRUCKING COMPANY, P.O. Box 1304, Oshkosh, WI 54901. Representative: Michael S. Varda, 121 South Pinckney St., Madison, WI 53703. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *paper and paper articles*, from Oshkosh, WI, to points in AZ, CA, NV, OR, and WA, under continuing contract(s) with Hoffmaster Co., Inc., of Oshkosh, WI. (Hearing site: Milwaukee, WI, or Chicago, IL.)

MC 146970 (Sub-1F), filed April 13, 1979. Applicant: J & J GUTIERREZ, INC., Box 336, Elsa, TX 78543. Representative: Thomas F. Sedberry, 801 Vaughn Building, Austin, TX 78701. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *foodstuffs* (except in bulk), from the facilities of Texsun Corporation, in Hidalgo and Cameron Counties, TX, to those points in the United States in and west of NM, CO, WY, and MT (except AK and HI). (Hearing site: McAllen or San Antonio, TX.)

MC 147140F, filed April 10, 1979. Applicant: MARK RENNER, d.b.a. MT. HOOD TIMBER PRODUCTS, P.O. Box 17370, Portland, OR 97217. Representative: Mark Renner (same address as applicant). To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *wood chips, sawdust, and hog fuel*, from Clatskanie, OR, to Longview, WA; and (2) *lumber*, from Clatskanie, OR, to Kalama, WA, under continuing contract(s) in (1) and (2) above with Beaver Lumber Company of Clatskanie, Inc., of Clatskanie, OR. (Hearing site: Portland, OR.)

BILLING CODE 7035-01-M

[Permanent Authority Decisions Volume No. 116]

Permanent Authority Decisions Applications; Decision-Notice

Decided: July 19, 1979.

The following applications filed on or before February 28, 1979, are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). For applications filed before March 1, 1979, these rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the

date notice of the application is published in the Federal Register. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

On cases filed on or after March 1, 1979, petitions for intervention either with or without leave are appropriate.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If applicant has introduced rates as an issue it is noted. Upon request an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exceptions of those applications involving duly noted

problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. § 10101 subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. § 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice, to the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 3 Members Parker, Fortner and Hill.
Agatha L. Mergenovich,
Secretary.

MC 112801 (Sub-223F), filed January 30, 1979, previously noticed in the

Federal Register issue of May 9, 1979. Applicant: TRANSPORT SERVICE CO., a Corporation, 2 Salt Creek Lane, Hinsdale, IL 60521. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, DC 20001. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting commodities, in bulk, in tank vehicles, (1) between points in IL, IN, IA, KS, KY, MI, MN, MO, NE, OH, TN, and WI, and (2) between points in the United States (except AK and HI). (Hearing site: Chicago, IL, or Washington, DC.)

Note.—Insofar as the transportation of hazardous materials is authorized the certificate shall expire in 5 years.

Note.—this republication includes WI in part (1).

BILLING CODE 7035-01-M

[No. 33374 (Sub-1)]

Petition To Vacate Order Prescribing Divisions on Textiles; Notice of Proceeding

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proceeding.

SUMMARY: A petition was filed by the Catawba Trucking Co., Inc., (Catawba), requesting that the Commission vacate its decision in No. 33374, *Divisions—Textiles, South Carolina to the East*, served March 28, 1963 and amended May 15, 1974. Catawba argues that the decision is obsolete and unduly inhibits its operations and services. The Commission is instituting this proceeding to address this issue and decide whether our prior decision in No. 33374 should be retained, modified or vacated.

DATES: Interested parties are asked to submit a statement of intent to participate 20 days after the date of publication of this notice. Parties should indicate whether they intend to actively participate or whether they merely wish to receive copies of the decision and releases of the Commission. An original and one copy of the statement regarding intent to participate must be filed.

Active participants must serve copies of their statement on all parties on the service list. An original and six copies of written statements must be filed with the Commission.

The filing and service of statements shall be as follows:

(a) Opening statement of facts and arguments by petitioners and any parties supporting petitioners within 40 days from the service date of this order.

(b) 30 days after that date, statement of facts and argument by persons opposing the proposed relief.

(c) Reply by petitioners and any supporting parties 20 days thereafter.

ADDRESSES: Statements and replies should be sent to: Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Janice M. Rosenak or Harvey Gobetz, Washington, D.C. 20423 (202-275-7893).

Copies of the decision being issued concurrently with this notice may be obtained by calling: 275-7428.

Issued in Washington, D.C., _____, 1979.

By the Commission, Chairman O'Neal.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 29022]

Southwest Forest Industries, Inc., and SWF Gulf Coast, Inc. Control the Atlanta and St. Andrews Bay Railway Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts the acquisition of control of the Atlanta & St. Andrews Bay Railway Company by Southwest Forest Industries, Inc., and its wholly owned subsidiary SWF Gulf Coast, Inc., from the requirements of 49 U.S.C. 11343-11347, which requires prior consideration and approval of the transaction by the Commission.

DATE: Effective on August 28, 1979.

FOR FURTHER INFORMATION CONTACT: Michael Erenberg, (202) 275-7545.

SUPPLEMENTARY INFORMATION:

Background

Southwest Forest Industries, Inc. (SWF), SWF Gulf Coast, Inc. (Gulf), and the Atlanta & St. Andrews Bay Railway Co. (Bay Railway), filed a petition for exemption under 49 U.S.C. 10505 on April 17, 1979, requesting that the proposed control of Bay Railway by SWF and Gulf be exempted from the requirements of obtaining prior Commission approval under 49 U.S.C. 11343-11347. We published a notice in the Federal Register on May 17, 1979, 44 FR 29816 (1979) requesting comments on the proposed exemption be received on or before 30 days after publication of the notice. Comments were filed in favor and in opposition to the exemption.

The Transaction

SWF, a non carrier engaged in manufacturing and marketing paper, paper products, packaging and building materials, and its wholly owned subsidiary Gulf seek to acquire control of the Bay Railway, a Class III railroad, as the result of a purchase of a paper mill from the International Paper Company (IP). SWF currently controls the Apache Railway Co. (Apache), a Class III railroad, located in Arizona. Apache operates 74.4 miles of main line between Holbrook and McNary, AZ, and also serves Snowflake and Bell, AZ. It connects with the Atchison, Topeka and Santa Fe Railway Company at Holbrook, AZ.

Bay Railway owns and operates approximately 81 miles of main line, 7.16 miles of Branch line, and 50.38 miles of yard and passing track, from Panama City, FL to Dothan, AL with a branch from Campbellton to Graceville, FL. Bay Railway connects with the Louisville and Nashville Railroad at Cottondale and Graceville, FL, and with the Seaboard Coast Line Railroad Company, Central of Georgia Railroad Company Inc., and the Hartford and Slocumb Railroad Company at Dothan, AL. Bay Railway has been a historically profitable railroad, deriving 85 to 75 percent of its operating revenues in the IP paper mill operations at Panama City. It had assets of \$14,240,569 as of December 31, 1978, and gross revenues of \$8,127,406 for 1978 with net income of \$1,785,941.

On March 1, 1979, SWF and Gulf agreed to acquire Bay Railway in conjunction with the acquisition of the paper mill, associated facilities, and 425,000 acres of timberland in Alabama, Florida, and Georgia, from IP. Gulf is accomplishing the purchase with \$150 million in cash plus 350,000 shares of SWF's 9 percent cumulative preferred stock (valued at \$70 million).

The purpose of the transactions is to preserve the paper mill operations in Panama City, FL, which are Bay Railway's sustaining source of freight revenue, and to preserve Bay Railway's existing services for the benefit of paper operations, shippers, and receivers who rely on Bay Railway service.

Parties to the Proceeding

Comments in opposition where filed by J.C. Holden Construction Co., Antoinett Fashions and Florists, A.E. Shipes Garden Shops, Hunts Excavating Service, Helen Ingram, and the Railway Labor Executives' Association. Holden, Antoinett and Hunt's allege no benefit from Gulf and SWF's control of Bay Railway. Shipes and Hunt's both request

a hearing. Shipes explains it can have no knowledge of the future operations without a public hearing. Ingram and RLEA both contend control will harm employees of the Bay Railway.

Thirty-one comments were filed in support of the exemption. These include comments filed by Governors Bob Graham of Florida and Fob James of Alabama, United States Senators Lawton Chiles and Richard (Dick) Stone, United States Congressmen William L. Dickinson and Earl Hutto, the State of Alabama Highway Department, the Florida Department of Transportation, and the State of Florida Public Service Commission. From Panama City, FL support was expressed by Daffin Merchantile Company, Empiregas, Inc. of Panama City, Fillette, Green & Co., Inc., Gulf Asphalt Corporation, North Florida Brick Co., Panama City Port Authority, Panama Machinery and Supply Co., Ryan-Walsh Stevedoring Co., Inc., Sykes Concrete Pipe Co., Sunshine-Jr. Stores, Inc., and Superior Propane Gas Company. From Dothan, AL, support was indicated by the Central Bank of Dothan, N.A., the First Alabama Bank, the Hartford and Slocumb Railroad Company, and Red Fox Fertilizers, Inc. Support was also expressed by Alimenta (U.S.A.) Inc., of Atlanta, GA; Gold Kist, Inc., of Campbellton, FL; Great Southern Paper of Cedar Springs, GA; Pate Stevedore Company of Pensacola, FL; Southern Railway System of Washington, DC; and Sylvachem Corporation of Port St. Jose, FL.

The parties supporting the exemption all make the same general arguments. They point out that the acquisition of the IP paper mill by SWF and Gulf will save approximately 1,000 jobs since IP intended to close the paper mill. Keeping the paper mill open will also preserve approximately 60 percent of Bay Railway's freight revenue. This will result in Bay Railway's viability and existing services being preserved. It is stated that Bay Railway will benefit from its relationship with SWF and Gulf because they are strong companies with the ability to attract financing and management talent.

The supporting parties also point out that we will retain jurisdiction over Bay Railway, that no questions of public interest are raised requiring protracted proceedings, and that Bay Railway will assume no financial obligations. The employees point out that they will not be affected, no environmental impact will ensue, and that no other carriers will be affected or involved. Additionally they argue that this proposed exemption is within the

purpose and intent of the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94-210.

Statutory Criteria

As pertinent here, 49 U.S.C. 10505 provides that we shall exempt a rail carrier transaction because of its limited scope if we find that application of a provision of 49 U.S.C. Subtitle IV, (1) is not necessary to carry out the national transportation policy, (2) would place an unreasonable burden on a person, class of persons, or interstate and foreign commerce, and (3) serve little or no useful public purpose. We may act under 49 U.S.C. 10505 only after an opportunity for a proceeding. The petition engaged our jurisdiction and the notice and request for comments on the petition for exemption provided the opportunity for a proceeding. We must now determine whether the proposed exemption meets the statutory requirements.

Scope of the transaction. The threshold inquiry is whether the transaction is limited in scope. SWF and Gulf are non-carriers. They own Apache which only operates in Arizona. They are seeking to control Bay Railway which only operates in Florida and Alabama. The tracks of Apache and Bay Railway are geographically distant from each other.

In its petition, and the application filed for authority under 49 U.S.C. 11344, SWF, Gulf, and Bay Railway state that there would be no operational changes resulting from SWF's control of Bay Railway, and that no employees of Bay Railway would be adversely affected. The comments support this. Bay Railway would continue to be used as the railway to originate the shipments from the former IP paper mill.

The record demonstrates that the proposal would not change operations, or affect competitors or employees. We conclude that acquisition of control of Bay Railway by SWF and Gulf, while they control Apache, would constitute a transaction of limited scope.

National Transportation Policy. In order to insure the development, coordination, and preservation of a transportation system that meets the transportation needs of the United States, Congress has declared that it is the policy of the United States Government to provide for the impartial regulation of the modes of transportation subject to 49 U.S.C. Subtitle IV. See 49 U.S.C. 10101. Impartial regulation is achieved through (1) recognizing and preserving inherent advantages of each mode; (2) promoting safe, adequate, economical, and efficient transportation; (3) encouraging sound

economic conditions in transportation, including sound economic conditions among carriers; (4) encouraging the establishment and maintenance of reasonable rates for transportation without unreasonable discrimination or unfair destructive competitive practices; (5) cooperating with each State and official of each state on transportation matters; and (6) encouraging fair wages and working conditions in the transportation industry.

Regulation of SWF's and Gulf's control of Bay Railway is not necessary to carry out the goals of the national transportation policy. The proposed transactions have no effect on any of the policy considerations since the only change involves indirect control of a minor Southeastern rail carrier by a non-carrier corporation which controls another minor Southwestern rail carrier.

Burden. SWF, Gulf, and Bay Railway have filed an application under 49 U.S.C. 11344, complying with the I.C.C. *Railroad Acquisition, Control, Merger, Consolidation Coordination Project, Trackage Rights, and Lease Procedures*, 49 C.F.R. Part 1111 (1978). Although this application has been filed, the proceeding is governed by the time limits of 49 U.S.C. 11345. Since the contract between SWF and IP calls for daily interest payments, the statutory time delays inherent in the processing of the application create an unreasonable burden. Where, as here, there is minimal opposition to, and massive public support of the proposal, and the transaction is of limited scope and minimal national transportation importance, the development of a massive record on which to base a decision would place a grave strain on the applicants and the scarce resources of the Commission. We believe that requiring SWF, Gulf, and Bay Railway to prosecute the application would place an unreasonable burden on them and on interstate and foreign commerce.

Public Purpose. Our function under 49 U.S.C. 11343-11347 is to determine whether a proposed transaction is consistent with the public interest. There is minimal opposition, apparently based on a lack of understanding of the transaction. Additionally, there has been support for the transaction by governmental agencies as well as many shippers who would be affected by the acquisition of the Bay Railway by SWF and Gulf.

The control of Bay Railway by SWF and Gulf is of limited scope and the regulation of it would be both unnecessary and an unreasonable burden. Our review of the application indicates that any further evidence would be minimal and of little provable

value at best (based on the comments which were received). Therefore, we conclude that our review of this matter would serve little or no useful public purpose.

The Application

SWF, Gulf and Bay Railway filed an application under 49 U.S.C. 11344 concurrently with their petition for exemption. Since we have determined to exempt this transaction from the requirements of 49 U.S.C. 11343-11347, further prosecution of the application filed on April 17, 1979, is not necessary. We shall dismiss the application.

We find: (1) The application of the requirements of 49 U.S.C. 11343-11347 to the control of the Atlanta & St. Andrews Bay Railway Company by Southwest Forest Industries, Inc., and its wholly owned subsidiary, SWF Gulf Coast, Inc., is of a limited scope and (a) is not necessary to carry out the national transportation policy of section 10101(b), would be an unreasonable burden on SWF, Gulf, and Bay Railway, and (c) would serve little or no useful public purpose.

(2) This decision is not a major Federal action significantly affecting energy consumption or quality of the human environment.

It is ordered: (1) The acquisition of control of the Atlanta & St. Andrews Bay Railway Company by Southwest Forest Industries, Inc., and SWF Gulf Coast, Inc., is exempted under 49 U.S.C. 10505 from the requirements of 49 U.S.C. 11343-11347 for the limited purpose of SWF and Gulf obtaining control of Bay Railway.

(2) If SWF and Gulf obtain control of Bay Railway, SWF and Gulf shall, within 60 days of obtaining control submit three copies of a sworn statement confirming, immediately after consummation, the date on which consummation has actually taken place.

(3) The exemption authorized by this decision shall remain in effect for three months following the effective date. Consummation to this exemption must take place during that time.

(4) The application filed on April 17, 1979, under 49 U.S.C. 11344 for SWF and Gulf to acquire control of Bay Railway, is dismissed.

(5) Public notice of our action in this proceeding shall be given to the general public by depositing a copy of this decision in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register, for publication therein.

(6) This decision shall be effective August 28, 1979.

Dated: August 21, 1979.

By the Commission. Chairman O'Neal, Vice Chairman Stafford, Commissioners Gresham, Clapp, Christian, Trantum and Gaskins.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Sunshine Act Meetings

Federal Register
Vol. 44, No. 168
Tuesday, August 28, 1979

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL RESERVE SYSTEM, BOARD OF GOVERNORS.

TIME AND DATE: 11:00 a.m., Friday, August 31, 1979.

PLACE: 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed purchase, under competitive bidding, of power supply equipment for the Miami Branch of the Federal Reserve Bank of Atlanta.

2. Proposed modifications to the plans for the new building under consideration for the Federal Reserve Bank of San Francisco.

3. Proposed purchases, under competitive bidding, of automation equipment by the Federal Reserve Bank of New York.

4. Proposed disposition of property by a Federal Reserve Bank.

5. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

6. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE

INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: August 23, 1979.

Griffith L. Garwood,

Deputy Secretary of the Board.

Part II

Department of
Health, Education,
and Welfare

Food and Drug Administration

Classification of Physical Medicine
Devices; Development of General
Provisions

federal register

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 890]

[Docket No. 78N-1182]

Classification of Physical Medicine Devices; Development of General Provisions

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing general rules applicable to the classification of all physical medicine devices. The Medical Device Amendments of 1976 require FDA to classify all medical devices intended for human use into three categories: Class I, general controls; class II, performance standards; and class III, premarket approval. This proposal describes the development of the proposed regulations classifying individual physical medicine devices, which are being published elsewhere in this issue of the Federal Register. This document also describes the activities of the Physical Medicine Device Classification Panel, and FDA advisory committee, that makes recommendations to FDA concerning the classification of physical medicine devices.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910 301-427-7238.

SUPPLEMENTARY INFORMATION:

Device Classification System

The Medical Device Amendments of 1976 (the amendments) (Pub. L. 94-295) establish a comprehensive system for the regulation of medical devices intended for human use. One provision of the amendments, section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c) establishes three categories (classes) of devices, depending on the regulatory controls

needed to provide reasonable assurance of their safety and effectiveness. The three categories are: class I, general controls; class II, performance standards; and class III, premarket approval.

Most devices are not classified under section 513 of the act until after FDA has (1) received a recommendation from a device classification panel (an FDA advisory committee); (2) published the panel's recommendation for comment, along with a proposed regulation classifying the device; and (3) published a final regulation classifying the device. These steps must precede the classification of any device that was in commercial distribution before May 28, 1976 (the date of enactment of the amendments) and that was not previously regarded by FDA as a new drug under section 505 of the act (21 U.S.C. 355). A device that is first offered for commercial distribution after May 28, 1976 and that is substantially equivalent to a device classified under this scheme is classified in the same class as the device to which it is substantially equivalent.

A device that FDA previously regarded as a new drug, or a newly offered device that is not substantially equivalent to a device that was in commercial distribution before the amendments, is classified by statute into class III. These two types of devices are classified into class III without any FDA rulemaking proceedings. The agency determines whether new devices are substantially equivalent to previously offered devices by means of the premarket notification procedure in section 510(k) of the act (21 U.S.C. 360(k)) and Part 807 of the medical device regulations (21 CFR Part 807).

Related Regulations

In the Federal Register of July 28, 1978 (43 FR 32988), the agency issued final regulations describing the procedures for classifying devices intended for human use. These regulations, which were proposed in the Federal Register of September 13, 1977 (42 FR 46028), supplement the agency's regulations in Part 14 (21 CFR Part 14) governing the use of advisory committees. The agency also issued interim device classification procedures in a notice published in the Federal Register of May 19, 1975 (40 FR 21848).

Activities of Panel

Anticipating enactment of the amendments, FDA established several advisory committees to make preliminary recommendations on device classification. The Physical Medicine Device Classification Panel (the Panel)

was originally chartered on October 15, 1974 as the Panel on Review of Physical Medicine (Physiatry) Devices. On January 26, 1976, FDA filed a report of the Panel's tentative classification recommendations with the office of the Hearing Clerk, Food and Drug Administration, and announced the availability of the report to the public by notice published in the Federal Register of June 25, 1976 (41 FR 26245).

On August 9, 1978, the Panel and other preamendment device classification panels were rechartered to reflect their new responsibilities under the amendments. The agency directed each panel to reconsider its preamendments classification recommendations in light of the new requirements. In 1976 and 1977, the Panel reviewed all devices that FDA had referred to it to ensure that its recommendations were in accord with the amendments.

Throughout the Panel's deliberations, interested persons were given an opportunity to present their views, data, and other information concerning the classification of physical medicine devices. The Panel also invited experts to testify and sought information on many devices from the published literature.

In November 1977, the Panel submitted to FDA a preliminary report of its recommendations. The report included a roster of current and former Panel members and consultants and listed all meeting dates. The agency placed a copy of the report in the office of the Hearing Clerk, Food and Drug Administration, and announced its availability to the public by notice published in the Federal Register of November 29, 1977 (42 FR 60792). Also available in the office of the Hearing Clerk are summary minutes from all Panel meetings, verbatim transcripts of meetings held after May 28, 1976 (the date of enactment of the amendments), and all references cited in individual physical medicine device proposed classification regulations. Interested persons may review these documents in the office of the Hearing Clerk (address above), between 9 a.m. and 4 p.m., Monday through Friday.

List of Physical Medicine Devices

In 1972 FDA surveyed device manufacturers to identify the devices that would require classification regulations. Following this survey, FDA developed a list of physical medicine devices. The Panel supplemented the list, utilizing its members' knowledge of physical medicine devices in use. Devices that were solely for experimental or investigational use or

that were not generally available were not included.

FDA is proposing to establish a new Part 890 in Title 21 of the Code of Federal Regulations. Part 890 will consist of sections identifying each physical medicine device or a generic category of devices with a brief narrative description and stating the classification of those devices. A list of the physical medicine devices appears elsewhere in this preamble.

Individual Physical Medicine Device Classification Regulations

Elsewhere in this issue of the Federal Register, the agency is issuing 82 individual proposed regulations to classify each physical medicine device or generic category of devices. The agency is proposing to classify 32 physical medicine devices into class I (general controls), 43 physical medicine devices into class II (performance standards), 2 physical medicine devices into class III (premarket approval), and 5 physical medicine devices into class II for some uses and class III for other uses. The powered finger exerciser was reclassified into class II following a petition for reclassification (under section 513(f) of the act), a notice announcing the reclassification was published in the Federal Register of November 11, 1977 (42 FR 58787). The final order will be published later in another issue of the Federal Register. The agency also is publishing the recommendations of the Panel regarding these devices, as required by section 513(c)(2) and (d)(1) of the act.

Published Panel Recommendations

Each published Panel recommendation concerning a physical medicine device includes the information described below.

1. Identification. Both the Panel recommendation and proposed FDA classification regulation include a brief narrative identification of the device. The identification statement is necessarily broad because it applies to a category or type of device rather than to a specific device. As explained in proposed § 890.1 (21 CFR 890.1), any manufacturer of a newly offered device who files a premarket notification submission under section 510(k) of the act and Part 807 of the regulations cannot show merely that the device is accurately described by the section title and identification provisions of a classification regulation. Although a new device may be described accurately by the title and identification in a classification regulation, it is nevertheless in class III under section 513(f) of the act if it is not substantially

equivalent to a preamendment device (or to a postamendment device that has already been reclassified from class III into class I or class II). It is not practical for FDA to publish an identification of each type of device that is so detailed as to anticipate every product feature that may be relevant in determining whether a new device is substantially equivalent to previous devices classified by the regulation. The agency believes that this problem was recognized in, and addressed by, the premarket notification procedures in section 510(k) of the act.

Accordingly, any manufacturer who submits a premarket notification submission should state why the manufacturer believes that the device is substantially equivalent to other devices in commercial distribution, as required by § 807.87 (21 CFR 807.87), and whether the device is described in a classification regulation.

2. Recommended classification. Each Panel's recommendation describes whether the device is recommended for classification into class I (general controls), class II (performance standards), or class III (premarket approval).

For each device recommended for classification into Class I, the Panel considered whether the device should be exempt from any requirements under certain sections of the act: section 510 (21 U.S.C. 360, registration), section 519 (21 U.S.C. 360i, records and reports), and section 520(f) (21 U.S.C. 360(f), good manufacturing practice requirements). The Panel recommended that the manufacturers of a few class I devices be exempt from section 510, section 519, and section 520(f) of the act. The agency's policy concerning these exemption recommendations is discussed below in the section "Exemptions for Class I Devices."

A Panel recommendation that a device be classified into class II includes the Panel's recommended priority (high or low) for establishing a performance standard for the device. Similarly, each Panel recommendation that a device be classified into class III includes the Panel's recommended priority (high or low) for application of premarket approval requirements to that device. As explained below in the section of this notice concerning "Priorities for Class II and III Devices," the agency is not proposing the establishment of FDA priorities at this time.

3. Summary of reasons for recommendation. The summary of reasons for the Panel's recommendation explains why the Panel believes that a particular device meets the statutory

criteria for classification into class I, II, or III.

Except in those instances in which FDA's classification proposal differs from the Panel's recommendation, the agency is adopting the Panel's summary of reasons as the agency's statement of the reasons for issuing the regulations, as required by section 517(f) of the act (21 U.S.C. 360g(f)).

The summary of reasons for a recommendation identifies any device that is an implant or a life-supporting or life-sustaining device. The summary of reasons for any implant or life-supporting or life-sustaining device that is not recommended for classification into class III also explains why the Panel determined that classification of the device into class III is not necessary to provide reasonable assurance of its safety and effectiveness. The agency provides a similar explanation in the "Proposed Classification" section of the preamble to any proposal to classify an implant or a life-supporting or life-sustaining device into a class other than class III.

4. Summary of data on which the recommendation is based. In many cases, the Panel based its recommendations on the Panel members' personal knowledge of, and clinical experience with, the devices under review. The Panel particularly relied on clinical experience and judgment when considering a simple device that had been used extensively and was accepted widely before the amendments were enacted. The legislative history of the amendments makes clear that the term "data" has a special meaning in section 513(a)(2) of the act, which requires that a Panel recommendation summarize the data on which a recommendation is based. As used in that section, "data" refers not only to the results of scientific experiments, but also to less formal evidence, other scientific information, or judgments of experts (House Committee on Interstate and Foreign Commerce, Medical Device Amendments of 1976, H. Rept. No. 94-853, 94th Congress, 2d Session (1976)). The agency has determined that clinical experience and judgment constitute valid scientific evidence for classifying certain devices.

In many cases, FDA sought more data and information concerning the classification of a device than were cited by the Panel. References to these data and information are found in the "Proposed Classification" section of the preamble to individual physical medicine device regulations. FDA is adopting, as the agency's statement of the basis for issuing the regulation under section 517(f) of the act, the Panel's

summary of the data on which a recommendation to classify a device is based, together with any additional data and information cited in the preamble to the proposed classification regulation.

5. *Risks to health.* In identifying the risks to health presented by physical medicine devices, the Panel recognized that few devices are completely free of risk. The Panel listed the risks it considered most significant, especially those that are unique to the individual device. In some cases, FDA has identified additional risks to health presented by a device. These additional risks are stated in the section of the preamble concerning the "Proposed Classification" of a particular device.

Because the Panel classification recommendations and FDA classification regulations do not identify all risks to health presented by physical medicine devices, future regulations establishing performance standards under section 514 of the act (21 U.S.C. 360d) or requiring premarket approval under section 515(b) of the act (21 U.S.C. 360e(b)) may identify additional risks to health to be addressed by FDA requirements.

Proposed Classification

Each proposed regulation to classify a physical medicine device states whether FDA agrees with the Panel's recommendation, describes the agency's proposed classification of the device, and proposes a new section in Part 890 in which the device classification will be codified.

FDA cautions that the final classification of a device may differ from the proposal. Factors that may cause such a change include comments, the agency's reconsideration of existing data and information, and the agency's consideration of new data and information.

Priorities for Class II and Class III Devices

For a device that the Panel recommends be classified into class II or class III, section 513(c)(2)(A) of the act requires that the Panel recommendation include, to the extent practicable, a recommendation for the assignment of priorities for application to the device of performance standards or premarket approval requirements. In developing its advice concerning priorities (high or low) of devices recommended for classification into class II or class III, the Panel compared the device with other physical medicine devices, based on information available to the Panel members concerning the relative importance of use of the device and the relative risks presented by the device.

The Panel recommended assignment of a high priority only to those class II or class III devices that the Panel believed should receive the agency's immediate attention.

FDA is not proposing at this time to establish priorities for development of performance standards for class II devices or application of premarket approval requirements to class III devices. Section 513(d)(3) of the act authorizes, but does not require, establishment of these priorities. At a later date, however, the agency will establish priorities for the development of standards for class II devices and the application of premarket approval requirements to class III devices. These priorities will be based on the classification panels' recommendations, available resources, and other relevant factors. The agency's priorities will be reflected in the agency's annual budget request and other publicly available documents and may be published in the Federal Register.

The agency intends to proceed as quickly as the statute and classification panel resources permit to require premarket approval of devices classified into class III. Two factors affect the length of time necessary before FDA requires submission of premarket approval applications for any particular device that is classified by an FDA regulation into class III: the number of devices reviewed by a panel and the priority of a particular device in relation to other class III devices considered by a classification panel. For example, where FDA classifies into class III only a few devices within a panel's specialty area, FDA may at the same time also publish regulations under section 515(b) of the act requiring premarket approval for many of the class III devices considered by the panel, regardless of a high or a low priority. Where practical, FDA will publish these section 515(b) regulations during the grace period (30 months) following classification, during which a device classified into class III by FDA regulation may lawfully remain on the market without a premarket approval application. The grace period is provided for in section 501(f) of the act (21 U.S.C. 351(f)).

Exemptions For Class I Devices

Section 513 of the Federal Food, Drug, and Cosmetic Act provides that FDA may exempt a device recommended for classification into class I from a requirement under the following sections of the act: section 510, registration; section 519, records and reports; and section 520(f), good manufacturing practices.

Under section 510 of the act, a person "engaged in the manufacture, preparation, propagation, compounding or processing of . . . a device or devices" must register with FDA (section 510(b) through (j)), file a list of devices (section 510(j)), and notify FDA at least 90 days before beginning commercial distribution of a device (section 510(k)). (See 21 CFR Part 807.) Section 510(g)(4) authorizes the agency to exempt a device from section 510 if it finds that compliance with that section is not necessary for the protection of the public health. In § 807.65 (21 CFR 807.65), FDA has exempted certain classes of persons from section 510 of the act. Several device classification panels have recommended that manufacturers of certain class I devices also be exempted from all or some of the requirements of section 510. The agency has determined that protection of the public health requires that manufacturers of medical devices, other than those already exempt under § 807.65, register and list their products with FDA to ensure that the agency can identify these manufacturers and their products and conduct necessary inspections.

The agency has determined, however, for certain devices, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions. Thus, the agency has proposed to exempt certain devices from Subpart E of Part 807 of the regulations, which implements section 510(k) of the act. The agency does not, at this time, anticipate that premarket approval will be required for these devices. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice of new products within these generic types of devices.

Section 519 of the act authorizes FDA to issue regulations requiring device manufacturers, importers, and distributors to establish and maintain such records, make such reports, and provide such information as the agency may reasonably require to assure that devices are not adulterated or misbranded and to otherwise assure their safety and effectiveness. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation (21 CFR Part 820), published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations in

accordance with section 519 of the act, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempted from the requirements, and FDA will issue exemptions that are appropriate.

The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from most requirements of the device GMP regulation. As explained below, the exemption will not extend to two device GMP records requirements.

The device GMP regulation was published in final form in the Federal Register of July 21, 1978. At the time of the Panel's recommendations, the GMP regulation had not yet been promulgated, and the agency had not yet developed criteria for exempting a class I device from GMP requirements. The agency has now decided that, if any one of the following criteria is met, FDA will consider exempting from the GMP regulation a class I device that is not labeled or otherwise represented as sterile. The agency will not, however, exempt a device from § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, or § 820.198 (21 CFR 820.198), with respect to complaint files. The criteria are:

1. FDA has determined, based on adequate information about current practices in the manufacture of the device and about user experience with the device, that application of the GMP regulation is unlikely to improve the safety and effectiveness of the device.

2. FDA has determined that all possible defects relating to the safety and effectiveness of the device are readily detectable before use, either through visual examination by the user or routine testing before use, e.g., testing a clinical laboratory reagent with positive and negative controls.

3. FDA has determined that any defect in the device that is not readily detectable will not result in a device failure that could have an adverse effect on the patient or other user.

FDA has determined that no device that is labeled or otherwise represented as sterile will be exempted from the device GMP regulation. Such a device must be subject to the entire GMP regulation to ensure that manufacturers

adequately reduce the bioburden (number of microorganisms) on the device and its components during the manufacturing process. This reduction is accomplished through adherence to a comprehensive quality assurance program as required by the GMP regulation, with adequate environmental controls, trained personnel, appropriate maintenance and calibration of sterilization equipment, recordkeeping concerning lot sterility, strict packaging and labeling controls, and other quality assurance measures.

The agency also has determined that no exemption from the device GMP regulation will extend to § 820.180, with respect to general requirements concerning records, or § 820.198, with respect to complaint files. The agency believes that granting exemptions from these sections would not be in the public interest, and that compliance with these sections is not unduly burdensome for device manufacturers. To ensure that device manufacturers have adequate systems for complaint investigation and followup, all such manufacturers are required to comply with the complaint file requirements of § 820.198. All device manufacturers also are required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

In general, FDA has not initiated proposals to exempt manufacturers of class I devices from requirements under section 510, 519, or 520(f) but has acted on the basis of exemption recommendations of the device classification panels. Manufacturers and other interested persons may submit comments on the appropriateness of

exemptions of manufacturers of class I devices that are not the subject of panel exemption recommendations. FDA will consider granting exemptions from the requirement of premarket notification and from the GMP regulation (other than §§ 820.180 and 820.198) according to the policies and criteria discussed above. Comments requesting additional exemptions should be supported by information showing that the exemption of manufacturers of a device from the premarket notification requirement or the GMP regulation (other than §§ 820.180 and 820.198), or both, is consistent with the policies and criteria discussed above.

At the February 7, 1979 meeting of the Physical Medicine Device Classification Panel, representatives from the American Orthotic and Prosthetic Association (AOPA) requested exemptions from premarket notification (section 510(k) of the act), records and reports (section 519 of the act), and good manufacturing practices (section 520(f) of the act) for 40 orthotic/prosthetic devices. The 40 orthotic/prosthetic devices are included in the proposed regulations published in this issue under the following Hearing Clerk docket numbers: 78N-1194, 78N-1200, 78N-1201, 78N-1203, 78N-1204, 78N-1209, and 78N-1210. The Panel members recommended that FDA accept AOPA's request for these exemptions. This recommendation for exemptions will be considered as part of the comments received on the physical medicine device proposed regulations.

List of Physical Medicine Devices

The following is a list showing the physical medicine devices that FDA is proposing to classify, the section and subpart of Part 890 in the Code of Federal Regulations under which the regulation classifying the device will be codified, the docket number of the proposed classification regulation, and the proposed classification of each device.

Section	Device	Docket No.	Class
SUBPART B—PHYSICAL MEDICINE DIAGNOSTIC DEVICES			
890.1100	Powered myoelectric biofeedback equipment	78N-1183	II
890.1175	Electrode cable	78N-1184	I
890.1225	Chronometer	78N-1185	II
890.1375	Diagnostic electromyograph	78N-1186	II
890.1385	Diagnostic electromyograph needle electrode	78N-1187	II
890.1450	Powered reflex hammer	78N-1188	II
890.1575	Force-measuring platform	78N-1189	II
890.1600	Intermittent pressure measurement system	78N-1190	II
890.1615	Miniature pressure transducer	78N-1191	II
890.1850	Diagnostic muscle stimulator	78N-1192	II
890.1925	Isokinetic testing and evaluation system	78N-1193	II
SUBPART C (RESERVED)			
SUBPART D—PHYSICAL MEDICINE PROSTHETIC DEVICES			
890.3025	Prosthetic and orthotic accessories	78N-1194	I
890.3075	Cane	78N-1195	I
890.3100	Mechanical chair	78N-1196	I

Section	Device	Docket No.	Class
SUBPART D—PHYSICAL MEDICINE PROSTHETIC DEVICES —Continued			
890.3110	Electric positioning chair	78N-1187	II
890.3150	Crutch	78N-1188	I
890.3175	Flotation cushion	78N-1189	I
890.3410	External limb orthotic components	78N-1200	I
890.3420	External limb prosthetic components	78N-1201	I

Devices Considered by Two or More Panels

Many devices were reviewed by two or more device classification panels. For these devices, FDA will publish each panel's recommendations and a single proposed classification regulation. The following devices were considered by the Physical Medicine Device

Classification Panel and by other panels:

1. The Neurological Device Classification Panel and the Physical Medicine Device Classification Panel recommended that the chronaximeter be classified into class II. The devices reviewed by the two Panels are essentially the same. Therefore, the agency is proposing a single regulation

classifying the chronaximeter into class II and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

2. The Neurological Device Classification Panel and the Anesthesiology Device Classification Panels recommended that the electromyograph and electromyograph monitor be classified into class II. The Physical Medicine Device Classification Panel recommended that the diagnostic electromyograph be classified into class II. These devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the diagnostic electromyograph device into class II and is publishing the three Panels' recommendations in the proposal appearing elsewhere in this issue of the Federal Register.

3. The General Hospital and Personal Use Device Classification Panel recommended that the wheeled geriatric chair be classified into class I. The Physical Medicine Device Classification Panel recommended that the mechanical chair be classified into class I. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the mechanical chair into class I and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

4. The General Hospital and Personal Use Device Classification Panel recommended that the silicone chair cushion be classified into class I. The Physical Medicine Device Classification Panel recommended that the flotation cushion be classified into class I. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the flotation cushion into class I and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

5. The Gastroenterology Device Classification Panel recommended that the abdominal belt be classified into class II. The Physical Medicine Device Classification Panel recommended that the truncal orthosis be classified into class I. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the truncal orthosis into class I and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

6. The Obstetrics/Gynecological Device Classification Panel

recommended that the manual sitz bath kit (not heated) be classified into class I. The Physical Medicine Device Classification Panel recommended that the nonpowered sitz bath be classified into class I. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the nonpowered sitz bath into class I and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

7. The General Hospital and Personal Use Device Classification Panel recommended that the AC-powered water flotation bed be classified into class II. The Physical Medicine Device Classification Panel recommended that the powered flotation therapy bed be classified into class II. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the powered flotation bed into class II and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

8. The General Hospital and Personal Use Device Classification Panel recommended that the heat lamp (infrared) be classified into class I. The Physical Medicine Device Classification Panel recommended that the infrared lamp be classified into class II. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the infrared lamp into class II and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

9. The General Hospital and Personal Use Device Classification Panel recommended that the chemical hot pack and chemical cold pack be classified into class I. The Physical Medicine Device Classification Panel recommended that disposable hot and cold packs be classified into class II. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the disposable hot or cold pack into class I and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

10. The General and Plastic Surgery Device Classification Panel recommended that the GPS muscle stimulator be classified into class II. The Physical Medicine Device Classification Panel recommended that the powered muscle stimulator be classified into

class II. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the powered muscle stimulator into class II and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

11. The Anesthesiology Device Classification Panel recommended that the bicycle ergometer and treadmill ergometer be classified into class II. The Physical Medicine Device Classification Panel recommended that powered exercise equipment be classified into class II. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying powered exercise equipment into class II and is publishing the two Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

12. The Dental Device Classification Panel recommended that the iontophoretic device be classified into class I. The Ear, Nose, and Throat Device Classification Panel recommended that the iontophoretic anesthetic be classified into class II. The Physical Medicine Device Classification Panel recommended that the iontophoresis device be classified into class II. The agency has determined that these devices are essentially the same. Therefore, the agency is proposing a single regulation classifying the iontophoresis device into class II for its use in the diagnosis of cystic fibrosis, for the acceleration of fluoride in dentistry, and for the local anesthesia of the intact tympanic membrane, and into class III for any other uses. The agency is publishing the three Panels' recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

13. The Physical Medicine Device Classification Panel and the other panels listed below made classification recommendations concerning the following devices:

Device	Other panel
Composite surface biopotential electrode	Neurological.
Metallic surface biopotential electrode	Neurological.
Metallic electrode with soft pad covering	Neurological.
Electrode gel	Neurological.
Physical medicine dynamometer	Orthopedic.
Touch discriminator esthesiometer	Neurological.
Two-point discriminator esthesiometer	Neurological.
AC-powered goniometer	Orthopedic.
Mechanical goniometer	Orthopedic.
AC-powered skin resistance meter	Neurological.

Device Classification Panel concurs with the Neurological Device Classification Panel's class II

recommendation for these devices. The recommendation appears in a proposed regulation in the November 28, 1978 Federal Register (43 FR 55650, 55648).

Environmental Impact

FDA has carefully considered the environmental effects of proposed §890.1 and of the proposed physical medicine device classification regulations and has concluded that an environmental impact statement is not required because the proposed actions will not significantly affect the quality of the human environment. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration (address above).

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513 and 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 U.S.C. 5.1), the Commissioner of Food and Drugs proposes that Chapter I of Title 21 of the Code of Federal Regulations be amended by adding new Part 890, Subpart A, to read as follows:

PART 890—PHYSICAL MEDICINE DEVICES

Subpart A—General Provisions

Sec.
890.1 Scope.

Authority: Secs. 513 and 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c and 701(a)).

Subpart A—General Provisions

§ 890.1 Scope.

(a) This part sets forth the classification of physical medicine devices intended for human use.

(b) The identification of a device in a regulation in this part is not a precise description of every device that is, or will be, subject to the regulation. A manufacturer who submits a premarket notification submission for a device under Part 807 of this chapter cannot show merely that the device is accurately described by the section title and identification provision of a regulation in this part, but shall state why the device is substantially equivalent to other devices, as required by § 807.87 of this chapter.

(c) To avoid duplicative listings, a physical medicine device that has two or more types of uses (e.g., use both as a diagnostic device and as a therapeutic device) is listed in the subpart representing one use of the device, rather than in two or more subparts.

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: August 14, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1183]

Medical Devices; Classification of Powered Myoelectric Biofeedback Equipment

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered myoelectric biofeedback equipment into class II (performance standards). This proposed classification applies to all powered myoelectric biofeedback equipment whether powered by alternating current (AC) or batteries. The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II if powered by alternating current and classified into class I if battery powered. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of powered myoelectric biofeedback equipment:

1. Identification: Powered myoelectric biofeedback equipment is a device that monitors certain bodily functions (e.g., muscle contraction/relaxation, skin temperature, and electrical resistance of skin) and displays the output of the device to the patient and is used to decrease psychophysiological symptoms and aid in muscle training performance. The device may be powered by alternating current (AC), or it may be battery powered.

2. Recommended classification: The Panel recommends that myoelectric biofeedback equipment that is powered by AC be classified into class II (performance standards) and that establishing a performance standard for this device be a low priority. The Panel also recommends that devices of this type that are battery powered be classified into class I (general controls), with no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that powered myoelectric biofeedback equipment be classified into class II if AC powered because the Panel believes that a standard is necessary to control electrical current to prevent shock and burns. The device applies an electrical current to the body to measure the intrinsic electrical properties of muscles and nerves, and to measure skin temperature and resistance. The Panel believes that the measurement limitations inherent in this technique should be clearly specified by the manufacturers of the device. The Panel believes that general controls will not provide sufficient control over the electrical characteristics of the AC-powered version of this device. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is

sufficient information to establish a standard to provide such assurance.

The Panel believes that general controls would provide reasonable assurance of the safety and effectiveness of battery-powered models of this device because the risks of electrical shock and burns for such a device are minimal. Therefore, the Panel recommends that battery-powered models of this device be classified into class I.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with AC-powered devices; the Panel members' personal knowledge of, and familiarity with, the device; a review of the pertinent literature (Refs. 1 through 4); and information presented during a Panel meeting. The Panel recommends that the device be restricted in use to professionally qualified persons recognized as experienced in the diagnosis, evaluation and/or treatment of the specific condition involved. At the Panel meeting of December 6, 1976, Dr. Kenneth Gaarder, University of Texas (Ref. 1), discussed the "Clinical use of Electromyography (EMG) in Biofeedback." He presented methods and indications of treatment and various other aspects of biofeedback. Dr. Gaarder stated that the procedures are safe with carefully made instruments and that standards could assure the production of high quality instruments.

5. Risks to health: (a) Electrical shock: The patient may receive an electrical shock because the device is electrically powered and connected to the patient by means of electrodes.

(b) Misdiagnosis and inappropriate therapy: Inaccurate measurement function of the device could lead to misdiagnosis and subsequent inappropriate therapy.

Proposed Classification

The Commissioner has reviewed the Panel recommendation on powered myoelectric biofeedback equipment and three studies in the literature, the results of which support the effectiveness and therapeutic value of biofeedback in rehabilitation (Refs. 2, 3, and 4). The Commissioner has concluded that all powered biofeedback equipment, whether battery powered or AC powered, should be subject to performance standards. The Commissioner believes that the battery-powered device, as well as the AC-powered device, presents a risk of electrical shock injuries. Therefore, the Commissioner is proposing that all powered myoelectric biofeedback equipment be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is

sufficient information to establish a performance standard for this device.

References

The following information has been placed in the office of the Hearing Clerk (address above), and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Gaarder, K., "Clinical Use of Electromyography (EMG) in Biofeedback," Unpublished Paper, Attachment A to Summary Minutes of the Second Meeting of the Electrodiagnostic Subcommittee of the Physical Medicine Device Classification Panel, December 6, 1976.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 by adding new Subpart B and § 890.1100, to read as follows:

Subpart B—Physical Medicine Diagnostic Devices

§ 890.1100 Powered myoelectric biofeedback equipment.

(a) **Identification.** Powered myoelectric biofeedback equipment is a device that monitors certain bodily functions (e.g., muscle contraction/relaxation, skin temperature, and electrical resistance of skin) and displays the output of the device to the patient and is used to decrease psychophysiological symptoms and aid in muscle training performance. The device may be powered by alternating current (AC), or it may be battery powered.

(b) **Classification.** Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found

in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

Medical Devices; Classification of Electrode Cables

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying electrode cables into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following

recommendation with respect to the classification of electrode cables:

1. Identification: An electrode cable is a device composed of strands of insulated electrical conductors laid together around a central core and used to connect an electrode from a patient to a diagnostic machine.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that electrode cables be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that electrode cables be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.1175, to read as follows:

§ 890.1175 Electrode cable.

(a) *Identification.* An electrode cable is a device composed of strands of insulated electrical conductors laid together around a central core and used to connect an electrode from a patient to a diagnostic machine.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk document number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

[Docket No. 78N-1185]

Medical Devices; Classification of Chronaximeters

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying chronaximeters into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel and the Neurological Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel and the Neurological Device Classification Panel, FDA advisory committees, made the following recommendations with

respect to the classification of chronaximeters:

1. Identification: A chronaximeter is a device that measures neuromuscular excitability by means of a strength-duration curve that provides a basis for diagnosis and prognosis of neurological dysfunction.

2. Recommended classification: Class II (performance standards). The Panels recommend that the establishment of a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panels recommend that the chronaximeter be classified into class II because the device is electrically powered and applies an electric current through the skin. The Panels believe that a performance standard is needed to control electrical leakage current to prevent electrical shock and burns. The chronaximeter provides a measurement function, and the Panels believe that the measurement limitations of this device should be clearly specified by the manufacturers of the device. They also believe that general controls will not provide sufficient control over these characteristics. The Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device; the Panel members' personal knowledge of, and familiarity with, the device; and a review of the available literature (Refs. 1 and 2). Harris (Ref. 1) describes the procedure to be followed in recording chronaxy, and Parry (Ref. 2) explains the plotting of the strength-duration curve and what the curve represents. The literature supports the need for accuracy of the prognostic and diagnostic data supplied by the chronaximeter.

5. Risks to health: (a) Electrical shock: The patient may receive an electrical shock because the device is electrically powered and connected to the patient by means of electrodes. (b) Burns: Skin burns could result from an excessive direct current component of the output. (c) Misdiagnosis and inappropriate therapy: An inaccurate measurement function could lead to misdiagnosis and subsequent inappropriate therapy.

Proposed Classification

The Commissioner agrees with the recommendations of the Physical Medicine Device Classification Panel and the Neurological Device Classification Panel and is proposing that chronaximeters be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and

effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

[Docket No. 78N-1186]

Medical Devices; Classification of Diagnostic Electromyographs

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying diagnostic electromyographs into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel, the Neurological Device Classification Panel, and the Anesthesiology Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, the Neurological Device Classification Panel, and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendation with respect to the classification of diagnostic electromyographs:

1. Identification: A diagnostic electromyograph is a device used to monitor and display the bioelectric signals produced by muscles, to stimulate peripheral nerves, and to monitor and display the electrical activity produced by nerves for the diagnosis and prognosis of neuromuscular disease.

2. Recommended classification: Class II (performance standards). The Panels recommend that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Physical Medicine

Device Classification Panel recommends that diagnostic electromyographs be classified into class II because the device is electrically powered, and the Panel believes a performance standard is needed to control leakage of electrical current to prevent electrical shock and burns. Also, because the device applies an electrical current to the body to measure the intrinsic electrical properties of skeletal muscle, the Panel believes that the measurement limitations inherent in this technique should be clearly specified by the manufacturers of the device. The Panel also recommends that the device be restricted to use by a physician trained in diagnostic electromyography. The Neurological Device Classification Panel recommends that the device be classified into class II because the Panel believes that the characteristics of the electric current applied to the body should be controlled to prevent injury. The Panel also believes that the measurement limitations of this device should be controlled to prevent misdiagnosis. The Anesthesiology Device Classification Panel recommends that the device be classified into class II because the Panel believes that a performance standard is needed to control electrical leakage current to prevent electrical shock. The Physical Medicine Device Classification Panel, the Neurological Device Classification Panel, and the Anesthesiology Device Classification Panel believe that general controls will not provide sufficient control over these characteristics. The Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panels based their recommendations on the potential hazards associated with this device; the Panel members' personal knowledge of, and familiarity with, the device; and a review of the available literature (Refs. 1 and 2). Guld, Rosenfalck, and Willison report that "... clinical electromyographers * * * must appreciate that electrodes, amplifiers, and recording apparatus need careful design and maintenance to avoid distortion severe enough to affect experimental results." The authors expand on this topic and report the main sources of error and distortion and the problems of safety and interference in the use of electromyographs (Ref. 1). The Electrodiagnostic Subcommittee of the Physical Medicine Device Classification Panel discussed the problem areas with the use of clinical electrodiagnostic equipment in a presentation by Dr. Joseph Goodgold, Department of Rehabilitation, New York University Medical Center, New York City (Ref. 2). The Subcommittee also discussed some of the general technical requirements of electromyographic equipment in a presentation by Stewart Reiner, Teca Corp., White Plains, New Jersey (Ref. 2). Dr. Goodgold identified the possible problem areas in the clinical use of electrodiagnostic equipment. General concepts for use of the device were presented (Ref. 2). Reiner presented for discussion the technical requirements, standard recommendations,

and specific device problems of the electromyograph (Ref. 2).

5. Risks to health: The Physical Medicine Device Classification Panel, the Neurological Device Classification Panel, and the Anesthesiology Device Classification Panel identified the following risks to health. (a) Electrical shock: The patient may receive an electrical shock because the device is electrically powered and connected to the patient by means of electrodes. (b) Misdiagnosis and inappropriate therapy: Inaccurate measurement function of the device could lead to misdiagnosis and subsequent inappropriate therapy. (c) Local burns and tissue damage: Excessive stimulation current could cause local burns and tissue damage to the patient.

Proposed Classification

The Commissioner agrees with the Panel recommendations and is proposing that diagnostic electromyographs be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

[Docket No. 78N-1187]

Medical Devices; Classification of Diagnostic Electromyograph Needle Electrodes

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying diagnostic electromyograph needle electrodes into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA would issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug

Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of diagnostic electromyograph needle electrodes:

1. *Identification:* A diagnostic electromyograph needle electrode is a monopolar or bipolar needle that is inserted into muscle or nerve tissue to sense bioelectric signals. The device is used in conjunction with diagnostic electromyography (recording the intrinsic electrical properties of skeletal muscle).
2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. *Summary of reasons for recommendation:* The Panel recommends that diagnostic electromyograph needle electrodes be classified into class II because the Panel believes the hazards associated with this device warrant a performance standard. Also, the Panel believes that a performance standard will assure that the performance characteristics of the device are maintained at a satisfactory level. The Panel believes that the materials of which the device is made should be controlled to prevent tip or shaft failure and a loss of insulation. The Panel believes that the materials should allow proper sterilization of the device. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. *Risks to health:* (a) *Toxicity:* The materials used could produce toxicity. (b) *Infection:* Infection may result if the device cannot be adequately sterilized. (c) *Misdiagnosis:* Spontaneous noise generation and/or impedance may cause invalid clinical observations in electromyography. (d) *Inappropriate therapy:* Loss of needle insulation or tip failure could cause misdiagnosis, resulting in inappropriate therapy.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that diagnostic electromyograph needle

electrodes be classified into class II (performance standards). Two studies on monopolar electromyographic needles were review (Refs. 1 and 2). Mikolich and Waylonis (Ref. 1) studied the durability of teflon-coated needle electrodes over a 2-year period. Their study concluded that the durability of electrode needles varies. It was found, however, that the most common causes of failure of the needle electrode were teflon failure, tip failure, wire pin failure, and electrical artifact and wire bending. Smith and Schulte (Ref. 2) studied the effects of defective insulation of monopolar electrode needles. They concluded that "loss of insulation from a monopolar electrode can appreciably reduce action-potential amplitude." This reduction of action-potential amplitude leaves the tip excessively exposed and may result in altered waveforms leading to misdiagnosis. The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

Medical Devices; Classification of Powered Reflex Hammers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered reflex hammers into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical

Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered reflex hammers:

1. Identification: A powered reflex hammer is a motorized device used to elicit and determine controlled deep tendon reflexes.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that powered reflex hammers be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential electrical hazards of shock and burns and to prevent injury to soft tissues. The Panel believes that the measurement limitations of this device should be clearly specified by the manufacturers of the device. The Panel believes that general controls will not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Bodily injury: Injury to soft tissues could result from excessive power of impact and from excursion. (c) Misdiagnosis: Inaccurate measurement function could lead to misdiagnosis.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that powered reflex hammers be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of

the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.1450 to read as follows:

§ 890.1450 Powered reflex hammer.

(a) *Identification.* A powered reflex hammer is a motorized device used to elicit and determine controlled deep tendon reflexes.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1189]

Medical Devices; Classification of Force-Measuring Platforms

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying force-measuring platforms into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying

the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of force-measuring platforms:

1. Identification: A force-measuring platform is a device that converts pressure applied upon a planar surface into analog mechanical or electrical signals. This device is used to determine ground reaction force, centers of percussion, centers of torque, and their variations in both magnitude and direction with time.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that force-measuring platforms be classified into class II to require that the performance characteristics be maintained at a satisfactory level. The function of the device is to provide diagnostic data; therefore, the Panel believes the device should provide accurate and replicable measurements. The Panel also recommends that FDA require that the device labeling indicate its diagnostic limitations. The Panel believes that general controls will not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device; a review of the

pertinent literature (Ref. 1); and a presentation by Dr. Thomas P. Andriacchi (Ref. 2): Dr. Andriacchi (Ref. 2) states that the force-measuring platform is useful in gait analysis, postural control studies, and sports activities. However, the device is still used by most physicians as a research tool.

5. Risks to health: Misdiagnosis: Misdiagnosis may result from inaccurate measurement and from the current diagnostic limitations of the device.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that force-measuring platforms be classified into Class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1190]

Medical Devices; Classification of Intermittent Pressure Measurement Systems

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intermittent pressure measurement systems into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intermittent pressure measurement systems:

1. Identification: An intermittent pressure measurement system is an evaluative device used to measure the actual pressure between the body surface and the supporting media.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that intermittent pressure measurement systems be classified into class II because the Panel believes that a standard is necessary to control the electrical properties of this device to avoid the potential hazards of shock and burns. The Panel believes that the measurement limitations of this device should be clearly specified by the manufacturers of the device. The Panel believes that malfunction of the measurement gauge could result in inaccurate determination of the media surface, thereby causing soft tissue injury to the patient. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Electrical shock: Electrical leakage current due to improper grounding or faulty circuitry could result in electrical shock to the patient. (b) Soft tissue injury: An inappropriate surface resulting from inaccurate measurement function could cause skin ulcers.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that intermittent pressure measurement systems be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.1600, to read as follows:

§ 890.1600 Intermittent pressure measurement system.

(a) *Identification.* An intermittent pressure measurement system is an evaluative device used to measure the actual pressure between the body surface and the supporting media.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26269 Filed 8-27-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 890;

[Docket No. 78N-1191]

Medical Devices; Classification of Miniature Pressure Transducers

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying miniature pressure transducers into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendations regarding the classification of miniature pressure transducers:

1. *Identification:* A miniature pressure transducer is a device used to measure the pressure between a device and soft tissue by converting mechanical inputs to analog electrical signals.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that miniature pressure transducers be classified into class II because the Panel believes that the electrical properties associated with the device should be controlled to avoid a potential shock hazard. The Panel believes that general controls will not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. *Risks to health:* Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that miniature pressure transducers be classified into class II (performance

standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.1615, to read as follows:

§ 890.1615 Miniature pressure transducer.

(a) *Identification.* A miniature pressure transducer is a device used to measure the pressure between a device and soft tissue by converting mechanical inputs to analog electrical signals.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1192]

Medical Devices; Classification of Diagnostic Muscle Stimulators

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying diagnostic muscle stimulators into class II (performance standards). The FDA is also publishing the recommendation of the Physical

Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendations regarding the classification of diagnostic muscle stimulators:

1. *Identification:* A diagnostic muscle stimulator is a device used mainly with an electromyograph machine to initiate muscle activity and is used to diagnose and/or treat motor nerve or sensory neuromuscular disorders and neuromuscular function.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. *Summary of reasons for recommendation:* The Panel recommends that diagnostic muscle stimulators be classified into class II because the Panel believes that a standard is necessary to control electrical current to prevent shock and burns. The device applies an electrical current to the body to measure the intrinsic properties of muscles. The Panel believes that the measurement limitations inherent in this technique should be clearly specified by the manufacturers of the device. The Panel believes that general controls will not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is

sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the potential hazards associated with this device; the Panel members' personal knowledge of, and familiarity with, the device; and a review of the pertinent literature (Ref. 1). Guld, Rosenfalck, and Willison (Ref. 1) describe the procedures used in diagnostic stimulation. The authors stress safety procedures that should be followed in using stimulators. The safety procedures include labeling of controls and sockets, "on-off warning lamp," close proximity of electrodes to localize excessive current flow, and restriction of the use of the device to trained personnel.

5. *Risks to health:* (a) Electrical shock: The patient may receive an electrical shock because the device is connected to the patient by means of electrodes. Also equipment used with this device might cause a hazardous leakage current that could be dangerous to the patient. (b) Burns: High current density in tissue could, over time, cause burns. (c) Cardiac arrhythmia: Excessive electrical current passing through the heart could cause irregular heartbeat or cardiac arrest. (d) Misdiagnosis: Misdiagnosis may result from inaccurate measurement function.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that diagnostic muscle stimulators be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Guld, C., A. Rosenfalck, and R. G. Willison, "Technical Factors in Recording" in "Electrodiagnosis and Electromyography," 3d. Ed., Edited by S. Licht, Waverly Press, Inc., Baltimore, MD, pp. 452-478, 1978.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.1850, to read as follows:

§ 890.1850 Diagnostic muscle stimulator.

(a) *Identification.* A diagnostic muscle stimulator is a device used mainly with an electromyograph machine to initiate muscle activity and is used to diagnose and/or treat motor nerve or sensory neuromuscular disorders and neuromuscular function.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

[Docket No. 78N-1193]

Medical Devices; Classification of Isokinetic Testing and Evaluation Systems

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying isokinetic testing and evaluation systems into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of isokinetic testing and evaluation systems:

1. Identification: An isokinetic testing and evaluation system is a rehabilitative exercise device used to measure, evaluate, and increase the strength of muscles and the range of motion of joints.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that isokinetic testing and evaluation systems be classified into class II because the Panel believes that a standard is necessary to control the electrical properties of this device to avoid the potential hazards of shock and burns. The Panel believes that the measurement limitations of this device should be clearly specified by the manufacturers of the device. The Panel also recommends this device be used by trained personnel under the supervision of a physician. The Panel believes that general controls will not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device; the Panel members' personal knowledge of, and familiarity with, the device; and a review of the pertinent literature (Refs. 1, 2, and 3). At the Panel meeting of March 21 through 22, 1978, Ridgeway (Ref. 1) discussed the use of the isokinetic testing and evaluation system and supported the use of this system in rehabilitation, particularly in knee rehabilitation. However, he stressed that "each patient must be individually evaluated" in order to teach an effective exercise regime. Ridgeway reported a "great need for further research into the clinical application . . ." of this device, and that the

units presently on the market can and should be improved.

5. Risks to health: (a) Shock and burns: Electrical leakage current due to improper grounding or faulty circuitry could result in electrical shock or burns to the patient. (b) Misdiagnosis: Inaccurate measurement function could lead to misdiagnosis.

Proposed Classification

The Commission agrees with the Panel recommendation and is proposing that isokinetic testing and evaluation systems be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.1925 as follows:

§ 890.1925 Isokinetic testing and evaluation system.

(a) *Identification.* An isokinetic testing and evaluation system is a rehabilitative exercise device used to measure, evaluate, and increase the strength of muscles and the range of motion of joints.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four

copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

Medical Devices; Classification of Prosthetic and Orthotic Accessories

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying prosthetic and orthotic (brace) accessories into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation.

The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of prosthetic and orthotic accessories.

1. Identification: A prosthetic and orthotic accessory is a device used to support, protect, or aid in the use of a cast, orthosis (brace), or prosthesis. Examples of prosthetic and orthotic accessories include the following: A pelvic support band and belt, a cast shoe, a limb cover, a prosthesis alignment device, a postsurgical pylon, a transverse rotator, or a temporary training splint.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendations: The Panel recommends that a prosthetic and orthotic accessory be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that prosthetic and orthotic accessories be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-545 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 by adding Subpart C, which is reserved, and adding new Subpart D and § 890.3025, to read as follows:

Subpart C [Reserved]

Subpart D—Physical Medicine Prosthetic Devices

§ 890.3025 Prosthetic and orthotic accessory.

(a) *Identification.* A prosthetic and orthotic accessory is a device used to support, protect, or aid in the use of a cast, orthosis (brace), or prosthesis. Examples of orthotic accessories include the following: A pelvic support band and belt, a cast shoe, a limb cover, a prosthesis alignment device, a postsurgical prosthesis alignment device, a postsurgical pylon, a

transverse rotator, or a temporary training splint.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 27, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1195]

Medical Devices; Classification of Canes

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying canes into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia

Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of canes:

1. Identification: A cane is a device used to provide minimum weight support while walking. Examples of canes include the following: a standard cane, a forearm cane, and a cane with a tripod, quad, or retractable stud on the ground end.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that a cane be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that canes be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3075, to read as follows:

§ 890.3075 Cane.

(a) *Identification.* A cane is a device used to provide minimum weight support while walking. Examples of canes include the following: a standard cane, a forearm cane, and a cane with a tripod, quad, or retractable stud on the ground end.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1196]

Medical Devices; Classification of Mechanical Chairs

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mechanical chairs into class I (general controls). The FDA is also publishing the recommendations of the Physical Medicine Device Classification Panel and the General Hospital and Personal Use Device Classification Panel that this device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION: Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel and the General Hospital and Personal Use Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of mechanical chairs:

1. Identification: A mechanical chair is a manually operated device used to assist a disabled person in performing an activity that the person would otherwise find difficult to do or be unable to do. Examples of mechanical chairs include the following: a chair with an elevating seat used to raise a person from a sitting position to a standing position, and a chair with casters used by a person to move from one place to another while sitting.

2. Recommended classification: Class I (general controls). The Panels recommend that there be no exemptions.

3. Summary of reasons for recommendation: The Panels recommend that a mechanical chair be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panels based their recommendations on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendations and is proposing that mechanical chairs be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3100, to read as follows:

§ 890.3100 Mechanical chair.

(a) *Identification.* A mechanical chair is a manually operated device used to assist a disabled person in performing an activity that the person would otherwise find difficult to do or be unable to do. Examples of mechanical chairs include the following: a chair with an elevating seat used to raise a

person from a sitting position to a standing position and a chair with casters used by a person to move from one place to another while sitting.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before (October 29, 1979) submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-28274 Filed 8-27-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1197]

Medical Devices; Classification of Electric Positioning Chairs

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying electric positioning chairs into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of electric positioning chairs:

1. Identification: An electric positioning chair is a device with a motorized positioning control that can be adjusted to various positions. The device is used to provide stability for patients with athetosis (involuntary spasms) and to alter postural positions for therapeutic purposes.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that an electric positioning chair be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazard of electrical shock. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Electrical shock: Improper grounding or a malfunction of the device may result in an electric shock to the patient or operator. (b) Bodily injury: The lack of an antitipping mechanism or locks on the casters, or a structural failure of the harness belt, could result in bodily injury to the patient.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that electric positioning chairs be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and effectiveness of the device.

The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3110, to read as follows:

§ 890.3110 Electric positioning chair.

(a) *Identification.* An electric positioning chair is a device with a motorized positioning control that can be adjusted to various positions. The device is used to provide stability for patients with athetosis (involuntary spasms) and to alter postural positions for therapeutic purposes.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-28275 Filed 8-27-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78-1198]

Medical Devices; Classification of Crutches

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying crutches into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of crutches:

1. Identification: A crutch is a device used by disabled persons to provide minimal to moderate weight support while walking.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that a crutch be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that crutches be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 53 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the commissioner proposes to amend Part

890 in Subpart D by adding new § 890.3150, to read as follows:

§ 890.3150 Crutch.

(a) *Identification.* A crutch is a device used by disabled persons to provide minimal to moderate weight support while walking.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1199]

Medical Devices; Classification of Flotation Cushions

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying flotation cushions into class I (general controls). The FDA is also publishing the recommendations of The Physical Medicine Device Classification Panel and the General Hospital and Personnel Use Device Classification Panel that this device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305),

Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel and the General Hospital and Personnel Use Device Classification Panel, FDA advisory committees, made the following recommendation regarding the classification of flotation cushions:

1. *Identification:* A flotation cushion is a device made of plastic filled with water, air, gel, or mud and is used on a seat to lessen the likelihood of skin ulcers.

2. *Recommended classification:* Class I (general controls). The Panels recommend that there be no exemptions.

3. *Summary of reasons for recommendation:* The Physical Medicine Device Classification Panel and the General Hospital and Personnel Use Device Classification Panel recommend that a flotation cushion be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. *Summary of data on which the recommendation is based:* The Panels based their recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. *Risks to health:* None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendations and is proposing that flotation cushions be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3175, to read as follows:

§ 890.3175 Flotation cushion.

(a) *Identification.* A flotation cushion is a device made of plastic filled with water, air, gel, or mud and is used on a seat to lessen the likelihood of skin ulcers.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1200]

Medical Devices; Classification of External Limb Orthotic Components

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying external limb orthotic (brace) components into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of external limb orthotic components:

1. *Identification:* An external limb orthotic component is a device used in conjunction with an orthosis (brace) to increase the function of the orthosis for a patient's particular needs. Examples of external limb orthotic components include the following: a brace-setting twister and an external brace stirrup.

2. *Recommended classification:* Class I (general controls). The Panel recommends that there be no exemptions.

3. *Summary of reasons for recommendation:* The Panel recommends that an external limb orthotic component be classified into class I because it is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. *Risks to health:* None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that external limb orthotic components be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposed to amend Part 890 in Subpart D by adding new § 890.3410, to read as follows:

§ 890.3410 External limb orthotic component.

(a) *Identification.* An external limb orthotic component is a device used in

conjunction with an orthosis (brace) to increase the function of the orthosis for a patient's particular needs. Examples of external limb orthotic components include the following: a brace-setting twister and an external brace stirrup.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1201]

Medical Devices; Classification of External Limb Prosthetic Components

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying external limb prosthetic components into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that this device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of external limb prosthetic components:

1. *Identification:* An external limb prosthetic component is a device that when put together with other appropriate components constitutes a total prosthesis. Examples of external limb prosthetic components include the following: ankle, foot, hip, knee, and socket components; mechanical or powered hand, hook, wrist unit, elbow joint, and shoulder joint components; and cable and prosthesis suction valves.

2. *Recommended classification:* Class I (general controls). The Panel recommends that there be no exemptions.

3. *Summary of reasons for recommendation:* The Panel recommends that an external limb prosthetic component be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. *Risks to health:* None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that external limb prosthetic components be classified into class I (general controls) with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3420, to read as follows:

§ 890.3420 External limb prosthetic component.

(a) *Identification.* An external limb prosthetic component is a device that when put together with other appropriate components constitutes a total prosthesis. Examples of external limb prosthetic components include the following: ankle, foot, hip, knee, and socket components; mechanical or powered hand, hook, wrist unit, elbow joint, and shoulder joint components; and cable and prosthesis suction valves.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-28279 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1202]

Medical Devices; Classification of Mechanical Automobile Hand and Foot Driving Controls

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mechanical automobile hand and foot driving controls into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA would issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976. **DATES:** Comments by October 29, 1979. The Commissioner of Food and Drugs

proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mechanical automobile hand and foot driving controls:

1. *Identification:* A mechanical automobile hand and foot driving control is a device used to enable persons who have limited use of their arms and legs to drive. This device allows the hand operation of the gas, brake, and clutch pedals or the foot operation of the steering and gear shift.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. *Summary of reasons for recommendation:* The Panel recommends that mechanical automobile hand and foot driving controls be classified into class II because the Panel believes that the design and materials of the device must be controlled to assure that there are adequate mechanical safety features to prevent malfunction or breakage of the driving controls and to avoid a potential injury to the driver and the public. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device, and a review of the pertinent literature (Refs. 1 and 2). At the Panel meeting of March 21-22, 1976, Wilfred G. Holsberg, Acting Deputy Director for Prosthetics, Surgical Service, Veterans Administration, discussed the Veterans Administration's standard for hand driving controls (Ref. 1). Mr. Holsberg reported that a driving simulator was used to evaluate the

effectiveness of the various adaptive driving aids, and a computer was used to yield data on patient requirements to operate the device in the laboratory under simulated driving conditions. Mr. Holsberg stated that the VA is "providing eligible veterans with tested and standardized adaptive equipment so they can operate motor vehicles in safety and comfort." Representatives from the American Automobile Association, Department of Transportation, and Sharpe Health School's Handicapped Driver Education (Ref. 2) discussed with the Panel the hazards resulting from faulty devices available for use. The greatest concern is that there may be faulty installation or poor-grade materials used which could result in serious injury. A performance standard to control the parts used in the device would decrease the likelihood of device breakage and accidents.

5. *Risks to health:* (a) *Bodily injury:* Injury to the driver or public could result from a lack of adequate mechanical safety features causing a malfunction in the driving controls.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that mechanical automobile hand and foot driving controls be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

References

[Docket No. 78N-1203]

Medical Devices; Classification of Limb Orthoses

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food Drug Administration (FDA) is issuing for public comment a proposed regulation classifying limb orthoses (braces) into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976. **DATES:** Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical

Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of limb orthoses:

1. *Identification:* A limb orthosis (brace) is a device that is worn on the upper or lower extremities to support, to correct, or to prevent deformities or to align body structures for functional improvement. Examples of limb orthoses include the following: a whole limb and joint brace, a hand splint, an elastic stocking, a knee cage, and a corrective shoe.

2. *Recommended classification:* Class I (general controls). The Panel recommends that there be no exemptions.

3. *Summary of reasons for recommendation:* The Panel recommends that a limb orthosis be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device.

5. *Risks to health:* None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that limb orthoses be classified into class I (general controls) with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3475, to read as follows:

§ 890.3475 Limb orthosis.

(a) *Identification.* A limb orthosis (brace) is a device that is worn on the upper or lower extremities to support, to correct, or to prevent deformities or to align body structures for functional improvement. Examples of limb orthoses

include the following: a whole limb and joint brace, a hand splint, an elastic stocking, a knee cage, and a corrective shoe.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1204]

Medical Devices; Classification of Truncal Orthoses

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying truncal orthoses (braces for the trunk of the body) into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that this device be classified into class I and the recommendation of the Gastroenterological-Urological Device Classification Panel that abdominal orthoses be classified into class II. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30

days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel and the Gastroenterological-Urological Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of truncal orthoses:

1. Identification: A truncal orthosis is a device used to support and/or to immobilize fractures, strains, and sprains of the neck and/or trunk of the body. Examples of truncal orthoses are the following: abdominal, cervical, cervical-thoracic, lumbar, lumbo-sacral, rib fracture, sacroiliac, and thoracic orthoses and clavicle splints.

2. Recommended classification: The Physical Medicine Device Classification Panel recommends that a truncal orthosis be classified into class I (general controls) and that there be no exemptions. The Gastroenterological-Urological Device Classification Panel recommends that an abdominal orthosis be classified into class II (performance standards) and that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Physical Medicine Device Classification Panel recommends that a truncal orthosis be classified into class I because it is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Gastroenterological-Urological Device Classification Panel recommends that an abdominal orthosis be classified into Class II because the Panel believes that a standard is necessary to control the amount of pressure applied by the device to avoid venous congestion (an increased tendency for thrombosis in veins) and pressure sores. The Panel states, however, that this device is simple in concept and that hazards are very rare or even theoretical. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panels based their recommendations on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: None were identified by the Physical Medicine Device Classification Panel. The Gastroenterological-Urological Device Classification Panel identified the following risks to health regarding abdominal orthoses: (a) Possible pulmonary emboli (the sudden blocking of a blood vessel in the lungs so as to obstruct circulation) and pressure sores: Excessive pressure due to abdominal compression could result in possible pulmonary emboli or pressure sores. (b) Contact dermatitis (skin irritation): The materials used in the construction of the device may cause a local skin irritation.

Proposed Classification

The Commissioner agrees with the recommendation of the Physical Medicine Device Classification Panel and is proposing that truncal orthoses be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of these devices. The Commissioner disagrees with the recommendation of the Gastroenterological-Urological Device Classification Panel that abdominal orthoses be classified into class II (performance standards). The Commissioner believes that the hazards associated with the device, as stated by the Gastroenterological-Urological Device Classification Panel, result from improper use and sizing of orthoses. The Panel states that the hazards are rare, and the Commissioner believes that if the device is used in a normal manner and for the purpose recommended, the device presents no undue risks to health.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-548 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3490, to read as follows:

§ 890.3490 Truncal orthosis.

(a) *Identification.* A truncal orthosis is a device used to support and/or to immobilize fractures, strains, and sprains of the neck and/or trunk of the body. Examples of truncal orthoses are the following: abdominal, cervical, cervical-thoracic, lumbar, lumbo-sacral, rib fracture, sacroiliac, and thoracic orthoses and clavicle splints.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26282 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1205]

Medical Devices; Classification of External Assembled Lower Limb Prostheses

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying external assembled lower limb prostheses into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug

Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of external assembled lower limb prostheses:

1. Identification: An external assembled lower limb prosthesis is a preassembled external artificial limb for the lower extremity. Examples of external assembled lower limb prostheses are the following: knee/shank/ankle/foot assembly and thigh/knee/shank/ankle/foot assembly.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device by a low priority.

3. Summary of reasons for recommendation: The Panel recommends that external assembled lower limb prostheses be classified into class II because the Panel believes that the structural strength of this device must be controlled to prevent a potential injury to the patient. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazard associated with this device and the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: Bodily injury: Injury from falling could result from breakage of the unit due to inadequate structural strength, particularly of the set screws.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that external assembled lower limb prostheses be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3500, to read as follows:

§ 890.3500 External assembled lower limb prosthesis.

(a) *Identification.* An external assembled lower limb prosthesis is a preassembled external artificial limb for the lower extremity. Examples of external assembled lower limb prostheses are the following: knee/shank/ankle/foot assembly and thigh/knee/shank/ankle/foot assembly.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR part 890]

[Docket No. 78N-1206]

Medical Devices; Classification of Plinths

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying plinths (a flat padded table or board) into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of plinths:

1. Identification: A plinth is a flat, padded board with legs on which a patient is placed for treatment or examination.

2. Recommended classification: Class I (general controls). The Panel recommends that plinths be exempt from registration, device listing, and premarket notification under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and good manufacturing practice regulations under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that plinths be classified into class I and that manufacturers of this device should not be required to comply with registration, device listing, premarket notification, records and reports, or good manufacturing practice regulations because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that plinths be classified into class I (general controls). The Commissioner believes that general controls are

sufficient to provide reasonable assurance of the safety and effectiveness of the device. In response to the Panel's recommendation that manufacturers of a plinth be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a plinth, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a plinth. The agency does not, at this time, anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of a plinth be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and

reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of a plinth be exempt from the device GMP regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a plinth must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a plinth must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540546 (21 U.S.C. 360, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3520 to read as follows:

§ 890.3520 Plinth.

(a) *Identification.* A plinth is a flat, padded board with legs on which a patient is placed for treatment or examination.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in

Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1207]

Medical Devices; Classification of Rigid Pneumatic Structure Orthoses

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying rigid pneumatic structure orthoses (whole body braces) into class III (premarket approval). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, and FDA advisory committee, made the following recommendation with respect to the classification of rigid pneumatic structure orthoses:

1. Identification: A rigid pneumatic structure orthosis is a device used to provide whole body support by means of a pressurized suit to help thoracic paraplegics walk.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that the rigid pneumatic structure orthosis be classified into class III because the Panel believes that satisfactory performance of this device has not been demonstrated and, therefore, that it is not possible to establish an adequate performance standard for the device. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus ensure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the literature concerning the device (Refs. 1 and 2). The literature evaluation did not demonstrate that the device was safe or effective (Ref. 1). The rigid pneumatic structure orthosis was also evaluated as requested by the Veterans' Administration and the Rehabilitation Services Administration, Department of Health, Education, and Welfare (Ref. 2), and did not meet adequate performance standards for safety and effectiveness.

5. Risks to health: (a) Bodily injury: The device could collapse and the patient could fall, resulting in bodily injury, if inflation is lost or the zippers fail. (b) Tissue trauma and/or pressure sores: Tissue trauma and/or pressure sores could result if the support beams overinflate and cause excessive pressure on the skin of the patient.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that rigid pneumatic structure orthoses be classified into class III (premarket approval). The Commissioner has reviewed the Panel recommendation

and the evaluations of rigid pneumatic structure orthoses (Refs. 1 and 2). The problems found with this device, as stated in the literature, are (1) zipper failure, (2) deflation or overinflation, (3) pressure over bony prominences, causing sores, (4) inability of the patient to climb stairs independently, (5) inability of the patient to move as stated, and (6) difficulty in the patient regaining a standing position after a fall. Future improvements and studies were recommended for rigid pneumatic structure orthoses because a potential exists for their use in early rehabilitation. The Commissioner believes that the device presents a potential unreasonable risk of injury to the patient because satisfactory performance has not been demonstrated. He agrees with the Panel conclusion that insufficient information exists to determine that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device, and he believes that insufficient information exists to establish a performance standard which would provide such assurance.

References

The following information has been placed in the office of the Hearing Clerk (HFA-305) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

Medical Devices; Classification of Arm Slings

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying arm slings into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of arm slings:

1. Identification: An arm sling is a device used to immobilize the arm, by means of a fabric band suspended from around the neck.

2. Recommended classification: Class I (general controls). The Panel recommends that an arm sling be exempt from registration, device listing, and premarket notification under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and good manufacturing practice regulations under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that an arm sling be classified into class I and that manufacturers of this device not be required to comply with registration, device listing, premarket notification, records and reports, or good manufacturing practice regulations because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that arm slings be classified into class I (general controls). The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. In response to the Panel's recommendation that manufacturers of an arm sling be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 501 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of an arm

sling, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning an arm sling. The agency does not, at this time, anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of an arm sling be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of an arm sling be exempt from the device GMP regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180, with respect to general requirements concerning records, and

§ 820.198, with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an arm sling must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an arm sling must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3640, to read as follows:

§ 890.3640 Arm sling.

(a) *Identification.* An arm sling is a device used to immobilize the arm, by means of a fabric band suspended from around the neck.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the

above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26286 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1209]

Medical Devices; Classification of
Congenital Hip Dislocation Abduction
Splints

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying congenital hip dislocation abduction splints into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of congenital hip dislocation abduction splints:

1. Identification: A congenital hip dislocation abduction splint is a device used to stabilize the hips of a young child with dislocated hips in an abducted position (away from the midline).

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that a congenital hip dislocation abduction splint be classified into class I because this is a simple device that presents no undue risk to health when used in a normal manner and for the purpose recommended. The Panel recommends that the device be used under the direct supervision of a physician, therapist, or orthotist/prosthetist (makers or fitters of orthotic or prosthetic devices). The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that congenital hip dislocation abduction splints be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.3665, to read as follows:

§ 890.3665 Congenital hip dislocation
abduction splint.

(a) *Identification.* A congenital hip dislocation abduction splint is a device used to stabilize the hips of a young child with dislocated hips in an abducted position (away from the midline).

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the

above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26287 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1210]

Medical Devices; Classification of
Denis Brown Splints

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying Denis Brown splints into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of Denis Brown splints:

1. Identification: A Denis Brown splint is a device used to immobilize the feet. It is used

on young children with tibial torsion (excessive rotation of the lower leg) or club foot.

2. Recommended Classification: class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that Denis Brown splints be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that Denis Brown splints be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3675, to read as follows:

§ 890.3675 Denis Brown splint.

(a) *Identification.* A Denis Brown splint is a device used to immobilize the feet. It is used on young children with tibial torsion (excessive rotation of the lower leg) or club foot.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-28286 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1211]

Medical Devices; Classification of Powered Wheeled Stretchers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered wheeled stretchers into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to ensure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered wheeled stretchers:

1. Identification: A powered wheeled stretcher is a battery-powered table with wheels that is used by patients who are unable to propel themselves independently and who must maintain a prone or supine position for prolonged periods of time because of skin ulcers or contractures (muscle contractions).

2. Recommended classification: Class II (performance standards). The Panel

recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The panel recommends that powered wheeled stretchers be classified into class II because the Panel believes that if there is a malfunction of the device, serious harm to the patient could result. The Panel also believes that the electrical properties of the battery must be controlled to avoid the potential hazard of shock or malfunction. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Bodily injury: Bodily injury could result from defective controls, battery malfunction, or use of the device on inclined surfaces. (b) Electrical shock: Excessive leakage current or malfunction of the device could result in electric shock.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that powered wheeled stretchers be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. Performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3690, to read as follows:

§ 890.3690 Powered wheeled stretcher.

(a) *Identification.* A powered wheeled stretcher is a battery-powered table with wheels that is used by patients who are unable to propel themselves independently and who must maintain a prone or supine position for prolonged periods because of skin ulcers or contractures (muscle contractions).

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document.

Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1212]

Medical Devices; Classification of Nonpowered Communication Systems

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying nonpowered communication systems into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-27-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides

background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of nonpowered communication systems:

1. Identification: A nonpowered communication system is a mechanical device used to assist a patient in communicating when physical impairment prevents writing, telephone use, reading, or talking. Examples of nonpowered communications systems include the following: an alphabet board, a telephone holder, and a page turner.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that a nonpowered communication system be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that nonpowered communication systems be classified into class I (general controls), with no exemptions. The Commissioners believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend part 890 in Subpart D by adding new § 890.3700, to read as follows:

§ 890.3700 Nonpowered communication system.

(a) *Identification.* A nonpowered communication system is a mechanical device used to assist a patient in communicating when physical impairment prevents writing, telephone use, reading, or talking. Examples of nonpowered communications systems include the following: An alphabet board, a telephone holder, and a page turner.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-28290 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1213]

Medical Devices; Classification of Powered Communication Systems

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered communication systems into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

**SUPPLEMENTARY INFORMATION:
Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered communication systems:

1. Identification: A powered communication system is an electrical or battery powered device used to transmit or receive information. It is used by persons unable to use their hands because of physical impairment. Examples of powered communication systems include the following: a specialized typewriter, a reading machine, and a video picture and word screen.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that a powered communication system be classified into class II because the Panel believes that the electrical properties of this device must be controlled to avoid the potential hazard of electric shock. The Panel believes that general controls will not provide sufficient control over this characteristic. The Panel believes that a performance standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: Electrical shock: Excessive leakage current could result in injury, and a malfunction of the device could result in electric shock.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that powered communication systems be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3710, to read as follows:

§ 890.3710 Powered communication system.

(a) *Identification.* A powered communication system is an electrical or battery-powered device used to transmit or receive information. It is used by persons unable to use their hands because of physical impairment. Examples of powered communication systems include the following: a specialized typewriter, a reading machine, and a video picture and word screen.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
*Acting Associate Commissioner for
Regulatory Affairs.*

BILLING CODE 4110-03-M

[21 CFR Part 890]**[Docket No. 78N-1214]****Medical Devices; Classification of
Powered Environmental Control
Systems**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered environmental control systems into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered environmental control systems:

1. Identification: A powered environmental control system is an electrical or battery-powered device used by a patient to operate an environmental control function. Examples of environmental control functions include the following: to control room temperature, to answer a doorbell or telephone, or to sound an alarm for assistance.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that a powered environmental control system be classified into class II because the Panel believes that the electrical properties of this device must be controlled to avoid the potential hazard of electric shock. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: Electrical shock: Excessive leakage current could result in injury, and a malfunction of the device could result in electric shock.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that powered environmental control systems be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3725, to read as follows:

§ 890.3725 Powered environmental control system.

(a) *Identification.* A powered environmental control system is an electrical or battery-powered device used by a patient to operate an environmental control function. Examples of environmental control functions include the following: to control room temperature, to answer a doorbell or telephone, or to sound an alarm for assistance.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

BILLING CODE 4110-03-M

[21 CFR Part 890]**[Docket No. 78N-1215]****Medical Devices; Classification of
Mechanical Tables**

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mechanical tables into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mechanical tables:

1. Identification: A mechanical table is a device that has a flat surface that can be inclined or adjusted to various positions. It is used by patients with circulatory, neurological, or musculoskeletal conditions to increase tolerance to an upright or standing position.

2. Recommended classification: Class I (general controls). The Panel recommends that mechanical tables be exempt from registration, device listing, and premarket notification regulations under section 510 of the Federal Food, Drug, and Cosmetic Act (21

U.S.C. 360), records and reports under section 519 of the act (21 U.S.C. 360i), and good manufacturing practice (GMP) regulations under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that a mechanical table be classified into class I and that the manufacturers of this device should not be required to comply with registration, device listing, premarket notification, records and reports, or GMP regulations because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device and that a performance standard is not necessary.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that mechanical tables be classified into class I (general controls). The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Commissioner disagrees with the Panel recommendation that manufacturers of mechanical tables be exempt from registration, device listing, and premarket notification under section 510 of the act. Under section 510(g)(4) of the act, the Commissioner may exempt a manufacturer from section 510 only upon a finding that compliance with this section is not necessary for the protection of public health. In the case of the mechanical table, the Commissioner cannot make the required finding. To protect the public health, the agency needs to require manufacturers of this device to register and to list their products with FDA, so that the agency is able to identify the firms manufacturing this device and to conduct necessary inspections. Premarket notification by these manufacturers assures that FDA learns of new products, and of significant modifications of existing products, for which premarket approval is required.

The Commissioner disagrees with the Panel's recommendation that manufacturers of a mechanical table be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device

good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

The Commissioner disagrees with the Panel recommendation that manufacturers of the mechanical table be exempt from the good manufacturing practice regulation under section 520(f) of the act. The Commissioner believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of a mechanical table having defects that could harm users.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3750, to read as follows:

§ 890.3750 Mechanical table.

(a) *Identification.* A mechanical table is a device that has a flat surface that can be inclined or adjusted to various positions. It is used by patients with circulatory, neurological, or musculoskeletal conditions to increase tolerance to an upright or standing position.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26293 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1216]

Medical Devices; Classification of Powered Tables

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered tables into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered tables:

1. Identification: A powered table is an electrically operated flat surface table that can be adjusted to various positions. It is used by patients with circulatory, neurological, or musculoskeletal conditions to increase tolerance to an upright or standing position.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that a powered table be classified into class II because the Panel believes that the electrical properties of this device must be controlled to avoid injury. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with the electrical properties of the device and on the Panel members' personal knowledge of, and familiarity with, the device.
5. Risks to health: Electrical shock: Excessive leakage current could result in injury, and malfunction of the device could result in an electric shock.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that powered tables be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3760, to read as follows:

§ 890.3760 Powered table.

(a) *Identification.* A powered table is an electrically operated flat surface table that can be adjusted to various positions. It is used by patients with circulatory, neurological, or musculoskeletal conditions to increase tolerance to an upright or standing position.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1217]

Medical Devices; Classification of Cane, Crutch, and Walker Tips

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cane, crutch, and walker tips into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305),

Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cane, crutch, and walker tips:

1. Identification: Cane, crutch, and walker tips are rubber accessories applied to the ground end of mobility aids to prevent skidding.
2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.
3. Summary of reasons for recommendation: The Panel recommends that these devices be classified into class I because they are simple devices that present no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of these devices.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, these devices.
5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that cane, crutch, and walker tips be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3790, to read as follows:

§ 890.3790 Cane, crutch, and walker tips.

(a) *Identification.* Cane, crutch, and walker tips are rubber accessories applied to the ground end of mobility aids to prevent skidding.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1218]

Medical Devices; Classification of Motorized Three-Wheeled Vehicles

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying motorized three-wheeled vehicles for outdoor use into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health,

Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of motorized three-wheeled vehicles:

1. Identification: A motorized three-wheeled vehicle is a gasoline-fueled or battery-powered device that is used for outside transportation by disabled persons.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.
3. Summary of reasons for recommendation: The Panel recommends that a motorized three-wheeled vehicle be classified into class II because the Panel believes that the design and materials of the device must be controlled to assure that there are adequate mechanical safety features to prevent the patient from falling from the device. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that performance standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device, on the Panel members' personal knowledge, of and familiarity with, the device, and a review of the pertinent literature (Refs. 1 and 2). Staros and Peizer (Ref. 1) state that good bilateral hand, arm, and shoulder strength and excursion are needed to drive three-wheeled vehicles. The authors report that there have been frequent accidents from the use of these vehicles, caused by excessive speeds and fast turns.

5. Risks to health: Bodily injury: The patient could fall as a result of instability of the vehicle, fast turning, or tipping over of the vehicle while the patient mounts or dismounts. Lack of foot guard rails could cause the patient's feet to become entangled and thus cause injury.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that motorized three-wheeled vehicles be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard

would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes there is sufficient information to establish a performance standard for this device.

Medical Devices; Classification of Mechanical Walkers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mechanical walkers into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mechanical walkers:

1. Identification: A mechanical walker is a four-legged device used to provide moderate weight support while walking by means of a metal frame. It is used by disabled persons who lack strength, good balance, or endurance.
2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that a mechanical walker be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel member's

personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that mechanical walkers be classified into class I (general controls), with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3825, to read as follows:

§ 890.3825 Mechanical walker.

(a) *Identification.* A mechanical walker is a four-legged device used to provide moderate weight support while walking by means of a metal frame. It is used by disabled persons who lack strength, good balance, or endurance.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

[Docket No. 78N-1220]

Medical Devices; Classification of Mechanical Wheelchairs

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mechanical wheelchairs into class I (general controls). The FDA is also publishing the recommendation of

the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mechanical wheelchairs:

1. Identification: A mechanical wheelchair is a manually operated device with wheels used to provide mobility to persons restricted to a sitting position.
2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.
3. Summary of reasons for recommendation: The Panel recommends that a mechanical wheelchair be classified into class I because this device presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.
5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that mechanical wheelchairs be classified into class I (general controls)

with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3850, to read as follows:

§ 890.3850 Mechanical wheelchair.

(a) *Identification.* A mechanical wheelchair is a manually operated device with wheels used to provide mobility to persons restricted to a sitting position.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1221]

Medical Devices; Classification of Powered Wheelchairs

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered wheelchairs into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA

will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered wheelchairs:

1. Identification: A powered wheelchair is a battery-operated device with wheels used to provide mobility to persons restricted to a sitting position.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that a powered wheelchair be classified into class II because this device is widely used by handicapped persons in numerous public places, both indoors and outdoors. The Panel believes that if the device should malfunction, serious harm to the patient or public could result. The Panel believes that the structural strength of the device must be controlled to prevent the wheelchair from collapsing. The Panel also believes that the control mechanism and power system should be controlled to prevent malfunction and a loss of control of the device and injury to the patient or public. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device and a review of the pertinent literature (Refs. 1 and 2).

5. Risks to health: Bodily injury: Defective controls, battery malfunction, poor structural materials, or use of the device on inclined surfaces could result in bodily injury.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that powered wheelchairs be classified into class II (performance standards). The relevant literature on powered wheelchairs has been reviewed (Refs. 1 and 2). There is a limited amount of literature generated by the Veterans Administration (VA) program evaluating nonlicensed mobility aids. The parameters for a standard to control the hazards associated with the use of this device have been evaluated at the VA Prosthetic Center in New York. The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

References

The following information has been placed in the office of Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Lipskin, R., "VAPC Program for Electric Wheelchairs and Other Nonlicensed Mobility Aids," *Bulletin of Prosthetics Research*, 10-22:326-336, Fall 1974.

2. Lipskin, R., "Trends in Nonlicensed Mobility Aids," *Bulletin of Prosthetics Research*, 10-22:41-52, Fall 1974.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart B by adding new § 890.3860, to read as follows:

§ 890.3860 Powered wheelchair.

(a) *Identification.* A powered wheelchair is a battery-operated device with wheels used to provide mobility to persons restricted to a sitting position.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing

Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

[21 CFR Part 890]

[Docket No. 78N-1222]

Medical Devices; Classification of Special Grade Wheelchairs

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying special grade wheelchairs into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory

committee, made the following recommendation regarding the classification of special grade wheelchair:

1. Identification: A special grade wheelchair is a device with wheels that provides mobility for those persons restricted to a sitting position and that is designed for long term use to be used in all environments (e.g., for paraplegics, quadraplegics, and amputees).

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that a special grade wheelchair be classified into class II because the Panel believes that the design and structural strength of the device must be controlled to assure that there are adequate safety features to prevent the wheelchair from tipping over or collapsing, thus causing injury to the patient. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Bodily injury: Poor structural materials, mechanical breakdown, or instability of the device could result in bodily injury to the patient.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that special grade wheelchairs be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3880, to read as follows:

§ 890.3880 Special grade wheelchair.

(a) *Identification.* A special grade wheelchair is a device with wheels that provides mobility for those persons

restricted to a sitting position and is designed to be used in all environments for long term uses (e.g., for paraplegics, quadraplegics, and amputees).

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1223]

Medical Devices; Classification of Stair-Climbing Wheelchairs

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying stair-climbing wheelchairs into class III (premarket approval). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after date of publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of stair-climbing wheelchairs:

1. Identification: A stair-climbing wheelchair is a mobility assist device used by a disabled person to climb stairs in a sitting position. The device functions by means of two endless belt tracks that are lowered from under the chair and adjusted to the angle of the stairs.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a high priority because of the large number of potential users and the risk to health involved.

3. Summary of reasons for recommendation: The Panel recommends that stair-climbing wheelchairs be classified into class III because the Panel believes that satisfactory performance of this device has not been demonstrated and, therefore, that it is not possible to establish an adequate performance standard for the device. The design of the device is experimental and data to support its safe and effective use are not available. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with the device and on the Panel members' familiarity with stair-climbing wheelchairs and the lack of sufficient data to support the safety and effectiveness of the device. Seybold's article (Ref. 1), describes the device and its use and states that a need for further development, testing, and evaluation of the stair-climbing wheelchair is necessary.

5. Risks to health: Bodily injury: If the device fails the disabled patient could fall and be seriously or fatally injured.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that stair-climbing wheelchairs be classified into class III (premarket approval). The Commissioner believes

that premarket approval is necessary for the device because general controls and performance standards are insufficient to control the risk to health described above and thus to provide reasonable assurance of the safety and effectiveness of the device. The Commissioner believes the device presents a potential unreasonable risk of injury because satisfactory performance has not been demonstrated. The Commissioner also believes that there is not sufficient information to establish a performance standard for this device.

[Docket No. 78N-1224]

Medical Devices; Classification of Standup Wheelchairs

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying standup wheelchairs (that assist a person to stand) into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976. **DATES:** Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.
FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of standup wheelchairs:

1. Identification: A standup wheelchair is a wheeled mobility-assist device that also operates as an external manually controlled mechanical system that enables a paraplegic to stand by means of an elevating seat.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that

a standup wheelchair be classified into class II because the Panel believes that the design and materials of the device must be controlled to assure that there are adequate mechanical safety features to prevent the patient from falling while arising to the standing position or while in the standing position. The Panel believes that general controls would not provide sufficient control over these over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device, on the Panel members' personal knowledge of, and familiarity with, the device and on a review of the pertinent literature (Refs. 1 and 2). Staros and Peizer (Ref. 1) have identified the following benefits that standup wheelchairs offer: (1) Achieving the upright position early in treatment, (2) prevention of contractures (muscle shortening) and pressure sores, and (3) possible improvements in circulation, urinary drainage, respiration, and other vital functions.

5. Risks to health: Bodily injury: Poor structural materials or instability of the device may cause the patient to fall, resulting in bodily injury.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that standup wheelchairs be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Medical Devices; Classification of Wheelchair Accessories

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying wheelchair accessories into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the devices be classified into class I. The effect of classifying the devices into class I is to require that the devices meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the devices. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of wheelchair accessories:

1. Identification: A wheelchair accessory is a device that is sold separately from the wheelchair and is used for the specific needs of a patient who uses a wheelchair. Examples of wheelchair accessories are the following: armboard, lapboard, pusher cuff, crutch and cane holder, restraint, overhead suspension sling, head and trunk support, blanket and leg rest strap.

2. Recommended classification: Class I (general controls). The Panel recommends that wheelchair accessories be exempt from registration, device listing, and premarket notification regulations under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports under section 519 of the act (21 U.S.C. 360i), and good manufacturing practice regulations under section 520(f) of the act (21 U.S.C. (360)(f)).

3. Summary of reasons for recommendation: The Panel recommends that wheelchair accessories be classified into class I and that manufacturers of these devices should not be required to comply with registration, device listing, premarket notification, records and reports, or good manufacturing practice regulations because they are simple devices that pose no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the devices.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, these devices.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that wheelchair accessories be classified into class I (general controls). The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices. In response to the Panel's recommendation that manufacturers of a wheelchair

accessory be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a wheelchair accessory, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a wheelchair accessory. The agency does not, at this time, anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of a wheelchair accessory be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP

requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of a wheelchair accessory be exempt from the device GMP regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a wheelchair accessory must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a wheelchair accessory must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3910, to read as follows:

§ 890.3910 Wheelchair accessory.

(a) *Identification.* A wheelchair accessory is a device that is sold separately from the wheelchair and is used for the specific needs of a patient who uses a wheelchair. Examples of wheelchair accessories are the following: armboard, lapboard, pusher cuff, crutch and cane holder, restraint, overhead suspension sling, head and trunk support, blanket and leg rest strap.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter.

The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26303 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1226]

Medical Devices; Classification of Wheelchair Components

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying wheelchair components into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of special grade wheelchair components:

1. *Identification:* A wheelchair component is a device that is generally sold as an integral part of a wheelchair, but may also be sold separately as a replacement part. Examples of wheelchair components are the following: armrest, narrowing attachment, belt, extension brake, curb climber, cushion, antitip device, footrest, handrim, hill holder, leg rest, heel loops, and toe loops.
2. *Recommended classification:* Class I (general controls). The Panel recommends that there be no exemptions.
3. *Summary of reasons for recommendation:* The Panel recommends that wheelchair components be classified into class I because they are simple devices that present no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the devices.
4. *Summary of data of which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, these devices.
5. *Risks to health:* None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that wheelchairs components be classified into class I (general controls), with no exemptions. The Commissioner believes that a general controls are sufficient to provide reasonable assurance of the safety and effectiveness of these devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3920, to read as follows:

§ 890.3920 Wheelchair component.

(a) *Identification.* A wheelchair component is a device that is generally sold as an integral part of a wheelchair,

but may also be sold separately as a replacement part. Examples of wheelchair components are the following: Armrest, narrowing attachment, belt, extension brake, curb climber, cushion, antitip device, footrest, handrim, hill holder, leg rest, heel loops, and toe loops.

(b) *Classification.* Class I (general controls).

Interested persons may on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857. Written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26304 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1227]

Medical Devices; Classification of Wheelchair Elevators

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying wheelchair elevators into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of wheelchair elevators:

1. *Identification:* A wheelchair elevator is a motorized lifting device used by a disabled person to move a wheelchair from one level to another.
2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. *Summary of reasons for recommendation:* The Panel recommends that wheelchair elevators be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazard of bodily injury and strain in case of an electrical malfunction. The Panel believes that general controls will not provide sufficient control over this characteristic. The Panel believes that a performance standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.
4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.
5. *Risks to health:* Bodily injury: An electrical malfunction of the device or insufficient protection by the guardrails could result in strain or injury to the patient.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that wheelchair elevators be classified into class II (performance standards). The Commissioner believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and

effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3930, to read as follows:

§ 890.3930 Wheelchair elevator.

(a) *Identification.* A wheelchair elevator is a motorized lift device used by a disabled person to move a wheelchair from one level to another.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26305 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1228]

Medical Devices; Classification of Wheelchair Platform Scales

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying wheelchair platform scales into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device.

After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of wheelchair platform scales:

1. Identification: A wheelchair platform scale is a device with a base designed to accommodate a wheelchair and is used to weigh a person who is confined to a wheelchair.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that wheelchair platform scales be classified into class II because the Panel believes that the measurement function of this device should be controlled to lessen the likelihood of misdiagnosis due to inaccurate measurement readings. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on a review of the pertinent literature. Madorsky (Ref. 1) states that significant inaccuracies and inefficiencies in recording weights have occurred due to the varying sizes of wheelchairs, time of day, and different clothing weights. The inconsistencies as stated in the literature and

the possible diagnostic or prognostic use of the weight measured by the scale demands accuracy of the measurement function of the device.

5. Risks to health: Misdiagnosis: Inaccurate information may result if the measurement function is faulty.

Proposed Classification

The Commissioner disagrees with the Panel recommendation that wheelchair platform scales be classified into class II (performance standards). The Commissioner believes that general controls are sufficient to require that the degree of accuracy of a platform scale be described in labeling accompanying the device. Section 502 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352) requires information under authority of this act to appear on the labeling and that the labeling be prominently placed on the device. Therefore, the Commissioner is proposing that wheelchair platform scales be classified into class I (general controls) with no exemptions. The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Madorsky, A., "Weighing of Wheelchair-Bound Patients," *Archives of Physical Medicine and Rehabilitation*, 57:594, December 1976.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart D by adding new § 890.3940, to read as follows:

§ 890.3940 Wheelchair platform scale.

(a) *Identification:* A wheelchair platform scale is a device with a base designed to accommodate a wheelchair and is used to weigh a person who is confined to a wheelchair.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. [Docket No. 78N-1229]

Medical Devices; Classification of Daily Activity Assist Devices

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying daily activity assist devices into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of daily activity assist devices:

1. Identification: Daily activity assist devices are modified adaptors and utensils (e.g., dressing, grooming, recreational activity, transfer, eating, and homemaking aids) that are used to assist a patient in performing a specific function.

2. Recommended classification: Class I (general controls). The Panel recommends that daily activity assist devices be exempt from registration, device listing, and premarket notification under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that daily activity assist devices be classified into class I and that manufacturers of these devices not be required to comply with registration, device listing, premarket notification, records and reports, or good manufacturing practice regulations, because they are simple devices that present no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the devices.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, these devices.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that daily activity assist devices be classified into class I (general controls). The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices. In response to the Panel's recommendation that manufacturers of daily activity assist devices be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of daily activity assist devices, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing these devices and to conduct necessary inspections. The agency has determined,

however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning daily activity assist devices. The agency does not at this time anticipate that premarket approval will be required for these devices. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of daily activity assist devices be exempt from records and reports regulations under section 519 of the act. The Records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of daily activity assist devices be exempt from the device GMP regulation under section 520(f) of the act, FDA is proposing that a manufacturer of these devices who does not label or otherwise represent them as sterile be exempt, in the manufacture of the devices, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint

files. Based on available information about current practices used in the manufacture of the devices and user experience with the devices, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the devices. The agency believes, however, that manufacturers of daily activity assist devices, even when they are not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of daily activity assist devices must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of daily activity assist devices that are labeled or otherwise represented as sterile is, in the manufacture of these devices, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 by reserving Subpart E and adding new Subpart F and § 890.5050, to read as follows:

Subpart E [Reserved]

Subpart F—Physical Medicine Therapeutic Devices

§ 890.5050 Daily activity assist devices.

(a) *Identification.* Daily activity assist devices are modified adaptors and utensils (e.g., dressing, grooming, recreational activity, transfer, eating, and homemaking aids) that are used to assist a patient to perform a specific function.

(b) *Classification.* Class I (general controls). The devices are exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If the devices are not labeled or otherwise represented as sterile, they also are exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements

concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26307 Filed 8-27-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1230]

Medical Devices; Classification of Immersion Hydrobaths

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying immersion hydrobaths into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia

Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of immersion hydrobaths:

1. Identification: An immersion hydrobath (e.g., whirlpool) consists of water agitators and may include a tub to be filled with water. The water temperature may be measured by a gauge. It is used in hydrotherapy to relieve pain and itching and as an aid in the healing process of inflamed and traumatized tissue, and it serves as a setting for removal of contaminated tissue.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that immersion hydrobaths be classified into class II because the Panel believes that a standard is necessary to control the electrical properties of this device to avoid the potential hazards of electrical shock. The Panel believes that the temperature control should be sufficiently accurate to prevent burns, and that the materials and design of the device should enable proper cleaning to prevent infection. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Thermal burns: A faulty temperature control could result in burns. (c) Bodily injury: If the surface of the device is slippery, the patient could sustain bodily injury by falling. (d) Infection: The accumulation of debris in drains and faucets could cause infection.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that immersion hydrobaths be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance

standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Foods and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5100, to read as follows:

§ 890.5100 Immersion hydrobath.

(a) *Identification.* An immersion hydrobath (e.g., whirlpool) consists of water agitators and may include a tub to be filled with water. The water temperature may be measured by a gauge. It is used in hydrotherapy to relieve pain and itching and as an aid in the healing process of inflamed and traumatized tissue, and it serves as a setting for removal of contaminated tissue.

(b) *Classification.* Class II (performance standard).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1231]

Medical Devices; Classification of Paraffin Baths

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying paraffin baths into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device

Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of paraffin baths:

1. Identification: A paraffin bath is a metal tub to be filled with liquid paraffin (wax) maintained at an elevated temperature in which the appendages (e.g., hands or fingers) are placed to relieve pain and stiffness.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that paraffin baths be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazards of shock and burns to the operator and/or patient. The Panel believes that the temperature control should be sufficiently accurate to avoid an inappropriate temperature level that may cause burns. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel

members' personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Electrical shock: Excessive leakage current could result in patient injury, or a malfunction of the device could result in electrical shock. (b) Burns: Hot wax burns to a patient may result from a faulty temperature control.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that paraffin baths be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5110, to read as follows:

§ 890.5110 Paraffin bath.

(a) *Identification.* A paraffin bath is a metal tub to be filled with liquid paraffin (wax) maintained at an elevated temperature in which the appendages (e.g., hands or fingers) are placed to relieve pain and stiffness.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine and the Obstetrical and Gynecological Device Classification Panel, FDA advisory committees, made the following recommendation with respect to the classification of nonpowered sitz baths:

1. Identification: A nonpowered sitz bath is a tub to be filled with water that is used in external hydrotherapy to relieve pain or pruritis and to accelerate the healing of inflamed or traumatized tissues of the perianal and perineal areas.

2. Recommended classification: Class I (general controls). The Panels recommend that there be no exemptions.

3. Summary of reasons for recommendation: The Panels recommend that this device be classified into class I (general controls) because this is a simple device that

presents no risks to health or undue hazards when used in a normal manner for the purpose recommended. The Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panels based their recommendations on the Panel members' personal knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panels' recommendation and is proposing that nonpowered sitz baths be classified into class I (general controls) with no exemptions because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5125, to read as follows:

§ 890.5125 Nonpowered sitz bath.

(a) *Identification.* A nonpowered sitz bath is a tub to be filled with water that is used in external hydrotherapy to relieve pain or pruritis and to accelerate the healing of inflamed or traumatized tissues of the perianal and perineal areas.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1233]

Medical Devices; Classification of Powered Patient Transports

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered patient transports into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered patient transports:

1. Identification: A powered patient transport is a motorized device used to assist patient transfers to and from the bath, beds, chairs, treatment modalities, transport vehicles, and up and down flights of stairs.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.
3. Summary of reasons for recommendation: The Panel recommends that

powered patient transports be classified into class II because the Panel believes that the electrical properties of this device must be controlled to avoid the potential hazard of electrical shock. The Panel also believes that the structural strength of this device should be controlled to prevent a potential injury hazard to the patient. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Electrical shock: Excessive leakage current could result in injury, and malfunction of the device could result in electrical shock. (b) Bodily injury: Injury could result from the patient falling due to structural failure of the device.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that powered patient transports be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5150, to read as follows:

§ 890.5150 Powered patient transport.

(a) *Identification.* A powered patient transport is a motorized device used to assist patient transfers to and from the bath, beds, chairs, treatment modalities, transport vehicles, and up and down flights of stairs.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may

submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26311 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1234]

Medical Devices; Classification of Air-Fluidized Beds

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying air-fluidized beds into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory

committee, made the following recommendation regarding the classification of air-fluidized beds:

1. Identification: An air-fluidized bed is a device employing the circulation of filtered air through ceramic spherules (small round ceramic objects) to treat decubitus ulcers (bedsores), severe and extensive burns, and aid circulation.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that air-fluidized beds be classified into class II because the Panel believes that the electrical properties associated with the device must be controlled to prevent the potential hazard of electrical shock. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and on the Panel members' personal knowledge of, and familiarity with, the device and a review of the pertinent literature (Refs. 1 through 5). At the Panel meeting of March 18, 1975 (Ref. 1), the Physical Medicine Device Classification Panel recommended that the device be classified into class III (premarket approval) because the Panel at that time believed that there was the possibility of patient infection and that data were insufficient to write an adequate standard for efficacy. However, at the Panel meeting of March 21 through 22, 1976, Sharbaugh (Ref. 2) discussed data on the microbiological aspect of air-fluidized beds. He presented studies in which air-fluidized beds were contaminated with bacteria and fungi. The number of organisms steadily decreased with no fungi or bacteria remaining 24 hours following this initial higher level of contamination. Sharbaugh also stated that the nature of the beds protects the patient from any sudden temperature changes. Newsome et al. (Ref. 3) conducted a study using air-fluidized beds. The investigators concluded that this device "has proven to be a useful adjunct in the care of extensively burned patients." They found that decubitus ulcers did not form, and old ulcers healed, when the beds were used. The authors stated that patients found this bed more comfortable than conventional beds, in which the patient had to change positions frequently. Sharbaugh and Hargest (Ref. 4) and Sharbaugh, Hargest, and Wright (Ref. 5) stated that air-fluidized beds have been found to remain "uncontaminated" and "essentially bacteria-free." These studies demonstrate the efficacy of air-fluidized beds, and the Panel recommends a class II classification only to assure electrical safety.

5. Risks to health: Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that air-fluidized beds be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risk to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide this assurance.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Summary Minutes of the Fourth Meeting of the Physical Medicine Device Classification Panel, March 18, 1975.
2. Sharbaugh, R. J., "Microbiological Aspects of the Air-Fluidized Bed," unpublished paper. Appendix A to Summary Minutes of the Seventh Meeting of the Physical Medicine Device Classification Panel, March 21 through 22, 1976.

[Docket No. 78N-1235]

Medical Devices; Classification of Powered Flotation Therapy Beds

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered flotation therapy beds into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel and the General Hospital and the Personal Use Device Classification Panel, that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the

development of the proposed regulation. The Physical Medicine Device Classification Panel and the General Hospital and the Personal Use Device Classification Panel, FDA advisory committees, made the following recommendation regarding the classification of powered flotation therapy beds:

1. Identification: A powered flotation therapy bed is a device that may have an electrically heated mattress and is designed to accommodate a large volume of constantly moving water, air, mud, or sand in its mattress. This device is used as an aid to nursing care for the acceleration of healing or prevention of decubitus ulcers (bedsores), for patients with severe or extensive burns, or to aid circulation.

2. Recommended classification: Class II (performance standards). The Physical Medicine Device Classification Panel recommends that establishing a performance standard for this device be a high priority. The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panels recommend that powered flotation therapy beds be classified into class II because the Panels believe that the electrical properties of the device must be controlled to avoid the potential hazard of electrical shock and to prevent injury to soft tissues. The Panels believe that general controls will not provide sufficient control over these characteristics. The Panels believe that a standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panels based their recommendation on the potential hazards associated with this device, the Panels members' personal knowledge of, and familiarity with, the device, and a review of the pertinent literature. The literature supports the efficacy of flotation therapy for the treatment and prevention of decubitus ulcers (Refs. 1 and 2). Harper et al. (Ref. 2) state that flotation therapy used during a patient's stay in the hospital would be effective in preventing the formation of decubitus ulcers.

5. Risks to health: The Physical Medicine and the General Hospital and Personal Use Device Classification Panels identified the following risks to health: (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Bodily injury: Soft tissue breakdown could result from electrical failure of the device and/or failure to turn the patient when necessary because of overreliance on the device by the therapist or nurse. The general nature of the device is conducive to over-reliance on its purported efficacy, and this could lead to bodily injury. The water in the mattress could leak onto the floor, resulting in a slippery surface, causing patients and/or personnel to slip or fall. (c)

Cross-infection: If it is improperly cleaned, the device could spread infection to patients.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that powered flotation therapy beds be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

[Docket No. 78N-1236]

Medical Devices; Classification of Manual Patient Rotation Bed

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying manual patient rotation beds into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of manual patient rotation beds:

1. Identification: A manual patient rotation bed is a device that turns a patient who is restrained to a reclining position. This manually operated bed is used to treat patients with severe and extensive burns or decubitus ulcers (bedsores), and to aid circulation.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that manual patient rotation beds be classified into class I because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' knowledge of, and familiarity with, this device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that manual patient rotation beds be classified into class I (general controls), with no exemptions, because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5180, to read as follows:

§ 890.5180 Manual patient rotation bed.

(a) *Identification.* A manual patient rotation bed is a device that turns a patient who is restrained to a reclining position. This manually operated bed is used to treat patients with severe and extensive burns or decubitus ulcers (bedsores), and to aid circulation.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 20, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1237]

Medical Devices; Classification of Powered Patient Rotation Bed

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered patient rotation beds into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered patient rotation beds:

1. Identification: A powered patient rotation bed is a device that turns a patient

who is restrained to a reclining position. It is used to treat patients with decubitus ulcers (bedsores), severe and extensive burns, and urinary tract blockage, and to aid circulation.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that powered patient rotation beds be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazard of electrical shock. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device, and on the Panel members' personal knowledge of, and familiarity with, the device and a review of the pertinent literature (Refs. 1). Hilt and Schmitt (Ref. 2) describe the procedures to follow in using patient rotation beds. The authors support the use of this device in rehabilitation; however, they emphasize that "the bed should be maintained properly and the motor checked," and that it should be unplugged when the bed is not in use. Thus, the electrical properties of this device should be controlled to lessen the likelihood of malfunction and possible bodily injury to the patient and/or operator.

5. Risks to health: (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Decubitus ulcers (bedsores): Decubitus ulcers or other injury to soft tissues may develop if there is overreliance by the therapist on the device. (c) Bodily injury: The patient may fall out of the bed if he or she is not stabilized or restrained properly.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that powered patient rotation beds be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes there is sufficient information to establish a performance standard to provide such assurance.

References

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5225, to read as follows:

§ 890.5225 Powered patient rotation bed.

(a) *Identification.* A powered patient rotation bed is a device that turns a patient who is restrained to a reclining position. It is used to treat patients with decubitus ulcers (bedsores), severe and extensive burns, and urinary tract blockage, and to aid circulation.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-28315 Filed 8-27-79; 9:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1238]

Medical Devices; Classification of Moist Steam Cabinets

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying moist steam cabinets into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the

safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of moist steam cabinets:

1. Identification: A moist steam cabinet is a device that delivers a flow of heated, moisturized air to a patient in an enclosed unit to treat arthritis and fibrosis (a formation of fibrous tissue) and to increase local blood flow.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that moist steam cabinets be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazards of electrical shock and burns. The Panel believes that the temperature control should be sufficiently accurate to avoid burns. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel members based their recommendation on the potential hazards associated with this device and their personal knowledge of, and familiarity with, the device.

5. Risks to health: (a) Electrical shock: Excessive leakage current could result in injury or a malfunction of the device could

result in electrical shock. (b) Burns: Hot steam burns could result from a faulty temperature control.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that moist steam cabinets be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5250, to read as follows:

§ 890.5250 Moist steam cabinet.

(a) *Identification.* A moist steam cabinet is a device that delivers a flow of heated, moisturized air to a patient in an enclosed unit to treat arthritis and fibrosis (a formation of fibrous tissue) and to increase local blood flow.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1239]

Medical Devices; Classification of Microwave Diathermies

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying microwave diathermies into class II (performance standards) for use in applying therapeutic deep heat and into class III (premarket approval) for all other uses. The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of microwave diathermies:

1. Identification: A microwave diathermy for use in applying therapeutic deep heat is a device that applies high-frequency energy at microwave frequencies (915 megahertz to 2450 megahertz) to specific areas of the body. Such tissue heating is used as adjunctive therapy for the relief of pain in medical conditions such as muscle spasms and joint contractures.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that microwave diathermies be classified into class II because the Panel believes that, even though more information is needed on microwave diathermy and its biologic effects, the development and application of standards based on the present level of information would improve the safety and effectiveness of the device by providing for electrical standards, minimal and maximal energy output control limits and adequate labeling. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel also believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard to provide such assurance. The Panel also recommends that these devices be restricted to use by or under the supervision of a physician.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with the device, on the Panel members' knowledge of and clinical experience with the device, and on a review of the pertinent literature (Refs. 1 through 4). Michaelson (Refs. 1 and 2) summarizes the physiologic effects of microwaves, the potential hazards of microwaves, and presents data on which proposed environmental safety standards are based. Guy et al. (Ref. 3) present estimates of power absorption and thermal measurements that suggest that beneficial physiologic responses occur with tissue temperature in the range of 40° C to 45° C. Krusen (Ref. 4) summarizes the background of therapeutic microwave diathermy applications, listing specific indications and contraindications. The Panel noted that the Bureau of Radiological Health of the FDA is preparing a proposed draft of a microwave safety standard for therapeutic devices and that the Federal Communications Commission has radiofrequency transmitting requirements for medical diathermy.

5. Risks to health: (a) Adverse tissue response: The devices may cause adverse tissue response that can result in possible cataract formation and central nervous system injury. (b) Electrical shock: Excessive leakage current from improper grounding or a device malfunction can lead to electrical shock. (c) Burns: Contact with uncovered parts of the body at the instrument output terminal or with cables and electrodes that are inadequately insulated may lead to burns.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that microwave diathermies be classified into class II (performance standards) for use in delivering therapeutic deep heat. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health

presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Like the shortwave diathermy, which is the subject of a proposed classification regulation published elsewhere in this issue of the Federal Register, the microwave diathermy is used for therapeutic deep heat. It is also used for additional purposes for which it has not been shown to be safe and effective. Accordingly, although the Panel considered only one use for the microwave diathermy—the delivery of therapeutic deep heat—the agency believes that the device also should be classified with respect to all other intended uses. Therefore, the agency is proposing that microwave diathermy devices be classified into class III (premarket any use other than delivering therapeutic deep heat). The agency believes that microwave diathermy, when it is used for any purpose other than applying therapeutic deep heat, presents a potential unreasonable risk of injury without proven benefit to the patient because substantial data and clinical investigations do not exist to support these other claims. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device when it is used for any purpose other than applying deep therapeutic heat, and that insufficient information exists to establish a performance standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5275, to read as follows:

§ 890.5275 Microwave diathermy.

(a) *Microwave diathermy for use in applying therapeutic deep heat—(1) Identification.* A microwave diathermy for use in applying therapeutic deep heat is a device that applies high frequency energy at microwave frequencies (915 megahertz to 2450 megahertz) to specific areas of the body. Such tissue heating is used as adjunctive therapy for the relief of pain in medical conditions such as muscle spasms and joint contractures.

(2) *Classification.* Class II (performance standards).

(b) *Microwave diathermy for any use other than applying therapeutic deep heat—(1) Identification.* A microwave diathermy for any use other than applying therapeutic deep heat is a device that applies high frequency energy (915 megahertz to 2450 megahertz) to the body for any purpose other than applying therapeutic deep heat for the relief of pain.

(2) *Classification.* Class III (premarket approval).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. [Docket No. 78N-1241]

Medical Devices; Classification of Shortwave Diathermies

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying short wave diathermies into class II (performance standards) for use in applying therapeutic deep heat and into class III (premarket approval) for all other uses. FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that shortwave diathermy (i.e., devices

claiming therapeutic effects through the heating of tissue) be classified into class II (performance standards). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of shortwave diathermy:

1. Identification: A shortwave diathermy for use in applying therapeutic deep heat is a device that applies the electromagnetic energy of pulsed and/or continuous radiowaves in the radiofrequency bands of 13 megahertz to 27.12 megahertz to provide therapeutic deep heat in specific areas of the body. Such tissue heating is used as adjunctive therapy for the relief of pain in selected medical conditions such as muscle spasms and joint contractures.

2. Recommended classification: The Panel recommends that shortwave devices that are claimed to be capable of generating therapeutic heat in specific areas of the body be classified into class II (performance standards) and that establishing a performance standard for these devices be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that

shortwave diathermy devices that produce an increase in internal body tissue temperature be classified into class II because the Panel believes that these devices have demonstrated therapeutic effectiveness. The Panel believes that, even though more information is needed on shortwave diathermy and its biological effects, the development and application of standards based on the present level of information would improve the safety and effectiveness of the device by providing for electrical standards, minimal and maximal energy output control limits, and adequate labeling. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel also believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a preliminary standard that would require periodic updating as data become available. The Panel also recommends that shortwave devices be restricted to use by or under the supervision of a physician.

4. Summary of data on which the recommendation is based: The Panel based its recommendations on the Panel members' professional knowledge of shortwave devices, a review of the literature, a report by the University of Washington's Department of Rehabilitation Medicine (Ref. 1), and a GAO report addressing the safety and effectiveness of diathermy (Ref. 2). Some of the Panel members have evaluated the clinical application of the devices and tested the performance of the equipment. These devices were discussed by the Panel members at the Panel and Subcommittee meetings of August 14 and 15, 1975, March 21 and 22, 1976, March 18, 1977, October 14, 1977, and March 17, 1978 (Refs. 3 through 7). It was stated that the therapeutic benefits of diathermy are related to a temperature rise (thermal effect) in the body tissues. (Ref. 3). The Panel recognizes that some shortwave devices cannot provide a sufficient increase in tissue temperature and thus are considered therapeutically ineffective. In particular, many of these ineffective devices have used pulsed radiofrequency outputs (Ref. 3). Diathermy is only used for its thermal effects, and the Panel could find no therapeutic value in the nonthermal effects of shortwave treatment (Ref. 4). The Panel noted that the Federal Communications Commission has radiofrequency transmitting requirements for medical diathermy that must be met.

5. Risks to health: (a) Cellular or tissue injury: Nonthermal biological effects of nonionizing radiation may cause cellular or tissue injury. (b) Pacemaker interference: The electromagnetic fields generated by the device may interfere with the circuitry of a cardiac pacemaker. (c) Tissue necrosis (death) and burns: Excessive energy deposition into the tissue may cause excessive heating that results in tissue damage. (d) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that

shortwave diathermy devices be classified into class II (performance standards) for use in delivering therapeutic deep heat. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

The Panel noted that the shortwave diathermy is capable of being, and has been offered for use for other than the thermal effects of diathermy. Accordingly, the agency is proposing that shortwave diathermy devices be classified into class III (premarket approval) for any use other than delivering therapeutic deep heat. The agency believes that shortwave diathermy, when it is used for any purpose other than applying therapeutic deep heat, presents a potential unreasonable risk of injury without proven benefit to the patient because substantial data and clinical investigations do not exist to support additional claims made. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device when it is used for any purpose other than applying therapeutic deep heat, and that insufficient information exists to establish a performance standard to provide this assurance.

Medical Devices; Classification of Ultrasonic Diathermies

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultrasonic diathermies into class II (performance standards) for use in applying therapeutic deep heat and into class III for all other uses. The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in the issue of the Federal Register provides background information concerning the

development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ultrasonic diathermies:

1. Identification: An ultrasonic diathermy for use in applying therapeutic deep heat is a device that applies ultrasonic energy at a frequency beyond 20,000 cycles per second to provide therapeutic deep heat in specific areas of the body. Such tissue heating is used as adjunctive therapy for the relief of pain in selected medical conditions such as muscle spasms and joint contractures.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that ultrasonic diathermies be classified into class II because the electrical current used to provide ultrasound should be controlled to prevent injury. The Panel believes that the measurement limitations inherent in the use of the device should be clearly specified by manufacturers in the device labeling. The Panel also recommends that the device be restricted to use by or under the supervision of a physician. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device, on the Panel members' knowledge of, and experience with, the device, and on a review of the pertinent literature (Refs. 1 and 2). Lehmann (Ref. 1) stated that ultrasound has been found to be of established value in treating joint contractures, muscle spasms, and periarthritis (inflammation of tissue around the joints). Lehmann stated that ultrasound is a very powerful and effective heating agent but that there are contraindications for use of the device. If used improperly, ultrasound can cause cavitation (cellular destruction), resulting in possible irreversible damage. The Panel noted that the Bureau of Radiological Health of FDA has promulgated performance safety standards for ultrasonic therapeutic products (21 CFR 1050.10) and that the Federal Communications Commission has radio-frequency transmitting requirements for medical diathermy that must be met.

5. Risks to health: (a) Electrical shock: Faulty design or a malfunction of the device could result in electrical shock. (b) Burns: High current density over time could result in burns to tissues. (c) Inappropriate therapy: Inappropriate therapy could result from inaccurate measurement of applied energy. (d) Cavitation (cellular destruction): Inadequate uniform field distribution or lack of sufficient external pressure on the device applied to the skin could lead to tissue cavitation.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ultrasonic diathermies be classified into class II (performance standards) for use in delivering therapeutic deep heat. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Like the shortwave diathermy, which is the subject of a proposed classification regulation published elsewhere in this issue of the Federal Register, the ultrasonic diathermy is used for therapeutic deep heat. It is also used for additional purposes in which it has not been shown to be safe and effective. Accordingly, although the Panel considered only one use for the device—the delivery of therapeutic deep heat—the agency believes that the device should also be classified with respect to all other intended uses. Therefore, the agency is proposing that ultrasonic diathermy devices be classified into class III (premarket approval) for any use other than delivering therapeutic deep heat. The agency believes that ultrasonic diathermy, when it is used for any purpose other than applying therapeutic deep heat, presents a potential unreasonable risk of injury without proven benefit to the patient because substantial data and clinical investigations do not exist to support those other claims. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device, when it is used for a purpose other than applying therapeutic deep heat, and that insufficient information exists to establish a performance standard to provide this assurance.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Lehmann, J. F., "Diathermy" in "Handbook of Physical Medicine and Rehabilitation," 2d Ed., Edited by Krusen, F. H., F. J. Kottke, and P. M. Ellwood, W. B. Saunders Co., Philadelphia, PA, pp. 297-321, 1971.

Ed., Edited by Taylor, E. J. and C. V. Mosby, St. Louis, MO, pp. 75-80, 1977.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5300, to read as follows:

§ 890.5300. Ultrasonic diathermy.

(a) *Ultrasonic diathermy for use in applying therapeutic deep heat—(1) Identification.* An ultrasonic diathermy for use in applying therapeutic deep heat is a device that applies ultrasonic energy at a frequency beyond 20,000 cycles per second to provide therapeutic deep heat in specific areas of the body. Such tissue heating is used as adjunctive therapy for the relief of pain in selected medical conditions such as muscle spasms and joint contractures.

(1) *Classification.* Class II (performance standards).

(b) *Ultrasonic diathermy for any use other than applying therapeutic deep heat—(1) Identification.* An Ultrasonic diathermy for any use other than applying therapeutic deep heat is a device that applies ultrasonic energy at a frequency beyond 20,000 cycles per second to the body for any purpose other than applying therapeutic deep heat for the relief of pain.

(2) *Classification.* Class III (premarket approval).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26318 Filed 8-27-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1243]

Medical Devices; Classification of Exercise Components

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying exercise components into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that these devices be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of exercise components:

1. Identification: An exercise component is a device that is used in conjunction with exercise equipment or with other forms of exercise. Examples of an exercise component include a weight, a dumbbell, a strap, and a hand mitt.

2. Recommended classification: Class I (general controls). The Panel recommends that exercise components be exempt from registration, device listing, and premarket notification regulations under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports requirements under section 519 of the act (21 U.S.C. 360j), and good manufacturing practice regulations under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that these devices be classified into class I and that manufacturers of these devices should

not be required to comply with registration, records and reports, or good manufacturing practice regulations because they are simple devices that present no undue risks to health when used in a normal manner for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of these devices.

4. Summary of data on which the recommendation is based: The Panel members based their recommendation on their personal knowledge of, and familiarity with, these devices.

5. Risks to health: None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that exercise components be classified into class I (general controls). The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of these devices. In response to the Panel's recommendation that manufacturers of an exercise component be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of an exercise component, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning an exercise component. The agency does not, at this time, anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of an exercise component be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device

good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of an exercise component be exempt from the device GMP regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an exercise component must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an exercise component must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption

from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart F by adding new § 890.5350, to read as follows:

§ 890.5350 Exercise component.

(a) *Identification.* An exercise component is a device that is used in conjunction with exercise equipment or with other forms of exercise. Examples of an exercise component include a weight, a dumbbell, a strap, and a hand mitt.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1244]

Medical Devices; Classification of Measuring Exercise Equipment

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying measuring exercise equipment into class II (performance standards). The FDA is also publishing the recommendation of the Physical

Medicine Device Classification Panel that these devices be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of measuring exercise equipment:

1. *Identification:* Measuring exercise equipment consists of manual devices used to redevelop muscles, restore motion to joints, and provide general conditioning. These devices display, by means of a gauge, the amount of exercise performed. Examples of measuring exercise equipment are the therapeutic exercise bicycle, the manually propelled treadmill, and the rowing machine.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for these devices be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that measuring exercise equipment be classified into class II because the devices perform measurement functions that indicate the strength or endurance of a patient. Accurate exercise measurements are necessary for the proper diagnosis and prognosis of a patient's condition, the development of the correct treatment regimen, and the therapeutic evaluation of a patient's progress. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable

assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel also recommends that the measurement limitations inherent in the use of these devices should be clearly specified in the labeling.

4. *Summary of data on which the recommendation is based:* The Panel members based their recommendation on the potential hazards associated with these devices and their personal knowledge of, and familiarity with, the devices.

5. *Risks to health:* Inappropriate therapy: Inaccurate determination of the patient's strength or endurance due to a faulty measurement gauge could lead to inappropriate therapy.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that measuring exercise equipment be classified into class II (performance standards). The agency believes that a performance standard is necessary for these devices because general controls alone are insufficient to control the risks to health presented by these devices. A performance standard would provide reasonable assurance of the safety and effectiveness of the devices. The agency also believes there is sufficient information to establish a standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5360, to read as follows:

§ 890.5360 Measuring exercise equipment.

(a) *Identification.* Measuring exercise equipment consists of manual devices used to redevelop muscles, restore motion to joints, and provide general conditioning. These devices display, by means of a gauge, the amount of exercise performed. Examples of measuring exercise equipment are the therapeutic exercise bicycle, the manually propelled treadmill, and the rowing machine.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading

of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1245]

Medical Devices; Classification of Nonmeasuring Exercise Equipment

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying nonmeasuring exercise equipment into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. The Commissioner of Food and Drugs proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of nonmeasuring exercise equipment:

1. *Identification:* Nonmeasuring exercise equipment consists of devices used to redevelop muscles, restore motion to joints, and provide general physical conditioning. Examples of nonmeasuring exercise equipment are prone scooter boards, parallel bars, mechanical treadmills, and exercise tables.

2. *Recommended classification:* Class I (general controls). The Panel recommends that nonmeasuring exercise equipment be exempt from registration under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports under section 519 of the act (21 U.S.C. 360j), and good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that these devices be classified into class I and that the manufacturers of these devices not be required to comply with registration, records and reports, or good manufacturing practice regulations because these are simple devices that present no undue risks to health when used in a normal manner and for the purposes recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the devices.

4. *Summary of data on which the recommendation is based:* The Panel members based their recommendation on their personal knowledge of, and familiarity with, these devices.

5. *Risks to health:* None identified.

Proposed Classification

The Commissioner agrees with the Panel recommendation and is proposing that nonmeasuring exercise equipment be classified into class I (general controls). The Commissioner believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices. In response to the Panel's recommendation that manufacturers of nonmeasuring exercise equipment be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of nonmeasuring exercise equipment, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing these devices and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the

public health that FDA receive premarket notification submissions concerning nonmeasuring exercise equipment. The agency does not, at this time, anticipate that premarket approval will be required for these devices. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of nonmeasuring exercise equipment be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of nonmeasuring exercise equipment be exempt from the device GMP regulation under section 520(f) of the act, FDA is proposing that a manufacturer of these devices be exempt, in the manufacture of the devices, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the devices and user experience with the devices, the

agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the devices. The agency believes, however, that manufacturers of nonmeasuring exercise equipment must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of nonmeasuring exercise equipment must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate a device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart F by adding new § 890.5370, to read as follows:

§ 890.5370 Nonmeasuring exercise equipment.

(a) *Identification.* Nonmeasuring exercise equipment consists of devices used to redevelop muscles, restore motion to joints, and provide general physical conditioning. Examples of nonmeasuring exercise equipment are prone scooter boards, parallel bars, mechanical treadmills, and exercise tables.

(b) *Classification.* Class I (general controls). The devices are exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The devices also are exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the

above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1246]

**Medical Devices; Classification of
Powered Exercise Equipment**

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered exercise equipment into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel and the Anesthesiology Device Classification Panel that the devices be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendation regarding

the classification of powered exercise equipment:

1. *Identification:* Powered exercise equipment consists of motorized devices used to redevelop muscles, restore motion to joints, and provide general physical conditioning. Examples of powered exercise equipment are the powered treadmill, the powered bicycle, and powered parallel bars.

2. *Recommended classification:* The Physical Medicine Device Classification Panel and the Anesthesiology Device Classification Panel recommend that powered exercise equipment be classified into class II (performance standards). The Panels recommend that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panels recommend that powered exercise equipment be classified into class II because the Panels believe that the electrical properties of these devices must be controlled to avoid the potential hazards of electrical shock and burns. Powered exercise equipment provide a measurement function, and the Physical Medicine Device Classification Panel believes that the measurement limitations of these devices should be clearly specified by the manufacturers of the devices. The Anesthesiology Device Classification Panel believes that the design and materials of these devices must be controlled to assure that there are adequate mechanical safety features to prevent bodily injury to the patient. The Panels believe that general controls would not provide sufficient control over these characteristics. The Panels believe that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panels based their recommendation on the potential hazards associated with these devices and the Panel members' personal knowledge of, and familiarity with, the devices.

5. *Risks to health:* The Physical Medicine Device Classification Panel and the Anesthesiology Device Classification Panel identified the following risks to health: (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Misdiagnosis or inappropriate therapy: Misdiagnosis or inappropriate therapy could result from faulty gauges causing inaccurate measurements. (c) Bodily injury: Sudden starts or stops of the device, or lack of mechanical safety features, may result in bodily injury.

Proposed Classification

FDA agrees with the Panels' recommendation and is proposing that powered exercise equipment be classified into class II (performance standards). The agency believes that a performance standard is necessary for these devices because general controls alone are insufficient to control the risks to health presented by these devices. A

performance standard would provide reasonable assurance of the safety and effectiveness of the devices. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5380, to read as follows:

§ 890.5380 Powered exercise equipment.

(a) *Identification.* Powered exercise equipment consists of motorized devices used to redevelop muscles, restore motion to joints, and provide general physical conditioning. Examples of powered exercise equipment are the powered treadmill, the powered bicycle, and powered parallel bars.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1248]

**Medical Devices; Classification of
Infrared Lamps**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public summary a proposed regulation classifying infrared lamps into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II and of the General Hospital and Personal Use

Device Classification Panel that the device be classified into class I. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I (general controls) is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 56 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel and the General Hospital and Personal Use Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of infrared lamps:

1. *Identification:* An infrared lamp is a device used to provide topical heating for therapeutic purposes by means of either a tungsten or carbon filament heated to emit a high level of incandescence (approximately 10,000 angstroms) or a solid rod or resistance wire heated to red heat (approximately 20,000 to 40,000 angstroms).

2. *Recommended classification:* The Physical Medicine Device Classification Panel recommends that this device be classified into class II (performance standards), and that establishing a performance standard for this device be a low priority. The General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class I (general controls) with no exemptions.

3. *Summary of reasons for recommendation:* The Physical Medicine Device Classification Panel recommends that infrared lamps be classified into class II because the Panel believes that the electrical properties of the device must be controlled to

avoid the potential hazard of electrical shock. The Panel believes that the radiant intensity of this device must be controlled to avoid pain, blistering, burns, and/or heatstroke caused by overexposure. The desired radiant intensity of this device, as stated by Stoner (Ref. 1) is 0.07 to 0.49 watts/cm² to produce hyperemia (increased local blood flow) during a 1-minute to 20-minute exposure. An increased intensity, with a 3-minute exposure, results in pain and blistering. The Panel also recommends the need for a warning to read "when used therapeutically consult your physician or therapist." The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The General Hospital and Personal Use Device Classification Panel recommends that infrared lamps be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of this device.

4. Summary of data on which the recommendation is based: The Physical Medicine Device Classification Panel based its recommendation on the potential hazards associated with this device, the Panel members' personal knowledge of, and familiarity with, the device, and a review of the pertinent literature (Ref. 1). Stoner (Ref. 1) stated that "exposure to infrared and luminous radiation produces superficial hyperemia, sweating, counterirritation and relaxation of muscles." The author further states that "blistering, burns and heatstroke" may be caused by an "overdosage of infrared radiation." The General Hospital and Personal Use Device Classification Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: The Physical Medicine Device Classification Panel and the General Hospital and Personal Use Device Classification Panel identified the following risks to health: (a) Contact burns: Contact burns could result from an unprotected heat element. (b) Radiation burns: Overexposure could lead to radiation burns. (c) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. The General Hospital and Personal Use Device Classification Panel identified the following additional risk to health: (d) Glass cuts: Bursting of the lamp due to liquid contact with the lamp could result in glass cuts.

Proposed Classification

FDA agrees with the Physical Medicine Device Classification Panel and is proposing that infrared lamps be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A

performance standard would provide reasonable assurance of the safety and effectiveness of the device. The Commissioner also believes that there is sufficient information to establish a performance standard to provide such assurance.

FDA disagrees with the General Hospital and Personal Use Device Classification Panel recommendation that infrared lamps be classified into class I (general controls). The agency believes that the device presents a risk to health and that the device should be subject to performance standards.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Stoner, E. K., "Luminous and Infrared Heating," in "Therapeutic Heat and Cold," 2d Ed., Edited by Licht, S., Waverly Press, Inc., Baltimore, MD, pp. 252-265, 1965.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5500, to read as follows:

§ 890.5500 Infrared lamp.

(a) *Identification.* An infrared lamp is a device used to provide topical heating for therapeutic purposes by means of either a tungsten or carbon filament heated to emit a high level of incandescence (approximately 10,000 angstroms) or a solid rod or resistance wire heated to red heat (approximately 20,000 to 40,000 angstroms).

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

[21 CFR Part 890]

[Docket No. 78N-1249]

Medical Devices; Classification of Iontophoresis Devices

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying iontophoresis devices for the specialized uses (for the diagnosis of cystic fibrosis, and for fluoride uptake acceleration in dentistry, and for local anesthesia of the intact tympanic membrane) into class II (performance standards) and for all other uses into class III. The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel and the Ear, Nose, and Throat Device Classification Panel that the device be classified into class II and the recommendation of the Dental Device Classification Panel that the device be classified into class I for fluoride uptake acceleration. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Johnsie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, the Ear, Nose, and Throat Device Classification Panel and the Dental Device Classification Panel, FDA advisory committees, made the following recommendation regarding the classification of iontophoresis devices:

1. Identification: An iontophoresis device is a device used to introduce ions of soluble salts (i.e., medications), by use of a direct current, into the tissues of the body for therapeutic or diagnostic purposes. An iontophoresis device for the diagnosis of cystic fibrosis is a device that induces sweating by the introduction of pilocarpine through the use of a direct current. The sweat is collected and its composition and weight are used in the diagnosis of cystic fibrosis. An iontophoresis device for dental application of fluoride is a device used to accelerate the introduction (diffusion) of fluoride ions into tooth structures to reduce hypersensitivity and for fluoride uptake in cavity prevention. An iontophoresis device for the local anesthetizing of the intact tympanic membrane is a device used to induce ions of lidocaine and epinephrine into the tympanic membrane of the ear to cause an anesthetizing effect.

2. Recommended classification: The Physical Medicine Device Classification Panel recommends that iontophoresis devices be classified into class II and that establishing a performance standard for this device be a high priority. The Ear, Nose, and Throat Device Classification Panel recommends that iontophoresis devices be classified into class II and that establishing a performance standard for this device be a high priority. The Dental Device Classification Panel recommends that this device be classified into class I and that it be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports under section 519 of the act (21 U.S.C. 360i), and good manufacturing practice (GMP) regulations under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Physical Medicine Device Classification Panel recommends that iontophoresis devices be classified into class II because the Panel believes that the electrical current, which is applied to deliver ions through the skin, should be controlled to prevent injury. The Panel also believes that the measurement limitations inherent in the use of the device should be clearly specified

by manufacturers in the device labeling. The Ear, Nose, and Throat Device Classification Panel recommends that iontophoresis devices be classified into class II because the Panel believes that the design and materials of the electrode must be controlled to prevent trauma to the patient. The Panels believe that general controls would not provide sufficient control over these characteristics. The Panels believe that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Dental Device Classification Panel recommends that this device be classified into class I and that manufacturers of this device not be required to comply with premarket notifications, records and reports, or GMP regulations because the Panel believes that the electrical voltage is low and the direct current involved is sufficiently small not to be of danger to the patient. The Dental Device Classification Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Physical Medicine Device Classification Panel considered only the device and not the safe and effective use of the drug used with the device in making its classification recommendation. The Panel based its recommendation on the potential hazards associated with this device, the Panel members' personal knowledge of, and familiarity with, the device, and a review of the pertinent literature (Ref. 1). Harris (Ref. 1) describes the techniques used in iontophoresis for various indications. He states that "iontophoresis has been widely used in clinical practice for many years," and it is of "theoretical and practical value." Harris states, however, that more controlled studies should be conducted to produce therapeutic applications that are soundly based on clinical studies. The Ear, Nose, and Throat Device Classification Panel based its recommendation on the potential hazards associated with this device and the Panel members' personal knowledge of, and familiarity with, the device and a presentation by Dr. Robert Brummett (Ref. 2). At the Panel meeting of November 6 and 7, 1978, Dr. Brummett (Ref. 2) discussed the use of iontophoresis in the anesthetizing process of the tympanic membrane. He summarized various studies (Refs. 8 through 12) and concluded that "the procedure of inducing anesthesia of the tympanic membrane by use of iontophoresis and the appropriate drug is safe and satisfactory." The Dental Device Classification Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device and on its history of use in dentistry without significant problems.

5. Risks to health: The Physical Medicine Device Classification Panel identified the following risks to health:

(a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Burns: High current densities in tissue over time could result in burns. (c) Cardiac arrest: Cardiac arrest may

be caused by an excessive electrical current passing through the heart. (d) Inappropriate therapy: Inappropriate therapy could result from inaccurate current measurement function. The Ear, Nose, and Throat Device Classification Panel identified the following risks to health: (a) Trauma: Trauma to the ear may be caused by the use of an improperly designed electrode. (b) Bodily injury: Bodily injury may be caused by the use of an inappropriate drug or use of the procedure with a perforated tympanic membrane. The Dental Device Classification Panel identified no risks to health.

Proposed Classification

FDA agrees with the recommendation of the Ear, Nose, and Throat Device Classification Panel and in part with the recommendation of the Physical Medicine Device Classification Panel, and is proposing that iontophoresis devices be classified into class II (performance standards) for use in the diagnosis of cystic fibrosis, in accelerating fluoride introduction to the teeth, and for local anesthesia of the intact tympanic membrane. The agency disagrees with the Dental Device Classification Panel recommendation that iontophoresis devices for fluoride uptake acceleration be classified into class I (general controls). The agency believes that the device presents the risk of electrical shock and that the measurement limitations inherent in the use of the device should be controlled. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device.

The agency also believes that there is sufficient information to establish a standard to provide reasonable assurance of the safety and effectiveness of the device for use in the diagnosis of cystic fibrosis, in accelerating fluoride introduction to the teeth in dentistry, and for local anesthesia of the intact tympanic membrane. The agency has reviewed the pertinent available literature on iontophoresis (Refs. 1 through 14). Harris (Ref. 1) states that "many forms of iontophoresis have no other value other than as simple counter-irritants or as psychotherapeutic measures." There is a lack of scientific data supporting the use of iontophoresis for any of the claims being made, and Harris states that "therapeutic applications are not based soundly on clinical experiments Subcutaneous injection of drugs is quicker, more reliable and more exact and is usually to be preferred." Stillwell (Ref. 3) contends that the therapeutic

value of iontophoresis is limited, and the disadvantages "include the difficulty of estimating the dosage of the drug and, particularly of estimating how much of the drug may act systemically." Limited uses (for the diagnosis of cystic fibrosis, for fluoride uptake acceleration in dentistry and for the local anesthesia of the intact tympanic membrane) off iontophoresis have been studied, documented, and accepted as being safe and effective. Kopito and Shwachman (Ref. 4) state that "the stimulation of sweat by pilocarpine iontophoresis followed by a chemical analysis of sodium and chloride is currently the preferred method for confirming the diagnosis of cystic fibrosis." Steinrud et al. (Ref. 5) concur that "sweat stimulation with pilocarpine iontophoresis followed by sodium-potassium analysis of a measured amount of sweat has proved most valuable in determining the high sweat electrolytes of cystic fibrosis children." Tocci and McKey (Ref. 6) describe the Gibson-Cooke quantitative pilocarpine iontophoresis test as currently being "the most reliable diagnostic test for cystic fibrosis." The authors state that any laboratory can perform this test with accuracy "if there has been proper attention to detail in collecting and preparing the sweat specimen." In a study performed by Tocci and McKey (Ref. 6) with 1,270 subjects, 203 of whom were cystic fibrosis patients, the investigators found that the sweat test was 84 percent reliable with 16 percent false-positive on the first test and 93 percent reliable with 7 percent false-positive results on the retest.

Gargarosa and Park (Ref. 7) conclude that fluoride iontophoresis results in the most rapid and effective relief of dentin hypersensitivity during topical application of fluoride. The use of fluoride iontophoresis has a broad application in dental practice.

Comeau and Brummett (Ref. 8) state that following 12 investigations, using three subjects, the techniques of iontophoresis to produce tympanic anesthesia is safe, effective, and easy. Echols (Ref. 9) demonstrated that lidocaine in the middle ear space does not have any major toxic effects on the eighth nerve. Epley (Ref. 10) finds that the iontophoresis procedure followed by an injection of additional anesthesia enables the surgical procedure to be carried out with ease. Epley (Ref. 10) studied the effectiveness of the anesthetic method in 100 children tympanostomy candidates. He found very little substantial difference between the effectiveness of the iontophoretic anesthesia (pain being the

criterion) with and without the additional anesthesia. However, those children operated on under general anesthesia alone reported post-operative bleeding more often than those children operated on under iontophoresis alone. Epley (Ref. 10), Schleuning, et al. (Ref. 11), and Comeau and Brummett (Ref. 12) attribute the absence of bleeding to the vasoconstricting effect of epinephrine, and the authors cite this hemostasis as an important advantage of iontophoresis. Comeau and Brummett (Ref. 12) state that this vasoconstriction ultimately results in "rapid healing and less chance of infection" * * *. The FDA has determined that iontophoresis used in the diagnosis of cystic fibrosis, in the acceleration of fluoride introduction to the teeth, and in the local anesthetizing of the intact tympanic membrane has been shown to be both safe and effective. The agency is proposing, therefore, that iontophoresis devices for these uses be classified into class II (performance standards). The agency recognizes that the Physical Medicine Device Classification Panel members recommended a classification for the device only and did not consider the specific use of the device. The agency believes, however, that the intended use of the device and the device itself cannot be separated. Therefore, the agency is proposing that iontophoresis devices be classified into class III (premarket approval) for any uses except those described above. The agency believes that iontophoresis devices, when used for purposes other than those specifically considered, present a potential unreasonable risk of injury without benefit to the patient because substantial data and clinical investigations do not exist to support the claims made for the devices. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device, and that insufficient information exists to establish a performance standard to provide this assurance with respect to use of the device purposes other than those specifically considered.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart F by adding new § 890.5525, to read as follows:

§ 890.5525 Iontophoresis device.

(a) Iontophoresis device for the diagnosis of cystic fibrosis:

- (1) *Identification.* An iontophoresis device for the diagnosis of cystic fibrosis is a device that induces sweating by the introduction of pilocarpine through the use of a direct current. The sweat is collected and its composition and weight are used in the diagnosis of cystic fibrosis.

(2) *Classification.* Class II (performance standards).

(b) Iontophoresis device for dental application of fluoride:

- (1) *Identification.* An iontophoresis device for dental application of fluoride is a device used to accelerate introduction (diffusion) of fluoride ions into tooth structures to reduce hypersensitivity and for fluoride uptake in cavity prevention.

(2) *Classification.* Class II (performance standards).

(c) Iontophoresis device for the local anesthetizing of the intact tympanic membrane:

- (1) *Identification.* An iontophoresis device for the local anesthetizing of the intact tympanic membrane is a device used to induce ions of lidocaine and epinephrine into the tympanic membrane of the ear to cause an anesthetizing effect.

(2) *Classification.* Class II (performance standards).

(d) Iontophoresis device for all other purposes:

- (1) *Identification.* An iontophoresis device is a device used to introduce ions of soluble salts (i.e., medications), by use of a direct current, into the tissues of the body for therapeutic or diagnostic purposes.

(2) *Classification.* Class III (premarket approval).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1250]

Medical Devices; Classification of Powered External Limb Overload Warning Devices

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered external limb overload warning devices into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered external limb overload warning devices:

1. A powered external limb overload warning device is a device used to warn a patient of an overload or an underload in the amount of pressure placed on a leg.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that powered external limb overload warning devices be classified into class II because the Panel believes that a standard is necessary to control the electrical properties of this device to avoid the potential hazard of electrical shock. The Panel recommends that the load measurement accuracy and limitations of this device should be clearly specified by the manufacturers in the device labeling. The Panel believes that general controls would not provide sufficient control over these

characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel members based their recommendation on the potential hazards associated with this device, on their personal knowledge of, and familiarity with, the device, and on a review of the pertinent literature (Ref. 1). Warren and Lehmann (Ref. 1) state that "adequate accuracy in limb loading was achieved when the target for limb loading was set at 30% of the body weight." However, when the target loading was increased to 70 percent of body weight, accuracy was reduced. Load overshoots can occur with the use of this device.

5. Risks to health: (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Injury to lower limb: Load control adjustment inaccuracy regarding the set weight or load limit could result in injury to the lower limb.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that powered external limb overload warning devices be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide such assurance.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug

Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of inflatable tube massagers:

1. Identification: A powered inflatable tube massager is a powered device used to relieve minor muscle aches and pains. It simulates kneading and stroking of tissues with the hands by use of an inflatable pressure cuff.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that inflatable tube massagers be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazard of electrical shock. The Panel believes that general controls will not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with this device and the Panel members' personal knowledge of, and familiarity with, the device.

5. Risks to health: Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that inflatable tube massagers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5650, to read as follows:

§ 890.5650 Powered inflatable tube massager.

(a) *Identification.* A powered inflatable tube massager is a powered device used to relieve minor muscle aches and pains. It simulates kneading and stroking of tissues with the hands by use of an inflatable pressure cuff.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1252]

Medical Devices; Classification of Physical Therapy Muscle Relaxers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying physical therapy muscle relaxers, whether powered by alternating current (AC) or battery powered, into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II if powered by alternating current and into class I (general controls) if battery powered. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public

comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of physical therapy muscle relaxers:

1. Identification: A physical therapy muscle relaxer is a motorized device used to relieve minor muscle aches and pains. This generic type of device was reviewed by the Panel under the name "powered massager."

2. Recommended classification: Class II (performance standards) if the device is powered by alternating current (AC), class I (general controls) if the device is powered by a battery. The Panel recommends that establishing a performance standard for the AC-powered device be a low priority and that there be no exemptions for the battery-powered device.

3. Summary of reasons for recommendation: The Panel recommends that AC-powered physical therapy muscle relaxers be classified into class II because the Panel believes that the electrical properties of the device must be controlled to prevent potential shock and burn hazards to the patient or user. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the AC-powered device and that there is sufficient information to establish a standard to provide such assurance. The Panel recommends that battery-powered physical therapy muscle relaxers be classified into class I because the Panel believes that the risks of electrical shock and burns are minimal with battery-powered devices, and that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on the potential hazards associated with the AC-powered device.

5. Risks to health: The Panel identified the following risk to health for AC-powered physical therapy muscle relaxers: Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. The Panel identified no risks to health for battery-powered physical therapy muscle relaxers.

Proposed Classification

FDA has reviewed the Panel recommendation for powered massagers and has concluded that all physical therapy muscle relaxers, whether battery powered or AC powered, should be subject to performance standards. The agency believes that the battery powered device, as well as the AC-powered device, presents a risk of electrical shock injuries. Although there is less risk of electrical shock from a battery-powered device than from an AC-powered device, there is still enough of a risk of electrical shock from the battery-powered device to justify the application of a performance standard. Therefore, the agency is proposing that all physical therapy muscle relaxers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5660, to read as follows:

§ 890.5660 Physical therapy muscle relaxer.

(a) *Identification.* A physical therapy muscle relaxer is a motorized device used to relieve minor muscle aches and pains.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four

copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William R. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26328 Filed 8-27-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1253]

Medical Devices; Classification of Cold Packs

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cold packs into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device

Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cold packs:

1. Identification: A cold pack is a device consisting of a compact fabric envelope containing a specially hydrated (chemically combined with water) pliable silicate gel capable of forming to the contour of the body. It is used when cold therapy is indicated for body surfaces.
2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.
3. Summary of reasons for recommendation: The Panel recommends that this device be classified into class I (general controls) because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.
5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that cold packs be classified into class I (general controls) with no exemptions because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-548 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5700, to read as follows:

§ 890.5700 Cold pack.

(a) *Identification.* A cold pack is a device consisting of a compact fabric envelope containing a specially hydrated (chemically combined with water) pliable silicate gel capable of forming to the contour of the body. It is used when cold therapy is indicated for body surfaces.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing

Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1254]

Medical Devices; Classification of Hot or Cold Disposable Packs

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying hot or cold disposable packs into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II, and the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of hot or cold disposable packs:

1. Identification: A hot or cold disposable pack is a device consisting of a sealed plastic bag incorporating chemicals that, upon activation, produces heat or cold. It is used when hot or cold therapy is indicated for body surfaces.
2. Recommended classification: The General Hospital Panel recommends that the device be classified into class I (general controls) with no exemptions. The Physical Medicine Device Classification Panel recommends that this device be classified into class II (performance standards), and that establishing a performance standard for this device be a high priority.
3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class I because the Panel believes that there are no known risks to health and that general controls alone are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Physical Medicine Device Classification Panel recommends that this device be classified into class II because the Panel believes that the temperatures achieved and chemicals used are critical and must be controlled to prevent injury to tissue and to minimize the hazards associated with toxic chemicals. At the Panel meeting of October 14, 1977 (Ref. 1), the Physical Medicine Device Classification Panel recommended that the device be classified into class III (premarket approval) because the Panel at that time believed that the labeling of most of these devices lacked sufficient information on temperatures achieved, and lacked chemical hazard warnings. However, at the Panel meeting of March 17, 1978, Dr. Margaret Kenrick (Ref. 2) presented guidelines for the labeling of hot and cold disposable packs and recommended that the Panel change its recommended classification to class II. The standard should include labeling requirements for storage, temperatures achieved, and necessary warnings. The Panel reassessed its previous recommendation on this device and recommended that it be classified into class II with the appropriate labeling requirements. The Panel believes that the minimum and maximum temperatures reached when the chemicals are activated should be clearly stated by manufacturers in the device labeling, and also a warning statement for the hazards associated with the chemicals used should be prominently placed on the label. The Panel believes that general controls alone will not provide sufficient control over these characteristics. The Panel believes that a performance standard will provide reasonable assurance of the safety and

effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The General Hospital and Personal Use Device Classification Panel based its recommendation on chemical toxicity data obtained from one manufacturer whose test results showed that no primary irritation was produced by the hot and cold pack tested, and the chemicals used were classed as nonirritant. The Physical Medicine Device Classification Panel based its recommendation on the hazards associated with this device, a review of labeling from five different manufacturers, and inspection of several commercially available hot and cold disposable packs. The Panel also reviewed an evaluation made by the Emergency Care Research Institute of 10 different manufacturers (Ref. 3). In this study, all hot packs tested reached at least 10° C above the skin pain threshold. Four cold packs obtained temperatures of 5.5° C below the skin-freezing threshold. Smith and Stetson (Ref. 4) state that at "4° C, a local erythema is produced first and then the skin is anesthetized." They also state that "there is a danger of local necrosis or sclerema" when cooling the skin.
5. Risks to health: The Physical Medicine Device Classification Panel identified the following risks to health: (a) Burns and freezing of tissue: Uncontrolled levels and/or duration of temperatures could lead to burns or freezing of tissues. (b) Skin irritation: Leakage of toxic chemical used in the device onto the skin may result in skin irritation.

Proposed Classification

FDA agrees with the General Hospital and Personal Use Device Classification Panel recommendation and is proposing that hot or cold disposable packs be classified into class I (general controls) with no exemptions. The agency believes that general controls alone are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The agency disagrees with the Physical Medicine Device Classification Panel recommendation that hot or cold disposable packs be classified into class II (performance standards) because the agency believes that general controls are sufficient to require the needed labeling under section 502 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352), as requested by the Panel. Section 502 of the act requires information under authority of this act to appear on the labeling and that the labeling be prominently placed on the device. The labeling information must include adequate directions for use, adequate warnings against misuse and warnings against unsafe methods or duration of application.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

Medical Devices; Classification of Water Circulating Hot or Cold Packs

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying water circulating hot or cold packs into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of water circulating hot or cold packs:

1. Identification: A water circulating hot or cold pack is a device used on body surfaces for heat or cold therapy that operates by pumping heated or chilled water through a plastic bag.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that water circulating hot or cold packs be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazard of electrical shock. The Panel believes that the temperature control should be sufficiently accurate to prevent burning or freezing of tissues. The Panel

believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on the potential hazards associated with this device.

5. Risks to health: (a) Shock: Electrical leakage current due to improper grounding or faulty circuitry could result in electrical shock. (b) Tissue damage: Burning or freezing of tissue could result from a faulty temperature control.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that water circulating hot or cold packs be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5720, to read as follows:

§ 890.5720 Water circulating hot or cold pack.

(a) *Identification.* A water circulating hot or cold pack is a device used on body surfaces for heat or cold therapy that operates by pumping heated or chilled water through a plastic bag.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1256]

Medical Devices; Classification of Moist Heat Packs

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying moist heat packs into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of moist heat packs:

1. *Identification:* A moist heat pack is a device consisting of silica gel in a fabric container used to retain an elevated temperature for moist heat therapy of body surfaces.

2. *Recommended classification:* Class I (general controls). The Panel recommends that there be no exemptions.

3. *Summary of reasons for recommendation:* The Panel recommends that this device be classified into class I (general controls) because this is a simple device that presents no undue risks to health when used in a normal manner for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, this device.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that moist heat packs be classified into class I (general controls) with no exemptions because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5730, to read as follows:

§ 890.5730 Moist heat pack.

(a) *Identification.* A moist heat pack is a device consisting of silica gel in a fabric container used to retain an elevated temperature for moist heat therapy of body surfaces.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1257]

Medical Devices; Classification of Powered Heating Pads

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered heating pads into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered heating pads:

1. *Identification:* A powered heating pad is an electrical device used for dry heat therapy of body surfaces. It is capable of maintaining an elevated temperature during use.

2. *Recommended classification:* Class II (general standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that powered heating pads be classified into class II because the Panel believes that the

electrical properties of the device must be controlled to prevent the potential hazard of electrical shock. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide a reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and the potential hazards associated with this device.

5. *Risks to health:* (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Burns: Skin burns could result from a faulty thermostatic control or improper use of the device.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that powered heating pads be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5740, to read as follows:

§ 890.5740 Powered heating pad.

(a) *Identification.* A powered heating pad is an electrical device used for dry heat therapy of body surfaces. It is capable of maintaining an elevated temperature during use.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the

above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1258]

Medical Devices; Classification of Pressure-Appling Devices

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying pressure-applying devices into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of the pressure-applying device:

1. *Identification:* A pressure-applying device is a table with an adjustable overhead weight

attached. In place of the therapist's hands, a weight is placed on the back of a prone patient. It is used to apply continuous pressure to the paravertebral tissues, with the intended purpose of providing muscular relaxation and neuro-inhibition.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that the pressure-applying devices be classified into class I because this is a simple device that presents no risks to health or undue hazards when used in a normal manner for the purpose recommended. The Panel believes that general controls are sufficient to assure the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and a review of the pertinent literature (Refs. 1 and 2). Waecker and Thomas (Ref. 1) and Waecker et al. (Ref. 2) found that inhibition and facilitation in sympathetic response were produced and were able to be reproduced in "particular subjects."

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that pressure-applying devices be classified into class I (general controls) with no exemptions because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Waecker, H. F. and P. E. Thomas, "The Modification of Sympathetic Activity by Sustained Pressure on Paravertebral Tissues," *Journal of the American Osteopathic Association*, 60:686-699, April 1961.

2. Waecker, H. F., P. E. Thomas, and D. Simpson, "Further Studies on the Influence of Sustained Paravertebral Pressure on Sympathetic Activity," *Journal of the American Osteopathic Association*, 61:677, April 1962.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 890 in Subpart F by adding new § 890.5765, to read as follows:

§ 890.5765 Pressure-applying device.

(a) *Identification.* A pressure-applying device is a table with an adjustable overhead weight attached. In place of the therapist's hands, a weight is placed

on the back of a prone patient. It is used to apply continuous pressure to the paravertebral tissues, with the intended purpose of providing muscular relaxation and neuro-inhibition.

(b) *Classification.* Class I (general controls).

[Docket No. 78N-1259]

Medical Devices; Classification of Powered Muscle Stimulators

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered muscle stimulators into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel and the General and Plastic Surgery Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendation regarding the classification of powered muscle stimulators:

1. *Identification:* A powered muscle stimulator is a motorized device used to repeatedly contract muscles by passing electrical currents through electrodes contacting the affected body area.

2. *Recommended classification:* Class II (performance standards). The Physical Medicine Device Classification Panel recommends that establishing a performance standard for this device be a high priority. The General and Plastic Surgery Device Classification Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panels recommend that powered muscle stimulators be classified into class II because the Panels believe that the electrical properties of the device must be controlled to avoid the potential hazard of electrical shock and to prevent bodily injury. The Physical Medicine Device Classification Panel recommends that the measurement limitations of this device be clearly specified by the manufacturers in the device labeling. The Panels believe that general controls will not provide sufficient control over these characteristics. The Panels believe that a standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on the potential hazards associated with this device.

5. *Risks to health:* The Physical Medicine and the General and Plastic Surgery Device Classification Panels identified the following risks to health: (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Cardiac arrest: Excessive electrical current passing through the heart could result in cardiac arrest. (c) Inappropriate therapy: Inappropriate therapy

could result from inaccurate measurement function.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that powered muscle stimulators be classified into class II. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard will provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5850, to read as follows:

§ 890.5850 Powered muscle stimulator.

(a) *Identification.* A powered muscle stimulator is a motorized device used to repeatedly contract muscles by passing electrical currents through electrodes contacting the affected body area.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1260]

Medical Devices; Classification of Ultrasound and Muscle Stimulators

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultrasound and muscle stimulator into class II (performance standards) for applying therapeutic deep heat and muscle stimulation and into class III for all other uses. FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class III is to provide for each manufacturer to the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ultrasound and muscle stimulators:

1. *Identification:* An ultrasound and muscle stimulator for use in applying therapeutic deep heat and muscle stimulation is a device that applies ultrasonic energy at a frequency beyond 20,000 cycles per second to provide therapeutic deep heat in specific areas of the body, and passes electrical currents through the affected body area to relax muscles. Such tissue heating and muscle stimulation is used as adjunctive therapy for the relief of pain in

selected medical conditions such as muscle spasms and joint contractures.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. *Summary of reasons for recommendation:* The Panel recommends that ultrasound and muscle stimulators be classified into class II because the electrical current used to provide ultrasound and muscle stimulation should be controlled to prevent injury. The Panel believes that the measurement limitations in the use of the device should be clearly specified by manufacturers in the device labeling. The Panel also recommends that the device be restricted to use by or under the supervision of a physician. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' knowledge of, and experience with, the device, on a review of the pertinent literature (Refs. 1, 2, and 3), and on the potential hazards associated with this device. Lehmann (Ref. 1) states that ultrasound has been found to be of established value in treating joint contractures, muscle spasm, and periarthritis (inflammation of tissue around the joints). He states that ultrasound is a very powerful and effective heating agent but that there are contraindications for use of the device. Ultrasound, if used improperly, can cause cavitation (cellular destruction), resulting in possible irreversible tissue damage. The Panel noted that the Bureau of Radiological Health of FDA has promulgated performance safety standards for ultrasonic therapeutic products (21 CFR 1050.10) and that the Federal Communications Commission has radiofrequency transmitting requirements for medical diathermy that must be met.

5. *Risks to health:* (a) Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock. (b) Burns: High current density over time could cause burns to tissues. (c) Cardiac arrest: Excessive electrical current passing through the heart could lead to cardiac arrest. (d) Inappropriate therapy: Inappropriate therapy could result from inaccurate measurement function. (e) Cavitation (cellular destruction): Inadequate uniform field distribution of ultrasound source, or lack of sufficient external pressure on the device sound head applied to the skin could lead to cavitation in tissues.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ultrasound and muscle stimulators be classified into class II (performance standards) for use in delivering therapeutic deep heat and muscle

stimulation. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

Like the shortwave diathermy, which is the subject of a proposed classification regulation published elsewhere in this issue of the Federal Register, the ultrasound and muscle stimulator is used for therapeutic deep heat. It is also used for additional purposes for which it has not been shown to be safe and effective. Accordingly, although the Panel considered only two related uses for the device—the delivery of therapeutic deep heat and muscle stimulation—the agency believes that the device should be classified with respect to all other intended uses. Therefore, the agency is proposing that ultrasound and muscle stimulator devices be classified into class III (premarket approval) for any use other than delivering therapeutic deep heat and muscle stimulation. The agency believes that the ultrasound component of the ultrasound and muscle stimulator, when it is used for any purpose other than applying therapeutic deep heat and muscle stimulation, presents a potential unreasonable risk of injury without proven benefit to the patient because substantial data and clinical investigations do not exist to support those other claims. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the ultrasound component of the device, when it is used for a purpose other than applying therapeutic deep heat, and that insufficient information exists to establish a performance standard to provide this assurance.

References

The following information has been placed in the office of the Hearing Clerk (HFA-305) (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Lehmann, J. F., "Diathermy" in "Handbook of Physical Medicine and Rehabilitation," 2d Ed., Edited by Krusen, F. H., F. J. Kotke, and P. M. Ellwood, W. B. Saunders Co., Philadelphia, PA, pp. 297-321, 1971.

[Docket No. 78N-1261]

Medical Devices; Classification of Multi-Function Physical Therapy Tables

AGENCY: Food and Drug Administration.
ACTION: Proposed Rules.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying multi-function physical therapy tables into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of multi-function physical therapy tables:

1. *Identification:* A multi-function physical therapy table is a device consisting of a motorized table equipped to provide patients with heat, traction, and muscle relaxation therapy. This generic type of device was reviewed by the Panel under the name "powered vibration, massage, heat, and traction table."

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that multi-function physical therapy tables be classified into class II because the Panel believes that a standard is necessary to control the electrical properties of this device to avoid the potential hazard of electrical shock and to prevent burns or tissue injury. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on the potential hazards associated with this device.

5. *Risks to health:* (a) Electrical shock: Excessive leakage current or a malfunction of the device could result in electrical shock. (b) Burns: Excessive heat from the device could cause thermal burns to the patient. (c) Bodily injury: Soft tissue trauma could result from a malfunction of the traction component.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that multi-function physical therapy tables be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513; 710(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5880, to read as follows:

§ 890.5880 Multi-function physical therapy table.

(a) *Identification.* A multi-function physical therapy table is a device consisting of a motorized table equipped

to provide patients with head, traction, and muscle relaxation therapy.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

[Docket No. 78N-1262]

Medical Devices; Classification of Powered Traction Equipment

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered traction equipment into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug

Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered traction equipment:

1. *Identification:* Powered traction equipment consists of devices used in conjunction with belts and harnesses to exert therapeutic tensile (pulling) forces on the body.
2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. *Summary of reasons for recommendation:* The Panel recommends that powered traction equipment be classified into class II because the Panel believes that the electrical properties of the devices must be controlled to avoid the potential hazard of electrical shock. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.
4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on the potential hazards associated with this device.
5. *Risks to health:* Electrical shock: Excessive leakage current could result in injury, or a malfunction of the device could result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that powered traction equipment be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority

delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5900, to read as follows:

§ 890.5900 Powered traction equipment.

(a) *Identification.* Powered traction equipment consists of devices used in conjunction with belts and harnesses to exert therapeutic tensile (pulling) forces on the body.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

Medical Devices; Classification of Traction Accessories

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying traction accessories into class I (general controls). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying these devices. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of traction accessories:

1. Identification: Traction accessories are manual devices used with traction equipment to aid in exerting proper tensile (pulling) forces on the body. Examples of traction accessories are pulleys, straps, head halters, and pelvic belts.

2. Recommended classification: Class I (general controls). The Panel recommends that traction accessories be exempt from registration, device listing, and premarket notification regulations under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports regulations under section 519 of the act (21 U.S.C. 360i), and good manufacturing practice regulations under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that these devices be classified into class I (general controls) and that the manufacturers of these devices should not be required to comply with registration, records and reports, or good manufacturing practice regulations because they are simple devices that present no undue risks to health when used in a normal manner for the purpose recommended. The Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, these devices.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that traction accessories be classified into class I (general controls) because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of these devices. The

agency disagrees with the Panel recommendation that manufacturers of traction accessories be exempt from registration, device listing, and premarket notification under section 510 of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from compliance with section 510 of the act only upon a finding that compliance is not necessary for the protection of public health. In the case of traction accessories, the agency cannot make the required finding. To protect the public health, the agency needs to require manufacturers of these devices to register and to list their products with FDA so that the agency can identify the firms and products that is regulates and can conduct necessary inspections and investigations concerning safety, effectiveness, adulteration, or misbranding. Premarket notification by these manufacturers assures that FDA learns of new products and of a significant modifications of existing products for which premarket approval is required.

The agency disagrees with the Panel recommendation that manufacturers of traction accessories be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The agency believes that it cannot properly issue exemptions from regulations that have not yet been promulgated. Whenever the agency proposes device regulations that include records and reports requirements, interested persons can submit comments requesting that certain classes of manufacturers be exempt from those requirements, and FDA will issue any exemptions that are appropriate. The agency disagrees with the Panel recommendation that manufacturers of traction accessories be exempt from the good manufacturing practice (GMP) regulation. The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of traction accessories having defects that could cause harm to users.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5925, to read as follows:

§ 890.5925 Traction accessories.

(a) *Identification.* Traction accessories are manual devices used with traction equipment to aid in exerting proper tensile (pulling) forces on the body. Examples of traction accessories are pulleys, straps, head halters, and pelvic belts.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1264]

Medical Devices; Classification of Chilling Units

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying chilling units into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of chilling units:

1. Identification: A chilling unit is a refrigerative device used to chill and maintain cold packs at a reduced temperature.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that chilling units be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazards of electrical shock and burns to the user. The Panel believes that the temperature control should be sufficiently accurate to avoid freezing of tissues. The Panel believes that general controls will not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on the potential hazards associated with this device.

5. Risks to health: (a) Electrical shock: Excessive leakage current or a malfunction of the device could result in electrical shock. (b) Freezing of tissues: A faulty temperature control could result in freezing of tissues, causing trauma.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that chilling units be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that

there is sufficient information to establish a standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5940, to read as follows:

§ 890.5940 Chilling unit.

(a) *Identification.* A chilling unit is a refrigerative device used to chill and maintain cold packs at a reduced temperature.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1265]

Medical Devices; Classification of Powered Heating Units

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered heating units into class II (performance standards). The FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being

taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered heating units:

1. Identification: A powered heating unit is a device consisting of an encased cabinet containing hot water used to heat and maintain hot packs at an elevated temperature.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that powered heating units be classified into class II because the Panel believes that the electrical properties of the device must be controlled to avoid the potential hazard of electrical shock to the user. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and familiarity with, the device and on the potential hazards associated with this device.
5. Risks to health: Electrical shock: Electrical leakage current due to improper grounding or faulty circuitry could result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that powered heating units be classified into

class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5950, to read as follows:

§ 890.5950 Powered heating unit.

(a) *Identification.* A powered heating unit is a device consisting of an encased cabinet containing hot water used to heat and maintain hot packs at an elevated temperature.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4065, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26341 Filed 8-27-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 890]

[Docket No. 78N-1266]

Medical Devices; Classification of Physical Therapy Pulsators

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying physical therapy pulsators, whether powered by alternating current or battery powered, into class II (performance standards). The FDA is

also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class II if powered by alternating current (AC) and classified into class I (general controls) if battery powered. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 29, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Johnnie W. Bailey, Bureau of Medical Devices (HFK-410), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of physical therapy pulsators:

1. Identification: A physical therapy pulsator is a motorized device incorporated in various kinds of pads, that is held in the hand or attached to the hand or to a table to relax muscles and thereby relieve minor aches and pains. This generic type of device was reviewed by the Panel under the name "powered vibrator."
2. Recommended classification: The Panel recommends that this device be classified into class II (performance standards) if powered by alternating current (AC) and that establishing a performance standard for this device be a low priority. The Panel recommends that the device be classified into class I (general controls) with no exemptions, if it is battery powered.
3. Summary of reasons for recommendation: The Panel recommends that AC-powered physical therapy pulsators be classified into class II because the Panel

believes that the electrical properties of the device should be controlled to prevent electrical shock, and the mechanical intensity should be controlled to prevent trauma to tissue. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel recommends that battery-powered physical therapy pulsators be classified into class I because the Panel believes that the risk of electrical shock and burns are minimal with battery-powered devices, and that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with the AC-powered device and on the Panel members' personal knowledge of, and familiarity with, the AC-powered and battery-powered device.

5. Risks to health: The Panel identified the following risks to health for AC-powered physical therapy pulsators: (a) Electrical shock: Excessive current could result in injury, or a malfunction of the device could result in electrical shock. (b) Trauma to tissues: Excessive mechanical intensity could cause tissue trauma. The Panel identified no risks to health for battery-powered physical therapy pulsators.

Proposed Classification

FDA disagrees with the Panel recommendation that battery-powered physical therapy pulsators be classified into class I (general controls). The agency believes that the risks of electrical shock and tissue trauma exist with battery-powered physical therapy pulsators as well as with AC-powered physical therapy pulsators. The agency is therefore proposing that all physical therapy pulsators be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 890 in Subpart F by adding new § 890.5975, to read as follows:

§ 890.5975 Physical therapy pulsator.

(a) *Identification.* A physical therapy pulsator is a motorized device incorporated in various kinds of pads, that is held in the hand or attached to the hand or to a table to relax muscles and thereby relieve minor aches and pains.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 29, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

**Merit Systems
Protection Board
Equal Employment
Opportunity
Commission**

Discrimination; Interim Rules

MERIT SYSTEMS PROTECTION BOARD**5 CFR Part 1200****Interim Regulations for Processing Appealable Actions, Alleging Prohibited Discrimination, Pending Before January 11, 1979**

AGENCY: Merit Systems Protection Board.

ACTION: Interim Regulations, request for comments.

SUMMARY: These regulations, published for immediate effect provide interim operating instructions for the processing of certain cases pending before the Merit Systems Protection Board (MSPB) involving allegations of discrimination.

The issuance of preliminary determinations by the board in these cases is authorized by delegation of authority from the EEOC pursuant to Reorganization Plan No. 1 of 1978. In addition the Board requests public comment on these regulations.

DATES: Effective date: August 28, 1979. Comment date: Written comments should be submitted on or before October 29, 1979.

ADDRESS: Comments should be addressed to the Office of the Secretary of the Merit Systems Protection Board, 1717 H Street, N.W., Washington, D.C. 20419.

FOR FURTHER INFORMATION CONTACT: Donald Cox, Deputy General Counsel, Merit Systems Protection Board, Washington, D.C. 20419 (202-653-7157).

SUPPLEMENTARY INFORMATION: On January 1, 1979, certain federal employment enforcement responsibilities, previously vested in the Civil Service Commission under four different statutes, were transferred to the Equal Employment Opportunity Commission (EEOC) pursuant to Reorganization Plan No. 1 of 1978. The enforcement responsibilities transferred were those specified in section 717 of Title VII of the Civil Rights Act of 1964, as amended, section 6(d) of the Fair Labor Standards Act (the Equal Pay Act), section 501 of the Rehabilitation Act of 1973, as amended, and sections 12 and 15 of the Age Discrimination in Employment Act of 1967, as amended. Reorganization Plan No. 1 specifically permitted the EEOC to delegate back to the Civil Service Commission or its successor agency the authority to make preliminary determinations on issues of discrimination prohibited by Section 717 of Title VII of the Civil Rights Act of 1964, as amended, whenever such issues were raised in the course of an appeal

before that agency on other grounds (for example, in an adverse action appeal). The MSPB is the adjudicatory successor to the Civil Service Commission. The EEOC has delegated Title VII authority back to the Board so that the Board may make preliminary decisions on race, color, sex, religion, or national origin issues, when such issues are raised in cases otherwise appealable to the Board. The EEOC has determined that it is within its general powers also to delegate similar authority to the Board to decide age and handicap issues, and has done so. (The Commission did not consider it appropriate to delegate its authority with regard to the Equal Pay Act.) This delegation and accompanying regulations are published elsewhere in this issue of the *Federal Register*.

The regulations of the Board provide for a preliminary determination, on issues of discrimination prohibited by the statutes mentioned above, in any type of case arising before the Board which is covered by the provisions of Reorganization Plan No. 1 of 1978. Basically there are two types of cases which fall within the scope of these regulations. First, there are cases which were previously handled initially by the former Federal Employee Appeals Authority (FEAA) and which were appealable to the former Appeals Review Board (ARB) under the procedures of 5 CFR Part 772 (as in effect prior to January 11, 1979). These organizations were merged into the MSPB. Included in this group are a number of cases which were pending both in the FEAA and the ARB on the effective date of Reorganization Plan No. 1. Second, there are cases previously within the original jurisdiction of the ARB, including those cases arising under 5 CFR Part 713, which involved issues otherwise appealable to the Board.

It should be noted that these regulations are applicable only to those cases pending prior to the effective date of the Civil Service Reform Act of 1978, January 11, 1979 (Pub. L. 95-454). Cases initiated on or after that date will be processed under the new Act and the regulations issued pursuant thereto. That Act establishes a process whereby the Board will render a determination where allegations of discrimination are raised in cases otherwise appealable to the Board ("mixed cases"). Appellants dissatisfied with that determination may then petition the EEOC to review the Board's disposition of these issues. (See Section 205 of the Act, 5 U.S.C. 7702.)

It is the intention of EEOC and MSPB in establishing these regulations and these delegations to process cases

pending before the effective date of the Civil Service Reform Act of 1978 in a manner as consistent as possible with the procedures established by that Act.

Inasmuch as there are presently before the Board a large number of cases to which these regulations and delegations pertain and in view of the fact that many of these cases have been pending for several months, the Commission and the Board recognize that good cause exists to make these regulations immediately effective so that there will be no further delay in case processing.

Issued: August 22, 1979.

By Order of the Board.

Ersa H. Poston,

Vice Chair, Merit Systems Protection Board.

Accordingly, it is proposed Part 1200 be amended to add § 1201.165 as follows:

§ 1201.165 Mixed cases governed by Reorganization Plan No. 1 of 1978.

(a) *Definitions.* (1) *Prohibited discrimination* as used in this section means discrimination prohibited by Section 717 of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000e-16(c)); Section 501 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 791); and Sections 12 and 15 of the Age Discrimination in Employment Act of 1967, as amended (29 U.S.C. 631, 633a).

(2) *Initial decision* as used in this section means decision on an appeal rendered by a presiding official of the MSPB pursuant to 29 CFR 1613 or 5 CFR Part 772 (as in effect prior to January 11, 1979) in which issues of prohibited discrimination have been raised.

(3) *Preliminary decision as used in this section means:* (i) An initial decision within the meaning of § 1201.165(a)(2) which has not been reopened by a Board member or as to which no petition to reopen was filed by a party within 35 days after issuance of the decision.

(ii) A decision by the Board itself pursuant to 29 CFR Part 1613 or 5 CFR Part 772, in which issues of prohibited discrimination are addressed, on a decision by the Board denying all petitions to reopen.

(b) *Contents of petition.* A petition for appeal raising issues of prohibited discrimination shall state there was discrimination and provide specific examples of how the appellant was discriminated against.

(c) *Procedures.* (1) Appeals under 29 CFR Part 1613 (43 FR 60901, formerly 5 CFR Part 713) shall be processed by the Board consistent with the provisions set forth in that part. Such appeals shall be

filed in writing with the appropriate Board Field Office.

(2) Appeals under the procedures of 5 CFR Part 772, shall be processed as provided therein, except that under 5 CFR 772.306(b) the discrimination investigation shall be completed and the investigative file and report sent to the Board, within 120 days. Except when this time has been extended upon a verified showing of good cause, the Board may impose the sanctions provided in 5 CFR 1201.43 if an agency fails to timely complete and file the result of such an investigation.

(3) An initial decision on an appeal which includes issues of prohibited personnel discrimination shall be rendered by an employee of the Board, pursuant to 29 CFR 1613 or 5 CFR Part 772, on all issues raised in the appeal.

(4) Unless a petition to reopen is filed with the Board or unless a Board member reopens on his/her own motion, within 35 days from issuance of an initial decision, the initial decision shall become the preliminary decision of the Board.

(d) *Review by EEOC.* (1) *Time for filing.* A petition to review the preliminary decision of the Board on issues of prohibited discrimination shall be filed with the EEOC within 35 days after the initial decision of the Board becomes the preliminary decision.

(2) *Petition filed.* In the event a petition for review is filed with the EEOC, the Board decision shall become final on all issues, other than issues of prohibited discrimination, on the date EEOC's decision on these issues becomes final.

(3) *Petition not filed.* If a petition for review is not filed with the EEOC the decision of the Board shall become final on all issues.

(5 U.S.C. 1203(g))

(FR Doc. 79-26539 Filed 8-27-79; 8:45 am)

BILLING CODE 6325-20-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION**29 CFR Part 1613****Interim Regulations for Processing Appealable Actions, Alleging Prohibited Discrimination, Pending on or Before January 10, 1979**

AGENCY: Equal Employment Opportunity Commission.

ACTION: Interim Regulations; request for comments.

SUMMARY: These regulations, published for immediate effect, provide delegations of authority to the Merit

Systems Protection Board to issue preliminary determinations in certain federal EEO cases governed by Reorganization Plan No. 1 of 1978, and temporary operating instructions for the further processing of such cases by EEOC. In addition the Commission requests public comment on these regulations.

DATES: Effective date: August 28, 1979. Comment date: Written comments should be submitted on or before October 29, 1979.

ADDRESS: Comments should be addressed to the Office of the Executive Secretariat, Room 4096, Equal Employment Opportunity Commission, 2401 E Street, Northwest, Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT: Constance L. Dupre, Associate General Counsel, Legal Counsel Division, Office of the General Counsel, Room 2254, EEOC, 2401 E Street, Northwest, Washington, D.C. 20506, (202) 634-6595.

SUPPLEMENTARY INFORMATION: On January 1, 1979, certain federal equal employment enforcement responsibilities, previously vested in the Civil Service Commission under four different statutes, were transferred to the Equal Employment Opportunity Commission (EEOC) pursuant to Reorganization Plan No. 1 of 1978. The enforcement responsibilities transferred were those specified in Section 717 of Title VII of the Civil Rights Act of 1964, as amended, Section 6(d) of the Fair Labor Standards Act, as amended (the Equal Pay Act), Section 501 of the Rehabilitation Act of 1973 and Sections 12 and 15 of the Age Discrimination in Employment Act of 1967 as amended. Reorganization Plan No. 1 specifically permitted the EEOC to delegate back to the Civil Service Commission or its successor agency the authority to make a preliminary determination on issues of discrimination prohibited by Section 717 of Title VII of the Civil Rights Act of 1964, whenever such issues were raised before that agency in the course of an appeal on other grounds (for example, in an adverse action appeal). The Merit Systems Protection Board (the Board) is the adjudicatory successor to the Civil Service Commission. The EEOC has delegated Title VII authority back to the Board so that the Board may make preliminary decisions on issues of race, color, sex, religion, or national origin, when such issues are raised in appeals otherwise before the Board. The EEOC has determined that it is within its general powers also to delegate similar authority to the Board to decide age and handicap issues, and has done so. (The Commission did not consider it

appropriate to delegate its authority with regard to the Equal Pay Act.) Its regulations to this effect are published below. The complementary regulations of the Board are published elsewhere in this issue of the *Federal Register*.

It should be noted that these regulations are applicable only to those cases pending before January 11, 1979, the effective date of the Civil Service Reform Act of 1978, Pub. L. 95-454. That Act establishes a process whereby the Board will render a determination where allegations of discrimination are raised in cases before it and dissatisfied appellants can then petition the Equal Employment Opportunity Commission to review the Board's disposition of those issues. See Section 205 of the Act, codified in pertinent part at 5 U.S.C. 7702. It was the intention of the EEOC and the Board in establishing these regulations and these delegations to process cases pending before the effective date of the Civil Service Reform Act of 1978 in a manner as consistent as possible with the procedures established by that Act.

Inasmuch as there are presently pending before the Board a large number of cases to which these regulations and delegations pertain, and in view of the fact that many of these cases have been pending for several months, the Commission and the Board recognize that good cause exists to make these regulations immediately effective so that there will be no further delay in case processing.

These regulations have been reviewed in accordance with Executive Order 12044. They do not require regulatory analysis under Section 3 of that Order.

Issued on August 21, 1979.

For the Commission.

Eleanor Holmes Norton,

Chair.

Therefore, Part 1613 of Title 20 of the Code of Federal Regulations is amended by adding a new Subpart H to read as follows:

Subpart H—Regulations for Processing Appealable Actions, Alleging Prohibited Discrimination, Pending on or Before January 10, 1979

Sec.

1613.801 Scope.

1613.802 Definitions.

1613.803 Election.

1613.804 Election of Part 1613.

1613.805 Election of Part 772.

1613.806 Petition to EEOC; finality of decisions.

Authority: 42 U.S.C. 2000e-16; 29 U.S.C. 633a; 29 U.S.C. 791; Reorganization Plan No. 1 of 1978.

Subpart H—Regulations for Processing Appealable Actions, Alleging Prohibited Discrimination, Pending on or Before January 10, 1979

§ 1613.801 Scope.

This subpart establishes regulations for the processing of an allegation that an action otherwise appealable to the Merit Systems Protection Board (the Board) was based in whole or in part on discrimination because of race, color, religion, sex, national origin, age, or handicap. This subpart applies only to administrative procedures pending before January 11, 1979, to which Section 205 of the Civil Service Reform Act of 1978, 5 U.S.C. 7702, is inapplicable.

§ 1613.802 Definitions.

(a) As used in this section, the term "prohibited discrimination" means discrimination prohibited by Section 717 of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000c-16); Section 501 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 791); and Sections 12 and 15 of the Age Discrimination in Employment Act of 1967, as amended (29 U.S.C. 631 and 633a).

(b) As used in this section, the term "initial decision" means a decision on an appeal, rendered by a presiding official of the Board pursuant to 29 CFR Part 1613 or 5 CFR Part 772 (as in effect prior to January 11, 1979), in which issues of prohibited discrimination have been raised.

(c) As used in this section, the term "preliminary decision" means (1) an initial decision within the meaning of § 1613.802(b), which has not been reopened by a Board member or as to which no petition to reopen was filed by a party within 35 days after issuance of the decision; or (2) a decision by the Board itself pursuant to 29 CFR Part 1613 or 5 CFR Part 772 (as in effect prior to January 11, 1979), in which issues of prohibited discrimination are addressed, or a decision by the Board denying all petitions to reopen.

§ 1613.803 Election.

An appellant who alleges that an action otherwise appealable to the Board was based in whole or in part on prohibited discrimination shall elect to proceed under 29 CFR Part 1613 (43 FR 60901, formerly 5 CFR 713) or under 5 CFR Part 772 (as in effect prior to January 11, 1979). This section is applicable only to persons who had not previously made an election under regulations of the former Civil Service Commission.

§ 1613.804 Election of Part 1613.

(a) When an appellant elects or has elected to proceed under 29 CFR Part 1613 (43 FR 60901, formerly 5 CFR Part 713) the provisions of Part 1613 are applicable to that proceeding.

(b) The Commission hereby delegates to the Merit Systems Protection Board the authority to make initial and preliminary decisions on issues of prohibited discrimination in appeals from final agency decisions under 29 CFR Part 1613 (43 FR 60901, formerly 5 CFR Part 713).

§ 1513.605 Election of Part 772.

(a) When a complainant elects or has elected to proceed under 5 CFR Part 772, the allegations of discrimination shall be referred to the EEO Officer of the agency for investigation in accordance with 29 CFR 1613.216 (43 FR 60901, formerly 5 CFR 713.216).

(b) The Commission hereby delegates to the Merit Systems Protection Board the authority to make initial and preliminary decisions on issues of prohibited discrimination in appeals from final agency decisions under 5 CFR Part 772.

§ 1613.806 Petition to EEOC; finality of decisions.

(a) A petition to review the preliminary decision of the Board shall be filed in writing with the Office of Review and Appeals, EEOC, 2401 E Street, N.W., Washington, D.C. 20506 (1) within 35 days after the initial decision of the Board becomes a preliminary decision (as contemplated in § 1613.802(c)(1)) or (2) within 35 days after the issuance of a preliminary decision by the Board.

(b) A decision of the EEOC on a petition to review the preliminary decision of the Board shall be final when issued.

(c) If a petition to review is not timely filed with the EEOC, the preliminary decision of the Board shall become final on all issues on the day after the expiration of the 35-day period for filing with EEOC, unless the EEOC chooses to exercise its discretion under the standards of 29 CFR 1613.233(b) and accept the late petition.

Department of the Interior

Fish and Wildlife Service

Final Frameworks for Late Season
Migratory Bird Hunting

DEPARTMENT OF THE INTERIOR

50 CFR Part 20

Final Frameworks for Late Season Migratory Bird Hunting Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes final frameworks, that is, the outer limits for both the early and the late seasons. Initial regulatory proposals are first announced in mid-February, and opened to public comment. As additional information becomes available, and comments are received and considered to the initial proposals, supplemental proposed rulemakings are announced in the Federal Register. At the termination of the comment periods and following a public hearing, the Service develops and publishes the proposed frameworks for times of seasons, season lengths, shooting hours, daily bag and possession limits, and other regulatory restraints or options. Following another public comment period, and after consideration of additional comments, the Service publishes in the Federal Register the final frameworks. Using these frameworks, State conservation agencies select hunting season dates and offered options. States may select more restrictive seasons, limits, and options than those offered in the Service's frameworks. The final regulations, reflected in amendments to Subpart K of 50 CFR 20 then appear in the Federal Register, and become effective upon publication.

EFFECTIVE DATE: August 29, 1979.

FOR FURTHER INFORMATION CONTACT:

John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, telephone 202-254-3207.

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), as amended, authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds to determine when, to what extent, and by what means such birds or any part, nest, or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported, or transported.

In the annual process for developing migratory game bird hunting regulations, "early" seasons are separated from "late" seasons. Early seasons are those which may open before September 29 while late seasons open on or after September 29. Regulations are developed independently for early and late seasons. The early season regulations cover mourning doves, white-winged doves, band-tailed pigeons, rails, gallinules, woodcock, common snipe, sea ducks in the Atlantic Flyway, teal in September in the Central and Mississippi Flyways, sandhill cranes in North and South Dakota, an early duck season opening in Iowa, doves in the Virgin Islands and Hawaii,

all migratory game birds in Puerto Rico and Alaska, and some extended falconry seasons. Late seasons include the general waterfowl seasons; special seasons for scaup and goldeneyes; extra scaup and teal in regular seasons; most sandhill crane seasons in the Central Flyway; coots, gallinules, and snipe in the Pacific Flyway; and other special falconry seasons.

Certain general procedures are followed in developing regulations for both the early and the late seasons. Initial regulatory proposals are first announced in mid-February, and opened to public comment. As additional information becomes available, and comments are received and considered to the initial proposals, supplemental proposed rulemakings are announced in the Federal Register. At the termination of the comment periods and following a public hearing, the Service develops and publishes the proposed frameworks for times of seasons, season lengths, shooting hours, daily bag and possession limits, and other regulatory restraints or options. Following another public comment period, and after consideration of additional comments, the Service publishes in the Federal Register the final frameworks. Using these frameworks, State conservation agencies select hunting season dates and offered options. States may select more restrictive seasons, limits, and options than those offered in the Service's frameworks. The final regulations, reflected in amendments to Subpart K of 50 CFR 20 then appear in the Federal Register, and become effective upon publication.

This year the process was implemented as follows. On February 15, 1979, the Service published for public comment in the Federal Register (44 FR 9928) proposals to amend 50 CFR 20, with a comment period ending May 16, 1979. That document dealt with the establishment of seasons, limits and shooting hours for migratory birds under §§ 20.101 through 20.107 of Subpart K. On June 13, 1979, the Service published for public comment in the Federal Register (44 FR 34082) the second document in the series consisting of a supplemental proposed rulemaking dealing specifically with a number of supplemental or modified proposals arising from comments received on the initial proposals, or from new information.

On June 21, 1979, a public hearing was held in Washington, D.C., to review the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, and sandhill cranes. The meeting was announced in the Federal Register

on February 15, 1979 (44 FR 9928) and June 13, 1979 (44 FR 34082). Proposed hunting regulations for these species were discussed plus those for common snipe; rails; gallinules; migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; mourning doves in Hawaii; September teal seasons in the Mississippi and Central Flyways; and early duck season in Iowa; special sea duck seasons in the Atlantic Flyway; and falconry seasons. Statements or comments were invited.

On June 28, 1979, the Service also published for public comment in the Federal Register (44 FR 37857) the third document in the series consisting of supplemental proposed rulemaking dealing specifically with proposed frameworks for early season migratory bird hunting regulations from which, when finalized, States may select season dates, shooting hours, and daily bag and possession limits for the 1979-80 season. On June 28, 1979, the Service published in the Federal Register (44 FR 37854) the fourth document in the series of proposed and final rulemakings dealing specifically with final frameworks for the 1979-80 season from which wildlife conservation agency officials in Alaska, Puerto Rico, and the Virgin Islands could select season dates for hunting certain migratory birds in their respective jurisdictions during the 1979-80 season. On July 24, 1979, the Service published in the Federal Register (44 FR 43420) the fifth document in the series of proposed and final rulemakings dealing specifically with final frameworks for early season migratory game bird hunting regulations from which State wildlife conservation agency officials selected season dates and daily bag and possession limits for the 1979-80 early season.

On August 2, 1979, a public hearing was held in Washington, D.C., as announced in the Federal Register on February 15, 1979 (44 FR 9928) and June 13, 1979 (44 FR 34082) to review information on population status and proposed hunting regulations for waterfowl, coots, and gallinules; sandhill cranes in Colorado, New Mexico, Oklahoma, Texas, Montana and Wyoming; common snipe in the Pacific Flyway; and special falconry regulations. Statements or comments were invited.

On August 8, 1979, the Service published in the Federal Register (44 FR 46462) the sixth document in the series of proposed and final rulemakings dealing specifically with a correction to the final frameworks published on July 24, 1979 (44 FR 43420) to include in the final frameworks a page of text

inadvertently omitted from that document.

On August 10, 1979, the Service published for comment in the Federal Register (44 FR 47246) the seventh document in the series of proposed and final rulemakings dealing specifically with proposed regulations frameworks for 1979-80 late hunting seasons on certain migratory game birds. On August 20, 1979, the Service published in the Federal Register (44 FR 48846) the eighth document in the series of proposed and final rulemakings dealing specifically with amending Subpart K of 50 CFR 20 to set open hunting seasons, certain closed areas, shooting and hawking hours and bag and possession limits for mourning doves, white-winged doves, band-tailed pigeons, rails, woodcock, snipe, and gallinules; September teal seasons; sea ducks in certain defined areas of the Atlantic Flyway; ducks in late September in Iowa; sandhill cranes in designated portions of North Dakota and South Dakota; and migratory game birds in Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

This final rulemaking document is the ninth in the series of proposed, supplemental, and final rulemakings for migratory game bird hunting regulations and deals specifically with final regulations frameworks for 1979-80 late hunting seasons on certain migratory game birds.

These final frameworks also reflect clarifications or corrections to the frameworks which were proposed in the Federal Register (44 FR 47246) dated August 10, 1979. These include: a restoration of the goose bag and possession limits in the Lac Qui Parle quota area of Minnesota to those effective during the 1978-79 season, clarification of the canvasback limits in North and South Dakota, and a minor change in the description of waterfowl zones in Massachusetts.

Review of Public Comments and the Service's Response

Various public comments on the proposed late season regulations have been considered during the regulatory development period. The Service replied to public comments on regulations proposed in the Federal Register (44 FR 9928) dated February 15, 1979, in the Federal Register (44 FR 34082) dated June 13, 1979. Subsequent public comments, including those made at the public hearing held in Washington, D.C., on August 2, 1979, were considered, and responded to in the Federal Register (44 FR 47246) dated August 10, 1979, which dealt with proposed frameworks for late season migratory bird hunting. That publication advised that additional

public comments on proposed late season frameworks would be considered through August 20, 1979.

Thirteen additional public comments were received by the Service through August 20, 1979. These originated from 3 Flyway Councils (one submitted two comments), 5 States, 2 sportsmen's clubs, a national conservation organization, and a law institute. The comments from the Atlantic, Mississippi, and Central Flyway Councils were received prior to the public hearing on proposed waterfowl regulations held in Washington, D.C., on August 2, 1979. They were again presented by the Councils at the public hearing. Most of the Councils' recommendations were responded to in the Federal Register (44 FR 47246) dated August 10, 1979, and are reflected in the final frameworks. Those recommendations which were not accepted by the Service were discussed in that or prior issues of the Federal Register.

The State conservation agencies of Arkansas and Missouri recommended regulatory wording designed to alleviate confusion about the waterfowl season applicable on the St. Francis River, which separates the two States. The boundary is poorly defined, and different hunting seasons are usually selected by Arkansas and Missouri. The two State agencies jointly recommended that the problem area be defined for regulatory purposes, and that the waterfowl season selected by Missouri also apply to the Arkansas portion of the St. Francis River.

Response. The Service concurs with the recommendations. The final frameworks define the area and provide that the waterfowl seasons selected by Missouri shall also apply to the defined Arkansas portion of the river.

Wisconsin opposed the proposal that the opening framework date for waterfowl seasons in the Upper Region of the Mississippi Flyway coincide with the Saturday closest to October 1. Wisconsin considers Saturday waterfowl season openings undesirable because of the heavy hunting pressure placed on local waterfowl and because of crowded hunting conditions. The State recommended that the option be offered only to States interested in the option, and that the change be on an experimental basis.

Response. The Service notes that the proposal was requested by the Upper Region of the Mississippi Flyway Council. States are not obligated to select Saturday opening dates if local situations favor other opening days.

A sportsmen's club in Mississippi urged that the hunting of Canada geese

at Sardis Lake (Reservoir) not be prohibited this year as the Service has proposed.

Response. Canada geese which winter at Sardis Lake are part of the Mississippi Valley Population (MVP) which once wintered in southern parts of the Mississippi Flyway. Both the Service and the Mississippi Flyway Council believe it is desirable that MVP geese be encouraged to reoccupy former wintering areas in the southern part of the Mississippi Flyway. This is an objective of a management plan for MVP geese which has been approved by the Service and the Mississippi Flyway Council. As part of a cooperative effort to meet this objective, hunting of Canada geese is being suspended this season in Arkansas, Louisiana, Mississippi, and southwestern Tennessee. It is believed important that complete protection be given to the remnant flocks of Canada geese which still winter in southern areas such as Sardis Reservoir.

A Michigan duck hunters' association recommended that the waterfowl season in Zones 2 and 3 of Michigan open on October 17, 1979.

Response. The Service establishes frameworks, or time periods, within which State conservation agencies may select hunting season dates. The selection of specific hunting dates within the framework is a State prerogative.

On August 20, 1979, the Institute for Public Representation (IPR), Georgetown University Law Center, Washington, D.C., submitted a comment on behalf of Defenders of Wildlife (Defenders). The comment asserted that consultations and communications between the Service and the four flyway councils during preparation of the hunting regulations were contrary to the Federal Advisory Committee Act, 5 U.S.C., App. I, and to several court decisions related to *ex parte* communications in informal rulemaking. Similar comments had been submitted by IPR on behalf of Defenders on May 18, 1979, and by Defenders themselves on January 17, 1979.

The Department's Associate Solicitor for Conservation and Wildlife responded to these assertions in a letter to Defenders dated May 7, 1979. This letter was published by the Service in the Federal Register of June 13, 1979 (44 FR 34082). The Associate Solicitor concluded that the flyway councils are not functioning as advisory committees and that the Service's contacts with the councils are in compliance with the requirements applicable to *ex parte* communications during informal rulemaking.

The advisory committee and *ex parte* questions were discussed again in a meeting held on August 20, 1979, between the Associate Solicitor and representatives from IPR and Defenders. A memorandum of this meeting has been placed in the public file for these regulations. At the meeting, the Associate Solicitor pointed out that procedural subjects such as advisory committee and *ex parte* communications might be dealt with more effectively in a rulemaking proceeding that is separate from the present proceedings being utilized to develop the substantive content of the hunting regulations. The Associate Solicitor then suggested that Defenders and IPR might wish to petition the Service for the issuance of such procedural rules. The Service agrees with the Associate Solicitor's suggestion.

A comment was received from Defenders of Wildlife (Defenders) contending that black duck regulations were inconsistent with the status of the species based on winter counts and harvest levels. Defenders also contended that the limited data concerning breeding populations suggested a downward trend, and that information was lacking to support status quo regulations.

Response. The winter survey population index for black ducks shows a gradual but steady decline. However, the contention that this decline is related directly to hunting regulations and to the size of the black duck harvest is doubtful. Many factors, such as the unusually severe winters which occurred along the Atlantic Coast the past three years, affect black duck harvests, food availability, and distribution. Data in Service files show no correlation between size of black duck harvests and the subsequent winter survey index. The 1978-79 U.S. black duck harvest (343,000) increased 20 percent over the previous year, but was 14 percent below the average harvest (400,000) of the past 11 years. The 1978-79 harvest was slightly below the average harvest of the previous 4 seasons, a period of stable regulations for black duck daily bag and possession limits and season lengths. Harvests during this 4-year period ranged from a low of 281,000 to a high of 430,000, strongly suggesting that factors other than hunting regulations were affecting harvest size. The best and most voluminous waterfowl banding and harvest data available are for the mallard, the species most closely allied with the black duck. Recent studies by Anderson and Burnham (1975), based on an analysis of 700,000 mallard bandings,

failed to demonstrate a direct relationship between harvest levels and population survival rates. Defenders' implication that this relationship exists for black ducks as shown by winter survey indices is unsupported by available data.

Defenders expressed concern about breeding population data derived from surveys in Nova Scotia and New Brunswick. While the 1979 population was lower than the previous year, it equaled or exceeded the average population for the previous 5-year period, and populations measured in the late 1950's and the early 1960's. This suggests that the breeding population in this portion of Maritime Canada is maintaining itself at a satisfactory level.

Defenders contends that data upon which to base a continuation of status quo regulations are inadequate, and were unavailable to them until late in the comment period. The Service is attempting to evaluate changes in black duck hunting regulations according to the plan detailed in an Environmental Assessment titled "Proposed Hunting Regulations on Black Ducks." A 4-year period of stabilized black duck hunting regulations is being conducted in conjunction with a major banding study to evaluate harvest rates and related matters of importance in managing the continental black duck population. Availability of an environmental assessment outlining this study was announced in the *Federal Register* dated July 8, 1978, at page 27987.

Twenty-two States, 5 Provinces, the Canadian Wildlife Service, and the U.S. Fish and Wildlife Service are participating in the banding program. Over 25,000 bands have been placed on black ducks to date. The introduction of different regulations for black ducks at this time would negate much of the effort by these agencies to acquire better information upon which to base future black duck management plans, including regulatory measures. Based on data from previous years, there is no reason to believe that continuing this study to its completion will either jeopardize or adversely affect the black duck.

Virginia reiterated the Atlantic Flyway Council's request for a 15-day subseason during which a daily bag of 4 drake canvasbacks could be taken in "traditional" canvasback hunting areas of Delaware, Maryland, New Jersey, New York, North Carolina, and Virginia.

Response. The Service considered proposal for a special canvasback season in the Atlantic Flyway and responded in the *Federal Register* dated February 15 (44 FR 9826), June 13 (44 FR 34082), and August 10 (44 FR 47246), 1979. The Service notes that population

objectives and harvest management strategies for the canvasback are guided by an Environmental Assessment titled "Proposed Hunting Regulation on Canvasback and Redhead Ducks," issued in August 1978. A special subseason for canvasbacks is not among the strategies listed in the EA. However, in the light of additional information accumulated since the EA was prepared, the Service believes it desirable to reassess population objectives and management strategies for canvasbacks, and intends to do so prior to the 1980-81 season. Part of this reassessment will involve evaluation of data from a canvasback banding program currently underway in the Maryland portion of Chesapeake Bay. In reviewing the Atlantic Flyway Council proposal, note was made of the need for more detailed planning to evaluate effects of the proposed subseason. Recognizing that a proposal for an experimental season must meet requirements of the National Environmental Policy Act and the Administrative Procedure Act, the Service reiterates its willingness to consider an experimental season in traditional hunting areas. Prior to the 1980-81 season, further consideration will be given to canvasback harvest regulations proposals that are supportive of an updated canvasback-redhead environmental assessment.

Steel Shot Regulations

Non-toxic shot requirements in some geographical areas apply to waterfowl regulations being finalized here. On July 17, 1979, the Service published in the *Federal Register* (44 FR 41461) final regulations regarding zones in all flyways in which shotshells loaded with steel shot will be required for waterfowl hunting in seasons commencing in 1979. Minor corrections to the final regulations appeared in the *Federal Register* dated August 10, 1979 (44 FR 47093). The intended effect of establishing these steel shot regulations is to reduce the number of waterfowl deaths caused by ingesting spent lead pellets.

The regulations appear under 50 CFR §§ 20.21 and 20.10b, and will also be summarized in the Service's regulations leaflets to be published late this summer.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75-54)" was filed with the Council on Environmental Quality on June 6, 1975 and notice of availability was published in the *Federal Register* on June 13, 1975 (40

CFR 25241). A number of environmental assessments have been issued by the Service to supplement the above FES. Shooting hours, dove hunting in September, black ducks, canvasbacks and redheads, Atlantic Flyway brant, and greater snow geese are among the subjects of these assessments. The 1975 FES is now out of print but copies of the environmental assessments are available from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Endangered Species Act Consideration

Section 7 of this act provides that, "The Secretary shall review other programs administered by him and utilized such programs in furtherance of the purposes of this Act," and "by taking such action necessary to insure that actions authorized, funded, or carried out * * * do not jeopardize the continued existence of such endangered or threatened species or result in the destruction or modification of habitat of such species * * * which is determined to be critical."

As in the past, hunting regulations this year are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species.

The Service reviewed all migratory bird regulations frameworks being contemplated this year for the early seasons (season lengths, limits, shooting hours, and outside dates) within which States may select seasons for mourning doves, white-winged doves, band-tailed pigeons, rails, woodcock, snipe, and gallinules; for September teal seasons (including the extra teal option during regular seasons), for sea ducks in certain defined areas of the Atlantic Flyway; for a portion of the regular duck season in Iowa to be taken in late September; for sandhill cranes in designated portions of North Dakota and South Dakota; and special falconry regulations. As a result of intra-Service Section 7 consultation, Acting Director Robert S. Cook concluded in a biological opinion dated July 9, 1979, that the proposed 1979-80 early season migratory bird hunting regulations are not likely to jeopardize the continued existence of the five Endangered species considered, or destroy or adversely modify their Critical Habitat or habitat that might be determined critical in the future. Several actions were recommended as means for furthering the conservation of listed species.

The proposed late season regulatory frameworks were likewise subjected to

careful study to insure that they complied with section 7 of the Endangered Species Act. Special attention was given the Aleutian Canada goose (*Branta canadensis leucopareia*), Everglade kite (*Rostrhamus sociabilis plumbeus*), whooping crane (*Grus americana*), bald eagle (*Haliaeetus leucocephalus*), and peregrine falcon (*Falco peregrinus*). A biological opinion reviewed and evaluated the population and habitat status and trends of these endangered species; factors affecting their status and welfare; management programs underway or planned to enhance the status of the species; and the impacts, if any, of the proposed late season hunting regulations. On August 21, 1979, Director Lynn A. Greenwalt concluded:

"Based on all the information available to me, it is my biological opinion that the migratory bird late hunting seasons are not likely to jeopardize the continued existence of the above listed species or result in destruction or adverse modification of any designated Critical Habitat."

The Service's biological opinion resulting from its consultation under Section 7 is considered a public document and is available for inspection in the Office of Endangered Species and the Office of Migratory Bird Management, Department of the Interior, Washington, D.C. 20240. Copies may also be supplied by mail upon request.

Authorship

The primary author of this final rule is Henry M. Reeves, Office of Migratory Bird Management, working under the direction of John P. Rogers, Chief.

Exception from Executive Order 12044 and 43 CFR Part 14

As discussed in the *Federal Register* dated February 15, 1979 (44 FR 9929), the Assistant Secretary for Fish and Wildlife and Parks has concluded that the ever decreasing time frames in the regulatory process are mandated by the Migratory Bird Treaty Act and the Administrative Procedure Act. The regulatory process simply has no remaining slack in its timetable between the accumulation of critical summer survey data and the publication of the revised sets of proposed rulemakings. Compliance with the determination of significance and regulatory analysis criteria established under Executive Order 12044 would simply not be possible if the fall hunting season deadlines are to be achieved.

Consequently, the Assistant Secretary for Fish and Wildlife and Parks has approved the exemption of these regulations from the procedures of

Executive Order 12044 and 43 CFR 14 which is provided for in section 6(b)(6) and § 14.3(f), respectively.

Regulations Promulgation

The rulemaking process for migratory game bird hunting, must, by its nature, operate under severe time constraints. However, the service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed rulemakings were published on February 15, June 13, June 28, and August 10, the Service established what it believed were the longest periods possible for public comment. In doing this, the Service recognized that at the periods' close, time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, the Service is of the opinion that the States would have insufficient time to select their season dates, and bag limits; to communicate those selections to the Service, and finally to establish and publicize the necessary regulations and procedures to implement their decisions. The Service therefore finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) and these frameworks will, therefore, take effect immediately upon publication.

Accordingly, the Service prescribes the final frameworks setting forth the species to be hunted, daily bag and possession limits, season dates, shooting hours, and special closures from which State conservation agency officials may select open season dates. Upon receipt of season selections from State officials, the Service will publish in the *Federal Register* final rulemaking amending certain sections of subpart K of 50 CFR Part 20 to reflect seasons, limits and shooting hours for the contiguous United States for the 1979-80 season.

Final Regulations Frameworks for 1979-80 Late Hunting Seasons on Certain Migratory Game Birds

Pursuant to the Migratory Bird Treaty Act, the Secretary of the Interior has approved final frameworks for season lengths, shooting hours, bag and possession limits, and outside dates within which States may select seasons for hunting waterfowl, coots, and gallinules; sandhill cranes in parts of New Mexico, Texas, Colorado, Oklahoma, Montana, and Wyoming; and common snipe in the Pacific Flyway. Frameworks are summarized below. States may be more restrictive in selecting season regulations, but may not exceed the framework provisions.

General

States in the Pacific, Central and Mississippi Flyways may split their season for ducks or geese into two segments of equal or unequal lengths. States in the Atlantic Flyway may, in lieu of zoning, split their season for ducks or geese into two or three segments of equal or unequal lengths. Exceptions are noted in appropriate sections.

Shooting and hawking hours in all States, on all species, and for all seasons are ½ hour before sunrise until sunset, except that during September teal season the hours are sunrise until sunset.

States in the Mississippi and Central Flyways selecting neither a September teal season nor the point system may select an extra daily bag and possession limit of 2 and 4 blue-winged teal, respectively, for 9 consecutive days designated during the regular duck season. These extra limits are in addition to the regular duck bag and possession limits.

States in the Atlantic Flyway not selecting the point system may select an extra teal limit for 9 consecutive hunting days during the regular duck season of no more than 2 blue-winged teal or 2 green-winged teal or 1 of each daily and no more than 4 singly or in the aggregate in possession.

States in the Atlantic, Mississippi and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, with daily bag and possession limits of 5 and 10 scaup, respectively, subject to the following conditions:

1. The season must fall between October 1, 1979, and January 31, 1980, all dates inclusive.
2. The season must fall outside the open season for any other ducks except sea ducks.
3. The season must be limited to areas mutually agreed upon between the State and the Service prior to September 1, 1979.
4. These areas must be described and delineated in State hunting regulations.

Or

As an alternative, States in the Atlantic, Mississippi, and Central Flyways, except those selecting a point system, may select an extra daily bag and possession limit of 2 and 4 scaup, respectively, during the regular duck hunting season, subject to conditions 3 and 4 listed above. These extra limits are in addition to the regular duck limits and apply during the entire regular duck season.

Selection of the point system for any State entirely within a flyway must be

on a statewide basis, except if New York selects the point system, conventional regulations may be retained for the Long Island Area. New York may not select the point system within the Upstate zoning option, and Maine, Connecticut, and North Carolina may not select the point system pending completion of zoning studies currently under way.

States that did not select their rail, woodcock, snipe, gallinule, or sea duck seasons in July should do so at the time they make their waterfowl selections.

Frameworks for open seasons and season lengths, bag and possession limit options, and other special provisions are listed below by Flyway.

Atlantic Flyway

Between October 1, 1979, and January 20, 1980, States in this Flyway may select open seasons on ducks, coots, and mergansers of: (a) 50 days, with basic daily bag and possession limits of 4 and 8 ducks, respectively, of which no more than 2 in the daily bag and 4 in possession may be black ducks; or (b) 50 days, with basic daily bag and possession limits of 5 and 10 ducks, respectively, of which no more than 1 in the daily bag and 2 in possession may be black ducks.

Except in closed areas, the limit on canvasbacks and redheads is 1 canvasback daily and 1 in possession or 1 redhead daily and 1 in possession. Under the point system, canvasbacks count 100 points each and redheads count 70 points each, except in closed areas. Areas closed to canvasback and redhead hunting are:

New York—Upper Niagara River between the Peace Bridge at Buffalo, New York, and the Niagara Falls. All waters of Lake Cayuga.

New Jersey—Those portions of Monmouth County and Ocean County lying east of the Garden State Parkway.

Maryland, Virginia and North Carolina—Those portions of each State lying east of U.S. Highway 1.

Under conventional and point system options, the daily bag and possession limits may not include more than 2 and 4 wood ducks, respectively, except that Virginia, North Carolina, South Carolina, Georgia and Florida may split their regular hunting season so that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15. During this period under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the flyway in 1979 shall apply to wood ducks. Under the point system, the point value of wood ducks shall be 25. For other ducks, daily bag

and possession limits shall be the same as established for the flyway under conventional or point system regulations. For those States using conventional regulations, the 9 consecutive days extra teal option may be selected concurrent with the early wood duck season option. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

The daily bag limit on mergansers is 5, only 1 of which may be a hooded merganser. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits of coots are 15 and 30, respectively.

The Lake Champlain Area of New York must follow the waterfowl seasons, daily bag and possession limits, and shooting hours selected by Vermont. This area includes that part of New York lying east and north of a boundary running south from the Canadian border along U.S. Highway 9 to New York Route 22 south of Keeseville along New York Route 22 to South Bay, along and around the shoreline of South Bay to New York Route 22, along New York Route 22 to U.S. Highway 4 at Whitehall, and along U.S. Highway 4 to the Vermont border.

In lieu of a special scaup season, Vermont may, for the Lake Champlain Area, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate, subject to the same provisions that apply to the special scaup season elsewhere.

New York may, for Long Island, select season dates and daily bag and possession limits which differ from those in the remainder of the State.

Upstate New York (excluding the Lake Champlain area) may be divided into three zones (West, North, South) on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Option (a) and (b) for seasons and bag limits is applicable to the zones in the Upstate area within the Flyway framework; only conventional regulations may be selected. Each zone will be permitted the full number of days offered under options (a) or (b). In addition, a two-segment split season without penalty may be selected in each zone. The basic daily bag limit on ducks in each zone and the restrictions applicable to options (a) and (b) of the regular season for the Flyway also apply. Teal and

scaup bonus bird options shall be applicable to the Upstate zones, but the 16-day special scaup season will not be allowed.

The zones are defined as follows:

The West Zone is that portion of Upstate New York lying west of a line commencing at the north shore of the Salmon River and its junction with Lake Ontario and extending easterly along the north shore of the Salmon River to its intersection with Interstate Highway 81, then southerly along Interstate Highway 81 to the Pennsylvania border.

The North and South Zones are bordered on the west by the boundary described above and are separated from each other as follows:

Starting at the intersection of Interstate Highway 81 and New York Route 49 and extending easterly along Route 49 to its junction with Route 8 in Utica, then southerly along Route 8 to its intersection with U.S. Highway 20 in Bridgewater, then easterly along U.S. Highway 20 to the Massachusetts border.

Maine, Massachusetts, Connecticut, Pennsylvania, and North Carolina each may be divided into two zones on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Option (a) or (b) for seasons and bag limits is applicable to the zones within the Flyway framework; only conventional regulations may be selected in Maine, Connecticut and North Carolina. Both zones will be permitted the full number of days offered under options (a) or (b). In addition, a two-segment split season without penalty may be selected. The basic daily bag limit on ducks in each zone and the restrictions applicable to options (a) and (b) of the regular season for the Flyway also apply. Teal and scaup bonus bird options and the 16-day special scaup season shall be allowed.

The zones are defined as follows:

Maine: North Zone—Game Management Zones 1, 2 and 3. South Zone—Game Management Zones 4 through 8.

Massachusetts: Coastal Zone—Beginning at the New Hampshire-Massachusetts border, that portion of the State east and south of a boundary formed by Interstate 95, south to U.S. Route 1, south to Interstate 93, south to Route 3, south to U.S. Route 6, southwest to Route 28, northwest to Interstate 195, and west to the Rhode Island line. Inland Zone—That portion of the State west and north of the above boundary.

Connecticut: North Zone—That portion of the State north of Interstate 95. South Zone—That portion of the State south of Interstate 95.

Pennsylvania: North Zone—The Lake Erie waters of Pennsylvania and a shoreline margin along Lake Erie from New York on the east to Ohio on the west extending 150 yards

inland, but including all of Presque Isle Peninsula. South Zone—The remainder of the State.

North Carolina: East Zone—That portion of the State east of U.S. Highway 1. West Zone—That portion of the State west of U.S. Highway 1.

As an alternative to conventional bag limits for ducks, a 50-day season with a point-system bag limit may be selected by States in the Atlantic Flyway during the framework dates prescribed. Point values for species and sexes taken are as follows: in Florida only, the fulvous tree duck counts 100 points each; in all States the canvasback counts 100 points each (except in closed areas); the female mallard, black duck, mottled duck, wood duck (except in Virginia, North Carolina, South Carolina, Georgia and Florida during the early wood duck season option), redhead (except in closed areas) and hooded merganser count 70 points each; the blue-winged teal, green-winged teal, pintail, gadwall, wigeon, shoveler, scaup, sea ducks, and mergansers (except hooded) count 10 points each; the male mallard, the wood duck during the early wood duck season option in Virginia, North Carolina, South Carolina, Georgia and Florida, and all other species of ducks count 25 points each. The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

In any State in the Atlantic Flyway selecting both point-system regulations and a special sea duck season, sea ducks count 10 points each during the point-system season, but during any part of the regular sea duck season falling outside the point-system season, regular sea duck daily bag and possession limits of 7 and 14, respectively, apply.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Between October 1, 1979, and January 20, 1980, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, West Virginia, Maryland, and Virginia (excluding those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17) may select 70-day seasons on Canada geese; the daily bag and possession limits are 3 and 6 geese, respectively. However, in the area comprised of New Jersey, Delaware, the Delmarva Peninsula portions of Maryland and Virginia, and that portion of Pennsylvania lying east and south of

a boundary beginning at Interstate Highway 83 at the Maryland border and extending north to Harrisburg, then east on U.S. Highway 22 to the New Jersey border, the Canada goose season length will be 90 days with the closing framework date extended to January 31, 1980. The daily bag limit within this area will be 4 birds with a possession limit of 8 birds. North Carolina and those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17 in Virginia may select 50-day seasons on Canada geese within the October 1, 1979, to January 20, 1980, framework; the daily bag and possession limits are 2 and 4 Canada geese, respectively. South Carolina may select a 50-day season on Canada geese within the October 1, 1979, to January 20, 1980, framework; the daily bag and possession limits are 1 and 2 Canada geese, respectively.

The season is closed on Canada geese in Florida and Georgia.

Between October 1, 1979, and January 31, 1980, States in the Atlantic Flyway may select 70-day seasons on snow geese (including blue geese); the daily bag and possession limits are 4 and 8 geese, respectively.

The season is closed on Atlantic brant.

Mississippi Flyway

Between September 29, 1979, and January 20, 1980, States in this Flyway may select concurrent 50-day seasons on ducks, coots, and mergansers, except that in Iowa the framework opening date is September 22 and in Mississippi the framework closing date is January 31. The daily bag limit for ducks is 5, and may include no more than 3 mallards, no more than 2 of which may be female mallards; 1 black duck; and 2 wood ducks (except as noted below). The possession limit is 10, including no more than 6 mallards, no more than 4 of which may be female mallards; 2 black ducks; and 4 wood ducks (except as noted below).

Except in closed areas, the limit on canvasbacks and redheads is 1 canvasback daily and 1 in possession or 1 redhead daily and 1 in possession. Under the point system, canvasbacks count 100 points each and redheads count 70 points each, except in closed areas. Areas closed to canvasback and redhead hunting are:

Mississippi River—Entire river, both sides, from Alton Dam upstream to Prescott, Wisconsin, at confluence of St. Croix River.

Alabama—Baldwin and Mobile Counties.

Louisiana—Caddo, St. Charles, and St.

Mary Parishes; that portion of Ward 1 formerly designated as Ward 6 of St. Martin

Parish; and Catahoula Lake in LaSalle and Rapides Parishes.

Michigan—Arenac, Bay, Huron, Macomb, Monroe, St. Clair, Tuscola, and Wayne Counties, and those adjacent waters of Saginaw Bay south of a line extending from Point au Gres in Sec. 6, T18N, R7E (Arenac County) to Sand Point in Sec. 11, T17N, R9E (Huron County), the St. Clair River, Lake St. Clair, the Detroit River and Lake Erie, under jurisdiction of the State of Michigan.

Minnesota—Douglas, Mahanomen, Polk, Pope and Sibley Counties. Where the county line of any of the above counties crosses any portion of a lake, that entire lake is closed. In addition, all land in Sec. 13, T130N, R31W (i.e., land between Lake Christina and Pelican Lake) is closed.

Ohio—Land and water areas comprising Erie, Ottawa and Sandusky Counties.

Tennessee—Kentucky Lake lying north of Interstate Highway 40.

Wisconsin—In the Mississippi River Zone, all that part of Wisconsin west of the Burlington-Northern Railroad in Grant, Crawford, Vernon, LaCrosse, Trempealeau, Buffalo, Pepin and Pierce Counties. Also, the following lakes and waters, including a strip of land 100 yards wide adjacent to the shorelines thereof: Lake Poygan in Winnebago and Waushara Counties and Lakes Winneconne and Butte des Morts, including the connecting waters thereof, in Winnebago County.

The daily bag limit on mergansers is 5, only 1 of which may be a hooded merganser. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits on coots are 15 and 30, respectively.

As an alternative to conventional bag limits for ducks, a 50-day season with point-system bag and possession limits may be selected by States in the Mississippi Flyway during the framework dates prescribed. Point values for species and sexes taken are as follows: except in closed areas, the canvasback counts 100 points; the redhead (except in closed areas), female mallard, wood duck (except as noted below), black duck and hooded merganser count 70 points each; the pintail, blue-winged teal, cinnamon teal, wigeon, gadwall, shoveler, scaup, green-winged teal and mergansers (except hooded merganser) count 10 points each; the male mallard and all other species of ducks count 25 points each. The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Kentucky, Arkansas, Tennessee, Louisiana, Mississippi and Alabama may split their regular duck hunting seasons in such a way that a hunting season not to exceed 9 consecutive days may occur between October 1 and October 15. During this period, under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway shall apply to wood ducks, and under the point system, the point value for wood ducks shall be 25 points. For other species of ducks, daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations. In addition, the extra blue-winged teal option available to States in this Flyway that select conventional regulations and do not have a September teal season may be selected during this period. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

In that portion of Louisiana west of a boundary beginning at the Arkansas-Louisiana border on Louisiana Highway 3; then south along Louisiana Highway 3 to Shreveport; then east along Interstate 20 to Minden; then south along Louisiana Highway 7 to Ringgold; then east along Louisiana Highway 4 to Jonesboro; then south along U.S. Highway 167 to Lafayette; then southeast along U.S. Highway 90 to Houma; then south along the Houma Navigation Channel to the Gulf of Mexico through Cat Island Pass—the season on ducks, coots and mergansers may extend 5 additional days, provided that the season opens no later than on November 3, 1979. If the 5-day extension is selected, and if point-system regulations are selected for the State, point values will be the same as for the rest of the State.

The waterfowl seasons, limits, and shooting hours in the Pymatuning Reservoir area of Ohio will be the same as those selected by Pennsylvania. The area includes Pymatuning Reservoir and that part of Ohio bounded on the north by County Road 306 known as Woodward Road, on the west by Pymatuning Lake Road, and on the south by U.S. Highway 322.

Michigan, Illinois, Indiana, Ohio, Missouri, Alabama and Tennessee may select hunting seasons on ducks, coots and mergansers by zones described as follows:

Michigan: *North Zone*—The Upper Peninsula. *South Zone*—The Lower Peninsula.

Illinois: *North Zone*—That portion of the State north of U.S. Highway 50. *South Zone*—The remainder of Illinois.

Indiana: *North Zone*—That portion of Indiana north of State Highway 18. *South Zone*—The remainder of Indiana.

Ohio: *North Zone*—The counties of Darke, Miami, Clark, Champaign, Union, Delaware, Licking, Miskinung, Guernsey, Harrison and Jefferson and all counties north thereof. In addition, the North Zone also includes that portion of the Buckeye Lake area in Fairfield and Perry Counties bounded on the west by State Highway 37, on the south by State Highway 204, and on the east by State Highway 13. *South Zone*—The remainder of Ohio.

Ohio may split its season in each zone into two segments.

Missouri: *North Zone*—That portion of Missouri north of a line running easterly from the Kansas-Missouri border along U.S. Highway 160 to the junction of U.S. Highway 60 in Springfield, along U.S. Highway 60 to the junction of State Highway 21, along State Highway 21 to the junction of State Highway 34, and along State Highway 34 to the Illinois-Missouri border along the Mississippi River at Cape Girardeau. *South Zone*—The remainder of Missouri.

Alabama: *South Zone*—Mobile and Baldwin Counties. *North Zone*—The remainder of Alabama.

Tennessee: *Reelfoot Zone*—Lake and Obion Counties, or a designated portion of that area. *State Zone*—The remainder of Tennessee.

Within each State: (1) the same bag limit option must be selected for both zones; (2) if a special, scaup season is selected for a zone, it shall not begin until after the regular season closing date in that zone.

The waterfowl seasons, limits, and shooting hours in the lower St. Francis River area of Arkansas and Missouri shall be the same as those selected by Missouri. The area is defined as that part of the St. Francis River south of U.S. Highway 62 where it is the boundary between Arkansas and Missouri and all sloughs and chutes (but not tributaries) connected to it.

Between September 29, 1979, and January 20, 1980, States in this Flyway, except Louisiana, may select 70-day seasons on geese, with daily bag and possession limits of 5 geese, to include no more than 2 white-fronted geese. Regulations for Canada geese are shown below by State.

Between September 29, 1979, and February 14, 1980, Louisiana may select 70-day seasons on snow (including blue) and white-fronted geese by zones established for duck hunting seasons, with daily bag and possession limits of 5 geese, to include no more than 2 white-fronted geese.

The season on Canada geese is closed in Arkansas, Louisiana and Mississippi. In Minnesota, in the:

(a) *Lac Qui Parle Zone* (described in State regulations)—the season on Canada geese closes after 50 days or when 7,000 birds have been harvested, whichever occurs first. The daily bag limit is 2 Canada geese or 2 white-fronted geese, or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

(b) *Southeastern Zone* (described in State regulations)—The season for Canada geese may extend for 70 consecutive days. The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

(c) *Remainder of the State*—the season on Canada geese will be concurrent with the duck season. The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

In Iowa, the season for Canada geese may extend for 70 consecutive days. The daily bag limit is 2 Canada geese. The possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

In Missouri, in the:

(a) *Swan Lake Zone* (described in State regulations)—the season on Canada geese closes after 70 days or when 25,000 birds have been harvested, whichever occurs first. Through November 25, the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese. After November 25, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

(b) *Southeastern Area* (east of U.S. Highway 67 and south of Crystal City)—the State may select a 45-day season on Canada geese between December 1, 1979, and January 20, 1980, with a daily bag limit of 2 Canada geese or 2 white-fronted geese or 1 of each; and a possession limit of 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

(c) *Remainder of the State*—the season on Canada geese may not exceed 45 days. The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the

aggregate, of which no more than 2 may be white-fronted geese.

In Wisconsin, the harvest of Canada geese is limited to 35,000. In the Horicon Zone, during the first hunting period, the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each, and the possession limit is 1 Canada goose and 2 white-fronted geese; thereafter, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each, and the possession limit is 2 Canada and 2 white-fronted geese. In the Central Zone, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each, and the possession limit is 2 Canada geese and 2 white-fronted geese. Elsewhere in Wisconsin, the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each, and the possession limit is 2 Canada geese and 2 white-fronted geese. In the Horicon Zone and the Central Zone, Canada goose hunting is restricted to those persons holding valid Canada goose hunting permits issued by the State. The Horicon Zone is defined as those portions of the counties of Fond du Lac, Green Lake, Washington and Dodge enclosed by a line beginning at the intersection of State Highway 175 and State Highway 23 in Fond du Lac County, then southerly on State Highway 175 to its intersection with State Highway 33, then westerly on State Highway 33 to the City of Beaver Dam, then northerly on State Highway 33 to its intersection with County Highway A, then northerly on County Highway A to its intersection with County Highway S, then easterly on County Highway S and continuing easterly on County Highway AS to its intersection with County Highway E, then northerly on County Highway E to its intersection with State Highway 23, then easterly on County Highway 23 to the point of beginning.

The Central Zone is defined as those portions of Fond du Lac, Winnebago, Green Lake, Marquette, Columbia and Dodge Counties enclosed by a line beginning in Winnebago County at the intersection of State Highway 21 and U.S. Highway 45, then southerly on U.S. Highway 45 to its intersection with State Highway 175, then southerly on State Highway 175 to its intersection with State Highway 23, then westerly on State Highway 23 to its intersection with County Highway E, then southerly on County Highway E to its intersection with County Highway AS, then westerly on County Highway AS and continuing westerly on County Highway S to its intersection with County Highway A, then southerly on County Highway A to its intersection with State Highway 33,

then southeasterly on State Highway 33 to its intersection with U.S. Highway 151, then southwesterly on U.S. Highway 151 to its intersection with State Highway 73, then northerly on State Highway 73 to its intersection with State Highway 33, then westerly on State Highway 33 to its intersection with State Highway 22, then northerly on State Highway 22 to its intersection with State Highway 23, then northeasterly on State Highway 23 to its intersection with State Highway 49, then northerly on State Highway 49 to its intersection with State Highway 116, then easterly on State Highway 116 to State Highway 21, then easterly on State Highway 21 to the point of beginning.

In Illinois, 70-day seasons on geese may be selected by zones established for duck hunting seasons. The harvest of Canada geese is limited to 35,000, with 29,000 birds allocated to the Southern Illinois Zone (described in State regulations). The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese. The season on Canada geese may open at a later date in the Southern Illinois Zone and extend to January 20, 1980, or until the Zone's quota of 29,000 birds is reached, whichever occurs first.

In Michigan, in the:

(a) Counties of Baraga, Dickinson, Delta, Gogebic, Houghton, Iron, Keweenaw, Marquette, Menominee and Ontonagon—the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

(b) *Southeastern Canada Goose Management Area* (described in State regulations)—the Canada goose season will open with the duck season and extend through December 9. Through November 14, the daily bag limit will be 1 Canada goose and 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese. From November 15 through December 9, the daily bag limit will be 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

(c) *Remainder of the State*—the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each; the possession limit is 1 Canada goose and 2 white-fronted geese.

In Ohio, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each and the possession limit is 2 Canada and 2 white-fronted geese, except that in the counties of Ashland, Trumbull, Marion, Wyandot, Lucas, Ottawa, Erie, Sandusky, Mercer and

Auglaize, the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each.

In Indiana, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

In Kentucky, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese. In the Ballard County Zone (described in State regulations), the harvest of Canada geese is limited to 15,000.

In Tennessee, the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese, except in that portion of the State west of State Highway 13, where the daily bag and possession limits are 2 Canada geese. The season on Canada geese is closed in that portion of Tennessee bounded on the north by State Highways 20 and 104, and on the east by U.S. Highways 45W and 45.

In Alabama, the season is closed on all geese in the counties of Henry, Russell and Barbour. Elsewhere in Alabama, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

When it has been determined that the quota of Canada geese allotted to the Southern Illinois Zone, the Swan Lake Zone of Missouri, and the Ballard County Zone of Kentucky will have been filled, the season for taking Canada geese in the respective area will be closed by the Director upon giving public notice through local information media at least 48 hours in advance of the time and date of closing.

Geese taken in Illinois and Missouri and in the Kentucky counties of Ballard, Hickman, Fulton, and Carlisle may not be transported, shipped, or delivered for transportation or shipment by common carrier, the Postal Service, or by any person except as the personal baggage of the hunter taking the birds.

Central Flyway

Seasons on ducks (including mergansers) and coots may be selected between September 29, 1979, and January 20, 1980, inclusive, in Central Flyway States and portions of States.

The basic season may include no more than 60 days. Conventional limits on ducks (including mergansers), singly or in the aggregate, are 5 daily and 10 in possession. The aggregate daily bag limit on ducks (including mergansers) may include no more than 1 redhead or

1 canvasback (note areas closed to canvasback hunting), 1 female mallard, 1 hooded merganser, and 2 wood ducks. The possession limit may include no more than 1 redhead or 1 canvasback (note areas closed to canvasback hunting), 2 female mallards, 2 hooded mergansers, and 4 wood ducks. The daily bag and possession limits on coots are 15 and 30, respectively.

North Dakota—that portion lying east of State Highway 3, including all or portions of 27 counties.

South Dakota—all of Marshall County; that portion of Day County east of State Highway 25; that portion of Codington County south of State Highway 20 and west of U.S. Highway 81; that portion of Hamlin County west of U.S. Highway 81; and that portion of Kingsbury County east of State Highway 25 and north of U.S. Highway 14.

As an alternative to conventional bag and possession limits for ducks, point-system regulations may be selected for States and portions of States in this Flyway. The point system season length in the High Plains Mallard Management Unit is 83 days provided that the last 23 days of such season must begin on or after December 8, 1979. The High Plains Unit, roughly defined as that portion of the Central Flyway which lies west of the 100th meridian, shall be described in State regulations. The season length for the Low Plains Unit (those portions of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas not included in the High Plains Mallard Management Unit) may not exceed 60 days.

The point values for species and sexes taken in the Central Flyway are: canvasbacks count 100 points each (note areas closed to canvasback hunting); female mallards, Mexican-like ducks, wood ducks, redheads and hooded mergansers count 70 points each; blue-winged teal, green-winged teal, cinnamon teal, scaup, pintails, gadwalls, wigeon, shovellers, and mergansers (except the hooded merganser) count 10 points each; all other species and sexes of ducks count 20 points each. The daily bag limit is reached when the point value of the last bird taken, when added to the sum of the point values of other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under conventional limits.

Those portions of Colorado and Wyoming lying west of the Continental Divide, that portion of New Mexico

lying west of the Continental Divide plus the entire Jicarilla Apache Indian Reservation, and that portion of Montana which includes the counties of Hill, Chouteau, Cascade, Meagher, and Park and all counties west thereof, must select open seasons on waterfowl and coots in accordance with the framework for the Pacific Flyway.

States in this Flyway may select goose seasons between September 29, 1979, and January 20, 1980, inclusive.

Montana, Wyoming and Colorado may select, for the Central Flyway portions, seasons of 93 days, with daily bag and possession limits of 2 and 4 geese, respectively.

New Mexico (for the Central Flyway portion) and Texas (for that portion west of U.S. Highway 81) may select seasons of 93 days with a daily bag limit of 5 geese which may include no more than 2 dark (Canada and white-fronted) geese and a possession limit of 5 geese which may include no more than 4 dark geese.

North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas (for that portion east of U.S. Highway 81) may select seasons of 86 days for light (snow, including blue and Ross') geese and seasons of 72 days for dark (Canada and white-fronted) geese subject to the following:

Seasons for light and dark geese need not be concurrent.

The daily bag and possession limits may not exceed 5 geese during periods when such light and dark goose seasons may be concurrent.

The daily bag and possession limits may include no more than 5 light geese.

The daily bag limit may include no more than 2 dark geese and the possession limit may include no more than 4 dark geese subject to the following:

In North Dakota, the daily bag limit may include no more than 1 Canada goose and 1 white-fronted goose or 2 white-fronted geese. The possession limit may include no more than 2 Canada or 2 white-fronted geese or 1 of each. The season on dark geese may not extend beyond November 18, 1979.

In South Dakota, the daily bag limit may include no more than 1 Canada goose and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each. The season on dark geese may not extend beyond November 25, 1979, in the counties of Buffalo, Brule, Hughes, Hyde, Lyman, Potter, Stanley, and Sully.

In Nebraska, the season on dark geese may not extend beyond December 16, 1979. The daily bag limit may include no more than 1 Canada goose and 1 white-

fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each except that, in that portion of the State west of U.S. Highway 183, prior to November 19, the daily bag limit may include no more than 2 Canada geese and the possession limit no more than 4 Canada geese.

In Kansas, the season on dark geese may not extend beyond December 23, 1979. The daily bag limit may include no more than 1 Canada and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In the Oklahoma counties of Alfalfa, Bryan, Johnston, and Marshall, the State may select either:

(a) A season of 72 days with a daily bag limit of no more than 1 Canada goose and 1 white-fronted goose, and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

OR

(b) A season of 53 days (within the 72-day period selected for the remainder of the State) with a daily bag limit of no more than 2 Canada geese or 1 Canada goose and 1 white-fronted goose, and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In the remainder of Oklahoma, the daily bag limit may include no more than 2 Canada geese or 1 Canada goose and 1 white-fronted goose and the possession limit no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In that portion of Texas east of U.S. Highway 81, the daily bag limit may include no more than 1 Canada goose or 1 white-fronted goose and the possession limit no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

Colorado, Montana, New Mexico, Oklahoma, Texas, and Wyoming may select a sandhill crane season with daily bag and possession limits of 3 and 6, respectively, within a September 29, 1979-January 31, 1980, framework as follows:

(a) 37 consecutive days from September 29 through November 18, 1979, in the Central Flyway portion of Colorado except the San Luis Valley area, and in the Wyoming counties of Crook, Goshen, Laramie, Niobrara, Platte and Weston.

(b) 93 consecutive days between October 20, 1979, and January 31, 1980, in the New Mexico counties of Chaves, Curry, De Baca, Eddy, Lea, Quay, and Roosevelt, and in that portion of Texas west of a boundary from the Oklahoma border along U.S. Highway 287 to U.S.

Highway 87 at Dumas, along U.S. Highway 87 (including all of Howard and Lynn Counties) to U.S. Highway 277 at San Angelo, and along U.S. Highway 277 to the International Toll Bridge in Del Rio.

(c) 58 consecutive days on or after November 24, 1979, in that portion of Oklahoma west of U.S. Highway 81, and in that portion of Texas east of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, then along U.S. Highway 87 to San Angelo, and west of a line running north from San Angelo along U.S. Highway 277 to Abilene, along State Highway 351 to Albany, along U.S. Highway 283 to Vernon, and then along U.S. Highway 183 east to the Oklahoma border.

(d) 37 consecutive days, to open with the goose season, in all of the Central Flyway portion of Montana except Sheridan County and that area south and west of Interstate Highway 90 and the Big Horn River.

All persons hunting sandhill cranes in the above designated areas of the Central Flyway must obtain and possess valid Federal permits issued by the appropriate State conservation agency on an equitable basis without charge.

Emergency closures of hunting seasons will be considered whenever portions of either the Grays Lake or Aransas flocks of whooping cranes are found in areas where there is risk to their taking by hunters.

Pacific Flyway

Between September 29, 1979, and January 20, 1980, concurrent 93-day seasons on ducks, mergansers, coots, and gallinules may be selected in Pacific Flyway States and portions of States, except as subsequently noted. Basic daily bag and possession limits on ducks are 7 and 14, respectively.

No more than 2 redheads or 2 canvasbacks or 1 of each may be taken daily and no more than 4 singly or in the aggregate may be possessed.

The daily bag and possession limits on mergansers are 5 and 10, respectively, of which no more than 1 daily and 2 in possession may be hooded mergansers.

The daily bag and possession limits on coots and gallinules are 25 singly or in the aggregate.

Waterfowl season dates for the Colorado River Zone of California must coincide with season dates selected by Arizona for waterfowl. Waterfowl season dates for the Northeastern Zone of California must coincide with season dates selected by Oregon for waterfowl, except that the season on geese may differ according to prescribed options

described later. For the Southern Zone of California (as described in Title 14 California Fish and Game Code, Section 502), the State may designate season dates differing from those in the remainder of the State.

For Nevada, county of Clark, the State may designate season dates for waterfowl differing from those in the remainder of the State.

In the Idaho counties of Ada, Bannock, Benewah, Blaine, Bonner, Boundary, Camas, Canyon, Cassia, Elmore, Gem, Gooding, Jerome, Kootenai, Latah, Lewis, Lincoln, Minidoka, Nez Perce, Owyhee, Payette, Power, Shoshone, Twin Falls, Washington, and that portion of Bingham County lying outside the Blackfoot Reservoir drainage; the Oregon counties of Baker, Gilliam, Malheur, Morrow, Sherman, Umatilla, Union, Wallowa, and Wasco; and in Washington all areas lying east of the summit of the Cascade Mountains and east of the Big White Salmon River in Klickitat County (all formerly identified as the Columbia Basin Area for ducks), between September 29, 1979, and January 20, 1980, the season lengths for ducks, mergansers, coots and gallinules may be 100 days with all seasons to run concurrently.

Between September 29, 1979, and January 20, 1980, 93-day seasons on geese may be selected in States or portions of States in this Flyway, except as subsequently noted. The basic daily bag and possession limits are 6, provided, that the daily bag limit includes no more than 3 white geese (snow, including blue, and Ross' geese) and 3 dark geese (Canada and white-fronted geese); the daily bag and possession limits are proportionately reduced in those areas where special restrictions apply to Canada geese. In Washington and Idaho, the daily bag and possession limits are 3 and 6 geese, respectively.

The season is closed on the Aleutian Canada goose.

Three areas in California, described as follows, are restricted to the hunting of dark geese (Canada and white-fronted geese) in order to protect the Aleutian Canada goose for which no hunting is allowed and to temporarily reduce harvests on white-fronted geese and cackling Canada geese:

(1) In the counties of Del Norte and Humboldt there will be no open season on dark geese during the 1979-80 waterfowl hunting season.

(2) In the Sacramento Valley in the area described as follows: beginning at Willows in Glenn County proceeding south on Interstate Highway 5 to the junction with Hahn Road north of

Arbuckle in Colusa County; then easterly on Hahn Road and the Grimes-Arbuckle Road to Grimes on the Sacramento River; then south on the Sacramento River to the Tisdale By-pass; then easterly on the Tisdale By-pass to where it meets O'Banion Road; then easterly on O'Banion Road to State Highway 99; then northerly on State Highway 99 to its junction with the Gridley-Colusa Highway in Gridley in Butte County; then westerly on the Gridley-Colusa Highway to its junction with the River Road; then northerly on the River Road to the Princeton Ferry; then westerly across the Sacramento River to State Highway 45; then northerly on State Highway 45 to its junction with State Highway 162; then continuing northerly on State Highway 45-162 to Glenn; then westerly on State Highway 162 to the point of beginning in Willows; the hunting season for taking dark geese will not open until December 15, 1979, and will then continue to the end of the 1979-80 waterfowl hunting season.

(3) In the San Joaquin Valley in the area described as follows: beginning at Modesto in Stanislaus County proceeding west on State Highway 132 to the junction of Interstate 5; then southerly on Interstate 5 to the junction of State Highway 152 in Merced County; then easterly on State Highway 152 to the junction of State Highway 59; then northerly on State Highway 59 to the junction of State Highway 99 at Merced; then northerly and westerly to the point of beginning; the hunting season for taking dark geese will close on November 23, 1979.

Emergency closures may be invoked for all Canada geese should Aleutian Canada goose distribution patterns or other circumstances justify such actions.

In the Washington counties of Adams, Benton, Douglas, Franklin, Grant, Kittitas, Klickitat, Lincoln, Walla Walla, and Yakima, and in the Oregon counties of Gilliam, Morrow, Sherman, Umatilla, Union, Wallowa, and Wasco, the goose season may be of 100 days duration and must run concurrently with the duck season; and the bag limits for geese are to be the same as in the general goose season in their respective States.

Oregon, for Lake and Klamath Counties, and California, for the Northeastern Zone and the Balance-of-the-State Zone, may select frameworks for season and limits among the following listed seven options. The selected season must occur within that selected for ducks.

For Lake and Klamath Counties, Oregon, and the Northeastern Zone of California:

Option 1. A season of not more than 79 days between November 3, 1979, and January 20, 1980, with a basic goose bag of 6 per day and 6 in possession of which not more than 3 dark and 3 white geese may be in the daily bag.

Option 2. A season of not more than 86 days between October 27, 1979, and January 20, 1980, with a basic goose bag of 4 per day and 4 in possession, of which not more than 2 dark and 2 white geese may be in the daily bag.

Option 3. A season of 93 days between September 29, 1979, and January 20, 1980, with a basic goose bag of 2 per day and 2 in possession of which not more than 1 dark and 1 white goose may be in the daily bag.

For the Balance-of-the-State Zone in California:

Option 4. A season of not more than 88 days between September 29, 1979, and December 25, 1979, with a basic goose bag of 6 per day and 6 in possession of which not more than 3 dark and 3 white geese may be in the daily bag.

Option 5. A season of not more than 93 days between September 29, 1979, and January 1, 1980, with a basic goose bag of 4 per day and 4 in possession of which not more than 2 dark and 2 white geese may be in the daily bag.

Option 6. A season of not more than 93 days between September 29, 1979, and January 20, 1980, with a basic goose bag of 2 per day and 2 in possession of which not more than 1 dark and 1 white goose may be in the daily bag.

For Lake and Klamath Counties, Oregon (only):

Option 7. A season of not more than 93 days between September 29, 1979, and January 20, 1980, with a goose limit the same as that of Option #3, except that any time beginning or after October 27, 1979, the goose limit of Option #1 may be adopted.

In that portion of Idaho lying west of the line formed by U.S. Highway 93 north from the Nevada border to Shoshone, thence northerly on Idaho State Highway 75 (formerly U.S. Highway 93) to Challis, thence northerly on U.S. Highway 93 to the Montana border (except Boundary, Bonner, Kootenai, Benewah, Shoshone, Latah, Nez Perce, Lewis, Clearwater and Idaho Counties); in the Oregon counties of Baker and Malheur; and in that portion of Montana and Wyoming in the Pacific Flyway, the daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond January 1, 1979.

In that portion of Idaho lying east of the line formed by U.S. Highway 93 north from the Nevada border to Shoshone, thence northerly on Idaho

State Highway 75 (formerly U.S. Highway 93) to Challis, thence northerly on U.S. Highway 93 to the Montana border; in that portion of Colorado in the Pacific Flyway; and in Utah except Washington County, the daily bag and possession limits are 2 Canada geese, and the season on Canada geese may be no more than 72 days and may not extend beyond December 23, 1979.

For Nevada the State may experimentally designate season dates on geese in Clark County and on geese in Elko County and that portion of White Pine County within Ruby Lakes National Wildlife Refuge differing from those in the remainder of the State. The daily bag and possession limits are 2 Canada geese throughout the State.

In Arizona, except in the counties of Mohave and Yuma; in that portion of New Mexico in the Pacific Flyway; in Clark County, Nevada; in Washington County, Utah; and in the Southern Zone, except that portion in California Department of Fish and Game District 22, of California, the season on Canada geese may be no more than 72 days. The daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond January 20, 1980.

In California, the balance of California Fish and Game District 22 in the Southern Zone (that portion of District 22 lying outside the Colorado River Zone), the daily bag limit is 1 Canada goose with 2 in possession and the season on Canada geese may be no more than 72 days and may not extend beyond January 6, 1980.

In the Arizona counties of Mohave and Yuma and in the Colorado River Zone of California, the seasons on Canada geese may be no more than 72 days and may not extend beyond January 6, 1980. The daily bag and possession limits on Canada geese are 2 and 2, respectively, in these areas. The season on geese in the Colorado River Zone of California must be the same as that selected by Arizona.

In the Washington counties of Island, Skagit, Snohomish, and Whatcom, the seasons on snow geese may not extend beyond January 1, 1980; and the daily bag and possession limits on snow geese are 2 and 4, respectively.

Between October 20, 1979, and February 20, 1980, States in this Flyway may select an open season on brant of 93 days with daily bag and possession limits of 4 and 8 brant, respectively.

In Utah, Nevada and Montana, an open season for taking a limited number of whistling swans may be selected subject to the following conditions: (a) the season must run concurrently with the duck season; (b) in Utah, no more

than 2,500 permits may be issued, authorizing each permittee to take 1 whistling swan; (c) in Nevada, no more than 500 permits may be issued, authorizing each permittee to take 1 whistling swan in Churchill County; (d) in Montana, no more than 500 permits may be issued authorizing each permittee to take 1 whistling swan in Teton County; (e) permits and correspondingly numbered metal locking seals must be issued by the appropriate State conservation agency on an equitable basis without charge.

For all States entirely in the Pacific Flyway, open seasons on common snipe must coincide with the duck season locally in effect. For other States partially within the Pacific Flyway seasons between September 1, 1979, and February 28, 1980, and not to exceed 93 days, may be selected. The daily bag and possession limits are 8 and 16, respectively. Any State may split its snipe season without penalty.

Special Falconry Frameworks

Falconry is a permitted means of taking migratory game birds in any State.

Any State listed in 50 CFR 21.29(k) as meeting Federal Falconry Standards may select an extended season for taking migratory game birds in accordance with the following:

1. Seasons must fall within the regular season framework dates and, if offered, other special season framework dates for hunting.

2. Season lengths for all permitted methods of hunting within a given area may not exceed 107 days for any species.

3. Hunting hours shall not exceed ½ hour before sunrise to sunset.

4. Falconry daily bag and possession limits for all permitted migratory game birds shall not exceed 3 and 8 birds, respectively, singly or in the aggregate, during both regular hunting seasons and extended falconry seasons.

5. Each State selecting extended seasons shall report to the Service the results of the special falconry season by March 15, 1980.

6. Each State selecting the special season must inform the Service of the season dates and publish said regulations.

General hunting regulations, including seasons, hours, and limits, apply to falconry in each State listed in 50 CFR 21.29(k) which does not select an extended falconry season.

Dated: August 23, 1979.

Lynn A. Greenwalt,
Director, U.S. Fish and Wildlife Service.

Department of Labor

**Office of the Assistant Secretary for
Labor-Management Relations**

**Standards of Conduct for Labor
Organizations in the Federal Sector**

DEPARTMENT OF LABOR

Office of the Assistant Secretary for Labor-Management Relations

[29 CFR Chapter II]

Standards of Conduct for Labor Organizations in the Federal Sector

AGENCY: Office of the Assistant Secretary for Labor-Management Relations, Department of Labor.

ACTION: Notice of Proposed Regulations.

SUMMARY: The proposed regulations, Parts 207-209 of Title 29 of the Code of Federal Regulations, implement section 7120 of the Civil Service Reform Act of 1978. Section 7120 sets forth standards of conduct for labor organizations in the Federal sector and supersedes the standards of conduct provisions of section 18 of Executive Order 11491, as amended.

The proposed Parts 207-209 adopt with few revisions the portions of the regulations issued under the Executive Order in Parts 201-206 which relate to standards of conduct matters. These portions of Parts 201-206 remain in effect until the adoption of final regulations by the Assistant Secretary implementing section 7120 of the Civil Service Reform Act. The portions of Parts 201-206 which relate to matters other than standards of conduct will remain in effect to the extent that they are incorporated in regulations issued by the Federal Labor Relations Authority, the General Counsel of the Authority, and the Federal Service Impasses Panel implementing the other provisions of Title VIII of the Act.

DATE: Written comments on the proposed regulations must be received on or before October 29, 1979.

ADDRESS: Written comments should be submitted to the Assistant Secretary for Labor-Management Relations, Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Herbert Raskin, (202) 523-7373.

SUPPLEMENTARY INFORMATION: The Federal labor-management relations program of Executive Order 11491, as amended, has been replaced by the statutory program set forth in Title VII of the Civil Service Reform Act of 1978. Under section 7120 of the Act, the Assistant Secretary for Labor-Management Relations retains the responsibility for administering the standards of conduct requirements for labor organizations in the Federal sector previously set forth in section 18 of the Executive Order. The responsibility for

administering other areas of the Federal labor-management relations program (which under the Executive Order were assigned to the Assistant Secretary) have been delegated to the Federal Labor Relations Authority (the Authority), the General Counsel of the Authority, and the Federal Service Impasses Panel (the Panel), agencies which are independent of the Department of Labor.

Under the Executive Order, the Assistant Secretary issued implementing regulations in Parts 201-206 of Title 29 of the Code of Federal Regulations (CFR). The portions of these regulations which relate to the standards of conduct are proposed to be transferred with a few revisions to new Parts 207-209 and remain in effect until the adoption of final regulations by the Assistant Secretary. The portions of Parts 201-206 which relate to matters other than standards of conduct remain in effect to the extent that they are incorporated into the transition rules and regulations of the Authority and the Panel published in the Federal Register of January 2, 1979 (44 FR 5) and 5 CFR Chapter XIV, Part 2400 et. seq. (revised as of July 1, 1979).

The regulations proposed by the Assistant Secretary in Parts 207-209 incorporate with few changes the standards of conduct provisions of the current regulations. In particular, the proposed Part 207 contains definitions and essentially tracks the present Part 201. The proposed Part 208 contains substantive and enforcement provisions and essentially tracks the present Part 204. The proposed Part 209 contains miscellaneous provisions and essentially tracks the present Part 206.

Most of the changes made by the proposed Parts 207-209 are editorial in nature and are necessary in order to eliminate provisions which do not relate to standards of conduct matters, reflect changes in the titles of U.S. Government personnel and agencies, and change references from the Executive Order to the Act. The other changes which are set forth in detail below expand upon the procedures followed in implementing the standards of conduct requirements, extend the time limits with regard to certain enforcement procedures, renumber and consolidate various sections, and make a few other miscellaneous changes. A few revisions were also made in order to ensure that the regulations clearly conform generally to the principles applied to labor organizations in the private sector under the Labor-Management Reporting and Disclosure Act of 1959, as Amended. The primary changes are as follows:

1. The proposed § 208.64 is identical to § 204.64 except that a new subsection (c) has been added to provide for a request for a review by the Assistant Secretary when a complaint of a union officer election is dismissed by the Director of the Office of Labor-Management Standards Enforcement (LMSE). The review is limited to determining whether the dismissal was arbitrary and capricious.

2. Section 208.65 is identical to § 204.65 except that a new subsection (c) has been added to provide for certification to the Assistant Secretary of the results of a union officer election which was supervised pursuant to his order.

3. Section 208.66 is identical to section 204.66 except that a new provision has been added to clarify that a failure to abide by all the terms of a voluntary compliance agreement may result in either the filing of a complaint with the Chief Administrative Law Judge of the Department of Labor for a hearing or referral to the Assistant Secretary for other appropriate action.

4. Section 208.70 is identical to § 204.68 except that a provision has been added to clarify the jurisdiction of the Assistant Secretary in certain cases. Under that provision, when an agreement to take remedial action is reached after a complaint has been filed with the Chief Administrative Law Judge of the Department and the agreement has been approved by the Administrative Law Judge assigned to the case, the matter will be referred to the Assistant Secretary for the issuance of an order.

5. Section 208.91 is identical to § 204.91 except that a provision has been added whereby the Assistant Secretary may, in all standards of conduct matters, adopt without discussion the recommended decision and order of the Administrative Law Judge if timely and proper exceptions have not been filed. Under the current regulations set forth in §§ 203.26 and 204.91, the Assistant Secretary may adopt without discussion the recommended decision and order of the Administrative Law Judge only with regard to violations of the provisions concerning prohibited discipline and members' bill of rights.

6. Section 208.92 is identical to § 204.92 except for a change in the last sentence whereby the Assistant Secretary, when he finds that the remedial action he has ordered has not been taken shall refer the matter to the Federal Labor Relations Authority for appropriate action.

The proposed regulations also make a number of miscellaneous changes in procedures as follows:

1. Section 208.60 provides that when a Regional Administrator of the Labor-Management Services Administration finds that there is a reasonable basis for a complaint concerning an alleged violation of the provisions concerning members' bill of rights or prohibited discipline, he shall refer the matter to the Chief Administrative Law Judge of the Department of Labor for the issuance of a notice of hearing. Currently, under § 204.60 the Regional Administrator shall himself issue the notice of hearing. Accordingly, the provisions of section 208.61 are unnecessary and are proposed to be deleted.

2. Section 208.90(b) provides that a party may file within ten days answering briefs to exceptions taken to the recommended decision and order of an Administrative Law Judge. Presently, under § 204.90(b) answering briefs may only be filed at the discretion of the Assistant Secretary.

3. The time periods during which a party may take certain actions with regard to the enforcement of alleged violations of the standards of conduct has been extended. The current time periods of five, seven and ten days are proposed to be extended to seven, ten and fifteen days, respectively. These extensions are contained in the following proposed sections: §§ 208.59, 208.66, 208.69, 208.72, 208.82, 208.86, 208.87, and 208.88.

4. The requirement that a party to an enforcement proceeding file multiple copies of various documents has been eliminated in the following proposed sections: §§ 208.72, 208.82, 208.86 and 208.88.

5. Two provisions of the current Part 206 have been placed in the proposed Part 208 rather than the proposed Part 209. Section 206.6 is proposed to be renumbered as § 208.61 and § 206.7(g) is proposed to be renumbered as § 208.72(c).

The proposed regulations also eliminate the portions of the current regulations which do not pertain to standards of conduct or which are otherwise unnecessary or repetitious. The eliminated portions include the definitions of certain terms in Part 201, all of Parts 202, 203 and 205, and the following provisions of Part 206 ("Miscellaneous"): §§ 206.3(b), 206.4(c), 206.5 through 206.8, and 206.10.

Finally, the proposed regulations consolidate the two sets of hearing procedures contained in the current regulations into one set applicable to all standards of conduct matters. Under the

current regulations, there is one set of hearing procedures in Part 203 for alleged violations of the bill of rights and prohibited discipline requirements and another set in Part 204 for alleged violations of other standards of conduct requirements. Since the two sets of hearing procedures are virtually identical, the proposed regulations adopt the hearing procedures contained in Part 204 with a few necessary modifications based upon the procedures contained in Part 203.

Under the authority of sections 7120 and 7134 of the Civil Service Reform Act of 1978, — Stat. —, — U.S.C. —, the Assistant Secretary for Labor-Management Relations hereby proposes to withdraw Parts 201 through 206 of Title 29 of the Code of Federal Regulations and issue Parts 207 through 209 to read as follows:

PART 207—GENERAL

Subpart A—Purpose and Scope

- Sec.
207.1 Purpose and Scope.
207.10 Act; LMRDA.
207.11 Agency, employee, labor organization, dues.
207.12 Authority.
207.13 Assistant Secretary
207.14 Standards of conduct for labor organizations.
207.15 Regional Administrator
207.16 Area Administrator
207.17 Director.
207.18 Administrative Law Judge.
207.19 Chief Administrative Law Judge.
207.20 Party.
207.21 Intervenor.
Authority: Secs. 7120, 7134 of the Civil Service Reform Act of 1978 (— Stat. —, — U.S.C. —).

Subpart A—Purpose and Scope

§ 207.1 Purpose and scope.

The regulations contained in this chapter are issued pursuant to section 7134 of the Civil Service Reform Act of 1978 and are designed to implement the provisions of section 7120 of that Act. They prescribe procedures and basic principles which the Assistant Secretary of Labor will utilize in effectuating the standards of conduct required of labor organizations composed of federal government employees, in accordance with section 7120 of the Act. (Regulations implementing the other provisions of Title VII of the Civil Service Reform Act are issued by the Federal Labor Relations Authority, the General Counsel of the Federal Labor Relations Authority, and the Federal Service Impasses Panel in Title 5 of the Code of Federal Regulations.)

Subpart B—Meaning of Terms as Used in This Chapter

§ 207.10 Act; LMRDA.

"Act" means the Civil Service Reform Act of 1978; "LMRDA" means the Labor-Management Reporting and Disclosure Act of 1959, As Amended.

§ 207.11 Agency, employee, labor organization, dues.

"Agency," "employees," "labor organization," and "dues" have the meanings set forth in section 7103 of the Act.

§ 207.12 Authority.

"Authority" means the Federal Labor Relations Authority as described in sections 7104 and 7105 of the Act.

§ 207.13 Assistant Secretary.

"Assistant Secretary" means the Assistant Secretary of Labor for Labor-Management Relations.

§ 207.14 Standards of conduct for labor organizations.

"Standards of conduct for labor organizations" shall have the meaning as set forth in section 7120 of the Act as amplified in Part 208 of this chapter.

§ 207.15 Regional Administrator.

"Regional Administrator" means the Administrator of a region of the Labor-Management Services Administration, with geographical boundaries as fixed by the Assistant Secretary.

§ 207.16 Area Administrator.

"Area Administrator" means the Administrator of an area office within a region of the Labor-Management Services Administration, with geographical boundaries as fixed by the Assistant Secretary.

§ 207.17 Director.

"Director" means the Director of the Office of Labor-Management Standards Enforcement with the Labor-Management Services Administration of the Department of Labor.

§ 207.18 Administrative Law Judge.

"Administrative Law Judge" means the Chief Administrative Law Judge or any Administrative Law Judge designated by the Chief Administrative Law Judge to conduct a hearing in cases under section 7120 of the Act, as interpreted by Part 208 of this chapter, and such other matters as may be assigned.

§ 207.19 Chief Administrative Law Judge.

"Chief Administrative Law Judge" means the Chief Administrative Law Judge, U.S. Department of Labor, Washington, D.C. 20210.

§ 207.20 Party.

"Party" means any person, employee, group of employees, labor organization, activity or agency: (a) filing a complaint petition, request, or application; (b) named in a complaint, petition, request, or application; or (c) whose intervention in a proceeding has been permitted or directed by the Assistant Secretary, Chief Administrative Law Judge, or Administrative Law Judge, as the case may be.

§ 207.21 Intervenor.

"Intervenor" means a party in a proceeding whose intervention has been permitted or directed by the Assistant Secretary, Chief Administrative Law Judge, or Administrative Law Judge, as the case may be.

PART 208—STANDARDS OF CONDUCT**Subpart A—Substantive Requirements Concerning Standards of Conduct**

- Sec.
- 208.1 General.
- 208.2 Bill of Rights of members of Labor organizations.
- 208.3 Application of LMRDA labor organization reporting requirements.
- Trusteeships**
- 208.26 Purposes for which a trusteeship may be established.
- 208.27 Prohibited acts relating to subordinate body under trusteeship.
- 208.28 Presumption of validity.
- Elections**
- 208.29 Election of officers.
- Additional Provisions Applicable**
- 208.30 Removal of elected officers.
- 208.31 Maintenance of fiscal integrity in the conduct of the affairs of labor organizations.
- 208.32 Provision for accounting and financial controls.
- 208.33 Prohibition of conflicts of interest.
- 208.34 Loans to officers or employees.
- 208.35 Bonding requirements.
- 208.36 Prohibitions against certain persons holding office or employment.
- 208.37 Prohibition of certain discipline.
- 208.38 Deprivation of rights under the Act by violence or threat of violence.

Subpart B—Proceedings for Enforcing Standards of Conduct**General**

- 208.50 Investigations.
- 208.51 Inspection of records and questioning.
- 208.52 Report of investigation.
- 208.53 Filing of complaints.

Procedures Involving Bill of Rights or Prohibited Discipline

- 208.54 Complaints alleging violations of § 208.2, Bill of Rights of members of labor organizations or § 208.37, prohibition of certain discipline.

- Sec.
- 208.55 Content of complaint.
- 208.56 Service on respondent.
- 208.57 Additional information and report.
- 208.58 Dismissal of complaint.
- 208.59 Review of dismissal.
- 208.60 Actionable complaint.
- 208.61 Transfer and consolidation of cases.
- 208.62 Hearing procedures.

Procedures Involving Election of Officers

- 208.63 Complaints alleging violations of § 208.29, election of officers.
- 208.64 Investigations; dismissal of complaint.
- 208.65 Procedures following actionable complaint.

Procedures Involving Matters Other Than Bill of Rights and Prohibited Discipline

- 208.66 Procedures for institution of enforcement proceedings.
- 208.67 Standards complaint; initiation of proceedings.
- 208.68 Answer.

Subpart C—Hearing and Related Matters

- 208.69 Notice of hearing.
- 208.70 Administrative Law Judge.
- 208.71 Procedure upon admission of facts.
- 208.72 Motions and requests.
- 208.73 Prehearing conferences.
- 208.74 Conduct of hearing.
- 208.75 Intervention.
- 208.76 Duties and powers of the Administrative Law Judge.
- 208.77 Rights of parties.
- 208.78 Rules of evidence.
- 208.79 Burden of proof.
- 208.80 Unavailability of Administrative Law Judges.
- 208.81 Objection to conduct of hearing.
- 208.82 Motions after a hearing.
- 208.83 Waiver of objections.
- 208.84 Oral argument at the hearing.
- 208.85 Transcript.
- 208.86 Filing of brief.
- 208.87 Proposed findings and conclusions.
- 208.88 Submission of the Administrative Law Judge's recommended decision and order to the Assistant Secretary; exceptions.
- 208.89 Contents of exceptions to Administrative Law Judge's recommended decision and order.
- 208.90 Briefs in support of exceptions.
- 208.91 Action by the Assistant Secretary.
- 208.92 Compliance with decisions and orders of the Assistant Secretary.
- 208.93 Stay of remedial action.
- Authority: Secs. 7105, 7111, 7120, 7134 of the Civil Service Reform Act of 1978 (— Stat. —, — U.S.C. —).

Subpart A—Substantive Requirements Concerning Standards of Conduct**§ 208.1 General.**

The term "LMRDA" means the Labor-Management Reporting and Disclosure Act of 1959, as amended (29 U.S.C. 401 et seq.). Unless otherwise provided in this part or in the order, any term in any section of the LMRDA, which is incorporated into this part by reference and any term in this part which is also

used in the LMRDA, shall have the meaning which that term has under the LMRDA, unless the context in which it is used indicates that such meaning is not applicable. In applying the standards contained in this subpart the Assistant Secretary will be guided by the interpretations and policies followed by the Department of Labor in applying the provisions of the LMRDA and by applicable court decisions.

§ 208.2 Bill of rights of members of labor organizations.

(a)(1) *Equal rights.* Every member of a labor organization shall have equal rights and privileges within such organization to nominate candidates, to vote in elections or referendums of the labor organization, to attend membership meetings and to participate in the deliberations and voting upon the business of such meetings, subject of reasonable rules and regulations in such organization's constitution and bylaws.

(2) *Freedom of speech and assembly.* Every member of any labor organization shall have the right to meet and assemble freely with other members; and to express any views, arguments or opinions; and to express at meetings of the labor organization his views, upon candidates in an election of the labor organization or upon any business properly before the meeting, subject to the organization's established and reasonable rules pertaining to the conduct of meetings: *Provided*, That nothing herein shall be construed to impair the right of a labor organization to adopt and enforce reasonable rules as to the responsibility of every member toward the organization as an institution and to his refraining from conduct that would interfere with its performance of its legal or contractual obligations.

(3) *Dues, initiation fees, and assessments.* Except in the case of a federation of national or international labor organizations, the rates of dues and initiation fees payable by members of any labor organization in effect on the date this section is published shall not be increased, and no general or special assessment shall be levied upon such members, except—

(i) In the case of a local organization, (a) by majority vote by secret ballot of the members in good standing voting at a general or special membership meeting, after reasonable notice of the intention to vote upon such question, or (b) by majority vote of the members in good standing voting in a membership referendum conducted by secret ballot; or

(ii) in the case of a labor organization, other than a local labor organization or a federation of national or international

labor organizations, (A) by majority vote of the delegates voting at a regular convention, or at a special convention of such labor organization held upon not less than 30 days written notice to the principal office of each local or constituent labor organization entitled to such notice, or (B) by majority vote of the members in good standing of such labor organization voting in a membership referendum conducted by secret ballot, or (C) by majority vote of the members of the executive board or similar governing body of such labor organization, pursuant to express authority contained in the constitution and bylaws of such labor organization: *Provided*, That such action on the part of the executive board or similar governing body shall be effective only until the next regular convention of such labor organization.

(4) *Protection of the right to sue.* No labor organization shall limit the right of any member thereof to institute an action in any court, or in a proceeding before any administrative agency, irrespective of whether or not the labor organization or its officers are named as defendants or respondents in such action or proceedings, or the right of any member of a labor organization to appear as a witness in any judicial, administrative, or legislative proceeding, or to petition any legislature or to communicate with any legislator: *Provided*, That any such member may be required to exhaust reasonable hearing procedures (but not to exceed a 4-month lapse of time) within such organization, before instituting legal or administrative proceedings against such organizations or any officer thereof.

(5) *Safeguards against improper disciplinary action.* (a) No member of any labor organization may be fined, suspended expelled, or otherwise disciplined, except for nonpayment of dues by such organization or by any officer thereof unless such member has been (i) served with written specific charges; (ii) given a reasonable time to prepare his defense; (iii) afforded a full and fair hearing.

(b) Any provision of the constitution and bylaws of any labor organization which is inconsistent with the provisions of this section shall not be a defense to any proceeding instituted against the labor organization under this part of under the Act.

(c) Nothing contained in this section shall limit the rights and remedies of any member of a labor organization under any State or Federal law or before any court or other tribunal, or under the constitution and bylaws of any labor organization.

(d) It shall be the duty of the secretary or corresponding principal officer of each labor organization, in the case of a local labor organization, to forward a copy of each agreement made by such labor organization with any activity or agency to any employee who requests such a copy and whose rights as such employee are directly affected by such agreement, and in the case of a labor organization other than a local labor organization, to forward a copy of any such agreement to each constituent unit which has members directly affected by such agreement; and such officer shall maintain at the principal office of the labor organization of which he is an officer, copies of any such agreement made or received by such labor organization, which copies shall be available for inspection by any member or by any employee whose rights are affected by such agreement. An employee's rights under this paragraph shall be enforceable in the same manner as the rights of a member.

§ 208.3 Application of LMRDA labor organization reporting requirements.

The reporting provisions of Parts 402, 403, and 408 of Chapter IV of this title shall apply to labor organizations subject to the requirements of the Civil Service Reform Act of 1978.

Trusteeships**§ 208.26 Purposes for which a trusteeship may be established.**

Trusteeships shall be established and administered by a labor organization over a subordinate body only in accordance with the constitution and bylaws of the organization which has assumed trusteeship over the subordinate body and for the purpose of (a) correcting corruption or financial malpractice, (b) assuring the performance of negotiated agreements or other duties of a representative of employees, (c) restoring democratic procedures, or (d) otherwise carrying out the legitimate objects of such labor organization.

§ 208.27 Prohibited acts relating to subordinate body under trusteeship.

During any period when a subordinate body of a labor organization is in trusteeship, (a) the votes of delegates or other representatives from such body in any convention or election of officers of the labor organization shall not be counted unless the representatives have been chosen by secret ballot in an election in which all the members in good standing of such subordinate body were eligible to participate; and (b) no current receipts or other funds of the subordinate body except the normal per

capita tax and assessments payable by subordinate bodies not in trusteeship shall be transferred directly or indirectly to the labor organization which has imposed the trusteeship; *Provided, however*, That nothing contained in this section shall prevent the distribution of the assets of a labor organization in accordance with its constitution and bylaws upon the bona fide dissolution thereof.

208.28 Presumption of validity.

In any proceeding involving § 208.26, a trusteeship established by a labor organization in conformity with the procedural requirements of its constitution and bylaws and authorized or ratified after a fair hearing either before the executive trusteeship established by a labor organization board or before such other body as may be provided in accordance with its constitution and bylaws shall be presumed valid for a period of 18 months from the date of its establishment and shall not be subject to attack during such period except upon clear and convincing proof that the trusteeship was not established or maintained in good faith for purposes allowable under § 208.26. After the expiration of 18 months the trusteeship shall be presumed invalid in any such proceeding, unless the labor organization shall show by clear and convincing proof that the continuation of the trusteeship is necessary for a purpose allowable under § 208.26.

Elections**§ 208.29 Election of officers.**

Every labor organization subject to the order shall conduct periodic elections of officers in a fair and democratic manner. All elections of officers shall be governed by the standards prescribed in sections 401 (a), (b), (c), (d), (e), (f) and (g) of the LMRDA to the extent that such standards are relevant to elections held pursuant to the provisions of section 7120 of the Act.

Additional Provisions Applicable**§ 208.30 Removal of elected officers.**

When an elected officer of a local labor organization is charged with serious misconduct and the constitution and bylaws of such organization do not provide an adequate procedure meeting the standards of § 417.2(e) of this title for removal of such officer, the labor organization shall follow a procedure which meets those standards. A labor organization which has adequate procedures in its constitution and bylaws shall follow those procedures.

§ 208.31 Maintenance of fiscal integrity in the conduct of the affairs of labor organizations.

The standards of fiduciary responsibility prescribed in section 501(a) of the LMRDA are incorporated into this subpart by reference and made a part hereof.

§ 208.32 Provision for accounting and financial controls.

Every labor organization shall provide accounting and financial controls necessary to assure the maintenance of fiscal integrity.

§ 208.33 Prohibition of conflicts of interest.

(a) No officer or agent of a labor organization shall, directly or indirectly through his spouse, minor child, or otherwise (1) have or acquire any pecuniary or personal interest which would conflict with his fiduciary obligation to such labor organization, or (2) engage in any business or financial transaction which conflicts with his fiduciary obligation.

(b) Actions prohibited by paragraph (a) of this section include, but are not limited to, buying from, selling, or leasing directly or indirectly to, or otherwise dealing with the labor organization, its affiliates, subsidiaries, or trusts in which the labor organization is interested, or having an interest in a business any part of which consists of such dealings, except bona fide investments of the kind exempted from reporting under section 202(b) of the LMRDA. The receipt of salaries and reimbursed expenses for services actually performed or expenses actually incurred in carrying out the duties of the officer or agent is not prohibited.

§ 208.34 Loans to officers or employees.

No labor organization shall directly or indirectly make any loan to any officer or employee of such organization which results in a total indebtedness on the part of such officer or employee to the labor organization in excess of \$2,000.

§ 208.35 Bonding requirements.

Every officer, agent, shop steward, or other representative or employee of any labor organization subject to the order (other than a labor organization whose property and annual financial receipts do not exceed \$5,000 in value), or of a trust in which a labor organization is interested, who handles funds or other property thereof shall be bonded in accordance with the principles of section 502(a) of the LMRDA. In enforcing this requirement the Assistant Secretary will be guided by the interpretations and policies followed by the Department of Labor in applying the

provisions of section 502(a) of the LMRDA.

§ 208.36 Prohibitions against certain persons holding office or employment.

The prohibitions against holding office or employment in a labor organization contained in section 504(a) of the LMRDA are incorporated into this subpart by reference and made a part hereof. The prohibitions shall also be applicable to any person who has been convicted of, or who has served any part of a prison term resulting from his conviction of, violating 18 U.S.C. 1001 by making a false statement in any report required to be filed pursuant to this subpart, or who has been determined by the Assistant Secretary after an appropriate proceeding pursuant to §§ 208.66 through 208.92 to have willfully violated § 208.27: *Provided, however*, That the duties and responsibilities of the Parole Commission of the U.S. Department of Justice under section 504(a) of the LMRDA shall be assumed under this section by the Assistant Secretary or such other person as he may designate for the purpose of determining whether it would not be contrary to the Act and this section to permit a person barred from holding office or employment to hold such office or employment.

§ 208.37 Prohibition of certain discipline.

No labor organization or any officer, agent, shop steward, or other representative or any employee thereof shall fine, suspend, expel, or otherwise discipline any of its members for exercising any right to which he is entitled under the provisions of the Act or this chapter.

§ 208.38 Deprivation of rights under the Act by violence or threat of violence.

No labor organization or any officer, agent, shop steward, or other representative or any employee thereof shall use, conspire to use, or threaten to use force or violence to restrain, coerce, or intimidate, or attempt to restrain, coerce, or intimidate any member of a labor organization for the purpose of interfering with or preventing the exercise of any right to which he is entitled under the provisions of the Act or of this chapter.

Subpart B—Proceedings for Enforcing Standards of Conduct

General

§ 208.50 Investigations.

When he believes it necessary in order to determine whether any person has violated or is about to violate any provisions of this part (other than

§ 208.2 Bill of Rights of members of labor organizations or § 208.37, Prohibition of certain discipline) the Director shall have the authority to cause an investigation to be conducted. The authority to investigate possible violations of this part (other than §§ 208.2 or 208.37) shall not be contingent upon receipt of a complaint.

§ 208.51 Inspection of records and questioning.

In connection with such investigation an Area Administrator or his representative may inspect such records and question such persons as he may deem necessary to enable him to determine the relevant facts. Every labor organization, its officers, employees, agents, or representatives shall cooperate fully in any investigation and shall testify and produce the records or other documents requested in connection with the investigation. This section shall be enforced in accordance with the procedures in §§ 208.66 through 208.92.

§ 208.52 Report of investigation.

The Area Administrator's report of investigation (except those relating to complaints under § 208.2, Bill of Rights of members of labor organizations or 208.37, Prohibition of certain discipline) shall be submitted through the Regional Administrator to the Director, who may report to interested persons concerning any matter which he deems to be appropriate as a result of such an investigation.

§ 208.53 Filing of complaints.

A complaint alleging violations of this part may be filed with any area office, or any other office of the Labor-Management Services Administration.

Procedures Involving Bill of Rights or Prohibited Discipline

§ 208.54 Complaints alleging violations of § 208.2, Bill of Rights of members of labor organization or § 208.37, prohibition of certain discipline.

Any member of a labor organization whose rights under the provisions of § 208.2 or § 208.37 are alleged to have been infringed or violated, may file a complaint in accordance with § 208.53. *Provided, however*, That such member may be required to exhaust reasonable hearing procedures (but not to exceed a 4-month lapse of time) within such organization.

§ 208.55 Content of complaint.

(a) The complaint shall contain appropriate identifying information and a clear and concise statement of the facts constituting the alleged violation.

(b) The complainant shall submit with his complaint a statement setting forth the procedures, if any, invoked to remedy the alleged violation, including the dates when such procedures were invoked and copies of any written ruling or decision which he has received.

§ 208.56 Service on respondent.

Upon the filing of a complaint, a copy of the complaint shall be served upon the respondent, and a written statement of such service shall be furnished to the Administrator.

§ 208.57 Additional information and report.

Upon the filing a complaint pursuant to §§ 208.54–208.56, the Area Administrator shall obtain such additional information as he deems necessary and shall report the essential facts, the positions of the parties, and any offers of settlement to the Regional Administrator.

§ 208.58 Dismissal of complaint.

If the Regional Administrator after receipt of a report of the Area Administrator pursuant to § 208.57, determines that a reasonable basis for the complaint has not been established, or that an offer of settlement satisfactory to the complainant has been made, he may dismiss the complaint. If he dismisses the complaint, he shall furnish the complainant with a written statement of the grounds for dismissal, sending a copy of the statement to the respondent.

§ 208.59 Review of dismissal.

The complainant may obtain a review of such action by filing a request for review with the Assistant Secretary within fifteen (15) days of service of the notice of dismissal. A copy of such request shall be served on the Regional Administrator and the respondent, and a statement of service shall be filed with the Assistant Secretary. The request for review shall contain a complete statement of the facts and reasons upon which a request is based.

§ 208.60 Actionable complaint.

If it appears to the Regional Administrator that there is a reasonable basis for the complaint, and that no offer of settlement satisfactory to the complainant has been made, he shall refer the matter to the Chief Administrative Law Judge, U.S. Department of Labor, for the issuance of a notice of hearing as set forth in § 208.69.

§ 208.61 Transfer and consolidation of cases.

In any matter arising pursuant to the regulations in this chapter, whenever it appears necessary in order to effectuate the purposes of the order or to avoid unnecessary costs or delay, the Regional Administrator may consolidate cases within his own region or may transfer such cases to any other region, for the purpose of consolidation with any proceedings which may have been instituted in, or transferred to, such region.

§ 208.62 Hearing procedures.

The proceedings following issuance of the notice of hearing shall be as provided in §§ 208.69 through 208.92 of this chapter.

Procedures Involving Election of Officers

§ 208.63 Complaints alleging violations of § 208.29, election of officers.

(a) A member of a labor organization may file a complaint alleging violations of § 208.29 within 1 calendar month after he has (1) exhausted the remedies available under the constitution and bylaws of the labor organization and of any parent body, or (2) invoked such available remedies without obtaining a final decision within 3 calendar months of such invocation.

(b) The complaint shall contain a clear and concise statement of the facts constituting the alleged violation(s) and a statement of what remedies have been invoked under the constitution and bylaws of the labor organization and when such remedies were invoked.

(c) The complainant shall submit with his complaint a copy of any ruling or decision he has received in connection with the subject matter of his complaint.

§ 208.64 Investigations; dismissal of complaint.

(a) If it is determined after preliminary inquiry that a complaint is deficient in any of the following respects, the Area Administrator shall conduct no investigation: (1) The complainant is not a member of the labor organization which conducted the election being challenged; (2) the labor organization is not subject to the Civil Service Reform Act of 1978; (3) the election was not a regular periodic election of officers; (4) the allegations, if true, do not constitute a violation or violations of § 208.29; (5) the complainant has not complied with the requirements of § 208.63(a).

(b) If investigation discloses (1) that there has been no violation or (2) that a violation has occurred but could not have affected the outcome or (3) that a violation has occurred but has been

remedied, the Director shall issue a determination dismissing the complaint and stating the reasons for his action.

(c) A determination dismissing the complaint may be reviewed by the Assistant Secretary, but only on the basis of deciding whether the Director's decision was arbitrary and capricious. The request for review must be made within fifteen (15) days after service of notice of dismissal.

§ 208.65 Procedures following actionable complaint.

(a) If the Director concludes that there is probable cause to believe that a violation has occurred and has not been remedied and may have affected the outcome of the election, he shall proceed in accordance with §§ 208.66 through 208.92.

(b) The challenged election shall be presumed valid pending a final decision thereon by the Assistant Secretary, and in the interim the affairs of the organization shall be conducted by the officers elected or in such other manner as its constitution and bylaws may provide.

(c) When the Director supervises an election pursuant to an order of the Assistant Secretary issued under § 208.68 or § 208.91, he shall certify to the Assistant Secretary the names of the persons elected. The Assistant Secretary shall thereupon issue an order declaring such persons to be the officers of the labor organization.

Procedures Involving Matters Other Than Bill of Rights and Prohibited Discipline

§ 208.66 Procedures for institution of enforcement proceedings.

Whenever it appears to the Director that a violation of this part (other than § 208.2, Bill of Rights of members of labor organizations or § 208.37, Prohibition of certain discipline) has occurred and has not been remedied, he shall immediately notify any appropriate person and labor organization. Within fifteen (15) days following receipt of such notification, any such person or labor organization may request a conference with the Director or his representatives concerning such alleged violation. At any such conference, the Director may enter into an agreement providing for appropriate remedial action. If no person or labor organization requests such a conference, or upon failure to reach agreement following any such conference, the Director shall institute enforcement proceedings by filing a complaint with the Chief Administrative Law Judge, U.S. Department of Labor, and shall cause a copy of the complaint

to be served on each respondent named therein. If an agreement is reached and the Director concludes that there has not been compliance with all the terms of the agreement, he may refer the matter to the Assistant Secretary for appropriate enforcement action or file a complaint with the Chief Administrative Law Judge.

§ 208.67 Standards complaint; initiation of proceedings.

A complaint filed under § 208.66 shall constitute the institution of a formal enforcement proceeding in the name of the Director, who shall be the only complaining party in the proceeding and shall, where he believes it appropriate, refrain from disclosing the identity of any person who called the violation to his attention (except in proceedings involving violations of section 208.29, Election of Officers). The complaint shall include the following:

- (a) The name and identity of each respondent.
- (b) A clear and concise statement of the facts alleged to constitute violations of the Act or of this part.
- (c) A statement of the relief requested.
- (d) In any complaint filed by the Director on the basis of a complaint received from a member of a labor organization pursuant to § 208.63, a statement setting forth the procedures, if any, followed to invoke available remedies, including the dates when such procedures were invoked, and the substance of any ruling or decision received by the complaining member from the labor organization or any parent body.

§ 208.68 Answer.

(a) Within twenty (20) days from the service of the complaint the respondent shall file an answer thereto with the Chief Administrative Law Judge and shall serve a copy on all parties. The answer shall be signed by the respondent or his attorney.

(b) The answer (1) shall contain a statement of the facts which constitute the grounds of defense, and shall specifically admit, explain, or deny each of the allegations of the complaint unless the respondent is without knowledge, in which case the answer shall so state; or (2) shall state that the respondent admits all of the allegations in the complaint. Failure to file an answer to or plead specifically to any allegation in the complaint shall constitute an admission of such allegation.

Subpart C—Hearing and Related Matters

§ 208.69 Notice of hearing.

The Chief Administrative Law Judge shall issue and cause to be served upon each of the parties a notice of hearing. The notice of hearing shall include the following:

- (a) The name and identity of each party and the case number.
- (b) A statement of the authority and jurisdiction under which the hearing is to be held.
- (c) A statement of the time and place of the hearing which shall be not less than fifteen (15) days after service of the notice of hearing.

§ 208.70 Administrative Law Judge.

Each enforcement proceeding instituted pursuant to this part shall be conducted before an Administrative Law Judge designated by the Chief Administrative Law Judge for the Department of Labor except, however, that when the Administrative Law Judge approves a stipulated agreement for appropriate remedial action, he shall prepare his recommended decision and order adopting that agreement and transfer the case to the Assistant Secretary. The Assistant Secretary may order the remedial action set forth in the stipulation agreement or take such action as he deems appropriate.

§ 208.71 Procedure upon admission of facts.

The admission of all the material allegations of fact in the complaint shall constitute a waiver of hearing. Upon such admission, the Administrative Law Judge without further hearing shall prepare his recommended decision and order in which he shall adopt as his proposed findings of fact the material facts alleged in the complaint.

§ 208.72 Motions and requests.

(a) Motions and requests made prior to the hearing shall be filed with the Chief Administrative Law Judge. The moving party shall serve a copy of all motions and requests on all other parties. Motions during the course of the hearing may be stated orally or filed in writing and shall be made part of the record. Each motion shall state the particular order, ruling, or action desired, and the grounds therefor. The Administrative Law Judge is authorized to rule upon all motions made prior to the filing of his report.

(b) A party may request the attendance of witnesses and/or the production of documents at a hearing held pursuant to this part, by written application before the hearing or orally

during the hearing. Copies of an application filed before the opening of the hearing shall be served on the other parties, who may file written objections to the request within seven (7) days after such service. The Administrative Law Judge after consideration of any objections, shall grant the request provided the specified testimony and/or documents appear to be necessary to the matters under investigation. If the Administrative Law Judge denies the request he shall set forth the basis for his ruling. Upon the failure of any party or officer or employee of any party to comply with such a request which has been granted by the Administrative Law Judge, the Administrative Law Judge and the Assistant Secretary may disregard all related evidence offered by the party failing to comply with the request or take such other action as may be appropriate.

(c) Employees who have been determined to be necessary as witnesses at a hearing shall be granted official time only for such participation as occurs during their regular work hours and when they would otherwise be in a work or paid leave status. Participation as witnesses includes the time necessary to travel to and from the site of a hearing, and the time spent giving testimony and waiting to give testimony, when such time falls during regular work hours. In addition, necessary transportation and per diem expenses shall be paid by the employing activity or agency.

§ 208.73 Prehearing conferences.

(a) Upon his own motion or the motion of the parties, the Administrative Law Judge may direct the parties or their counsel to meet with him for a conference to consider:

- (1) Simplification of the issues;
- (2) Necessity or desirability of amendments to pleadings for purposes of clarification simplification, or limitations;
- (3) Stipulations, admissions of fact, and of contents and authenticity of documents;
- (4) Limitation of the number of expert witnesses; and
- (5) Such other matters as may tend to expedite the disposition of the proceeding.

(b) The record shall show the matters disposed of by order and by agreement in such prehearing conferences. The subsequent course of the proceeding shall be controlled by such action.

§ 208.74 Conduct of hearing.

Hearings shall be conducted by an Administrative Law Judge and shall be open to the public unless otherwise

ordered by the Administrative Law Judge.

§ 208.75 Intervention.

Any person desiring to intervene in a hearing shall file a motion in writing in accordance with the procedures set forth in § 208.72 or, if made at the hearing, may move orally on the record, stating the grounds upon which such person claims an interest. Such a motion shall be filed.

§ 208.76 Duties and powers of the Administrative Law Judge.

It shall be the duty of the Administrative Law Judge to inquire fully into the facts as they relate to the matter before him and to prepare, serve and submit his recommended decision and order pursuant to § 208.88. Upon assignment to him and before transfer of the case to the Assistant Secretary, the Administrative Law Judge shall have the authority to:

- (a) Grant requests for appearance of witnesses or production of documents;
- (b) Rule upon offers of proof and receive relevant evidence;
- (c) Take or cause depositions to be taken whenever the ends of justice would be served thereby;
- (d) Limit lines of questioning or testimony which are immaterial, irrelevant, or unduly repetitious;
- (e) Regulate the course of the hearing and if appropriate, exclude from the hearing persons who engage in misconduct and strike all related testimony of witnesses refusing to answer any questions ruled to be proper;
- (f) Hold conferences for the settlement or simplification of the issues by consent of the parties or upon his own motion;
- (g) Dispose of procedural requests, motions, or similar matters which shall be made part of the record of the proceeding, including motions to amend pleadings; also to recommend dismissal of cases or portions thereof, and to order hearings reopened prior to issuance of his recommended decision and order;
- (h) Examine and cross-examine witnesses and to introduce into the record documentary or other evidence;
- (i) Request the parties at any time during the hearing to state their respective positions concerning any issue in the case or theory in support thereof;
- (j) Continue, at his discretion, the hearing from day-to-day, or adjourn it to a later date or to a different place, by announcement thereof at the hearing or by other appropriate notice;
- (k) Take official notice of any material fact not appearing in evidence in the

record, which is among the traditional matters of judicial notice and also concerning which the Department by reason of its functions is presumed to be expert: *Provided*, That the parties shall be given adequate notice, at the hearing or by reference in the Administrative Law Judge's recommended decision and order of the matters so noticed, and shall be given adequate opportunity to show the contrary.

(l) Correct or approve proposed corrections of the official transcript when deemed necessary.

(m) Take any other action necessary under the foregoing and not prohibited by these regulations.

§ 208.77 Rights of parties.

Any party shall have the right to appear at such hearing in person, by counsel, or by other representative, to examine and cross-examine witnesses, and to introduce into the record documentary or other relevant evidence, except that the participation of any party shall be limited to the extent prescribed by the Administrative Law Judge. Two (2) copies of documentary evidence shall be submitted and a copy furnished to each of the other parties. Stipulations of fact may be introduced in evidence with respect to any issue.

§ 208.78 Rules of evidence.

The technical rules of evidence do not apply. Any evidence may be received, except that an Administrative Law Judge may exclude any evidence or offer of proof which is immaterial, irrelevant, unduly repetitious, or customarily privileged. Every party shall have a right to present his case by oral and documentary evidence and to submit rebuttal evidence.

§ 208.79 Burden of proof.

In a hearing concerning an alleged violation of § 208.2 (Bill of rights of members of labor organizations) or § 208.37 (Prohibition of certain discipline), the complainant shall have the burden of proving the allegations of the complaint by a preponderance of the evidence. In a hearing concerning an alleged violation of other standards of conduct matters, the Director shall have the burden of proof.

§ 208.80 Unavailability of Administrative Law Judges.

In the event the Administrative Law Judge designated to conduct the hearing becomes unavailable, the Chief Administrative Law Judge shall designate another Administrative Law Judge for the purpose of further hearing or issuance of a recommended decision

and order on the record as made, or both.

§ 208.81 Objection to conduct of hearing.

(a) Any objection with respect to the conduct of the hearing, including any objection to the introduction of evidence, may be stated orally or in writing accompanied by a short statement of the grounds for such objection and included in the record. No such objection shall be deemed waived by further participation in the hearing. Such objection shall not stay the conduct of the hearing.

(b) Automatic exceptions will be allowed to all adverse rulings. Rulings by the Administrative Law Judge shall not be appealed prior to the transfer of the case to the Assistant Secretary, but shall be considered by the Assistant Secretary only upon the filing of exceptions to the Administrative Law Judge's recommended decision and order in accordance with § 208.84.

§ 208.82 Motions after a hearing.

All motions made after the transfer of the case to the Assistant Secretary, except motions to correct the record under § 204.76(l), shall be made in writing to the Assistant Secretary. The moving party shall serve a copy of all motion papers on all other parties. A statement of service shall accompany the motion. Answers, if any, must be served on all parties and the original thereof, together with a statement of service, shall be filed with the Assistant Secretary after the hearing, within seven (7) days after service of the moving papers unless it is otherwise directed.

§ 208.83 Waiver of objections.

Any objection not duly urged before an Administrative Law Judge shall be deemed waived.

§ 208.84 Oral argument at the hearing.

Any party shall be entitled, upon request, to a reasonable period prior to the close of the hearing for oral argument, which shall be included in the official transcript of the hearing.

§ 208.85 Transcript.

An official reporter shall make the only official transcript of such proceedings. Copies of the official transcript will be provided to the parties, in accordance with the provisions of 29 CFR 70.62(c), or they may be examined in the Area Office in whose geographic jurisdiction the hearing has been held.

§ 208.86 Filing of brief.

Any party desiring to submit a brief to the Administrative Law Judge shall file the original within ten (10) days after the

close of the hearing: *Provided, however,* That prior to the close of the hearing and for good cause, the Administrative Law Judge may grant a reasonable extension of time. Copies of such brief shall be served on all of the parties to the proceeding. Requests for additional time in which to file a brief under authority of this section made after the hearing shall be made in writing to the Administrative Law Judge and copies thereof served on the other parties. A statement of such service shall be furnished. A request for extension of time shall be received not later than three (3) days before the date such briefs are due. In the absence of the Administrative Law Judge such requests shall be ruled upon by the Chief administrative Law Judge. No reply brief may be filed except by permission of the Administrative Law Judge.

§ 208.87 Proposed findings and conclusions.

Within fifteen (15) days following the close of the hearing, the parties may submit proposed findings and conclusions to the Administrative Law Judge, together with supporting reasons therefor, which shall become part of the record.

§ 208.88 Submission of the Administrative Law Judge's recommended decision and order to the Assistant Secretary; exceptions.

(a) After the close of the hearing, and the receipt of briefs, or findings and conclusions, if any, the Administrative Law Judge shall prepare his recommended decision and order expeditiously. The recommended decision and order shall contain findings of fact, conclusions, and the reasons or basis therefor including credibility determinations, and recommendations as to the disposition of the case including the remedial action to be taken.

(b) The Administrative Law Judge shall cause his recommended decision and order to be served promptly on all parties to the proceeding. Thereafter, the Administrative Law Judge shall transfer the case to the Assistant Secretary including his recommended Decision and order and the record. The record shall include the complaint, the notice of hearing, motions, rulings, orders, official transcript of the hearing, stipulations, objections, depositions, exhibits, documentary evidence and any briefs or other documents submitted by the parties.

(c) Exceptions to the Administrative Law Judge's recommended decision and order may be filed by any party with the Assistant Secretary within fifteen (15)

days after service of the recommended decision and order: *Provided, however,* That the Assistant Secretary may for good cause shown extend the time for filing such exceptions. Requests for additional time in which to file exceptions shall be in writing, and copies thereof shall be served on the other parties. Requests for extension of time must be received no later than three (3) days before the date the exceptions are due. Copies of such exceptions and any supporting briefs shall be served on all other parties, and a statement of such service shall be furnished to the Assistant Secretary.

§ 208.89 Contents of exceptions to Administrative Law Judge's recommended decision and order.

(a) Exceptions to an Administrative Law Judge's recommended decision and order shall:

(1) Set forth specifically the questions upon which exceptions are taken;

(2) Identify that part of the Administrative Law Judge's recommended decision and order to which objection is made;

(3) Designate by precise citation of page the portions of the record relied on, state the grounds for the exceptions and include the citation of authorities unless set forth in a supporting brief.

(b) Any exception to a ruling, finding, conclusion, or recommendation which is not specifically urged shall be deemed to have been waived. Any exception which fails to comply with the foregoing requirements may be disregarded.

§ 208.90 Briefs in support of exceptions.

(a) Any brief in support of exceptions shall contain only matters included within the scope of the exceptions and shall contain, in the order indicated, the following:

(1) A concise statement of the case containing all that is material to the consideration of the questions presented;

(2) A specification of the questions involved and to be argued;

(3) The argument, presenting clearly the points of fact and law relied on in support of the position taken on each question, with specific page reference to the transcript and the legal or other material relied on.

(b) Answering briefs to the exception may be filed with the Assistant Secretary within ten (10) days after service of the exceptions.

208.91 Action by the Assistant Secretary.

(a) After considering the Administrative Law Judge's recommended decision and order, the record, and any exceptions filed, the

Assistant Secretary shall issue his decision affirming or reversing the Administrative Law Judge, in whole, or in part, or making such other disposition of the matter as he deems appropriate: *Provided, however,* That unless exceptions are filed which are timely and in accordance with § 208.89, the Assistant Secretary may, at his discretion, adopt without discussion the recommended decision and order of the Administrative Law Judge, in which event the findings, conclusions, and recommendations of the Administrative Law Judge, as contained in his recommended decision and order shall, upon appropriate notice to the parties, automatically become the decision of the Assistant Secretary.

(b) Upon finding a violation of the Act, the Assistant Secretary may order the respondent to cease and desist from such violative conduct and may require the respondent to take such affirmative action as he deems appropriate to effectuate the policies of the Act.

(c) Upon finding no violation of the Act, the Assistant Secretary shall dismiss the complaint.

208.92 Compliance with decisions and orders of the Assistant Secretary.

When remedial action is ordered, the respondent shall report to the Assistant Secretary, within a specified period that the required remedial action has been effected. When the Assistant Secretary finds that the required remedial action has not been effected, he shall refer the matter to the Federal Labor Relations Authority for appropriate action.

208.93 Stay of remedial action.

In cases involving violations of this part, the Assistant Secretary may direct, subject to such conditions as he deems appropriate, that the remedial action ordered be stayed.

PART 209—MISCELLANEOUS

Sec.

209.1 Computation of time for filing papers.

209.2 Additional time after service by mail.

209.3 Documents in a proceeding.

209.4 Service of pleading and other papers under this chapter.

209.5 Rules to be construed liberally.

Authority: Secs. 7120, 7134 of the Civil Service Reform Act of 1978 (— Stat.—; — U.S.C. —).

§ 209.1 Computation of time for filing papers.

In computing any period of time prescribed by or allowed by the regulations contained in Part 208 of this chapter, the day of the act, event, or default after which the designated period of time begins to run, shall not be included. The last day of the period so

computed is to be included unless it is a Saturday, Sunday or Federal legal holiday in which event the period shall run until the end of the next day which is neither a Saturday, Sunday, or a Federal legal holiday. When the period of time prescribed or allowed is seven (7) days, or less, intermediate Saturdays, Sundays, and Federal legal holidays shall be excluded from the computations. When these regulations require the filing of any paper, such document must be received by the Assistant Secretary or the officer or agent designated to receive such matter before the close of business of the last day of the time limit, if any, for such filing or extension of time that may have been granted.

§ 209.2 Additional time after service by mail.

Whenever a party has the right or is required to do some act pursuant to these regulations within a prescribed period after service of a notice or other paper upon him and the notice or paper is served on him by mail, five (5) days shall be added to the prescribed period: *Provided, however,* That five (5) days shall not be added if any extension of time may have been granted.

§ 209.3 Documents in a proceeding.

(a) *Title.* Documents in any proceeding under Part 208 of this chapter, including correspondence, shall show the title of the proceeding and the case number, if any.

(b) *Signature.* The original of each document required to be filed under these regulations shall be signed by the party or by an attorney or representative of record for the party, or by an officer of the party, and shall contain the address and telephone number of the person signing it.

§ 209.4 Service of pleading and other papers under this chapter.

(a) *Method of service.* Notices of hearing, decisions, orders and other papers may be served personally or by registered or certified mail or by telegraph. When service is by mail, the date of service shall be the day when the matter served is deposited in the United States mail.

(b) *Upon whom served.* All papers, except as herein otherwise provided, shall be served upon all counsel of record and upon parties not represented by counsel or by their agents designated by them or by law and upon the Assistant Secretary, or his designated officer, or agent or Administrative Law Judge where appropriate. Service upon such counsel or representative shall constitute service upon the party, but a

copy also shall be transmitted to the party.

§ 209.5 Rules to be construed liberally.

(a) The regulations in this chapter may be construed liberally to effectuate the purposes and provisions of the Act.

(b) When an act is required or allowed to be done at or within a specified time, the Assistant Secretary may at any time order the period altered where it shall be manifest that strict adherence will work surprise or injustice or interfere with the proper effectuation of the Act.

Signed at Washington, D.C. this 26th day of July 1979.

R. C. DeMarco,

Acting Assistant Secretary of Labor for Labor-Management relations.

Part VI

Department of Labor

Mine Safety and Health Administration

**Metal and Nonmetal Mine Safety;
Correction**

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR 55, 56, and 57

Metal and Nonmetal Mine Safety;
Correction

AGENCY: Mine Safety and Health Administration, Department of Labor.

ACTION: Final Rule; Correction.

SUMMARY: This action corrects the Mine Safety and Health Administration's final rules amending 30 CFR Parts 55, 56 and 57 which were published in the Federal Register on June 1, 1979 (44 FR 31908-31920). The final rules added new or revised mandatory safety and health standards for radon daughter exposure; fire protection and control; ventilation; loading, hauling and dumping; travelways and escapeways; hoisting, and sanitary facilities. The corrections are necessary to assure that preamble statements are consistent with the rule itself and to further clarify the application of the rule.

EFFECTIVE DATE: August 28, 1979.

FOR FURTHER INFORMATION CONTACT: Thomas J. Shepich, Administrator, Metal and Nonmetal Mine Safety and Health, Mine Safety and Health Administration, Ballston Tower, No. 3, Room 702, 4015 Wilson Boulevard, Arlington, Virginia 22203, (703) 235-1565.

The following changes are made to correct errors in FR Doc. 79-17078:

1. On page 31910, column 1, paragraph 3, line 7 is corrected to read, "described in § 14.3 of ANSI N 13.8-1973".

2. On page 31910, column 2, line 3, insert "and" between "areas" and "in". This line is corrected to read, "areas and in any other location where".

3. On page 31910, column 2, paragraph 1, line 4, delete "still" and substitute "every 2 weeks" with "monthly". This line is corrected to read, "must be sampled monthly".

4. On page 31910, column 2, delete paragraph 2, and substitute the following:

In the event that air samplings reveal a radon daughter concentration in excess of 0.3 WL in the active working area, concentrations must be determined weekly in that area (whether or not uranium is mined) until the weekly determinations are 0.3 WL or less for five consecutive weeks. In addition, this final rule requires air testing in a uranium mine very two weeks when the radon daughter concentration is between 0.1 WL and 0.3 WL. The proposed standard specified monthly testing under like circumstances. The

agency and parties stipulated to the language of the final rule.

5. On page 31910, column 2, delete paragraph 3.

6. On page 31911, column 1, line 6, replace "0.8" with "1/12 WLM". This line is corrected to read "1/12 WLM (e.g. January—08; February—)".

7. On page 31911, column 2, paragraph 1, line 13, insert "non-duplicated" after "However, the". This line is corrected to read, "individual exposures. However, the non-duplicated".

8. On page 31911, column 3, 4th paragraph, delete 3rd sentence and correct 2nd sentence to read:

"The mine operator must provide either a second multipurpose dry-chemical extinguisher or equipment with the equivalent extinguishing capacity appropriate for the particular hazard involved where these same operations occur in close proximity to:

(1) Specific quantities of combustible liquids (other than those enclosed in noncombustible metal containers); (2) specific quantities of non-fire-retardant wood; (3) specific quantities of combustible plastic; (4) a mine shaft where there is a risk that combustible materials may be ignited by falling sparks or heated material; and (5) a raise or winze where there is a risk that combustible materials may be ignited by falling sparks or heated material [57.4-77(a), 57.4-78(a)]".

9. On page 31913, column 1, paragraph 3, line 11, delete "planned or". This line is corrected to read, "unplanned fan shutdowns".

10. On page 31913, column 2, paragraph 1, delete the entire paragraph and substitute the following:

"The revised standards, like the proposed standard establishes procedures to be followed in the event of fan failure. The language has been changed to provide the mine operator with a guide as to what is considered adequate monitoring of air quality. The revised standard requires such monitoring to consist of testing the air quality within 2 hours of discovery of fan failure for compliance with section 57.5 and 57.21 and every 4 hours thereafter until normal ventilation is restored."

11. On page 31913, 3rd paragraph, delete the first two sentences and substitute the following:

The principal concern at the hearing was a periodic 2-hour testing requirement contained in the proposed rule rather than the continuous operation of main, booster and auxiliary fans. Testing is essential and the agency and all parties agreed that a periodic 4-hour testing provision would be both workable and understandable and

would provide operators with specific and uniform direction with respect to the frequency of testing.

12. On page 31915, column 3, "Hoisting Buckets", line 15, delete "the" after "at" and substitute "a". This line is corrected to read "at a minimum speed for the hoist".

13. On page 31916, column 2, mandatory standard 55.19-78, line 2, 1st sentence, insert "about" between "raised" and "3 feet". The corrected sentence reads, "All buckets shall be stopped after being raised about 3 feet above the shaft bottom".

14. On page 31916, column 3, mandatory standard 56.19-78, line 2, 1st sentence, insert "about" between "raised" and "3 feet". The corrected sentence reads, "All buckets shall be stopped after being raised about 3 feet above the shaft bottom".

15. On page 31918, column 2, mandatory standard 57.5-37(b), replace "therefore:" with "thereafter:". This sentence is corrected to read, "(b) If concentrations of radon daughters less than 0.1 WL are found in an exhaust mine air sample, thereafter:".

Dated: August 24, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1978.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY*	USDA/ASCS		DOT/SECRETARY*	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/FHWA	USDA/FSQS		DOT/FHWA	USDA/FSQS
DOT/FRA	USDA/REA		DOT/FRA	USDA/REA
DOT/NHTSA	MSPB/OPM		DOT/NHTSA	MSPB/OPM
DOT/RSPA	LABOR		DOT/RSPA	LABOR
DOT/SLS	HEW/FDA		DOT/SLS	HEW/FDA
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

*NOTE: As of July 2, 1979, all agencies in the Department of Transportation, will publish on the Monday/Thursday schedule.

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going Into Effect Today

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

Health Care Financing Administration—

8-28-79 / Medicaid programs; exclusion of physicians or practitioner convicted of a criminal offense related to the programs.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last Listing August 17, 1979

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the LSA (List of CFR Sections Affected), the "Federal Register Index," or both.

LSA (List of CFR Sections Affected)
\$10.00
per year

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **\$8.00**
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually.

Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the LSA (List of CFR Sections Affected) will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed \$_____ for _____ subscription(s) to the publications checked below:

..... LSA (LIST OF CFR SECTIONS AFFECTED) (\$10.00 a year domestic; \$12.50 foreign)

..... FEDERAL REGISTER INDEX (\$8.00 a year domestic; \$10.00 foreign)

Energy Report

Wednesday
August 29, 1979

Highlights

- 50605 **Crude Oil** DOE/ERA proposes amendments to the pricing regulations; comments by 10-5-79; hearing 10-16-79 and 10-24-79
- 50788 **Weatherization Assistance for Low-Income Persons** DOE sets forth final rule on State developed list of weatherization measures; effective 11-27-79 (Part IV of this issue)
- 50656 **Developmental Disabilities Program** HEW/HDS provides notice of intent to reallocate funds; comments by 9-28-79
- 50601 **Genetic Diseases Testing and Counseling** HEW/PHS establishes final regulations for administration of project grants; effective 4-23-79
- 50604 **Aliens** Justice/INS proposes to amend regulations requiring nonimmigrant professional nurses to pass screening examination; comments by 10-29-79
- 50607 **Federal Credit Unions** NCUA prints a notice of determination concerning the regulation of debt collection practices; effective 8-29-79
- 50607 **Air Carriers** CAB proposes removal of limitations on cargo charters; comments by 10-29-79

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Area Code 202-523-5240

Highlights

- 50591, 50596, 50597 Air Carriers** CAB promulgates final amending regulations to allow split cargo charters; effective 9-28-79 (3 documents)
- 50668 Countertop Microwave Ovens from Japan** Treasury gives notice of initiation of investigation on antidumping proceedings
- 50626 Grants** Commerce/NTIA prints notice of an addendum to list of applications accepted for filing; comments by 9-28-79
- 50801 Energy** DOE solicits comments on regulations intending to prevent or impede development of renewable resources; comments by 10-15-79 (Part V of this issue)
- 50663 Antidumping** ITC issues notice of investigation on titanium dioxide being sold from Belgium, France, the United Kingdom, and the Federal Republic of Germany; hearing on 9-27-79
- 50785 Oil and Hazardous Substances** EPA and Transportation/CG publishes memorandum of understanding concerning the assessment of civil penalties (Part III of this issue)
- 50783 Hazardous Substances** EPA intend to remove calcium oxide and calcium hydroxide from list under the Clean Water Act; comments by 9-28-79 (Part III of this issue)
- 50780 National Pollutant Discharge Elimination System** EPA proposes rule to establish consolidated permit program requirements; additional comments by 9-12-79 (Part III of this issue)
- 50732 Water Pollution** EPA adopts guidelines on control technology; effective 9-28-79
- 50766 Water Pollution** EPA issues rules on designated hazardous substances under the Clean Water Act; effective 9-28-79 (Part III of this issue)
- 50576 Environmental Protection** USDA/SCS issues final regulations prescribing the general procedures for compliance with the National Environmental Policy Act; effective 8-29-79
- 50727 Sunshine Act Meetings**
- Separate Parts of This Issue**
- 50732 Part II, EPA**
50766 Part III, EPA
50788 Part IV, DOE
50801 Part V, DOE

Rules and Regulations

Federal Register

Vol. 44, No. 169

Wednesday, August 29, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE Agricultural Marketing Service 7 CFR Part 46

Regulations (Other Than Rules of Practice) Under the Perishable Agricultural Commodities Act, 1930

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final Rule.

SUMMARY: The Department of Agriculture amends 7 CFR Part 46, Regulations (Other Than Rules of Practice) issued pursuant to the Perishable Agricultural Commodities Act. The primary purpose of the amendments is to bring the Regulations into conformity with and to implement amendments to the Act enacted in Pub. L. 95-562, approved November 1, 1978, 92 Stat. 2381.

EFFECTIVE DATE: October 1, 1979.

FOR FURTHER INFORMATION CONTACT: Wilbur A. Rife, Head, License Section, Regulatory Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, Phone (202) 447-2189.

SUPPLEMENTARY INFORMATION: Notice was published in the May 31, 1979 Federal Register (44 FR 31186-31189) that the Department was considering amending §§ 46.2, 46.4, 46.5, 46.6, 46.9, 46.13, 46.14, 46.17, and 46.43 of the Regulations (Other Than Rules of Practice) (7 CFR Part 46.1-46.45) issued pursuant to the Perishable Agricultural Commodities Act, as amended (7 U.S.C. 499a et seq.). Interested parties were afforded 60 days to file written comments on the proposed revisions. Four of these comments, submitted by large shipping organizations, were in complete agreement with the proposed revisions of the Regulations. The other four commentors raised questions concerning the proposed amendment to § 46.2. These comments are dealt with below.

The Perishable Agricultural Commodities Act was enacted in 1930, after representatives of the produce industry recognized and convinced Congress that there was a need for a code of fair trading standards to curb abuses in the marketing of perishable agricultural commodities in interstate or foreign commerce. It establishes a means for the enforcement of marketing contracts by providing for the collection of damages from anyone who fails to live up to contractual obligations. Licenses are the key to the enforcement of the Act, and can be suspended or revoked for violations of the law. The Act has been amended numerous times to keep it up to date with changes in trading practices. The latest amendment was enacted on November 1, 1978.

Public hearing and considerations by the House and Senate Subcommittees on the 1978 legislation amending the Act can be found in House Report No. 95-1620 and Senate Report No. 95-1156. These reports show that there were extensive discussions on the proposed legislation and that all segments of the industry were heard in the public hearing regarding the proposal to amend the Act.

The recent amendments to the Act (Pub. L. 95-562), increased the exemption, effective January 1, 1979, on purchases of produce by retailers and sales of frozen food brokers from \$100,000 to \$200,000 during a calendar year, before they are subject to a license under the Act; authorized a change in the manner in which license fees are assessed from the current uniform fee, regardless of size or volume of business, to a variable basis; increased the maximum annual license fee from \$100 to \$150, and permitted an assessment of up to \$50 per branch for each branch operation exceeding nine, provided that the aggregate annual license fees that can be assessed a firm operating under the Act cannot exceed \$1,000; authorized inspection of the accounts, records, and memoranda of any commission merchant, dealer, or broker, who has been determined, in a formal disciplinary proceeding, to have violated the prompt payment provisions of Section 2(4) of the Act to insure that this provision is not being further violated; and authorized the Secretary to require that any commission merchant, dealer, or broker who has been determined, in a formal disciplinary proceeding, to have

violated the prompt payment provision of Section 2(4) of the Act, furnish, maintain, and from time to time adjust a surety bond in a form and amount satisfactory to the Secretary as assurance that the commission merchant, dealer, or broker will pay all reparation awards subject to its right of appeal under Section 7(c) of the Act.

(a) License fees and collateral matters. As noted above, the 1978 amendments to the Act affect license fees in two ways. First, the amendment authorizes annual assessments of up to \$50 per branch for each branch operation exceeding nine providing that the aggregate annual license fee cannot exceed \$1,000, and authorizes a maximum annual basic license fee of \$150. The authority to assess a fee on branch operations establishes a more equitable assessment of license fees by having the larger volume firms pay a fairer share of the cost of administering the program. Because of this authority to assess license fees on branches or additional business facilities operated by firms subject to the Act, § 46.2 of the Regulations is amended to include a definition of the term "Branch or additional business facility." This additional definition is necessary in order to establish, for fee assessment purposes, which business operations fall within the purview of the newly assessable category.

Additionally, §§ 46.4(b), 46.13 and 46.14(b) are amended to reflect that records and memoranda regarding the number and address of any branches or additional business facilities must be kept and preserved by the commission merchant, dealer, or broker and reported to the Secretary.

Two commentors raised questions regarding the proposed definition of "Branch or additional business facility." Their questions particularly concerned a cooperative's operation under the proposed definition. Cooperatives which operate as a commission merchant, dealer, or broker are regulated in the same manner as any other business enterprise in that same category. If a cooperative is operating at various locations in the buying and/or selling of commodities, or negotiating such purchases and/or sales, it will be treated in the same manner as other types of operators who conduct business through such additional facilities.

One of these commentors also raised several other questions. First, it raised a question concerning the use of the term "includes, but is not limited to," in the portion of the proposed section 7 CFR 46.2(gg) in which examples of branches or other business facilities are used. The purpose of the questioned term is to ensure that persons are notified that the examples in the definition are not intended to be exclusive. The examples given are broad enough to encompass most business operations, but they do not anticipate all possible situations. Therefore, the term "includes, but is not limited to," is used in prefacing the list of examples.

The second question asked was whether "packing sheds" are included in the definition of "branches or other business facilities." If personnel in the shed are authorized to purchase, sell, or otherwise effect contracts, the "packing shed" is considered to be a "branch or other business facility." The fact that all purchases are paid for through, or all sales are invoiced and proceeds received by, a headquarter's office is immaterial.

The second effect of the amendments is to raise the maximum basic annual license fee which may be assessed by the Secretary. These license fees and assessments provide the revenue through which the cost of administration of the Perishable Agricultural Commodities Act program is financed. The statutory maximum license fee was last increased by Congress in 1969, to \$100. The recent amendments increased the maximum basic annual license fee to \$150.

The increased fee structure was needed to maintain the financial solvency of the program, caused by a decline in the number of firms subject to a license during the 1970's. This decline was due primarily to mergers, consolidations, and closures of small firms. During the same period, the cost of administering the Act increased sharply, even though the number of employees in the program has remained relatively stable, or been slightly reduced over the past decade, while the workload has shown a slight increase.

As a result, the present annual license fee of \$100 is not producing sufficient revenue to meet administrative expenses. Therefore, § 46.6 of the regulations is amended to increase the basic annual license fee to \$135. Additionally, licensees with multiple branches pay an annual fee of \$35 per branch for each branch in excess of nine, subject to the aforementioned \$1,000 limit. This new fee structure is effective October 1, 1979.

One comment raised a question as to how the license fee of retail business with more than one location would be computed. If a retailer has a headquarters location plus ten retail outlets at different locations, its fee would be \$170 (\$135 plus \$35 for the one branch facility in excess of nine); if the retailer, on the other hand, had located its headquarters at one of the ten retail outlets, its fee would only be \$135 since it would only have nine branches.

(b) *Retailer exclusion.* The amendments to the Act increase the amount of perishable agricultural commodities retailers are permitted to buy without being considered a "dealer" from \$100,000 to \$200,000 in any calendar year. Section 46.2(m) of the regulations is amended to make the definition of the term "dealer" in the regulations consistent with that in the Act.

(c) *Broker exclusion.* The amendments to the Act increase the exempted amount of frozen fruits and vegetables for which a person acting as an independent agent may negotiate a sale on behalf of a vendor from \$100,000 in any calendar year to \$200,000 in any calendar year. Section 46.2(n) of the regulations is amended to make the definition of the term "broker" in the regulations consistent with that in the Act.

(d) *Bond.* The amendments to the Act authorize the Secretary to require that any commission merchant, dealer or broker, who has been determined, in a formal disciplinary proceeding, to have violated the prompt payment provisions of Section 2(4) of the Act to furnish, maintain and from time to time adjust a surety bond in a form and amount satisfactory to the Secretary as an assurance that the commission merchant, dealer or broker will pay all reparation awards subject to its right of appeal under Section 7(c) of the Act. Section 46.5 of the regulations is amended to reflect that Section 13(b) of the Act permits the Secretary to require the posting of a bond. Also, the regulations are amended to provide that the minimum bond acceptable, under any provision of the Act be increased to \$10,000.

(e) *License suspension.* The amendments to the Act authorized the suspension of the license of a commission merchant, dealer or broker who, after having been determined in a formal disciplinary proceeding to have violated the prompt payment provisions of Section 2(4) of the Act, refuses to permit inspection of its accounts, records and memoranda or fails or refuses to furnish, maintain, or adjust the surety bond required by the

Secretary. Section 46.9(h) of the regulations is amended to reflect this added authority.

(f) *Commercial Unit.* Several recent reparation cases, brought pursuant to the Act, have raised the questions as to what constituted a "commercial unit." Inasmuch as this has not heretofore been a problem, no definition of the term had been included in the regulations. In order to forestall any further difficulties from arising, a definition of the term "commercial unit" is added to § 46.43 of the regulations. This definition does not modify the parties existing contractual rights and responsibilities.

One Commentor objected to the proposed definition of "commercial unit." Its basis for objection stemmed from its view that the proposed definition was biased in favor of a receiver. This erroneous viewpoint resulted from the commentor's belief that a receiver would be able to reject an entire load of produce when only one container would be susceptible to rejection. The Commentor suggested that rather than a whole truckload, the "commercial unit" be limited to one commodity.

The definition sets down for use as a trade term, a policy which has been consistently followed in the administration of the Act. The objective is to clarify the rights and responsibilities of buyers and sellers so that they will be better able to avoid unjustified rejection of goods. The failure of one container to meet contract requirements would not be cause for rejection of a shipment. Also, if the definition of a commercial unit were to be confined to each commodity lot, the rejection problem could be aggravated. Assume a sale of five commodities tendered for delivery as one shipment. The buyer could accept any one or group of the commodities which met contract and reject the others. The seller would then have the problem of disposing of the goods left on a trailer without having control over the carrier.

Applying the principle of one contract and one shipment making a commercial unit eliminates some problem areas. The total number of packages of one or more commodities tendered for delivery to a buyer under one sales contract would be a commercial unit. Failure of one commodity, or a group which make up a minor portion of the total shipment, to meet contract requirements would not be a cause for rejection of the commercial unit (the entire shipment). In these circumstances, a buyer would be expected to accept the shipment and negotiate a new agreement with the

seller for disposition of the goods that did not meet contract.

If a seller tenders a shipment to a buyer which consists of two commodities, each of which makes up a substantial portion of the shipment and one commodity does not meet contract requirements, the buyer could reject the entire shipment or he could accept the entire shipment and recover damages resulting from the breach of contract. The buyer could not accept the commodity which meets contract and reject the other. Both commodities make up the commercial unit which must be accepted in its entirety.

Where a seller contracts with three buyers for goods which are moved in the same carrier, the goods tendered under each contract of sale make up a commercial unit. The rights and responsibilities accrue to each unit including the right to reject.

(g) *Miscellaneous.* Section 46.4(b)(4) of the regulations currently provides that responsibly connected female married persons furnish the full legal name of their husbands on the application for a license. Inasmuch as no requirement is made that male married persons furnish the full legal name of their wives on the application, the requirement that a female provide the name of her spouse may be construed as discriminatory. Section 46.4(b)(4) is amended to delete the requirement.

Additionally, § 46.13 of the regulations is amended to require that licensees using trade names report the deletion or addition of any trade name to the Director. Currently, licensees are only required to obtain approval of the Secretary before using a trade name. It is believed that knowing which trade names are being used, at any point in time, will be useful in administering the Act.

After due consideration of the comments presented concerning the proposed revisions of the Regulations and pursuant to the authority contained in § 15, 46 Stat. 537 as amended; 7 U.S.C. 499o, the Regulations (Other Than Rules of Practice) (7 CFR Part 46) under the Perishable Agricultural Commodities Act, 1930, are hereby amended as follows:

1. Amend § 46.2 by revising paragraphs (m)(2) and (n) and adding new paragraph (gg) to read as follows:

§ 46.2 Definitions.

The terms defined in the first Section of the Act shall have the same meaning as stated therein. Unless otherwise defined, the following terms whether used in the regulations, in the Act, or in the trade shall be construed as follows:

(m) "Dealer" means any person engaged in the business of buying or selling produce in wholesale or jobbing quantities in commerce, and includes:

(2) Retailers, when the invoice cost of all purchases of produce exceeds \$200,000 during a calendar year. In computing dollar volume, all purchases of fresh and frozen fruits and vegetables are to be counted, without regard to quantity involved in a transaction or whether the transaction was in intrastate, interstate or foreign commerce;

(n) "Broker" means any person engaged in the business of negotiating sales and purchases of produce in commerce for or on behalf of the vendor or the purchaser, respectively, except that no person shall be deemed to be a "broker" within the meaning of the Act if such person is an independent agent negotiating sales for or on behalf of the vendor and if the only sales of such commodities negotiated by such person are sales of frozen fruits and vegetables having an invoice value not in excess of \$200,000 in any calendar year.

(gg) "Branch or additional business facility," as used in Section 3(b) of the Act, means an office or outlet in a location other than that of the principal or main office of a firm, out of which or through which the firm purchases, sells, negotiates contracts, solicits, or handles consignments, or otherwise contracts in perishable agricultural commodities including seasonal, part-time and full-time operations. As used in this paragraph, "branch or additional business facility" includes, but is not limited to, the following:

(1) Jobbers, Wholesalers, Distributors—Each location through which commodities are bought, sold or otherwise contracted;

(2) Retailers—Each outlet through which retail sales of commodities are made and each office which purchases commodities;

(3) Trucker/Dealer—A truck is a "branch" office if the driver is authorized to buy, sell or otherwise contract for commodities on behalf of the firm;

(4) Shippers—On-the-ground representatives making purchases, sales or otherwise contracting for commodities;

(5) Brokers—Each office conducting contract negotiations including on-the-ground representatives negotiating contracts for commodities;

(6) Processors—Each location at which commodities are purchased, sold or contracted to be purchased or sold;

(7) Cooperatives—Each operation away from the main office that has responsibility to account for proceeds received from sales of commodities; or

(8) Seasonal/Part-Time Operations—Any facility with on-the-ground representatives making purchases, sales, or otherwise contracting for commodities.

2. Amend § 46.4(b) by revising paragraphs (b)(1) and (b)(4) to read as follows:

§ 46.4 Application for license.

(b) The applicant shall furnish the following information:

(1) Name or names in which business is conducted; place of business; mailing address; name, location and number of branches or additional business facilities, divisions or affiliates; name of firm succeeded and whether the applicant assumes responsibility of settling any complaints filed under the Act against the firm succeeded.

(4) Full legal name, all other names used, if any, and home address of the owner. If a partnership, the applicant shall furnish the full legal names, all other names used, if any, and home address of all partners, indicating whether general, limited or special partners; or if an association or corporation the applicant shall furnish the full legal names, all other names used, if any, and home address of all officers, directors and holders of more than 10 per centum of the outstanding stock and percentage of stock held by each such person. Minors shall also furnish the full name and home address of their guardian. If the applicant is a trust the name of the trust and full name and home address of the trustee shall be furnished.

3. Revising § 46.5 to read as follows:

§ 46.5 Bonds.

Bonds prescribed in Section 4(c), 4(e), 8(b), and 13(b) of the Act shall be in the form of cash or surety bonds in the form and amount satisfactory to the Director and shall not be less than \$10,000. When cash is posted as surety, it shall be deposited into a special account of the United States Treasury and no interest is to accrue or be paid the licensee. When surety bonds are furnished, the surety shall be a company holding a certificate of authority from the Secretary of the Treasury under Act of Congress approved July 30, 1947 (6 U.S.C. secs. 6-13) as acceptable surety on Federal bonds.

4. Revising § 46.6 to read as follows:

§ 46.6 License fee.

The annual license fee is one hundred and thirty-five (135) dollars plus thirty-five (35) dollars for each branch or additional business facility operated by the applicant exceeding nine. In no case shall the aggregate annual fees paid by any applicant exceed one thousand (1,000) dollars. The Director may require that the fee be submitted in the form of a money order, bank draft, cashier's check, or certified check made payable to Agricultural Marketing Service. Authorized representatives of the Division may accept fees and issue receipts therefor.

5. Revising § 46.9(h) to read as follows:

§ 46.9 Termination, suspension, revocation, cancellation of licenses; notices; renewal.

(h) Under Section 13 of the Act a license can be suspended:

(1) if the licensee refuses to permit inspection of his records or of any lot of produce under his ownership or control; or

(2) if the licensee, subsequent to a determination in a formal disciplinary proceeding that it has violated the prompt payment provision of Section 2(4) of the Act, refuses to permit an inspection of its accounts, records and memoranda to insure that it is in compliance with the prompt payment provision of Section 2(4) of the Act or fails or refuses to furnish, maintain, or adjust a surety bond in a form and amount satisfactory to the Secretary.

6. Amend § 46.13 to read as follows:

§ 46.13 Address, ownership, changes in trade name, changes in number of branches, changes in members of partnership, and bankruptcy.

The licensee shall:

(a) promptly report to the Director in writing:

(1) any change of address;

(2) any change in officers, directors, and holders of more than ten percent of the outstanding stock of a corporation, with the percentage of the stock held by each such person;

(3) any deletions or additions of trade names;

(4) any change in the number and address of any branches or additional business facilities; and

(5) when the licensee, or if the licensee is a partnership, any partner is subject to proceedings under the bankruptcy laws. A new license is required in case of a change in the ownership of a firm, an addition or

withdrawal of members of a partnership, or in case business is conducted under a different corporate charter from that under which the license was originally issued.

(b) obtain approval from the Director prior to using any trade name.

7. Amend § 46.14(b) to read as follows:

§ 46.14 General.

(b) Every commission merchant, dealer, and broker shall prepare and preserve records and memoranda required by the Act which shall fully and correctly disclose the true ownership and management of such business during the preceding four years. Such records shall include the number and location of all branches or additional business facilities operated by or for the commission merchant, dealer or broker. In the case of a corporation, such records shall include the corporate charter, record of stock subscription and stock issued, the amounts paid in for stock and minutes of stockholders' and directors' meetings showing the election of directors and officers, resignations and other pertinent corporate actions. In the case of a partnership, the records shall contain a copy of the partnership agreement showing the type of partnership, the full names and addresses of all partners including general, special or limited partners, the partnership interest of each individual, and any other pertinent records of the partnership.

8. Revise § 46.17 to read as follows:

§ 46.17 Inspection of records.

Each licensee shall, during ordinary business hours, promptly upon request, permit any duly authorized representative of the Department to enter his place of business and inspect such accounts, records, and memoranda as may be material (a) in the investigation of complaints under the Act, or (b) to the determination of ownership, control, packer, or State, country, or region or origin in connection with commodity inspections, or (c) to ascertain whether there is compliance with Section 9 of the Act, or (d) in administering the licensing and bonding provisions of the Act, or (e) if the licensee has been determined in a formal disciplinary proceeding to have violated the prompt payment provision of Section 2(4) of the Act, to determine whether, at the time of the inspection, there is compliance with that Section. Any necessary facilities for such inspection shall be extended to such

representative by the licensee, his agents, and employees.

9. Amend § 46.43 by adding new paragraph (ii) to read as follows:

§ 46.43 Terms construed.

(ii) "Commercial Unit" means a single shipment of one or more perishable agricultural commodities tendered for delivery on a single contract, such commercial unit must be accepted or rejected in its entirety. Acceptance of a commercial unit does not modify the parties' existing contractual rights and responsibilities.

Note. The amendments to these regulations have been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulations," and has been classified "significant." A copy of an approved Final Impact Analysis is available from Wilbur A. Rife, Head, License Section, Regulatory Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, Phone (202) 447-2189.

This becomes effective October 1, 1979.

Dated: August 24, 1979.

William T. Manley,
Deputy Administrator, Marketing Program Operations.

[FR Doc. 79-26984 Filed 8-28-79; 8:45 am]

BILLING CODE 3410-02-M

Soil Conservation Service**7 CFR Part 650****Compliance With NEPA**

AGENCY: Soil Conservation Service (SCS), U.S. Department of Agriculture, (USDA).

ACTION: Final rule.

SUMMARY: This revised rule prescribes the general procedures for compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 et seq.) and the Council on Environmental Quality's (CEQ) National Environmental Policy Act Regulations (40 CFR 1500-1508) issued November 29, 1978. This revised rule expands Part 650, Subpart A, to include all programs administered by SCS. The SCS rule adopts the CEQ regulations in total. The CEQ regulations will be distributed with the final SCS procedures.

EFFECTIVE DATE: August 29, 1979.

FOR FURTHER INFORMATION CONTACT: Dr. Gary A. Margheim, Acting Director, Environmental Services Division, U.S. Department of Agriculture, Soil Conservation Service, P.O. Box 2890, Washington, D.C. 20013, (202) 447-3839.

SUPPLEMENTARY INFORMATION: On May 2, 1979, the Soil Conservation Service

published revised rules for implementation of NEPA in SCS-assisted project actions.

This rule is a total revision of the procedures for implementing NEPA used by SCS to comply with the regulations of the Council on Environmental Quality, 40 CFR 1500-1508, published November 29, 1978. These rules are expanded to include procedures for implementing NEPA in all SCS-assisted programs. Several data-gathering and inventorying programs of SCS are categorically excluded from requirements to prepare an environmental impact statement (EIS).

SCS is introducing a new phrase, "environmental evaluation (EE)," to describe the interdisciplinary planning that is carried out before SCS takes action in any program it administers. The phrase "environmental assessment (EA)" was formerly used by SCS to describe this part of the planning process. The definition "environmental assessment" in the new CEQ regulations 40 CFR 1508.9 depicts a document rather than a process, making it necessary for SCS to use a new phrase.

These rules have been developed in consultation with the staff of the Council on Environmental Quality and are consistent with the NEPA procedures of the Secretary of Agriculture.

These proposed rules have been determined to be significant under Executive Order 12044 "Improving Government Regulations." An approved impact analysis is available by contacting Dr. Gary A. Margheim, Acting Director, Environmental Services Division, U.S. Department of Agriculture, Soil Conservation Service, P.O. Box 2890, Washington, D.C. 20013, (202) 447-3839.

During the 45-day commenting period, seven letters of comment were received on the proposed rules. Two letters were from Federal agencies, one letter was from a State agency, two letters were from State conservation associations, and two letters were from individuals. All written comments were considered in developing the final rules. In addition, a national briefing on the proposed revised rules was conducted on Monday, May 21, 1979. The full text of all comments received is on file and available for public inspection in Room 6105, South Agriculture Building, Environmental Services Division, SCS, USDA, Washington, D.C. 20013.

The principal points raised by those submitting written comments and the SCS response to each are as follows:

Comment 1: One comment suggested that SCS's rules should clearly state how NEPA compliance applies to SCS's Emergency Assistance Program under

Section 216 of the Flood Control Act of May 17, 1950.

Response: Actions under Section 216 of Pub. L. 81-516 are treated no different from other actions administered by SCS. Because potential effects of this program on the human environment are at least cumulatively significant, SCS has filed a final program EIS. If an individual environmental evaluation of a proposed action under this act indicates that it will not meet the circumstances considered in the program EIS, additional environmental documentation would be required. Only very unusual actions under any program would require exceptions under 40 CFR 1506.11. The program EIS provides information on environmental compliance procedures. Special treatment in these actions is therefore not warranted.

Comment 2: One agency requested nonstructural alternatives also be discussed in § 650.7(b)(3), Alternatives.

Response: SCS does not believe that a requirement for discussions of nonstructural alternatives for all situations should be included in the NEPA rules. The discussion of environmental evaluation in § 650.5(a)(3) states: "In SCS-assisted project actions, nonstructural, water conservation, and other alternatives that are in keeping with the Water Resources Council's Principles and Standards are to be considered if appropriate." This statement adequately reflects SCS procedural guidance for consideration of alternatives.

Comment 3: One agency indicated that in § 650.3(b)(8), SCS environmental policy, SCS should require, rather than encourage, local project sponsors to review with interested publics the operation and maintenance (O&M) of practices and programs specified in the contracts for projects. SCS should also indicate the details of O&M needed in a plan, as well as discuss mitigation.

Response: SCS monitors its programs to ensure compliance with the requirements of NEPA and to cooperate with other agencies in determining that environmental safeguards are carried out according to plans and project agreements. As part of specific NEPA documents such as an EIS, O&M is described in the same detail as other installation features. This information is available at public meetings to discuss with interested publics and is included in review drafts.

SCS has no authority to require sponsors to hold additional specific public participation activities for completed projects. However, SCS would do the appropriate inspections and monitoring of completed projects to

see that planned works operate as indicated in specific environmental documents. SCS does not believe that it is appropriate in these implementing procedures to present the details of O&M needed for all actions. These details are appropriate in the O&M plans for individual projects or in agency O&M manuals. SCS should not specifically discuss mitigation (§ 1505.3) in the policy section of its procedures.

Comment 4: One agency suggested that SCS remove the word "significant" in § 650.7(a)(1), and insert the phrase "or wildlife" after the words "aquatic."

Response: Section 650.7(a)(1) reflects § 1501.4(a)(1) of the CEQ rule concerning agency proposals that normally require an environmental impact statement. SCS has stated in these rules, which actions normally require an EIS, and which are exempted from an automatic EIS.

Actions along channels where no significant aquatic habitat exists are exempted from an automatic EIS. SCS feels the word "significant" is important in this rule because there are many channels, particularly the dry ephemeral streams in the West, that support a very limited aquatic habitat. In these cases, the environmental evaluation will provide the data to determine whether an EA or an EIS is prepared. The words "or wildlife" after the word "habitat" have been inserted in § 650.7(a)(1).

Comment 5: One agency requested that SCS substitute the word "identified" for "major" in the discussion of alternatives (§ 650.7(b)(3)).

Response: SCS agrees that the word "major" should be deleted.

Comment 6: One agency requested that the phrase "wetlands as well as fish and wildlife habitat" should be inserted after the word "farmlands" in § 650.7(b)(5).

Response: We agree and have made this change.

Comment 7: One agency disagreed with how scoping was presented in the SCS procedures. They stated that by comparing § 650.9(c) to the flow chart (Figure 1), it appears that scoping occurs immediately before the preparation of a notice of intent. They indicated that better planning would be fostered by including scoping as part of environmental evaluation.

Response: We agree that scoping should begin at the start of environmental evaluation. This has been clarified in the procedure § 650.9(c)(1). Formalized scoping, including scoping meetings, will not normally take place until the environmental evaluation indicates that an EIS may be needed. Once the need to prepare an EIS is established, SCS will publish a notice of intent to prepare an EIS.

Comment 8: One comment suggested that SCS's Guide for Environmental Assessment be highlighted to point out how environmental evaluation criteria will be used.

Response: The SCS Guide for Environmental Assessment describes the relationship between environmental evaluation and planning. The importance of this document has been highlighted in the SCS implementation regulations by describing its function at the beginning of § 650.5.

Comment 9: Another comment suggested that public participation be shown on the flow chart.

Response: The suggestion was considered, but because public participation occurs throughout planning, it cannot be portrayed at a single position on the flow chart.

Comment 10: One comment suggested that § 650.12 explain more clearly how its environmental evaluation process will culminate in a preferred alternative.

Response: The wide range of programs and projects administered by SCS results in an equally wide range of criteria that must be considered in each environmental evaluation. These criteria vary according to the problems and objectives of the applicant and the availability of natural resources to solve problems and meet objectives. Criteria include the rules and regulations for compliance with NEPA, and other resource preservation acts. It is not practical to include all such criteria in these rules. We believe that § 650.12, which details steps of program decisionmaking, responds to part 1505 of the CEQ regulations, and that public participation in decisionmaking ensures a wise choice of evaluatory procedures.

Comment 11: Another comment suggested that § 650.12 include a description of the content of the record of decision (ROD).

Response: The content of the ROD is noted in § 650.12(c) to serve as the public record of decision described in 40 CFR 1505.2. Because these rules are supplemental to the CEQ regulations, it was considered unnecessary to repeat the primary regulation (see 7 CFR 650.1(b)).

Comment 12: One comment suggested that draft EIS's should be sent to organizations, groups, and individuals noted in § 650.9(d)(3)(i).

Response: The public cited in both subsections is the same. This has been clarified by referring to § 650.9(d)(3)(i) in section 650.13, Review and Comment.

Comment 13: One comment suggested that SCS use a "supplement" instead of a "revision" of an EIS and that the rules also should provide for withdrawal of an EIS.

Response: SCS uses both terms, "revised" and "supplemented" to clarify the position of the action in the planning process. The term "revised" (§ 650.13(d)) is used in the planning process for actions in which substantial change has occurred. "Supplements" are made to the final EIS if a substantial project change has occurred that significantly affects the quality of the human environment or if it is necessary to clarify a point of concern. Provisions for withdrawal or rescission of an EIS are described in EPA's "Guidelines for Implementing Section 1506.9 of the CEQ Regulations." These guidelines will be distributed throughout SCS when they have been finalized.

Comment 14: Another comment suggested that SCS's 30-day public availability period for final EIS's be included in § 650.13(e).

Response: The provision for the public availability period is described in § 650.12(c)(3), but a reference to this substitution has been included as § 650.13(e)(3), to clarify the concern.

Comment 15: Two individuals suggested that SCS use the term "environmental analysis" instead of "environmental evaluation."

Response: For some years SCS has used the term "environmental assessment" (EA) to apply to the part of planning that inventories and estimates the potential effects of alternate solutions to resource problems on the human environment. CEQ has defined EA differently. In the search for a new term SCS decided on "environmental evaluation (EE)." The term "environmental analysis" was considered; however, its acronym would be EA, the same as for environmental assessment. It seems desirable to use the least confusing term.

Comment 16: Another comment suggested that the only way an action covered by a program EIS can be shown on the flow chart to need a site-specific EIS is by doing an EA. The comment suggested the flow chart be revised to require an EA at this point.

Response: The CEQ regulations, in § 1501.3, indicate that an EA is not always necessary to decide to prepare an EIS. SCS has the option to prepare an EA if appropriate. However, we do not believe this option needs to be shown in Fig. 1.

Comment 17: One comment suggested that the environmental assessment should not include any of the information required by § 650.11(b)(3). An appendix to the EIS should include only that information required by CEQ regulations. The last sentence of § 650.11(b)(5)(iii) should be deleted.

Response: A resource plan may be developed for an area without preparing an EIS. In the absence of an EIS, the environmental document forming the basis for the Finding of No Significant Impact (FNSI) is an EA and should include all the information necessary to reach a decision. All the information required by § 650.11(3) is needed by SCS to prepare a proper resource plan. The last sentence § 650.11(b)(5)(iii) is in conformance with § 1502.23 of the CEQ regulations.

Comment 18: One comment stated that social values cannot be judged to be significant in determining environmental impact.

Response: The CEQ regulations, in § 1508.14, indicate that social effects are not intended to be used by themselves to determine environmental impact. However, social values must be considered where they interrelate with other environmental effects on the human environment.

Comment 19: Another comment suggested that "or create controversies" be deleted from § 650.7(b)(1) because there was no basis in NEPA or the CEQ rules for considering that the creation of controversy may have a significant effect on the quality of the human environment.

Response: We agree and have deleted the phrase, but we should point out that CEQ rules do include considerations for "controversies" in their definition of "significantly."

Comment 20: One comment expressed concern over the criteria that will be used to determine if there is "significant" aquatic habitat that would require preparation of EIS for channel realignment. It was recommended that criteria be included to determine "significant" aquatic habitat.

Response: The definition of "significantly" verbatim from CEQ rules 40 CFR 1508.27, has been included in § 650.4. This definition will be used by the interdisciplinary team in determining if "significant" aquatic habitat exists. The determination of "no significant aquatic habitat" will not be the only factor used in determining whether an EIS will be prepared. In any event, this decision will be a part of the reviewable record.

Comment 21: One comment from a state conservation agency suggested that SCS has exceeded the requirements of complying with the NEPA process as outlined by CEQ in their rules and regulations published in the Federal Register on November 29, 1978. As an example they indicate that SCS is making the record of decision (ROD) a part of the environmental documents

and publishing a notice of its availability in the Federal Register.

Response: SCS has developed its NEPA implementing procedures in consultation with the Council of Environmental Quality as required in § 102(2)(b) of NEPA and § 1507.3(a) of the CEQ-NEPA rules. As part of this consultation, SCS learned that CEQ considers the ROD to be an environmental document. Therefore SCS did not exceed the requirements of the CEQ rules by considering the ROD as an environmental document. SCS may use whatever document it needs to complete its formal record. SCS has used a statement of findings (SOF) to document its decision since 1977 in compliance with its rule of August 1977. The ROD is an extension of the SOF with the name changed to correspond to the uniformity of terminology mandated by 40 CFR 1500-1508.

Similarly, SCS is not exceeding the intent of the CEQ rules if it publishes the notice of availability of the record of decision in the Federal Register. SCS consulted with CEQ to clarify the requirement (§ 1506.1) that an agency issues a record of decision. CEQ's intent is that the agency affirmatively make the record of decision available to the public, but leaves it up to the agency to decide how to affirmatively make the record of decision available. SCS has rewritten § 650.12(c) to clarify the timing and notification of both the ROD and the FNSI. Our intent in publishing the notice of availability of the ROD in the Federal Register and in local newspapers is to affirmatively call to the public's (§ 1505.2) attention that a decision has been made.

Comment 22: One comment stated, "Much of the SCS activity with which the local Conservation Districts are closely concerned is a succession of relatively minor individual actions taken within the limits of defined programs. Most or perhaps all of these activities in turn involve only the offering of technical advice to farmers, local government bodies, and other land occupiers, and to consulting specialists dealing with land and conservation problems—they do not involve SCS in any decisionmaking function, control responsibility, or financial support of the projects involved. There would seem to be no need for SCS filing on these individual projects, as the NEPA requirements, if any, should be met by the parties responsible for the respective projects. Thus, these activities as a whole might be covered by an SCS "Program EIS" applicable nation-wide, perhaps with appropriate subdivisions to identify particular classes of activity."

Response: We agree. It is SCS's intent to prepare program EIS's for such activities. The need for preparing program EIS's is addressed in § 650.7(b). We feel that SCS has a responsibility to call attention to legislated environmental constraints to those being provided technical assistance. These constraints such as wetlands, floodplains, and cultural resources will be addressed during the environmental evaluation. In its rules, SCS has included definitions of project and nonproject actions to emphasize that most SCS assistance is technical assistance to nonproject actions largely on nonfederal lands.

Comment 23: Another comment stated, that a similar approach might be appropriate where SCS or a conservation district has approval authority, such as the technical features of farm projects for which ASCS grants cost-sharing funds. Obviously the main NEPA filing on this should be by ASCS.

Response: Agriculture Stabilization and Conservation Service (ASCS) has a program EIS on the Agricultural Conservation (ACP) cost-sharing program. The NEPA filing referred to involves cost sharing only where ASCS is the lead agency and SCS is a cooperating agency. SCS is the lead agency for the technical assistance portion of the ACP cost sharing program and plans to prepare a program EIS for its technical assistance program. The roles of the lead agency and cooperating agencies are further addressed in § 650.9.

Comment 24: One comment indicated that where a project sponsor is required to file an EIS under state environmental policy rules, a Federal agency should not have to duplicate the process.

Response: We have revised § 650.10(a) to include adoption of an EIS by another Federal or State agency if it meets the requirements of the CEQ regulations and SCS-NEPA procedures. Further guidance on the Adoption of EIS's is given in 40 CFR 1506.3.

Having considered the comments reviewed and other relevant information, the SCS Administrator concludes that the proposed rules, with changes should be adopted as set forth below. Accordingly Title 7, Chapter VI, Subchapter F, Part 650, Subpart A is hereby amended and will be effective August 29, 1979.

(Catalog of Federal Domestic assistance programs numbered 10.900 through 10.908 National Archive Reference Services)

Dated: August 13, 1979.

R. M. Davis,
Administrator, Soil Conservation Service.

 - 650.12 SCS decisionmaking.
 - 650.13 Review and comment.
- Authority: 42 U.S.C. 4321 et seq.; Executive Order 11514 (Rev.); 16 U.S.C. 1001-1006; 7 U.S.C. 1010-1011; 16 U.S.C. 590 a-f, q; 7 CFR 2.62.

Subpart A—Procedures for SCS-Assisted Programs

§ 650.1 Purpose.

(a) This rule prescribes procedures by which SCS is to implement the provisions of NEPA. The Soil Conservation Service recognizes NEPA as the national charter for protection, restoration, and enhancement of the human environment. NEPA establishes policy, sets goals (Section 101), and provides means (Section 102) for carrying out this policy.

(b) The procedures included in this rule supplement CEQ's NEPA regulations, 40 CFR 1500-1508. CEQ regulations that need no additional elaboration to address SCS-assisted actions are not repeated in this rule, although the regulations are cited as references. The procedures include some overlap with CEQ regulations. This is done to highlight items of importance for SCS. This does not supersede the existing body of NEPA regulations.

(c) These procedures provide that—

- (1) Environmental information is to be available to citizens before decisions are made about actions that significantly affect the human environment;

- (2) SCS-assisted actions are to be supported to the extent possible by accurate scientific analyses that are technically acceptable to SCS;

- (3) SCS-prepared NEPA documents are to be available for public scrutiny; and

- (4) Documents are to concentrate on the issues that are timely and significant to the action in question rather than amassing needless detail.

(d) Procedures for implementing NEPA are designed to insure that environmental consequences are considered in decisionmaking. They allow SCS to assist individuals and nonfederal public entities to take actions that protect, enhance, and restore environmental quality.

(e) These procedures make possible the early identification of actions that have significant effects on the human environment to avoid delays in decisionmaking.

§ 650.2 Applicability.

This rule applies to all SCS-assisted programs including the uninstalled parts of approved projects that are not covered by environmental documents prepared under previous rules for compliance with NEPA. It is effective on the date of publication of the final rule. SCS is to consult with CEQ in the manner prescribed by 40 CFR 1506.11 if it is necessary to take emergency actions.

§ 650 Policy.

(a) *SCS mission.* The SCS mission is to provide assistance that will allow use and management of ecological, cultural, natural, physical, social, and economic resources by striving for a balance between use, management, conservation, and preservation of the Nation's natural resource base. The SCS mission is reemphasized and expanded to carry out the mandate of § 101(b) of NEPA, within other legislative constraints, in all its programs of Federal assistance. SCS will continue to improve and coordinate its plans, functions, programs, and recommendations on resource use so that Americans, as stewards of the environment for succeeding generations—

(1) Can maintain safe, healthful, productive, and esthetically and culturally pleasing surroundings that support diversity of individual choices; and

(2) Are encouraged to attain the widest range of beneficial uses of soil, water, and related resources without degradation to the environment, risk to health or safety, or other undesirable and unintended consequences.

(b) *SCS environmental policy.* SCS is to administer Federal assistance within the following overall environmental policies:

(1) Provide assistance to Americans that will motivate them to maintain equilibrium among their ecological, cultural, natural, physical, social, and economic resources by striving for a balance between conserving and

preserving the Nation's natural resource base.

(2) Provide technical and financial assistance through a systematic interdisciplinary approach to planning and decisionmaking to insure a balance between the natural, physical, and social sciences.

(3) Consider environmental quality equal to economic, social, and other factors in decisionmaking.

(4) Insure that plans satisfy identified needs and at the same time minimize adverse effects of planned actions on the human environment through interdisciplinary planning before providing technical and financial assistance.

(5) Counsel with highly qualified and experienced specialists from within and outside SCS in many technical fields as needed.

(6) Encourage broad public participation in defining environmental quality objectives and needs.

(7) Identify and make provisions for detailed survey, recovery, protection, or preservation of unique cultural resources that otherwise may be irrevocably lost or destroyed by SCS-assisted project actions, as required by Historic Preservation legislation and/or Executive Order.

(8) Encourage local sponsors to review with interested publics the operation and maintenance programs of completed projects to insure that environmental quality is not degraded.

(9) Advocate the retention of important farmlands and forestlands, prime rangeland, wetlands, or other lands designated by State or local governments whenever proposed conversions are caused or encouraged by actions or programs of a Federal agency, licensed by or require approval by a Federal agency, or are inconsistent with local or State government plans. Provisions are to be sought to insure that such lands are not irreversibly converted to other uses unless other national interests override the importance of preservation or otherwise outweigh the environmental benefits derived from their protection. In addition, the preservation of farmland in general provides the benefits of open space, protection of scenery, wildlife habitat, and in some cases, recreation opportunities and controls on urban sprawl.

(10) Advocate actions that reduce the risk of flood loss; minimize effects of floods on human safety, health, and welfare; and restore and preserve the natural and beneficial functions and values of flood plains.

(11) Advocate and assist in the reclamation of abandoned surface-

mined lands and in planning for the extraction of coal and other nonrenewable resources to facilitate restoration of the land to its prior productivity as mining is completed.

(12) Advocate the protection of valuable wetlands, threatened and endangered animal and plant species and their habitats, and designated ecosystems.

(13) Advocate the conservation of natural and manmade scenic resources to insure that SCS-assisted programs or activities protect and enhance the visual quality of the landscape.

(14) Advocate and assist in actions to preserve and enhance the quality of the Nation's waters.

§ 650.4 Definition of terms.

Definition of the following terms or phrases appear in 40 CFR 1508, CEQ regulations. These terms are important in the understanding and implementation of this rule. These definitions are not repeated in the interest of reducing duplication:

Categorical exclusion. (40 CFR 1508.4)

Cooperating agency. (40 CFR 1508.5)

Cumulative impact. (40 CFR 1508.7)

Environmental impact statement (EIS). (40 CFR 1508.11)

Human environment. (40 CFR 1508.14)

Lead agency. (40 CFR 1508.16)

Major Federal action. (40 CFR 1508.18)

Mitigation. (40 CFR 1508.20)

NEPA process. (40 CFR 1508.21)

Scope. (40 CFR 1508.25)

Scoping. (40 CFR 1501.7)

Tiering. (40 CFR 1508.28)

(a) *Channel realignment.* Channel realignment includes the construction of a new channel or a new alignment and may include the clearing, snagging, widening, and/or deepening of the existing channel. (Channel Modification Guidelines, 43 FR 8276).

(b) *Environmental assessment (EA).* (40 CFR 1508.9)

(1) An environmental assessment is a concise public document for which a Federal agency is responsible that—

(i) Briefly provides sufficient evidence and analysis for determining whether to prepare an environmental impact statement or a finding of no significant impact.

(ii) Aids an agency's compliance with the Act when no environmental impact statement is necessary.

(iii) Facilitates preparation of an environmental impact statement when one is necessary.

(2) An environmental assessment includes brief discussions of the need for the proposal, alternatives as required by section of the environmental impacts of the proposed action and alternatives,

and a list of agencies and persons consulted.

(c) *Environmental evaluation.* The environmental evaluation (EE) (formerly referred to by SCS as an environmental assessment) is the part of planning that inventories and estimates the potential effects on the human environment of alternative solutions to resource problems. A wide range of environmental data together with social and economic information is considered in determining whether a proposed action is a major Federal action significantly affecting the human environment. The environmental evaluation for a program, regulation, or individual action is used to determine the need for an environmental assessment or an environmental impact statement. It also aids in the consideration of alternatives and in the identification of available resources.

(d) *Federally-assisted actions.* These actions are planned and carried out by individuals, groups, or local units of government largely on nonfederal land with technical and/or financial assistance provided by SCS.

(e) *Interdisciplinary planning.* SCS uses an interdisciplinary environmental evaluation and planning approach in which specialists and groups having different technical expertise act as a team to jointly evaluate existing and future environmental quality. The interdisciplinary group considers structure and function of natural resource systems, complexity of problems, and the economic, social, and environmental effects of alternative actions. Public participation is an essential part of effective interdisciplinary planning. Even if an SCS employee provides direct assistance to an individual land user, the basic data used is a result of interdisciplinary development of guide and planning criteria.

(f) *Nonproject actions.* Nonprofit actions consist of technical and/or financial assistance provided to an individual, group, or local unit of government by SCS primarily through a cooperative agreement with a local conservation district, such as land treatment recommended in the Conservation Operations, Great Plains Conservation, Rural Abandoned Mine, and Rural Clean Water Programs. These actions may include consultations, advice, engineering, and other technical assistance that land users usually cannot accomplish by themselves. Nonproject technical and/or financial assistance may result in the land user installing field terraces, waterways, field leveling, onfarm drainage systems, farm ponds, pasture management,

conservation tillage, critical area stabilization, and other conservation practices.

(g) *Notice of intent (NOI)* (40 CFR 1508.22). A notice of intent is a brief statement inviting public reaction to the decision by the responsible Federal official to prepare an EIS for a major Federal action. The notice of intent is to be published in the Federal Register, circulated to interested agencies, groups, individuals, and published in one or more newspapers serving the area of the proposed action.

(h) *Project actions.* A project action is a formally planned undertaking that is carried out within a specified area by sponsors for the benefit of the general public. Project sponsors are units of government having the legal authority and resources to install, operate, and/or maintain works of improvement.

(i) *Record of Decision.* (ROD) (40 CFR 1505.2). A record of decision is a concise written rationale by the RFO regarding implementation of a proposed action requiring an environmental impact statement. This was previously defined by SCS as a Statement of Findings (SOF).

(j) *Responsible Federal official (RFO).* The SCS Administrator is the responsible Federal official (RFO) for compliance with NEPA regarding proposed legislation, programs, legislative reports, regulations, and program EIS's. SCS state conservationists (STC's) are the RFO's for compliance with the provisions of NEPA in other SCS-assisted actions.

(k) *Significantly.* (40 CFR 1508.27) "Significantly" as used in NEPA requires considerations of both context and intensity:

(1) *Context.* This means that the significance of an action must be analyzed in several contexts such as society as a whole (human, national), the affected region, the affected interests, and the locality. Significance varies with the setting of the proposed action. For instance, for a site-specific action, significance usually depends on the effects in the locale rather than in the world as a whole. Both short- and long-term effects are relevant.

(2) *Intensity.* This refers to the severity of impact. Responsible officials must bear in mind that more than one agency may make decisions about partial aspects of a major action.

The following should be considered in evaluating intensity:

(i) Impacts that may be both beneficial and adverse. A significant effect may exist even if the Federal agency believes that on balance the effect will be beneficial.

(ii) The degree to which the proposed action affects public health or safety.

(iii) Unique characteristics of the geographic area such as proximity to historic or cultural resources, park lands, prime farmlands, wetlands, wild and scenic rivers, or ecologically critical areas.

(iv) The degree to which the effects on the quality of the human environment are likely to be highly controversial.

(v) The degree to which the possible effects on the human environment are highly uncertain or involve unique or unknown risks.

(vi) The degree to which the action may establish a precedent for future actions with significant effects or represents a decision in principle about a future consideration.

(vii) Whether the action is related to other actions with individually insignificant but cumulatively significant impacts. Significance exists if it is reasonable to anticipate a cumulatively significant impact on the environment. Significance cannot be avoided by terming an action temporary or by breaking it down into small component parts.

(viii) The degree to which the action may adversely affect districts, sites, highways, structures, or objects listed in or eligible for listing in the National Register of Historic Places or may cause loss or destruction of significant scientific, cultural, or historical resources.

(ix) The degree to which the action may adversely affect an endangered or threatened species or its habitat that has been determined to be critical under the Endangered Species Act of 1973 as amended.

(x) Whether the action threatens a violation of Federal, State, or local law or requirements imposed for the protection of the environment.

(l) *Finding of no significant impact (FNSI).* (40 CFR 1508.13) "Finding of No Significant Impact" means a document by a Federal agency briefly presenting the reasons why an action not otherwise excluded (§ 1508.4) will not have a significant effect on the human environment, and an environmental impact statement therefore will not be prepared. It shall include the environmental assessment or a summary of it and shall note any other environmental documents related to it (§ 1501.7(a)(5)). If the assessment is included, the finding need not repeat any of the discussion in the assessment but may incorporate it by reference.

§ 650.5 Environmental evaluation in planning.

(a) *General.* Environmental evaluation (EE) integrates environmental concerns throughout the planning, installation, and operation of SCS-assisted projects. The EE applies to all assistance provided by SCS, but planning intensity, public involvement, and documentation of actions vary according to the scope of the action. SCS begins consideration of environmental concerns when information gathered during the environmental evaluation is used:

- (1) To identify environmental concerns that may be affected, gather baseline data, and predict effects of alternative courses of actions;
- (2) To provide data to applicants for use in establishing objectives commensurate with the scope and complexity of the proposed action;
- (3) To assist in the development of alternative courses of action; (40 CFR 1502.14). In SCS-assisted project actions, nonstructural, water conservation, and other alternatives that are in keeping with the Water Resources Council's Principles and Standards are considered, if appropriate.
- (4) To perform other related investigations and analyses as needed, including economic evaluation, engineering investigations, etc.
- (5) To assist in the development of detailed plans for implementation and operation and maintenance.

(b) *Procedures.* SCS's Guide for Environmental Assessment issued in March 1977 and published in the Federal Register on August 8, 1977, provides guidance for conducting an environmental evaluation. (42 FR 40123-40167).

BILLING CODE 3410-16-M

NEPA in SCS Planning

BILLING CODE 3410-10-C

(c) *Decision points.* Figure 1 illustrates the decision points for compliance with NEPA in SCS decisionmaking.

§ 650.6 Categorical exclusions.

(a) Some SCS programs or parts of programs do not normally create significant individual or cumulative impacts on the human environment. Therefore, an EA or EIS is not needed. These are data gathering and interpretation programs and include—

- (1) Soil Survey—7 CFR 611;
- (2) Snow Survey and Water Supply Forecasts—7 CFR 612;
- (3) Plant Materials for Conservation—7 CFR 613;
- (4) Inventory and Monitoring—Catalog of Federal Domestic Assistance—10.908; and
- (5) River Basin Studies under Section 6 of Pub. L. 83-566 as amended—7 CFR 621.

(b) The environmental evaluation performed by the RFO when any new action under these programs is planned is to identify extraordinary circumstances that might lead to significant individual or cumulative impacts. Actions that have potential for significant impacts on the human environment are not categorically excluded.

§ 650.7 When to prepare an EIS.

The following are categories of SCS action used to determine whether or not an EIS is to be prepared.

(a) *An EIS is required for—*

- (1) Projects that include stream channel realignment or work to modify channel capacity by deepening or widening where significant aquatic or wildlife habitat exists. The EE will determine if the channel supports significant aquatic or wildlife habitat;
- (2) Projects requiring Congressional action;
- (3) Broad Federal assistance programs administered by SCS when the environmental evaluation indicates there may be significant cumulative impacts on the human environment (§ 650.7(c)); and
- (4) Other major Federal actions that are determined after environmental evaluation to affect significantly the quality of the human environment (§ 650.7(b)). If it is difficult to determine whether there is a significant impact on the human environment, it may be necessary to complete the EE and prepare an EA in order to decide if an EIS is required.

(b) The RFO is to determine the need for an EIS for each action, program, or regulation. An environmental evaluation, using a systematic interdisciplinary analysis and

evaluation of data and information responding to the five provisions of Section 102(2)(C) of NEPA, will assist the RFO in deciding if the action requires the preparation of an EIS. In analyzing and evaluating environmental concerns, the RFO will answer the following questions:

- (1) *Environmental impact.* Will the proposed action significantly affect the quality of the human environment (40 CFR 1508.14)? For example, will it significantly alter or destroy valuable wetlands, important farmlands, cultural resources, or threatened and endangered species? Will it affect social values, water quality, fish and wildlife habitats, or wilderness and scenic areas?
- (2) *Adverse environmental effects that cannot be avoided.* What are the important environmental amenities that would be lost if the proposed action were implemented?
- (3) *Alternatives.* Are there alternatives that would achieve the planning objectives but avoid adverse environmental effects?
- (4) *Short-term uses versus long-term productivity.* Will the proposed actions, in combination with other actions, sacrifice the enhancement of significant long-term productivity as a tradeoff for short-term uses?
- (5) *Commitment of resources.* Will the proposed action irreversibly and irretrievably commit the use of resources such as important farmlands, wetlands, and fish and wildlife habitat?

(c) *Criteria for determining the need for a program EIS:*

- (1) A program EIS is required if the environmental evaluation reveals that actions carried out under the program have individually insignificant but cumulatively significant environmental impacts.
- (2) A project EIS, in lieu of a program EIS, is required if the environmental evaluation reveals that actions carried out under the program will have both individually and cumulatively significant environmental impacts. (7 CFR 620-623 and 640-643).
- (d) The RFO, through the process of tiering, is to determine if a site-specific EA or EIS is required for an individually significant action that is included in a program EIS.

(e) *When to prepare an environmental assessment (EA).*

An environmental assessment (EA) is to be prepared for—

- (a) Land and water resource projects that are not included in § 650.7(a) (1) through (4) for which State and local units of government receive Federal

technical and financial assistance from SCS (7 CFR 620-623; and 640-643); and

(b) Other actions not included in a program EIS nor categorically excluded that the EE reveals may be a major Federal action significantly affecting the quality of the human environment.

§ 650.9 NEPA and interagency planning.

- (a) *Lead agency.* (1) SCS is to be the lead agency for actions under programs it administers. If the actions affect more than one State, the SCS Administrator is to designate one SCS state conservationist as the RFO.
- (2) SCS normally takes the role of lead agency in actions that share program responsibilities among USDA agencies if SCS provides the majority of funds for the actions. If the lead agency role is in question, the role of SCS and other USDA agencies is to be determined by the USDA Environmental Coordinator, Office of Environmental Quality Activities.
- (3) If SCS and Federal agencies outside USDA cannot agree on which will be the lead agency and which will be the cooperating agencies, the procedures in 40 CFR 1501.5(e) are to be followed.
- (4) SCS, as lead agency, is to coordinate the participation of all concerned agencies in developing the EIS according to the provisions of 40 CFR 1501.6(a).
- (b) *Cooperating agencies.* (1) SCS is to request, as appropriate, the assistance of cooperating agencies in preparing the environmental evaluation. This assistance will broaden the expertise in the planning and help to avoid future conflict. SCS is to request assistance in determining the scope of issues to be addressed and identifying the significant issues related to a proposed action from Federal agencies that have jurisdiction by law or special expertise.
- (2) SCS is to act as a cooperating agency if requested. SCS may request to be designated as a cooperating agency if proposed actions may affect areas of SCS expertise, such as prime farmlands, soils, erosion control, and agricultural sources of nonpoint pollution. SCS, as a cooperating agency, is to comply with the requirements of 40 CFR 1501.6(b) to the extent possible depending on funds, personnel, and priority. If insufficient funds or other resources prevent SCS from participating fully as a cooperating agency, SCS is to request the lead agency to provide funds or other resources which will allow full participation.
- (c) *Scoping.* See 40 CFR 1501.7 for a definition of scoping.
- (1) SCS is to use scoping to identify and categorize significant environmental

issues in its environmental evaluation. Formalized scoping is used to insure that an analytical EIS can be prepared that will reduce paperwork and avoid delay. Scoping allows SCS to obtain the assistance and consultation of affected agencies that have special expertise or legal jurisdiction in the proposed action. If early environmental evaluation identifies a need for an EIS, SCS is to publish a notice of intent (NOI) to prepare an EIS. The NOI is to request the assistance of all interested agencies, groups, and persons in determining the scope of the evaluation of the proposed action.

(2) Normally a scoping meeting is held and Federal, State, or local agencies that have special expertise or legal jurisdiction in resource values that may be significantly affected are requested to participate. The scoping meeting will identify agencies that may become cooperating agencies.

(3) In the scoping meeting, the range of actions, alternatives, and impacts to be evaluated and included in the EIS as defined in (40 CFR 1508.25) are to be determined. Tiering (40 CFR 1508.28) may be used to define the relation of the proposed statement to other statements.

(4) Periodic meetings of the cooperating agencies are to be held at important decisionmaking points to provide timely interagency, interdisciplinary participation.

(5) Scoping is to include the items listed in 40 CFR 1501.7(a) and may also include any of the activities in 40 CFR 1501.7(b). Appropriate, timely requests and notification are to be made to promote public participation in scoping in accordance with (d) of this section.

(6) The RFO through the scoping process will set time and page limits as prescribed in 40 CFR 1501.8. Time and page limits are established by SCS in consultation with sponsors and others according to the projected availability of resources. The RFO is to make the applicant aware of the possible need for revising time and page limits because of changes in resources.

(d) *Public participation.* (1) *General.* Public participation activities begin early in the EE and are to be appropriate to the proposed action. For example, extensive public participation activities are required in the implementation of new programs and project actions, but limited public participation is appropriate for nonproject technical and financial assistance programs on nonfederal land.

(2) *Early public involvement.* The public is to be invited and encouraged to participate in the early stages of planning, including the consideration of the potential effects of SCS-assisted

actions on significant environmental resources such as wetlands, flood plains, cultural values, endangered species, important farmland.

(3) *Project activities.* The following are general considerations for providing opportunities for public participation:

- (i) *Identification of interested public.* The interested public consisting of but not limited to individuals, groups, organizations, and government agencies are to be identified, sought out, and encouraged to participate in and contribute to interdisciplinary planning and environmental evaluation.
- (ii) *Public notices.* (40 CFR 1506.6) If the effects of an action are primarily of local concern, notice of each public meeting or hearing should be: Submitted to State and areawide clearinghouses pursuant to OMB Circular A-95 (revised); submitted to Indian tribes if they are interested; published in local newspapers; distributed through other local media; provided to potentially interested community organizations including small business associations; published in newsletters that may be expected to reach potentially interested persons; mailed directly to owners and occupants of nearby or affected property; and posted onsite and offsite in the area where the action is to be located.
- (iii) *State statutes.* If official action by the local units of government cooperating in the proposal is governed by State statute, the public notice and mailing requirement of the statute is to be followed. If the effects of an action are of national concern, notice is to be published in the Federal Register and mailed to national organizations reasonably expected to be interested.
- (iv) *Public meetings.* The RFO, after consultation with the sponsors, is to determine when public meetings or hearings are to be held. Public meetings may be in the form of a workshop, tour, open house, etc. Public involvement will include early discussion of flood-plain management and protection of wetlands, where appropriate. Environmental information is to be presented and discussed along with other appropriate information. To the extent practical, pertinent information should be made available before the meetings.
- (v) *Documentation.* The RFO is to maintain a reviewable record of public participation in the environmental evaluation process.
- (4) *Nonproject activities.* Public participation in the planning and application of conservation practices with individual land users is accomplished primarily through conservation districts. These districts

are governed by boards of supervisors directors, commissioners, etc., who are elected and/or appointed to insure that soil, water, related resources, and environmental qualities in the district are maintained and improved. The public is to be encouraged to participate in the development of long-range district programs and district annual plans. The district keeps the public informed through public meetings, district newsletters, news stories, radio and television programs, and annual reports.

§ 650.10 Adoption of an EIS prepared by a cooperating agency.

(40 CFR 1506.3)

(a) If SCS adopts an EIS prepared by another Federal or State agency, the RFO is to review the document to insure that it meets the requirements of the CEQ regulations and SCS-NEPA procedures.

(b) If the actions included in the EIS are substantially the same as those proposed by SCS, the RFO is to recirculate the EIS as "final." The final EIS is to include an appropriate explanation of the action. If these actions are not substantially the same, the EIS is to be supplemented and recirculated as a draft EIS. The RFO is to inform the preparing agency of the proposed action.

(c) If the adopted EIS is not final, if it is the subject of a referral under 40 CFR 1504, or if the statement's adequacy is in litigation, the RFO is to include an appropriate explanation in the EIS.

(d) The RFO is to take appropriate action to inform the public and appropriate agencies of the proposed action.

§ 650.11 Environmental documents.

(a) SCS is to use the following documents in compliance with NEPA (see § 650.4):

- (1) Environmental assessments (EA)
- (2) Environmental impact statements (EIS)
- (3) Notice of intent (NOI)
- (4) Finding of no significant impact (FNSI)
- (5) Record of decision (ROD)
- (b) The format and content of each document is to be appropriate to the action being considered and consistent with the CEQ regulations.
- (1) To reduce duplication, SCS may combine environmental documents with other planning documents of the same proposal, as appropriate. For example, SCS, in consultation with CEQ and the office of the Secretary of Agriculture, has determined that each EIS is to satisfy the requirements for a regulatory impact analysis as required by Executive Order 12044. This may

are governed by boards of supervisors directors, commissioners, etc., who are elected and/or appointed to insure that soil, water, related resources, and environmental qualities in the district are maintained and improved. The public is to be encouraged to participate in the development of long-range district programs and district annual plans. The district keeps the public informed through public meetings, district newsletters, news stories, radio and television programs, and annual reports.

§ 650.10 Adoption of an EIS prepared by a cooperating agency.

(40 CFR 1506.3)

(a) If SCS adopts an EIS prepared by another Federal or State agency, the RFO is to review the document to insure that it meets the requirements of the CEQ regulations and SCS-NEPA procedures.

(b) If the actions included in the EIS are substantially the same as those proposed by SCS, the RFO is to recirculate the EIS as "final." The final EIS is to include an appropriate explanation of the action. If these actions are not substantially the same, the EIS is to be supplemented and recirculated as a draft EIS. The RFO is to inform the preparing agency of the proposed action.

(c) If the adopted EIS is not final, if it is the subject of a referral under 40 CFR 1504, or if the statement's adequacy is in litigation, the RFO is to include an appropriate explanation in the EIS.

(d) The RFO is to take appropriate action to inform the public and appropriate agencies of the proposed action.

§ 650.11 Environmental documents.

(a) SCS is to use the following documents in compliance with NEPA (see § 650.4):

- (1) Environmental assessments (EA)
- (2) Environmental impact statements (EIS)
- (3) Notice of intent (NOI)
- (4) Finding of no significant impact (FNSI)
- (5) Record of decision (ROD)
- (b) The format and content of each document is to be appropriate to the action being considered and consistent with the CEQ regulations.
- (1) To reduce duplication, SCS may combine environmental documents with other planning documents of the same proposal, as appropriate. For example, SCS, in consultation with CEQ and the office of the Secretary of Agriculture, has determined that each EIS is to satisfy the requirements for a regulatory impact analysis as required by Executive Order 12044. This may

are governed by boards of supervisors directors, commissioners, etc., who are elected and/or appointed to insure that soil, water, related resources, and environmental qualities in the district are maintained and improved. The public is to be encouraged to participate in the development of long-range district programs and district annual plans. The district keeps the public informed through public meetings, district newsletters, news stories, radio and television programs, and annual reports.

§ 650.10 Adoption of an EIS prepared by a cooperating agency.

(40 CFR 1506.3)

(a) If SCS adopts an EIS prepared by another Federal or State agency, the RFO is to review the document to insure that it meets the requirements of the CEQ regulations and SCS-NEPA procedures.

(b) If the actions included in the EIS are substantially the same as those proposed by SCS, the RFO is to recirculate the EIS as "final." The final EIS is to include an appropriate explanation of the action. If these actions are not substantially the same, the EIS is to be supplemented and recirculated as a draft EIS. The RFO is to inform the preparing agency of the proposed action.

(c) If the adopted EIS is not final, if it is the subject of a referral under 40 CFR 1504, or if the statement's adequacy is in litigation, the RFO is to include an appropriate explanation in the EIS.

(d) The RFO is to take appropriate action to inform the public and appropriate agencies of the proposed action.

§ 650.11 Environmental documents.

(a) SCS is to use the following documents in compliance with NEPA (see § 650.4):

- (1) Environmental assessments (EA)
- (2) Environmental impact statements (EIS)
- (3) Notice of intent (NOI)
- (4) Finding of no significant impact (FNSI)
- (5) Record of decision (ROD)
- (b) The format and content of each document is to be appropriate to the action being considered and consistent with the CEQ regulations.
- (1) To reduce duplication, SCS may combine environmental documents with other planning documents of the same proposal, as appropriate. For example, SCS, in consultation with CEQ and the office of the Secretary of Agriculture, has determined that each EIS is to satisfy the requirements for a regulatory impact analysis as required by Executive Order 12044. This may

are governed by boards of supervisors directors, commissioners, etc., who are elected and/or appointed to insure that soil, water, related resources, and environmental qualities in the district are maintained and improved. The public is to be encouraged to participate in the development of long-range district programs and district annual plans. The district keeps the public informed through public meetings, district newsletters, news stories, radio and television programs, and annual reports.

§ 650.10 Adoption of an EIS prepared by a cooperating agency.

(40 CFR 1506.3)

(a) If SCS adopts an EIS prepared by another Federal or State agency, the RFO is to review the document to insure that it meets the requirements of the CEQ regulations and SCS-NEPA procedures.

(b) If the actions included in the EIS are substantially the same as those proposed by SCS, the RFO is to recirculate the EIS as "final." The final EIS is to include an appropriate explanation of the action. If these actions are not substantially the same, the EIS is to be supplemented and recirculated as a draft EIS. The RFO is to inform the preparing agency of the proposed action.

(c) If the adopted EIS is not final, if it is the subject of a referral under 40 CFR 1504, or if the statement's adequacy is in litigation, the RFO is to include an appropriate explanation in the EIS.

(d) The RFO is to take appropriate action to inform the public and appropriate agencies of the proposed action.

necessitate modifying the recommended CEQ format. If documents are combined, the RFO is to include the information and sections required by the CEQ regulations (40 CFR 1502.10). The environmental impact statement should indicate those considerations, including factors not related to environmental quality, that are likely to be relevant to a decision.

(2) The RFO is to establish the format and content of each document giving full consideration to the guidance and requirements of the CEQ regulations. The SCS technical service center director is to provide guidance and concurrence on the format and content if the SCS state conservationist is the RFO. The results of scoping are to determine the content of the EA or the EIS and the amount of detail needed to analyze the impacts.

(3) In addition to the minimum requirements of the CEQ regulations (40 CFR 1502.10), environmental assessments and environmental impact statements are to include—

(i) A brief description of public participation activities of agencies, groups, and individuals during the environmental evaluation;

(ii) A description of the hazard potential of each alternative, including an explanation of the rationale for dam classification and the risk of dam failure from overtopping for other causes;

(iii) Information identifying any approved regional plans for water resource management in the study area (40 CFR 1506.2(d)) and a statement on whether the proposed project is consistent with such plans;

(iv) All Federal permits, licenses, and other entitlements that must be obtained (40 CFR 1502.25(b)); and

(v) A brief description of major environmental problems, conflicts, and disagreements among groups and agencies and how they were resolved. Unresolved conflicts and the SCS's proposal for resolving the disagreements before the project is implemented are to be summarized.

(4) *Letters of comment and responses.* (40 CFR 1503.4, 1502.9(b)) Letters of comment that were received and the responses to these comments are to be appended to the final EIS. Opposing views and other substantive comments that were not adequately discussed in the draft EIS are to be incorporated in the final EIS.

(5) *Appendix.* The RFO may use an appendix to an EA or EIS. If an appendix is too voluminous to be circulated with the EIS, the RFO is to make it available on request. If an appendix is included it is to—

(i) Meet the requirements of 40 CFR 1502.18;

(ii) Identify any methodologies used (40 CFR 1502.24) and make explicit reference to other sources relied on for conclusions; and

(iii) Briefly describe the relationship between the benefit-cost analysis and any analyses of unquantified environmental impacts, values, and amenities. "For purposes of complying with the Act, the weighing of the merits or drawbacks of the various alternatives need not be displayed in a monetary cost benefit and should not be when these are important qualitative considerations." (40 CFR 1502.23).

§ 650.12 SCS decisionmaking.

(a) *General.* The purpose of these procedures is to insure that environmental information is provided to decision makers in a timely manner. The NEPA process is a part of SCS decisionmaking. The RFO is to insure that the policies and purposes of NEPA and CEQ regulations are complied with in SCS decisionmaking by:

(1) Including in all decision documents and supporting environmental documents a discussion of all alternatives considered in the decision. Alternatives to be considered in reaching a decision will be available to the public.

(2) Submitting relevant environmental documents, comments, and responses with other decision documents through the review process.

(3) Including in the record of formal rulemaking or adjudicatory proceedings relevant environmental documents, comments and responses.

(4) Providing for pre- and post-project monitoring (40 CFR 1505.2(c), 1505.3) and evaluation in representative projects to insure that planning and evaluation procedures are performed according to sound criteria.

(b) *Decision points in SCS-assisted projects.* SCS administers programs that may have a significant effect on the human environment. Program procedures incorporate provisions for compliance with NEPA and for providing environmental information to the public, other agencies, and decision makers in a timely manner. SCS provides technical and financial assistance for projects under the Watershed Protection and Flood Prevention and the Resource Conservation and Development (RC&D) programs. These usually require the preparation of project EA's or EIS's. The major decisionmaking points and their relation to NEPA compliance are as follows:

(1) For Watershed Protection and Flood Prevention projects:

(i) Application for assistance by the sponsoring local organization (SLO).

(ii) A preauthorization report identifying goals, alternatives, and effects of alternatives (including environmental impacts) prepared by the RFO and submitted to the applicant for decision. It is circulated to local, State, and Federal agencies and public comment is solicited. A decision is made to stop planning assistance or to develop a watershed plan.

(iii) Granting of planning authorization by the Administrator. The RFO must provide an evaluation of the potential environmental impacts to obtain the authorization.

(iv) A watershed agreement between the SLO and SCS. The agreement is based on a completed watershed plan and associated environmental documents, which have been adequately reviewed within SCS.

(v) A project agreement between the SLO and the RFO executed after the NEPA process is complete and the watershed plan has been approved and final plans and specifications have been developed.

(2) For RC&D measure plans:

(i) A request for assistance (measure proposal) is reviewed by the RC&D council to insure that the proposal is in accordance with the RC&D area plan. The proposal is then referred to SCS.

(ii) A preliminary report is prepared by the RFO to identify goals, alternatives, and effects (including environmental impacts). The report is submitted to the sponsor for review. The sponsor may then apply to SCS for planning assistance for measures considered in the preliminary report.

(iii) An authorization for planning assistance is granted by the RFO.

(iv) The RC&D measure plan is signed by the applicant and the RFO after the preparation and review of the measure plan and environmental documents.

(v) A project agreement is signed between the applicant and the RFO after the NEPA process is complete, the measure plan has been approved, and final plans and specifications have been prepared.

(c) *Record of decision.* (1) *EIS's.* The RFO is to prepare a concise record of decision (ROD) for actions requiring an EIS. The record of decision is to be prepared and signed by the RFO following the 30-day administrative action period initiated by the EPA's publication of the notice of availability of the final EIS in the Federal Register. It is to serve as the public record of decision as described in 40 CFR 1505.2 of the CEQ regulations. The ROD is to

be distributed to all who provided substantive comments on the draft EIS and all others who request it. A notice of availability of the ROD will be published in the Federal Register and local newspaper(s) serving the project area. The RFO may choose to publish the entire ROD.

(2) *Environmental Assessments (EA).* If the EA indicates that the proposed action is not a major Federal action significantly affecting the quality of the human environment, the RFO is to prepare a finding of no significant impact (FNSI).

(3) *Distribution and publication of the FNSI (§ 1506.6(b)).* The RFO is to distribute the FNSI to interested agencies and individuals. Notice of its availability is to be published in the Federal Register and in one or more newspapers serving the area of the proposed action. Single copy requests for the document are to be filled without charge. A charge may be made for multiple copies. Implementing action is not to be initiated for 30 days after the notice of availability of the FNSI has been published in the Federal Register.

(d) *Changes in actions.* When it appears that a project or other action needs to be changed, the RFO will perform an environmental evaluation of the authorized action before making a change.

§ 650.13 Review and comment.

In addition to the requirements of 40 CFR 1503, 1506.10 and 1506.11, SCS will take the following steps in distributing EIS's for review and comment:

(a) *Draft EIS's.* Five copies of the draft EIS are to be filed by the RFO with the Office of Environmental Review, A-104, Environmental Protection Agency (EPA), Washington, D.C. At the same time, the RFO is to send copies of the draft EIS to the following:

(1) *Other Federal agencies.* The regional office of EPA and other agencies that have jurisdiction by law or special expertise with respect to any environmental effect, other Federal agencies (including appropriate field and regional offices), and affected Indian tribes.

(2) *State and local agencies.* OMB Circular No. A-95 (Revised), through its system of State and areawide clearinghouses, provides a means for obtaining the views of State and local environmental agencies that can assist in the preparation and review of EIS's.

(3) *Organizations, groups, and individuals.* A copy of the draft EIS is to be sent to the appropriate official of each organization or group and each individual of the interested public (§ 650.9(d)(3)(i)) and to others as

requested. A charge may be made for multiple copy requests.

(b) *Time period for comment.* The time period for review ends 45 days after the date EPA publishes the notice of public availability of the draft in the Federal Register. A 15-day-extension of time for review and comment is to be considered by the RFO when such requests are submitted in writing. If neither comments nor a request for an extension is received at the end of the 45-day period, it is to be presumed that the agency or party from whom comments were requested has no comments to make.

(c) *News releases.* In addition to the notice of availability published in the Federal Register by EPA, the RFO is to announce the availability of the draft EIS in one or more newspapers serving the area.

(d) *Revising a draft EIS.* If significant changes in the proposed action are made as a result of comments on the draft EIS, a revised draft EIS may be necessary. The revised draft EIS is to be recirculated for comment in the same manner as a draft EIS.

(e) *Final EIS's.* After the review period for the draft EIS, the RFO is to prepare a final EIS, making adjustments where necessary by taking into consideration and responding to significant comments and opposing viewpoints received on the draft EIS. The following steps are to be taken in filing and distributing the final EIS:

(1) Letters of comment are to be appended to the final EIS. If numerous repetitive responses are received, summaries of the repetitive comments and a list of the groups or individuals who commented may be appended in lieu of the actual letter.

(2) The RFO is to send five copies of the final EIS to EPA's Office of Environmental Review, and a copy of the final EIS to each State and Federal agency, organization, group, and individual who commented on the draft EIS. Single copy requests for copies of the final EIS will be provided without charge. A charge may be made for multiple copy requests.

(3) During the 30-day administrative action period noted in § 650.12(c), SCS will make its final EIS available to the public (40 CFR 1506.10).

(f) *Supplements to EIS's.* (1) If SCS determines that it is necessary to clarify or amplify a point of concern raised after the final EIS is filed, appropriate clarification or amplification is to be sent to EPA with information copies furnished to those who received copies of the final EIS. The waiting periods do not apply.

(2) If the RFO determines that the final EIS or supplement to the original EIS previously filed becomes inadequate because of a major change in the plan for the proposed action that significantly affects the quality of the human environment, a new EIS is to be prepared, filed, and distributed as described in this section.

BILLING CODE 3410-16-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 103

Designation of Aircraft Pilots and Helicopter Pilots as Immigration Officers

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This order amends the regulations of the Immigration and Naturalization Service to add aircraft pilots and helicopter pilots to the listing of Service personnel who are designated as immigration officers. The amendment is necessary and intended to add those officers to the listing of Service employees who are designated as immigration officers which is published in the Code of Federal Regulations.

EFFECTIVE DATE: August 29, 1979.

FOR FURTHER INFORMATION CONTACT: James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION: This is an amendment to 8 CFR 103.1(q) to add aircraft pilots and helicopter pilots to the list of immigration officers contained in the Service regulations. These officers are being listed because when they are not piloting airplanes and/or helicopters, they are engaged in performing other functions in connection with enforcement of the Immigration and Nationality Act for which this designation is necessary. Therefore, Chapter I of Title 8 of the Code of Federal Regulations is hereby amended as set forth below.

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

In Part 103, § 103.1(q) is amended by adding "aircraft pilot" and "helicopter pilot" to the listing of officers enumerated in that paragraph. As amended, 8 CFR 103.1(q) reads as follows:

§ 103.1 Delegations of authority.

(q) *Immigration officer.* Any immigration inspector, immigration examiner, border patrol agent, aircraft pilot, airplane pilot, helicopter pilot, deportation officer, detention officer, detention guard, investigator, general attorney (nationality), paralegal specialist, trial attorney (immigration), general attorney (immigration), or supervisory officer of such employees is hereby designated as an immigration officer authorized to exercise the powers and duties of such officer as specified by the Act, or this chapter.

(Sec. 103 (8 U.S.C. 1103))

The amendment set forth in this order is published pursuant to section 552 of Title 5 of the United States Code (80 Stat. 383) as amended by Pub. L. 93-502 (88 Stat. 1561), and the authority contained in section 103 of the Immigration and Nationality Act (8 U.S.C. 1103), 28 CFR 0.105(b) and 8 CFR 2.1. Compliance with the provisions of 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary in this instance because the amendment pertains to agency organization and management.

Effective date: This amendment becomes effective on August 29, 1979.

Dated: August 24, 1979.

Leonel J. Castillo,
Commissioner of Immigration and Naturalization.

BILLING CODE 4410-10-M

DEPARTMENT OF ENERGY**10 CFR Part 205****Administrative Procedures and Sanctions; 1979 Interpretations of the General Counsel**

AGENCY: Department of Energy.

ACTION: Notice of Interpretations.

SUMMARY: Attached are the interpretations and responses to petitions for reconsiderations issued by the Office of General Counsel of the Department of Energy under 10 CFR Part 205, Subpart F, during the period July 1, 1979, through July 31, 1979. Appendix C identifies those requests for interpretation which have been dismissed during the same period.

FOR FURTHER INFORMATION CONTACT:

Diane Stubbs, Office of General Counsel, Department of Energy, 12th & Pennsylvania Avenue, NW., Room 1121, Washington, D.C. 20461 (202) 633-9070.

SUPPLEMENTARY INFORMATION:

Interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the Federal Register in accordance with the editorial and classification criteria set forth in 42 FR 7923 (February 8, 1977), as modified in 42 FR 46270 (September 15, 1977).

These interpretations depend for their authority on the accuracy of the factual statement used as a basis for the interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom interpretations are addressed and other persons upon whom interpretations are served are entitled to rely on them (§ 205.85(c)). An interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the

interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). The interpretations published below are not subject to appeal.

The responses to petitions for reconsideration published herein have been issued in accordance with the provisions set forth in 10 CFR 205.85(f). It should be emphasized that the reconsideration procedure is not the equivalent of an administrative appeal, but merely provides a mechanism to insure that no inadvertent errors are made which affect the validity of the interpretation.

Issued in Washington, D.C., August 17, 1979.

Assistant General Counsel for Interpretations and Rulings, Office of General Counsel.

Appendix A.—Interpretations

No.	To	Date	Category	File No.
1979-15	Ethyl Corp.	July 30	Allocation	A-411
1979-16	Semarc California, Inc. and LIG-California, Inc.	July 31	Pricing & Allocation	A-373

Interpretation 1979-15

To: Ethyl Corporation
Regulations Interpreted: 10 CFR 211.103(c)(1), 211.51

Code: GCW—AI—Allocation Levels, Definition of "Energy Production"

Facts

The Ethyl Corporation (Ethyl) is a firm engaged in, among other things, the development and manufacture of additives for motor gasoline. Ethyl has filed a request for interpretation of the Mandatory Petroleum Allocation Regulations, 10 CFR Part 211, which relates to the characterization of certain of Ethyl's activities as "energy production" and the firm's entitlement to purchase motor gasoline. In order to conduct extensive automobile fleet tests of new "energy-extending antiknock mixtures," Ethyl states that its Detroit Research Laboratories would require 165,000 gallons of motor gasoline which have been certified as having met certain quality specifications. This motor gasoline is needed to conduct emission studies and to test the performance of its "energy extender." The volume of gasoline which Ethyl seeks is a considerable increase over its purchases during the base period (November 1977–October 1978).

Ethyl is a "bulk purchaser" of motor gasoline as that term is defined in 10 CFR 211.102. The allocation levels applicable to bulk purchasers of motor gasoline are governed by § 211.103,¹ which provides that

¹ At the time that Ethyl submitted its request for interpretation firms engaged in priority uses were entitled to an allocation level of 100 percent of total current requirements of motor gasoline as reduced

such firms are entitled to purchase motor gasoline for certain specified uses under an allocation level in reference to usage during the applicable base period. The first priority uses give rise to an entitlement to receive an allocation level not subject to an allocation fraction, and the second priority uses give rise to an allocation level subject to an allocation fraction.

A firm engaged in "energy production," as that term is defined in § 211.51, is a first priority use and is entitled to receive from its supplier 100 percent of base period use for that activity. Section 211.103(c)(2) sets forth four other motor gasoline uses that qualify for 100 percent of base period use as reduced by application of an allocation fraction.

Ethyl asserts that the "energy-extender" additive boosts the octane of motor gasoline without consuming as much refinery fuel as is normally consumed in the refining process and without unnecessarily reducing the refinery gasoline yield in its manufacture. Therefore, the firm contends that its use of testing gasoline qualifies as energy production as defined at § 211.51.

Issue

Does the use of motor gasoline by the Ethyl Corporation's Detroit Research Laboratories for fleet testing of "energy-extending antiknock mixtures" constitute "energy

by application of the allocation fraction. Effective August 1, 1979, the allocation regulations provide that priority uses entitle a firm to receive from its supplier 100 percent of base period use. See 44 FR 42545 (July 19, 1979).

production" as that term is defined in § 211.51?

Discussion

For the reasons discussed below, the Department of Energy (DOE) concludes that Ethyl's use of motor gasoline for fleet testing of "energy-extending antiknock mixtures" does not constitute "energy production" as that term is defined in § 211.51.

"Energy production" is defined in § 211.51 as [t]he exploration, drilling, mining, refining, processing, production and distribution of coal, natural gas, geothermal energy, petroleum or petroleum products, shale oil, nuclear fuels and electrical energy. It also includes the construction of facilities and equipment and similar capital goods. Excluded from this definition are synthetic natural gas manufacturing, electrical generation whose power source is petroleum based, gasoline blending and manufacturing and refinery fuel use.

The only rationale advanced by Ethyl for the proposition that the testing of its product qualifies as energy production is that the product may ultimately be used to conserve refinery fuel and thereby abate losses in refinery gasoline yield. While we appreciate the conservation potential of Ethyl's product, we are unable to conclude that the firm's usage of gasoline in the manufacturing process comports with either a common sense understanding of the term "energy production" or a plain reading of its definition. These arguments presented by Ethyl regarding the ultimate value of the product being tested are unpersuasive as to the proper legal construction of § 211.51.

Finally, Ethyl has requested an "Advisory Opinion" as to which allocation level is applicable to the use described in its request. However, Ethyl has not provided sufficient information to permit us to make a precise determination as to its proper allocation level category. The firm should be aware, however, that either of the two most likely categories, i.e., "commercial use" or "industrial use" would entitle Ethyl, pursuant to § 211.103(c)(2), to one hundred percent of base period use as reduced by application of the allocation fraction.

Issued in Washington, D.C., on July 30, 1979.

Everard A. Marseglia, Jr.,

Assistant General Counsel for Interpretations and Rulings.

Interpretation 1979-16

To: Semarc California, Inc. and LIG-California, Inc.

Regulations Interpreted: 10 CFR 211.51, 211.62, 212.31 and 212.82

Code: GCW—AI and PI—Def. of Firm, Refiner; Entitlements Program

² Section 211.51 contains the following definitions: "Commercial use" means usage by those purchasers engaged primarily in the sale of goods or services and for uses other than those involving industrial activities and electrical generation.

"Industrial use" means usage by those firms primarily engaged in a process which creates or changes raw or unfinished materials into another form or product.

Facts

Semarc California, Inc. (Semarc) and LIG-California, Inc. (LIG) are considering the formation of a partnership to construct and manage a crude oil refinery in California, the Independent Valley Energy Company (Independent Valley). Semarc is a consulting firm based in Houston, Texas and Los Angeles, California. It provides technical, financial and project management services for development of capital projects and, when appropriate, participates in such projects using its own equity capital. Semarc does not own or control any existing refinery. LIG is a utility with plant and operations in Louisiana. It is a wholly owned subsidiary of Central Louisiana Electric Company, Inc. (Central Louisiana). Central Louisiana also is the sole owner of South Louisiana Production Company, Inc. (South Louisiana), which owns and operates a 13,500 barrel per day (bpd) refinery in Jefferson Davis Parish, Louisiana. This refinery began operations in October 1978.

Semarc and LIG have provisionally entered into a joint venture to develop and operate a 20,000 bpd refinery in Bakersfield, California. The joint venture will be known as the Independent Valley Energy Company (Independent Valley). Under the proposed joint venture, LIG would hold an 80 percent equity interest in the refinery; Semarc would hold a 20 percent equity interest. Semarc would act as "manager" of the operations of the refinery for at least the first 2 years of the enterprise, and LIG would provide nearly 100 percent of the capital investment in the refinery.

Under the terms of the partnership agreement,¹ the following decisions would require the approval of both partners: (1) refinery financing, (2) selection of a principal contractor, (3) selection of major subcontractors, (4) refinery site selection, (5) major crude oil suppliers, (6) major refined product purchasers, (7) all filings and submissions made with U.S. Government agencies, and (8) all long-term contracts or agreements. Partnership Agreement, ¶ 3.5. Many other decisions related to the management of the partnership must also be approved by both parties. They include (1) acquisitions outside the scope of the partnership, (2) financing decisions, (3) sale of or encumbrance upon assets, (4) expenditures and incurring obligations over \$250,000, (5) settlement of claims or suits over \$10,000, (6) substantial deviations from budget, (7) substantial refinancing, and (8) filings with the U.S. Government. Partnership Agreement ¶ 5.4. In other words, Semarc would manage the refinery subject to the requirement that both partners would have to agree on any and all of these decisions.

Issues

1. Under the Mandatory Petroleum Allocation and Priced Regulations, would Independent Valley be a separate firm from LIG and its affiliated entities?

2. Would Independent Valley be a small refiner, as defined in 10 CFR 211.62, and therefore qualify for small refiner bias

¹ The requesting parties provided a copy of the agreement with the request.

entitlements benefits under the domestic crude oil allocation program for the proposed refinery without regard to the refining capacity of LIG and its affiliated entities?

Interpretation

For the reasons set forth below, the Department of Energy (DOE) has determined that Independent Valley and LIG and all of its affiliated entities, including South Louisiana, would constitute a single firm (hereafter called the Central Louisiana firm) for the purposes of the Mandatory Petroleum Allocation and Price Regulations. This means that Independent Valley would not be eligible for small refiner bias entitlements for its refinery without reference to the refinery capacity of South Louisiana.² Consequently, the Central Louisiana firm would be able to claim such entitlements only if it qualified in reference to all of the refineries which it controlled.

Discussion

10 CFR 211.62, defines "small refiner" for the purpose of determining which refineries are entitled to bias benefits and reads as follows: "Small refiner" means a refiner, the sum of the capacity of the refineries of which (including the capacity of any person who controls, or is controlled by, or is under common control with such refiner) does not exceed 175,000 barrels per day. (Emphasis added.)

Accordingly, a determination that the Independent Valley Refinery and the refinery in Jefferson Davis would be controlled by the same entity is dispositive of the issue whether Independent Valley is a refiner separate from the Central Louisiana firm, because this definition requires the aggregation of the capacities of all refineries under common control of one firm. Based upon the facts presented for our review, the Independent Valley refinery and the refinery in Jefferson Davis Parish, Louisiana, would be under the common control of the Central Louisiana firm, since Independent Valley would be controlled by LIG, the 80 percent partner in the joint venture, and LIG and South Louisiana are wholly owned subsidiaries controlled by Central Louisiana. Consequently, entitlements benefits under the small refiner bias may only be earned by the Central Louisiana firm, based upon the refinery capacity of all of the refineries controlled by that firm.³

² The requesting parties sought "separate firm" identification for purposes of (1) a determination of their status as small or independent refiners, 10 CFR 211.67(e); (2) the operation of the domestic crude oil allocation (buy/sell) program, 10 CFR 211.65; (3) the establishment of maximum lawful selling prices in sales of covered products, 10 CFR 212.83; and (4) the monthly reporting and calculation of "old pill" under the entitlements program. However, the requesting parties also recognized that as some of these regulations have little effect on their joint venture because neither party uses imported crude oil or sells covered products, the primary importance of the requested separate firm treatment concerns the entitlements program and the small refiner bias.

³ On April 27, 1978, the Economic Regulatory Administration (ERA) of DOE amended the small refiner bias to reduce the level of benefits available to small refiners under the bias and provide for the calculation of the bias on an individual plant basis.

Footnotes continued on next page

The element of control, an integral part of the firm concept, has been accorded a broad meaning which includes both actual or potential control. LIG has the potential, or power, of control by means of exercising its vote on all "major" decisions defined in the tentative agreement. There need not be any *de facto* exercise of this potential control by LIG to require the conclusion that Independent Valley is part of the Central Louisiana firm. As we stated in the Tesoro Interpretation, the administrative determination of whether one firm is controlled by another must be a factual and legal determination based upon possession of the power of control and not upon the happenstance of exercise of that power.⁵ Because substantial questions concerning maximum price levels and supply entitlements obligations are at stake, the determination must be one that is based on objective and well established criteria.⁶ In the present case, LIG has stated that it intends in fact to exercise that right of control over Independent Valley. Request, pp. 3, 5-6, 8, 12; Partnership Agreement ¶¶ 3.5 and 5.4. Thus, as a result of Central Louisiana's 100 percent ownership of South Louisiana and LIG, and the latter's 80 percent ownership interest in Independent Valley and associated voting rights and contribution of almost all of Independent Valley's capital, Central Louisiana controls all of those entities within the meaning of the DOE regulations.⁷ Based on the Tesoro criteria, all

Footnotes continued from last page rather than on an aggregate basis. Under the new rule, the daily average volume of crude oil runs to stills attributable to a particular plant would be equal to the same percentage of that small refiner's total daily average volume of crude oil runs to stills which a given plant bears to the total refining capacity of the small refiner. 44 FR 25621 (May 2, 1979). Nevertheless, a determination as to whether the "firm" under consideration constitutes a small refiner must still be made.

⁵ See *Tesoro Petroleum Corp.*, Interpretation 1975-32, 42 FR 23743, (August 21, 1975) where FEA found that Tesoro, a refiner, controlled CORCO, a refiner in Puerto Rico, after Tesoro acquired 38 percent of CORCO's outstanding shares. The FEA noted the widely dispersed ownership of the remaining shares outstanding: *Enterprise Products Co.*, Interpretation 1975-3, 42 FR 23724 (February 12, 1973) where Enterprise, a propane reseller, and two retailers affiliated with Enterprise were found to constitute a single firm because the common owners of the firms protected their control by the veto power they held over any attempts the majority of the board might take toward independent action; and *Boll Marketing Enterprise*, Interpretation 1977-18, 42 FR 39960, (June 13, 1977) in which a producer of crude oil and a refinery constituted a single firm based on the producer's greater than 50 percent ownership interest in the refinery.

⁶ *Tesoro* at 23744.

⁷ *Id.*

⁸ The main authority cited by the parties, *Commonwealth Oil Refining Co. (CORCO)*, Interpretation 1977-45, 43 FR 1480, (November 30, 1977), does not support the contention that LIG does not control Independent Valley. In *CORCO*, DOE found that the Puerto Rico Olefins Company (PRO), the result of a 50/50 joint venture between CORCO and PPG Industries, were separate firms because the PRO facility operated under an independent management committee made up equally of PPG and CORCO delegates and neither PPG nor CORCO could individually control the operations of PRO.

of the affiliated entities in this case must be considered together in determining whether the single firm qualifies as a "small refiner."

The definition of "small refiner" in § 211.62 is consistent with the definition of "firm" in 10 CFR 212.31, a section which contains the definitions generally applicable to the Mandatory Petroleum Price Regulations. That definition reads as follows:

"Firm" means any association, company, corporation, estate, individual, joint-venture, partnership, or sole proprietorship or any other entity however organized including charitable, educational, or other eleemosynary institutions, and the Federal government including corporations, departments, Federal agencies, and other instrumentalities, and State and local governments. The DOE may, in regulations and forms issued in this part, treat as a firm: (1) A parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls, (2) a parent and its consolidated entities, (3) an unconsolidated entity, or (4) any part of a firm.

For general price control purposes, DOE has selected the first and most expansive of the four meanings listed above,⁹ and has implemented that meaning in, *inter alia*, § 212.82 (which states that "firm" means a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls), as well as the report forms required to be filed by all refiners. See instructions to Forms FEO-96 and P-110-M-1. *E.g.*, *Northern Natural Gas Co.*, Interpretation 1978-63, 44 FR 3023 (January 15, 1979).

The definition of "firm" in 10 CFR 211.51, a section which contains definitions relating to the Mandatory Petroleum Allocation

However, the basic ownership in the present case is completely distinguished from that in *CORCO*. The ownership arrangement proposed in this case is 80 percent/20 percent. LIG has also admitted that it intends in fact to exercise its majority ownership to control the operations of Independent Valley. Request, pp. 3, 5-6, 8, 12; Partnership Agreement ¶¶ 3.5 and 5.4. Whether that control extends only to major decisions and not to the minor decisions of day-to-day operations is irrelevant to the determination of a firm's scope:

A decision which would depend upon a judgmental determination by FEA regarding the degree of Tesoro's actual supervision of CORCO's day-to-day operations, and which might be subject to review according to the changing circumstances of managerial intervention by Tesoro, would be both administratively unfeasible and too arbitrary and indefinite to permit coherent application of the price and allocation regulations to Tesoro. *Tesoro* at 23744.

Appendix B.—Responses to Petitions for Reconsideration

Petitioner	Interpretation	Date of response
Mobil Oil Corp.	Mobil Oil Corp. and Gulf Oil Corp., 1979-7, 44 FR 29433 (May 21, 1979)	July 9.
The Gulf Companies	Mobil Oil Corp. and Gulf Oil Corp., 1979-7, 44 FR 29433 (May 21, 1979)	July 9.

Regulations, similarly permits DOE to treat as a firm (a) a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls, (b) a parent and its consolidated entities, (c) an unconsolidated entity, or (d) any part of a firm. While for some purposes under the Allocation Regulations DOE has expressly chosen to apply this definition restrictively, *e.g.*, § 211.106(b), it has generally applied this definition in the expansive sense set forth in the definition of small refiner in § 211.62, quoted above.

Finally, Semarck and LIG contend that since Independent Valley would be constructed specifically to process California heavy crude oil, which is presently an under-utilized resource, its development should be encouraged. Request, pp. 13-15. While such a consideration may be cognizable in the context of a request for exception relief, that the financial incentive of additional small refiner bias entitlements is necessary to construct and operate the proposed refinery is not relevant to the proper interpretation of DOE regulations.

For the reasons set forth above, we have determined that the proper application of the DOE's Mandatory Petroleum Allocation and Price Regulations to the facts presented by Semarck and LIG is as follows:

(1) Under the Mandatory Petroleum Allocation and Price Regulations, Independent Valley is not a separate firm from LIG and its affiliated entities, but is part of the Central Louisiana firm; and
(2) The Central Louisiana firm may not determine its eligibility for small refiner bias entitlements benefits under the domestic crude oil allocation program for the proposed refinery of Independent Valley without regard to the refining capacity of other entities that are part of the firm.

Issued in Washington, D.C. on July 31, 1979.
Everard A. Marseglia, Jr.,
Assistant General Counsel for Interpretations and Rulings.

⁹ That Independent Valley and South Louisiana would not directly compete with each other or use each other's marketing facilities, and that these entities may be treated separately under State and Federal laws (Request, pp. 11-12), are irrelevant to the determination that we make in this case.

¹⁰ The second and third meanings under the general definition in § 212.31 were used by the Cost of Living Council and the Federal Energy Administration primarily in connection with profit margin regulations no longer effective. The fourth meaning has been used only in special circumstances, in connection with the granting of exceptions. *Boll Marketing Enterprise*, Interpretation 1977-18, 42 FR 39960 (June 13, 1977) at 39961.

Petition for Reconsideration of Mobil Oil Corp. and Gulf Oil Corporation 1979-7

Petitioner: The Gulf Companies
Date: July 9

This responds to the petitions submitted on behalf of The Gulf Companies (Gulf) and Mobil Oil Corporation (Mobil), seeking reconsideration of *Mobil Oil Corporation*, Interpretation 1979-7, 44 FR 29433 (May 21, 1979). In evaluating the petitions for reconsideration, the materials submitted by the petitioners prior to the issuance of the Interpretation have been reviewed. For the reasons discussed below, I have concluded that the request for reconsideration must be denied.

Interpretations issued by the Office of General Counsel of the Department of Energy (DOE) may be reconsidered in certain limited circumstances. In these cases the burden is upon the petitioners to demonstrate that the interpretation was erroneous in fact or in law, or that the result reached in the Interpretation was arbitrary or capricious. 10 CFR 205.85(f)(3).

In the Interpretation which was issued to Gulf and Mobil, the DOE determined that the provisions of § 212.83(c)(2)(iii)(E), which govern a crude oil refiner's computation of increased non-product costs, require refiners to calculate the "marketing cost increase" by computing the difference between the total cost of marketing covered products in the month of measurement and the total cost of marketing covered products in the month of May 1973. Marketing cost increases may be allocated to particular products by volume or by sales. This conclusion was based upon the express provisions of § 212.83(c)(2)(iii)(E) and a review and analysis of its historical background.

Gulf referenced a DOE study entitled *Analysis of Refiners' No. 2 Distillate Costs and Revenues* (March 30, 1979) and contends that this study requires reconsideration of this Interpretation, since the study employed the volume method to determine increased marketing costs for No. 2 distillate sales. This argument is unpersuasive. This study was not a formal legal interpretation of the refiner price formula but was intended only to serve the special analytical purposes of the Office of Fuels Regulations.

In other respects the petitions for reconsideration reiterate the arguments presented in the initial interpretation requests and raise no new substantive arguments of fact or of law. Accordingly, since the petitioners have failed to demonstrate that the Interpretation is erroneous in fact or in law, or that the Interpretation is arbitrary or capricious, the petitions for reconsideration are hereby denied. The denial of these petitions for reconsideration is a final order of the Department of Energy from which the petitioners may seek judicial review.

Petition For Reconsideration of Mobil Oil Corp. and Gulf Oil Corporation 1979-7

Petitioner: Mobil Oil Corp.
Date: July 9

This responds to the petitions submitted on behalf of The Gulf Companies (Gulf) and

Mobil Oil Corporation (Mobil), seeking reconsideration of *Gulf Oil Corporation*, Interpretation 1979-7, 44 FR 29433 (May 21, 1979). In evaluating the petitions for reconsideration, the materials submitted by the petitioners prior to the issuance of the Interpretation have been reviewed. For the reasons discussed below, I have concluded that the request for reconsideration must be denied.

Interpretations issued by the Office of General Counsel of the Department of Energy (DOE) may be reconsidered in certain limited circumstances. In these cases the burden is upon the petitioners to demonstrate that the interpretation was erroneous in fact or in law, or that the result reached in the Interpretation was arbitrary or capricious. 10 CFR 205.85(f)(3).

In the Interpretation which was issued to Gulf and Mobil, the DOE determined that the provisions of § 212.83(c)(iii)(E), which govern a crude oil refiner's computation of increased non-product costs, require refiners to calculate the "marketing cost increase" by computing the difference between the total cost of marketing covered products in the month of measurement and the total cost of marketing covered products in the month of May 1973. Marketing cost increases may be

allocated to particular products by volume or by sales. This conclusion was based upon the express provisions of § 212.83(c)(2)(iii)(E) and a review and analysis of its historical background.

Gulf referenced a DOE study entitled *Analysis of Refiners' No. 2 Distillate Costs and Revenues* (March 30, 1979) and contends that this study requires reconsideration of this Interpretation, since the study employed the volume method to determine increased marketing costs for No. 2 distillate sales. This argument is unpersuasive. This study was not a formal legal interpretation of the refiner price formula but was intended only to serve the special analytical purposes of the Office of Fuels Regulations.

In other respects the petitions for reconsideration reiterate the arguments presented in the initial interpretation requests and raise no new substantive arguments of fact or of law. Accordingly, since the petitioners have failed to demonstrate that the Interpretation is erroneous in fact or in law, or that the Interpretation is arbitrary or capricious, the petitions for reconsideration are hereby denied. The denial of these petitions for reconsideration is a final order of the Department of Energy from which the petitioners may seek judicial review.

CIVIL AERONAUTICS BOARD

14 CFR Part 207

[Regulation ER-1145; Amendment No. 21; Docket 31788]

Split All-Cargo Charters and Split Passenger/Cargo Charters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., August 23, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This amendment allows more than one person to charter the entire capacity of an aircraft for air freight, and to charter the unused belly capacity of a passenger charter flight. The amendments are intended to spur competition in the air cargo industry, and could lead to lower shipping rates and to increased charter opportunities for small shippers. This action is in response to a petition for rulemaking by two charter air carriers, Trans International Airlines and World Airways.

DATES: Effective: September 28, 1979. Adopted: August 23, 1979.

FOR FURTHER INFORMATION CONTACT: Mark Frisbie, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: In December 1977, Trans International Airlines and World Airways, U.S. charter carriers, filed a petition for rulemaking to amend the Board's Economic Regulations (14 CFR Parts 207, 208, 212 and 214) to allow split all-cargo charters and split passenger/cargo charters. They proposed a 5,000-pound minimum shipment, a limit on the maximum number of charterers permitted to engage an all-cargo aircraft, and that only one charterer be allowed to engage the belly cargo capacity on a passenger charter flight. The Board issued Notice of Proposed Rulemaking EDR-351 (43 FR 14519, April 6, 1978) asking for comment on a revision of the rules for split cargo charters and cargo charter service. We further asked how to define a split cargo charter so that the shippers would have maximum

flexibility in its use, the direct air carriers would not be hobbled by unnecessary regulations, and the public's need for scheduled cargo service would be met. The Board suggested the petitioners' proposed restrictions as a possible format, and tentatively decided that these changes are permitted under the Act. Comments and reply comments in response to the notice have been filed by numerous shippers, scheduled and charter carriers, and air freight forwarders.¹

The primary issues in this rulemaking are: whether there is a need for split cargo charters in domestic and international transportation; whether they would threaten the viability of international scheduled service; and whether they are permitted under the Federal Aviation Act.

Opponents of the rule, all of them scheduled combination or all-cargo carriers, argue that there is no need for split cargo charters in domestic markets because of the availability of section 418 cargo certificates allowing unregulated cargo carriage, or in international markets because the cargo market has been rapidly expanding and small-capacity aircraft are available for a small shipper to charter on a plane-load basis. Also, they claim, in international markets split cargo charters would cause disastrous diversion from scheduled service, undermining its economic base. These commenters contend that by eliminating the requirement that the entire capacity of the aircraft be chartered by one person, and by setting the minimum shipment at only 5,000 pounds, there would be no practical distinction between charter and individually waybilled service.

Supporters of the rule—including shippers, freight forwarders, charter carriers, and two foreign scheduled combination carriers—cited the

¹ Comments and/or reply comments have been received from: Civil Aeronautics Board Office of the Consumer Advocate (subsequently made part of the Bureau of Consumer Protection), National Air Carrier Association (on behalf of Evergreen International Airlines, Trans International Airlines, World Airways), International Aviation Services (U.K.), Lan-Chile Airlines, TAP Portuguese Airways, International Airforwarder and Agents Association (on behalf of 23 air freight forwarder members), Fourteen Electronics Shippers (Advanced Micro Devices, American Microsystems, Data General Corp., Electronic Memories and Magnetics Corp., Fairchild Camera-Instrument Corp., General Instrument Corp., Hewlett-Packard Co., Intel Corp., Intersil, Litronix, National Semiconductor Corp., RCA Corp., Rockwell Microelectronics, Signetics Corp.), Motor Vehicle Manufacturers Association, Rich International Airways, Polaroid, Certain Trunkline Carriers (American Airlines, Pan American World Airways, Trans World Airlines, Western Airlines), The Flying Tiger Line, China Airlines, British Airways, Seaboard World Airlines, Scandinavian Airlines System, Airlift International, and F.H. Fenderson, Inc.

efficiencies and attractiveness of split cargo charters, especially in the use of now-empty belly space on passenger charters. Shippers were interested in the lower rates and greater accessibility to charter service they expected from a split cargo charter rule.

After review of all the comments received, and in view of the changes in policy made by the Airline Deregulation Act of 1978 (Pub. L. 95-504), the Board has decided to permit split all-cargo charters with no minimum contract size, and with no restriction on the number of charterers, as long as the entire capacity of the aircraft is engaged in the aggregate. The reason for retaining the latter restriction at this time is that it was not proposed to be eliminated. We are also authorizing cargo charters in the unused belly capacity of passenger charters, with no restriction on contract size or number of charterers. EDR-351 proposed, as a possible format, a limitation on the number of charterers and a minimum contract size for each charterer, but the Board also asked the public to consider and suggest other possible rules, including the possibility of having no limitations. We have decided that a restriction on contract size or number of charterers is not legally necessary, and that the fewest restrictions would best promote competition and serve the needs of the public.

In Supplemental Notice of Proposed Rulemaking EDR-351B, issued simultaneously with this amendment, the Board is proposing to eliminate the requirement that the entire aircraft be engaged in the aggregate, and to allow any mix of cargo and passenger charters on an aircraft, including the carriage of cargo on the main deck with passengers. We are also proposing that notice of any limits on baggage space be placed in the participant contract, and that part charters of cargo be allowed on scheduled flights.

Need For Split Cargo Charters

We have concluded that split cargo charters will allow more efficient use of aircraft capacity and will allow smaller shippers to use cargo charter services. It seems probable that these new efficiencies will promote competition between cargo carriers, both charter and scheduled. We believe that this competition will benefit consumers.

Opponents of split cargo charters claim that they are not needed in either domestic or international markets. Domestically, charter air carriers were granted authority to receive all-cargo certificates under the grandfather provision of section 418 of the Act (Pub. L. 95-245), and these certificates have

been open to all applicants since November 1978. They argue that section 418 service will provide shippers with any benefits otherwise available from split all-cargo charters. For example, there will be an unlimited number of carriers and almost unhindered discretion in pricing and in the number of price/quality options available. In addition, they state that charters will remain available for those shippers who want the entire capacity of an aircraft for particular point-to-point service at specific times.

We agree that this rule will have no impact on domestic cargo service, which has already been deregulated by Congress and the Board. Since all carriers are exempted from our charter regulations for the purposes of domestic cargo service (14 CFR 291.24), this rule will affect only international cargo service. But in that realm, split cargo charters will still be a useful competitive force, stimulating greater efficiencies and variety of service. As we recently pointed out in another context,² the demand for cargo charter service to many countries has not been fully met. The rules we are adopting here will permit charter carriers to respond more quickly and efficiently to shippers' needs in those international markets. Furthermore, we consider it a weak argument against removing regulatory restrictions that further liberalization is not needed. The important question is whether the restrictions are needed. If they are not, the policies under which the Board is now acting call for their removal, so that the industry structure will be unhampered in changing to meet any new needs that might arise in the future.

Effect on Scheduled Service

The scheduled all-cargo and combination carriers claim that such substantial diversion will occur from traffic in international air cargo transportation that important scheduled service to many markets could be reduced or eliminated. Seaboard and FTL in particular argue that split cargo charters have no traffic generating potential in international aircraft. They state that since the cost of surface transportation is so much less than air transportation in the transatlantic and transpacific markets, even the expected decrease in cargo rates through split cargo charter competition will not cause any significant shift of traffic from surface modes.

² Order 78-12-80, December 8, 1978, in which the Board granted multiple exemption applications for all-cargo charter authority in transatlantic markets. See also *Transatlantic Cargo Service Case*, Order 78-12-59, December 8, 1978.

Opponents argue further that the anticipated diversion would lead to declining load factors and higher scheduled rates. For instance, Flying Tiger Lines predicts that it would have to lower prices for large-volume shippers in primary markets and raise rates for small shippers and in secondary markets. Other opponents warn that the shift in scheduled cargo traffic from secondary markets to major break-weight centers by shippers to take advantage of volume discounts would work to the detriment of shippers who desire scheduled service in the secondary markets. As a result, they argue, many shippers who now depend on the regularity and convenience of scheduled all-cargo service would find that service either prohibitively expensive, inconvenient, or unavailable.

The Board does not, however, consider diversion from one type of air transportation to another as something to be avoided. The policy question is not whether removal of regulatory restrictions causes a shift in market share, but rather, whether the range of needed services will be available to the public by competitive parts of the air transportation industry. There is nothing in the statute that favors limits on competition between charter and scheduled service, or that restricts charter service to traffic found unattractive by the scheduled carriers. While impairment of scheduled service is a public interest factor to be considered, the revenues from this service need not be maintained at the level, or under the conditions, desired by the scheduled carriers.

We are not persuaded that charter service under this rule will impair availability of scheduled cargo service in international markets for those who desire it. None of the shippers who commented seemed concerned about this possibility. It was raised only by the scheduled carrier opponents of the rule. Our experience shows that increased competition from charters often leads to lower scheduled rates while still allowing consumers a choice between charter and scheduled service. If less expensive charter service is attractive to many shippers who now must use scheduled service, there is no reason why those shippers should be forced to pay for the convenience of scheduled service that they neither need nor want. As Seaboard pointed out, the scheduled all-cargo carriers provide highly efficient service at acceptable cost. These carriers, especially with expanded off-route authority, should be able to withstand charter competition wherever

there is enough demand for the special advantages of scheduled service.

Legality

Another question is whether these rules are permitted by the Act. The opponents argue that split cargo charters are indistinguishable from individually-waybilled service, and that the Federal Aviation Act requires a clear distinction to be maintained. They contend that past court cases on split passenger charters do not support split charters in cargo service, and that Board precedent is also against such rules. These commenters cite the Board statement that elimination of the plane-load requirement would delete the only rule that inhibits supplementals from offering individually-waybilled service in derogation of their statutory function (ER-659), *Extension of Charter Regulations*, 36 FR 2486, January 29, 1971).

According to these commenters, there are no restrictions on split cargo charters that would differentiate them from individually-waybilled service. They make several points: There is no requirement of a middleman between the charter carrier and the shipper, as the courts have found important in split passenger charters. The logistical difficulties of coordinating multiple shipments and backhaul imbalances are substantially reduced by readily available surface transportation at each terminal, and by the availability of split passenger/cargo charters to prevent empty return flights. The restriction that the entire capacity be chartered is substantially weakened due to the number of different shippers possible on the aircraft, and because the significant rate advantage of charters makes the use of split cargo charters always in the interest of the shipper. They argue that the elimination of charter tariffs³ would make even the minimum restrictions in the Board rules unenforceable. For all of these reasons, they claim that the Board has no legal authority to adopt these rules, and cannot show any economic change that warrants reversal of its long-standing rejection of split cargo charters.

Congress has indicated a preference for the broadest charter rules consistent with the public interest by amending section 401(n)(2) of the Federal Aviation Act (by Pub. L. 95-504, the Airline Deregulation Act of 1978) to read, "No rule, regulation, or order issued by the Board shall restrict the marketability,

³ Charter tariffs were eliminated by ER-1125, 1126, 1127, 1128, 1129, 1130 and SPR-150, and 160 (44 FR 33056, June 8, 1979), adopted after comments were due in this proceeding.

flexibility, accessibility, or variety of charter trips provided under a certificate issued under this section, except to the extent required by the public interest. . . ." Also, the Deregulation Act changes the definition of charter air transportation (formerly "supplemental air transportation") to read: "Charter air transportation means charter trips, including inclusive tour charter trips, in air transportation, rendered pursuant to authority conferred under this Act under regulations prescribed by the Board." (section 101 (15)) The former definition read: ". . . rendered pursuant to a certificate of public convenience and necessity issued pursuant to section 401(d)(3) of this title to supplement the scheduled service authorized by certificates of public convenience and necessity issued pursuant to sections 401(d)(1) and (2) of this title." (Former section 101 (37).) Because charter service by definition was limited to "supplemental" air transportation, the Board was required to fashion charter rules that insured that the service would be distinct from scheduled transportation. Although the Conference Report is silent about the reason for this definitional change, we believe it indicates Congress's intent that no formal distinction between charter and scheduled service need be maintained. The present definition places full discretion with the Board to define charter service by regulation, and it omits the reference in the former definition to the distinct role of "supplementing" scheduled service. The change indicates that Congress realized that charter service should not be limited as it had in the past, and it changed the definition accordingly. This was consistent with the overriding purpose of the Deregulation Act to remove unnecessary restrictions and barriers to competition.

In light of these changes and policies, we believe that the Act does not require us to maintain more restrictive conditions for cargo charter service than for individually-waybilled service. The judicial interpretations that required charter service to be distinct from individually-ticketed service were based on legislative history and regulatory policies that are now outdated and have been superseded by new law. We believe that charter service should not be subject to special conditions that inhibit its responsiveness to consumer needs, and that the statute permits us to define charter service so that it may be used as a competitive alternative to waybilled service. We wish to permit both types of service, in unrestricted competition with each other, to be

available to satisfy consumer preferences.

The essence of charter service is its contractual, *ad hoc* nature. It is more flexible, because it can be arranged to suit the consumer's individual needs. It may also involve more risks for the shipper, and charter flights are typically less regular and less routinely available than scheduled service. The distinction, between charter and individually-waybilled service, if one is somehow needed, is primarily in the contrast between the flexible, individualized service characteristic of charters, and the routine, predictable service characteristic of scheduled flights. In addition, the existing requirement that the entire capacity of the plane must be engaged for charters is a clear distinction, since scheduled service is not subject to a "full-plane" restriction. Thus, charter service includes a risk that the flight will not take place if enough joint charterers cannot be found. We emphasize, however, that we do not consider this restriction to be especially characteristic of charters or required by statute.

We have decided that the public interest is served by a wider range of available air transportation modes, allowing more efficient operations, not by protection of scheduled service at the expense of competitive opportunities. This is consistent with the language and purpose of the Airline Deregulation Act. We affirm our tentative decision in EDR-351 that split cargo charters are permitted under the Act.

Split Passenger/Cargo Charters

EDR-351 asked for comment on permitting the unused belly capacity of a passenger charter to be engaged for cargo charters, although the text of the proposed rule arguably allows cargo charters on the main deck of the aircraft as well as in the belly. To assure adequate notice to the public of the full extent of our proposal, we are issuing simultaneously a supplemental notice of proposed rulemaking, EDR-351B, proposing explicitly to allow the carriage of both passenger and cargo charters on the main deck. In the amendments adopted now, we are permitting any number of cargo charters in the belly capacity of a passenger charter, with no minimum weight limit.

There is no reason to limit the number of cargo charterers of the belly capacity when there is no limit to the number of charterers on either split all-passenger charters or split all-cargo charters. To do so would restrict the flexibility of split charters and reduce public options.

Seaboard argued that only one cargo charterer should be allowed for the belly

capacity of a passenger charter, so that charter carriers would not be encouraged to reduce the baggage allowances of passengers on such combination flights. The Board recognizes that there could be some problems in regard to passenger baggage allowances with the introduction of cargo charters on passenger flights, and is proposing in EDR-351B that passengers be notified in the participant contract of the amount of baggage allowed. In the meantime, this is not sufficient reason to warrant delaying the adoption of this part of the rule.

The Board's former Office of Consumer Advocate suggested that the Board may wish to examine whether the rule should require that on split passenger/cargo charters both cargo and passengers be destined for the same airport, to prevent the value of the passenger ticket being diluted by diversion of the flight to a cargo destination. We have carefully considered this suggestion, and conclude that there is no practical need for such a provision. The direct carrier will be governed by its contract with the passenger charter operator(s), which prescribes the route that the aircraft will take. If the direct carrier wishes to modify the route (for example, include an extra stop) to accommodate a potential cargo charterer, it will have to obtain the charter operator's consent. Thus, the carrier will not be able to impose arbitrary route changes. Split passenger charters are currently operated without any necessity of informing passengers of intermediate stops, and we are aware of no significant problems with unexpected stops on those flights. If problems arise, there will be time to consider remedial rules. In any case, there appears little economic incentive for the carrier to divert a passenger flight to add a partial belly-load of cargo. The additional revenue from the cargo would seldom be enough to cover the extra mileage and landing costs of making the additional stop.

In EDR-351, we proposed that cargo charters in the belly of a passenger flight be made permissive, so that a full passenger flight would not be canceled for lack of cargo to fill the belly space. Thus, a plane will be considered to be "fully engaged" when the entire main deck is engaged. The Trunkline Carriers objected that the Board cannot arbitrarily define "fully engaged" to mean something less than engagement of all available space, including belly space. However, the definition of "charter" need not depend on engagement of the entire plane, and it is

wasteful and inefficient to have available cargo capacity on passenger charters go empty unless the belly is engaged in full. The new rule will allow more efficient usage of cargo space. It will not change the requirements for passenger charters.

Suggested Changes

Numerous commenters suggested various restrictions to be placed on split cargo charters, including a minimum shipment size, a maximum number of charterers, and prevention of split cargo operations between points where there are scheduled all-cargo operations. Each of these restrictions would, however, unnecessarily limit the flexibility of split cargo charters, in effect defeating the purpose of these charters.

The scheduled all-cargo carriers asked for compensating rights, such as the grant of unrestricted scheduled and charter passenger authority. We recently issued a proposal to eliminate all restrictions on off-route charters for U.S. certificated carriers.⁴ The request to allow all-cargo carriers to carry passengers, in addition to property and mail, on their regular scheduled flights requires amending the certificates of these carriers, and is better handled in that type of proceeding. All-cargo carriers wishing to apply for such certificate amendments may do so.

International Aviation Services (IAS), a foreign charter carrier, has requested that the Board amend Part 214, which governs passenger charters by foreign charter carriers, to allow them to carry cargo charters. Since we did not propose to amend Part 214 in EDR-351, we cannot issue a final rule at this time. However, in EDR-351B, issued simultaneously with this final rule, we are proposing to amend Part 214 to allow split cargo charters for foreign charter carriers.

British Airways argued that EDR-351 only sought comment on the desirability of redefining cargo charters, and made only vague proposals on the definition. It said that the public should be given an opportunity to be heard with respect to more specific proposals before adoption of a final rule. It is our opinion that EDR-351 did give sufficient notice of the Board's thinking and tentative decisions on the structure of a final rule for split cargo charters. A suggested format was given, and the Board's rationale was clearly stated. A notice of proposed rulemaking should be sufficiently descriptive of the issues so that the parties may offer informed criticism, but need not contain in precise form each proposal that the agency may eventually

⁴EDR-383, 44 FR 4182, July 18, 1979

adopt as a rule. *Ethyl Corporation v. Environmental Protection Agency*, 541 F. 2d 1 (D.C. Cir. 1976). Issues not discussed in EDR-351 are being proposed in a supplemental notice.

Technical Changes

We are renumbering and revising the organization of § 207.11, § 208.6, and § 212.8 to improve readability, make the wording of related sections parallel, and incorporate the new provisions we are adopting here. No substantive changes are being made in former § 207.11(a) and (b), § 208.6(a) and (b), and § 212.8(a). The existing provisos following § 207.11(c), 208.6(c), and 212.8(b) are being renumbered as § 207.11(b)(1), § 208.6(b)(1), and § 212.8(b)(1) respectively, and the rest of those sections are being organized under new § 207.11(a), 208.6(a) and 212.8(a), with appropriate subdivisions. Other substantive changes adopted here are being given their own paragraph numbers. We also are correcting an error made in the Public Charter rule (SPR-149, 43 FR 36604, August 18, 1978). The contract seat size for passenger charters on small aircraft was inadvertently changed in the Public Charter rulemaking to apply to aircraft of less than 80 seats. It should apply to aircraft of 80 or fewer, and we are changing the text accordingly.

Finally, we are amending § 207.13, § 208.32, and § 212.10 to conform references to former § 207.11(c), § 208.6(c), and § 212.8(b) to the new renumbering described above. These sections currently require 10-day advance payment of the charter price by all charterers on a split charter. The 10-day advance payment is designed for the protection of charter passengers from last-minute cancellations by other charterers on the same flight. However, cargo charters in the bellies of passenger flights are permissive, so cancellation by a cargo charterer will not result in cancellation of the whole flight. Therefore, the 10-day advance payment requirement has been made applicable only to passenger charterers.

Final Rule

The Civil Aeronautics Board amends 14 CFR Part 207, *Charter trips and special services*, as follows:

1. Section 207.11 is renumbered and amended to read as follows:

§ 207.11 Charter flight limitations.

(a) Charter flights (trips) in air transportation shall be limited to the following:

(1) Air transportation of persons and/or property pursuant to contracts with the Department of Defense where the

entire capacity of one or more aircraft has been engaged by the Department;

(2) Air transportation performed on a time, mileage, or trip basis where the entire capacity of one or more aircraft has been engaged for the movement of persons and their baggage and/or the movement of property:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel or company property, or in cases of emergency, of commercial traffic, except that emergency charters for commercial traffic shall be reported in accordance with § 207.10);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services) for the transportation of a group of persons, as agent or representative of such group;

(iii) By an air freight forwarder, or cooperative shippers association registered under Part 296 of this subchapter; with respect to flights from the United States in foreign air freight forwarder holding effective Board authority; or, with respect to flights to the United States in foreign air freight forwarder.

(iv) By an overseas military personnel charter operator as defined in Part 372 of this chapter;

(v) By a charter operator or foreign charter operator as defined in part 380 of this chapter:

(3) Air transportation performed on a time, mileage or trip basis where less than the entire capacity of an aircraft has been engaged for the movement of persons and their personal baggage and/or the movement of property by two or more of the following persons, except that such persons in the aggregate must engage the entire capacity of the aircraft in accordance with paragraph (b) of this section:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or company property, or in cases of emergency, of commercial traffic; except that emergency charters for commercial traffic shall be reported in accordance with § 207.10);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services), for the

transportation of a group of persons as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter;

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(v) By an air freight forwarder or cooperative shippers association registered under Part 296 of this subchapter; with respect to flights from the United States in foreign air transportation, by a foreign air freight forwarder holding effective Board authority; and with respect to flights to the United States in foreign air transportation, by any foreign air freight forwarder.

(b)(1) Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(3)(iv) of this section shall contract and pay for 20 or more seats. Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section shall contract and pay for 40 or more seats, except that if the main deck capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section for the movement of persons and their baggage, then either one of such persons may contract and pay for a minimum of 20 seats.

(2) Carriers shall not transport both persons and property on the main deck of a chartered aircraft.

(3) The entire capacity of an aircraft shall be considered as engaged if its main deck capacity is engaged, regardless of whether the remaining belly or other capacity is also engaged.

2. Section 207.13 is amended to read as follows:

§ 207.13 Terms of service.

(a) [Reserved]

(b) The carrier shall require full payment of the total charter price, including payment for the return portion of a round trip, or the posting of a satisfactory bond for full payment, prior to the commencement of any portion of the air transportation:

Provided, however, That in the case of a passenger charter for less than the entire capacity of an aircraft pursuant to § 207.11(a)(3), the carrier shall require full payment of the total charter price, including payment for the return portion of a round trip, from the passenger charterers not less than 10 days prior to the commencement of any portion of the transportation, and such payment shall

not be refundable unless the charter is canceled by the carrier or unless the carrier accepts a substitute charterer for one which has canceled a charter, in which case the amount paid by the latter shall be refunded. For the purpose of this paragraph payment to the carrier's depository bank, as designated in the charter contract, shall be deemed payment to the carrier.

(c) Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported one way in each direction, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see § 207.11(a)(3)), shall move as a unit in both directions, except as provided in § 207.14. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round trip is chartered separately in order to avoid the 5-percent limitation aforesaid.

(Secs. 102, 204, 401 of the Federal Aviation Act of 1958, as amended, 92 Stat. 1706, 72 Stat. 743, 92 Stat. 1710 49 U.S.C. 1302, 1324, 1371.)

BILLING CODE 6320-01-M

14 CFR Part 208

[Regulation ER-1146; Amendment No. 21; Docket 31788]

Terms, Conditions and Limitations of Certificates To Engage in Charter Air Transportation; Split All-Cargo Charters and Split Passenger/Cargo Charters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., August 23, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule allows more than one person to charter the entire capacity of an aircraft for air freight, and to charter the unused belly capacity of a passenger charter flight. The rule should spur competition in the air cargo industry, leading to lower shipping rates and to increased charter opportunities for small shippers. This action is in response to a petition for rulemaking by two charter air carriers, Trans International Airlines and World Airways.

DATES: Effective: September 28, 1979. Adopted: August 23, 1979.

FOR FURTHER INFORMATION CONTACT: Mark Frisbie, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: For the reasons explained in ER-1145, dated August 23, 1979, issued simultaneously, the Board is amending its charter regulations to allow split cargo charters. The Civil Aeronautics Board amends 14 CFR Part 208, *Terms, conditions, and limitations of certificates to engage in supplemental air transportation*, as follows:

1. Section 208.6 is renumbered and amended to read as follows:

§ 208.6 Charter flight limitations.

(a) Charter flights in air transportation performed by supplemental air carriers shall be limited to the following:

(1) Air transportation of persons and/or property pursuant to contracts with the Department of Defense where the entire capacity of one or more aircraft has been engaged by the Department;

(2) Air transportation performed on a time, mileage or trip basis where the entire capacity of one or more aircraft has been engaged for the movement of persons and/or property;

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel or company property or in cases of emergency, of commercial traffic, except that emergency charters for commercial traffic shall be reported in accordance with § 208.5);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services) for the transportation of a group of persons, as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter; or

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(v) By an air freight forwarder or cooperative shippers association registered under Part 296 of this subchapter, with respect to flights from the United States in foreign air transportation, by a foreign air freight forwarder holding effective Board authority; and with respect to flights to the United States in foreign air transportation, by any foreign air freight forwarder.

(3) Air transportation performed on a time, mileage or trip basis where less than the entire capacity of an aircraft has been engaged for the movement of persons and their personal baggage and/or the movement of property by two or more of the following persons, except that such persons in the aggregate must engage the entire capacity of the aircraft in accordance with paragraph (b) of this section:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or company property, or in cases of emergency, of commercial traffic; except that emergency charters for commercial traffic shall be reported in accordance with § 208.5);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services), for the transportation of a group of persons, as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter;

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter;

(v) By an air freight forwarder or cooperative shippers association registered under Part 296 of this subchapter, with respect to flights from the United States in foreign air transportation, by a foreign air freight forwarder holding effective Board authority; and with respect to flights to the United States in foreign air transportation, by any foreign air freight forwarder.

(b)(1) Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(3)(iv) of this section shall contract and pay for 20 or more seats. Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section shall contract and pay for 40 or more seats, except that if the main deck capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section for the movement of persons and their baggage, then either one of such persons may contract and pay for a minimum of 20 seats.

(2) Carriers shall not transport both persons and property on the main deck of a chartered aircraft.

(3) The entire capacity of an aircraft shall be considered as engaged if its main deck capacity is engaged, regardless of whether the remaining belly or other capacity is also engaged.

2. Section 208.32 is amended to read as follows:

§ 208.32 Tariffs and terms of service.

(e) The carrier shall require full payment of the total charter price, including payment for the return portion of a round trip, or the posting of a satisfactory bond for full payment, prior to the commencement of any portion of the air transportation:

Provided, however, That in the case of a passenger charter for less than the entire capacity of an aircraft pursuant to § 208.6(a)(3), the carrier shall require full payment of the total charter price, including payment for the return portion of a round trip, from the passenger charterers not less than 10 days prior to the commencement of any portion of the transportation, and such payment shall not be refundable unless the charter is canceled by the carrier or unless the carrier accepts a substitute charterer for one which has canceled a charter, in which case the amount paid by the latter shall be refunded. For the purpose of this paragraph, payment to the carrier's depository bank, as designated in the charter contract, shall be deemed payment to the carrier.

(f) Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported one way in each direction, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see § 208.6(a)(3)), shall move as a unit in both directions, except as provided in § 208.36. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round trip is chartered separately in order to avoid the 5-percent limitation aforesaid.

(Secs. 102, 204, 401 of the Federal Aviation Act 1958, as amended, 92 Stat. 1706, 72 Stat. 743, 92 Stat. 1710; 49 U.S.C. 1302, 1324, 1371.)

14 CFR Part 212

[Regulation ER-1147; Amendment No. 29; Docket 31788]

Split All-Cargo Charters and Split Passenger/Cargo Charters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., August 23, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule allows more than one person to charter the entire capacity of an aircraft for air freight, and to charter the unused belly capacity of a passenger charter flight. The rule should spur competition in the air cargo industry, leading to lower shipping rates and to increased charter opportunities for small shippers. This action is in response to a petition for rulemaking by two charter air carriers, Trans International Airlines and World Airways.

DATES: Effective: September 28, 1979. Adopted: August 23, 1979.

FOR FURTHER INFORMATION CONTACT: Mark Frisbie, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION:

For the reasons explained in ER-1145, dated August 23, 1979, issued simultaneously, the Board is amending its charter regulations to allow split cargo charters.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 212, *Charter trips by foreign air carriers*, as follows:

1. Section 212.8 is renumbered and amended to read as follows:

§ 212.8 Charter flight limitations.

(a) Charter flights (trips) shall be limited to foreign air transportation performed by a foreign air carrier holding a foreign air carrier permit issued pursuant to section 402 of the Act authorizing such carrier to engage in foreign air transportation on an individually ticketed or individually waybilled basis—

(1) Where the entire capacity of one or more aircraft has been engaged for the movement of persons and their baggage and/or for the movement of property, on a time, mileage or trip basis—

(i) By a person for his own use (including a direct air carrier or direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage or company property, or in cases of emergency, of commercial traffic; except that emergency charters

of commercial traffic shall be reported in accordance with § 212.14);

(ii) By a person (no part of whose business is the formation of groups for transportation or the consolidation of shipments for transportation or solicitation or sale of transportation services) for the transportation of a group of persons as agent or representative of such group;

(iii) By an air freight forwarder or cooperative shippers association registered under Part 296 of this subchapter, with respect to flights from the United States in foreign air transportation, by a foreign air freight forwarder holding effective Board authority; or, with respect to flights to the United States in foreign air transportation, by any foreign air freight forwarder;

(iv) By an overseas military personnel charter operator as defined in Part 372 of this chapter; or

(v) By a charter operator or foreign charter operator as defined in part 380 of this chapter.

(2) Where less than the entire capacity of an aircraft has been engaged for the movement of persons and their personal baggage and/or for the movement of property, on a time, mileage or trip basis, by two or more of the following persons; except that such persons in the aggregate must engage the entire capacity of the aircraft in accordance with paragraph (b) of this section:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or company property, or in cases of emergency, of commercial passenger traffic; except that emergency charters of commercial traffic shall be reported in accordance with § 212.14);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services), for the transportation of a group of persons as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter;

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(v) By an air freight forwarder or cooperative shippers association registered under Part 296 of this subchapter, with respect to flights from the United States in foreign air transportation, by a foreign air freight forwarder holding effective Board authority; and, with respect to flights to

the United States in foreign air transportation, by and foreign air freight forwarder.

(b)(1) Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(2)(iv) of this section shall contract and pay for 20 or more seats. Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii) of this section shall contract and pay for 40 or more seats, except that if the main deck capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii) of this section for the movement of persons and their baggage, then either one of such persons may contract and pay for a minimum of 20 seats.

(2) Carriers shall not transport both persons and property on the main deck of a chartered aircraft.

(3) The entire capacity of an aircraft shall be considered as engaged if its main deck capacity is engaged, regardless of whether the remaining belly or other capacity is also engaged.

2. Section 212.10 is amended to read as follows:

§ 212.10 Terms of service.

(a) [Reserved]

(b) The carrier shall require full payment of the total charter price, including payment for the return portion of a round trip, or the posting of a satisfactory bond for full payment, prior to the commencement of any portion of the air transportation:

Provided, however. That in the case of a passenger charter for less than the entire capacity of an aircraft pursuant to § 212.8(a)(2), the carrier shall require full payment of the total charter price, including payment for the return portion of a round trip, from the passenger charterers not less than 10 days prior to the commencement of any portion of the transportation, and such payment shall not be refundable unless the charter is canceled by the carrier or unless the carrier accepts a substitute charterer for one which has canceled a charter, in which case the amount paid by the latter shall be refunded. For the purpose of this section, payment to the carrier's depository bank, as designated in the charter contract, shall be deemed payment to the carrier.

(c) Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, one-way passengers shall not be carried except that up to 5 percent of the charter group

may be transported one way in each direction, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see § 212.8(a)(2)), shall move as a unit in both directions, except as provided in § 212.11. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round trip is chartered separately in order to avoid the 5-percent limitation aforesaid.

(Secs. 102, 204, 401, 402 of the Federal Aviation Act of 1958, as amended, 92 Stat. 1706, 72 Stat. 743, 92 Stat. 1710, 72 Stat. 757; 49 U.S.C. 1302, 1324, 1371, 1372.)

By the Civil Aeronautics Board:

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

14 CFR Part 324

[Regulation PR-212; Amendment No. 1]

Procedures for Compensating Air Carriers for Losses; Approval by the General Accounting Office

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., August 23, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule gives notice that the General Accounting Office has approved the reporting requirements contained in the subject regulation (PR-209, 44 FR 42171, July 19, 1979). This approval is required under the Federal Reports Act, and was transmitted to the Civil Aeronautics Board by letter dated August 17, 1979.

DATES: Adopted: August 23, 1979.
Effective: August 23, 1979.

FOR FURTHER INFORMATION CONTACT: Clifford M. Rand, Chief, Data Requirements Division, Office of Economic Analysis, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673-6044.

Part 324 [Amended]

Accordingly, the Civil Aeronautics Board amends Part 324 of its Procedural Regulations (14 CFR 324) by adding the following note at the end of Part 324:

Note.—The reporting requirements contained in §§ 324.2 and 324.9 have been approved by the U.S. General Accounting Office under B-180226 (R0654).

This amendment is issued by the undersigned pursuant to the delegation of authority from the Board to the Secretary in 14 CFR 385.24(b). (Sec. 204

of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324).

By the Civil Aeronautics Board.

Phyllis T. Kaylor,
Secretary.

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 211

[DoD Directive 5100.64]¹

DoD Foreign Tax Relief Program

AGENCY: Office of the Secretary of Defense.

ACTION: Final rule.

SUMMARY: This rule defines the tax relief program of the Department of Defense and delineates DoD responsibilities to implement and monitor the program. This rule outlines procedures to effect relief from tax burdens and clarifies statistical reporting.

EFFECTIVE DATE: June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Benjamin Forman, telephone 697-8343, Counselor on International Law, Office of the DoD General Counsel, The Pentagon, Room 3E963, Washington, D.C. 20301.

SUPPLEMENTARY INFORMATION: In FR Doc. 70-15847 appearing in the Federal Register on November 25, 1970 (35 FR 18045), the Department of Defense published Part 211. In FR Doc. 72-7177 appearing in the Federal Register on May 11, 1972 (37 FR 9457), the Department of Defense published an amendment to Part 211. This is an administrative revision of Part 211.

Accordingly, Chapter I, 32 CFR, Subchapter M, Part 211, is revised, reading as follows:

PART 211—DOD FOREIGN TAX RELIEF PROGRAM

Sec.

211.1 Reissuance and purpose.

211.2 Applicability and scope.

211.3 Definitions.

211.4 Policy.

211.5 Responsibilities.

211.6 Country tax law studies.

211.7 Information requirements.

Authority: The provisions of this Part 211 issued under Title 5, U.S.C. 301 and Title 10, U.S.C. 133.

¹Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120. Attention: Code 301.

§ 211.1 Reissuance and Purpose.

This Part (a) is reissued without substantive change, to correct superseded references; and (b) defines the tax relief policy of the Department of Defense, designates the organizational element which has continuing responsibility for the overall direction of the DoD Foreign Tax Relief Program, delineates the responsibilities of other organizational elements to implement and monitor the program, and requires the preparation and maintenance of specified foreign country tax law studies in order to facilitate the institution of statistical reporting procedures.

§ 211.2 Applicability and scope.

(a) The provisions of this Part apply to the Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff, the Unified Command, and the Defense Agencies (hereafter referred to as "DoD Components").

(b) The policy set forth in this Part applies to:

(1) Military functions expenditures by the Department of Defense, and

(2) Expenditures by nonappropriated fund activities of the Department of Defense that are subject to taxes imposed by:

(i) Foreign countries in which U.S. military forces are regularly stationed (other than *attache* and other military personnel assigned to a U.S. diplomatic mission); and

(ii) Any other foreign country in which all or most U.S. defense activities, in a collective sense, are conducted in the interest of the common defense or otherwise significantly improve the military security of that country.

(c) The policy set forth in this Part also applies to Military Assistance Program (MAP) expenditures in all countries.

§ 211.3 Definitions.

(a) Regardless of how a charge is denominated in foreign law or regulation, the words "tax" and "taxes" include all direct or indirect foreign customs duties, import and export taxes, excises, fees and other charges imposed at the national, local or intermediate level of a foreign country other than charges for services rendered or for other consideration received.

(b) For example, taxes include but are not limited to purchase tax, sales tax, use tax, gross receipts tax, stamp tax, transfer tax, transaction tax, turnover tax, value added tax, service tax, trade tax, business tax, license tax, transportation tax, circulation tax, luxury tax, possession tax, production tax, registration tax, consumption tax,

gasoline tax, real property tax, personal property tax, and gross income tax.

(c) The word "relief" includes any method, technique, or procedure by which the ultimate economic burden of a tax on DoD funds may be avoided or otherwise remedied, such as exemption, refund, or drawback.

§ 211.4 Policy.

It is the policy of the Department of Defense to secure, to the maximum extent practicable, effective relief from all foreign taxes wherever the ultimate economic burden of those taxes would, in the absence of such relief, be borne by funds appropriated or allocated to the Department of Defense (including MAP appropriations) or under the control of its nonappropriated fund activities. In those cases in which the total economic burden of a tax not readily identifiable in the normal course of business is so small that it may be considered a *de minimis* matter, or in which the administrative burden of securing effective relief from a tax in a particular instance would be out of proportion to the amount of the relief obtained, tax relief shall be considered impracticable.

§ 211.5 Responsibilities.

(a) The General Counsel of the Department of Defense shall:

(1) Provide overall supervision and direction of the DoD Foreign Tax Relief Program.

(2) Resolve any significant issues relating to the program.

(3) Designate those countries that come within § 211.2(b)(2)(ii) of this Part.

(4) Direct the preparation of country tax law studies for countries not within the scope of § 211.2(b) of this Part.

(5) Designate the DoD member of the Inter-Agency Committee on Foreign Tax Relief, established by the Department of State.

(b) The Assistant Secretary of Defense (International Security Affairs) shall monitor the negotiation and conclusion of international agreements subject to the Secretary's approval authority under DoD Instruction 2050.1 Delegated Approval Authority to Negotiate and Conclude International Agreements, July 6, 1977,¹ to ensure that such agreements are compatible with the policy set forth in this Part and any implementing guidance concerning that policy issued by the General Counsel of the Department of Defense.

(c) The Chairman, Defense Acquisition Regulatory Council, shall coordinate with the General Counsel of the Department of Defense before the issuance, amendment, or revision of any portion of the Defense Acquisition

Regulatory System (or regulation, directive, circular, or other publication within the scope of 32 CFR 160 that pertains to the implementation of the DoD Foreign Tax Relief Program.

(d) The Assistant Secretary of Defense (Comptroller) shall perform such fiscal functions as may be required to implement the DoD Foreign Tax Relief Program, including advice and assistance in the institution of procedures for collecting data, compiling reports, and performing internal audits.

(e) The Secretary of each of the Military Departments and the Director of each of the Defense Agencies shall issue instructions or regulations that charge a single office within the respective Military Department of Defense Agency (referred to as the "Cognizant Office") with continuing responsibility for supervising and monitoring the implementation of the DoD Foreign Tax Relief Program within such Department or Agency. Such instructions or regulations shall delegate to the Cognizant Office authority commensurate with its responsibility.

(f) Commanders of Unified Commands, as appropriate, shall promulgate management procedures to guide and coordinate the administration of the DoD Foreign Tax Relief Program throughout their respective area commands.

(g) For each foreign country that comes within the scope of subsection B.2. of this Directive, a single Military Commander shall be designated by the Commander of the Unified Command. The designated Military Commander shall be the same designated under the procedures in § 151.3(c) of 32 CFR 151. The designated Military Commander shall:

(1) Make and maintain a current country tax law study in accordance with § 211.6 of this Part.

(2) Be the single point of contact for U.S. contracting officers and activities for the investigation and resolution of specific matters that relate to the foreign tax relief program within the country for which the Military Commander is designated and for the forwarding of major problems affecting that program through proper channels to the General Counsel of the Department of Defense.

(3) Provide liaison with the responsible U.S. diplomatic mission on current tax relief problems and, where appropriate, with local foreign tax authorities.

§ 211.6 Country tax law studies.

(a) The taxes covered by each country tax law study shall be limited to those which in the absence of tax relief, would affect, or would appear to affect, U.S.

Government expenditures, even as a *de minimis* matter. (All such taxes are hereafter referred to as "applicable taxes.") The formats of the studies for all countries shall be similar within each Unified Command insofar as practicable, and designed to facilitate statistical reporting procedures. The studies shall be prepared and maintained with a view to the practical utilization of the studies by U.S. contracting officers and activities for purposes of making reliable estimates of the total amount of taxes applicable to any particular contract and the amount thereof for which tax relief is available.

(b) Each country tax law study shall consist of the following:

(1) A general survey of all applicable taxes, together with translations, as appropriate, of the salient features of the law or regulations imposing those taxes.

(2) For each applicable tax, a summary statement containing: its name; its rate (or rates); the taxing authority (national, provincial, or municipal); the legal incidence of the tax (the nature of the taxpayer or other entity liable for the payment of the tax to the taxing authority under the law of the country); its description (including the base or bases on which the tax is imposed); the applicability of the tax to various types of contracts (supplies, services, or construction) in the event the tax is applicable to only one or several of such types of contracts; the applicability of the tax to the prime contract, as well as to any subcontracts or purchase orders issued by the prime contractor or subcontractor; the applicability of the tax to contractor and subcontractor personnel; the variation, if any, of the applicability of the tax depending upon the domicile of the contractor or contractor personnel, such as United States, host country, or third country; any applicable exemptions or deductions of significance; and the method of collection of the tax.

(3) The basis upon which it is concluded that each applicable tax, in absence of tax relief, would affect, or would appear to affect, U.S. Government expenditures; and any evidence of the degree to which its ultimate economic burden would, in absence of tax relief, be borne by the U.S. Government rather than be absorbed by others.

(4) The substantive tax relief, if any, from each applicable tax that is available to the U.S. Government either by international agreements in force or under the tax law or other regulation of the country; the procedures which may be used to obtain any such relief; the requirement, if any, for the issuance of a tax exemption certificate by the military procuring agency or by an agency of the

country to secure an exemption; the entitlement, if any, of the taxpayer to interest on any tax refund made by the host country; the credits, if any, that may be available against any other taxes otherwise payable by the taxpayer resulting from the payment of the tax under analysis; the approximate amount of the tax that should be involved in a particular case, if such can be estimated, taking into account the costs of filing a claim for refund by a contractor to warrant filing such a claim; and a brief narration of any significant problems which have occurred in attempting to obtain relief in particular cases.

(5) A conclusion with regard to the adequacy of current tax relief measures; and such recommendations as may be appropriate for more efficient implementation of the policy set forth in this Part.

(c) Appended to each country tax law study shall be a verbatim quotation of all provisions relating to tax relief afforded by the country that are contained in international agreements in force.

(d) One copy of each country tax law study shall be forwarded to the General Counsel of the Department of Defense and to each of the Cognizant Offices of the Military Departments and Defense Agencies within 30 days after its approval by the designated Military Commander. The information contained in the studies shall be disseminated by the Cognizant Offices to U.S. contracting officers and activities when required.

(e) Country tax law studies shall be subject to continuing review. When there is a significant change in country tax laws, regulations, tax relief procedures, or in pertinent international agreements in force, the corresponding revision shall be promptly forwarded by the designated Military Commander to each of the offices referred to in § 211.6(d).

§ 211.7 Information Requirements.

(a) The reporting requirement contained in § 211.6 relating to the submission of country tax law studies and revisions thereof is assigned Report Control Symbol DDSD (AR) 1036.

(b) Each January a summary of significant activities during the preceding year in implementation of the DoD Foreign Tax Relief Program shall be furnished by the Heads of Cognizant Offices to the General Counsel of the Department of Defense. The summary, in narrative form, shall include actions taken by the Cognizant Office to discharge its responsibility for supervising and monitoring the implementation of the foreign tax relief program within its Military Department

or Defense Agency, and for disseminating the information contained in country tax law studies to U.S. contracting officers and activities. The reporting requirement contained in this subsection is assigned Report Control Symbol DDGC (A) 1198.

(c) Each January a summary of significant activities during the preceding year of the administration of the foreign tax relief program shall be furnished by Commanders of the Unified Commands to the General Counsel of the Department of Defense. The summary, in narrative form, shall include actions taken by the Unified Command to discharge its responsibility to supervise and coordinate the preparation and maintenance of country tax law studies. The reporting requirement contained in this subsection is assigned Report Control Symbol DDGC (A) 1199.

August 24, 1979.

H. E. Lofdahl,

Deputy Director, Correspondence and Directives Washington Headquarters Services, Department of Defense.

BILLING CODE 3810-70-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 1306-3]

Approval and Promulgation of Implementation Plans; Minnesota

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces approval of a request by the State of Minnesota for an eighteen month extension of the statutory timetable for submittal of the portion of its State Implementation Plan (SIP) revision implementing the National Secondary Ambient Air Quality Standards for total suspended particulates. The portion of the Minnesota SIP addressing particulate secondary nonattainment areas must be submitted by July 1, 1980 for the United States Environmental Protection Agency's (USEPA) approval or disapproval by January 1, 1981. The following five nonattainment areas are the subject of the extension: Cloquet, East Grand Forks, the Iron Range, Red Wing, and Silver Bay.

EFFECTIVE DATE: August 29, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Jay Bortzer, Minnesota State Specialist, Air Programs Branch, United

States Environmental Protection Agency Region V, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6066.

SUPPLEMENTARY INFORMATION: On January 8, 1979, the Executive Director of the Minnesota Pollution Control Agency submitted to the Regional Administrator Region V, a request for a twelve month extension of the statutory submittal date for the portion of the Minnesota State Implementation Plan implementing the National Secondary Ambient Air Quality Standard for total suspended particulates. On March 9, the Executive Director of the Minnesota Pollution Control Agency submitted additional information and requested that the extension be for eighteen months. These requests were made pursuant to section 110(b) of the Clean Air Act. The United States Environmental Protection Agency published a document in the Federal Register (44 FR 30378) on May 25, 1979 proposing to approve the request of the State of Minnesota for an eighteen month extension of the January 1, 1979 deadline for submittal of the SIP revision and the July 1, 1979 deadline for its approval by USEPA. Interested parties were given until June 25, 1979, to submit written comments on the request for an extension and on USEPA's proposed approval. No comments were received.

The United States Environmental Protection Agency has determined that the request satisfies the requirements of 40 CFR 51.31 since a showing has been made by Minnesota that attainment cannot be achieved without emission reductions greater than those that can be achieved through the application of Reasonably Available Control Technology (RACT). Further, Minnesota has properly given notice of the requested extension to the States of Wisconsin and North Dakota which adjoin some of the air quality control regions which are the subject of this extension. Accordingly, the Administrator approves the extension request. The portion of the Minnesota SIP implementing the National Secondary Ambient Air Quality Standards for particulates in Cloquet, East Grand Forks, the Iron Range, Red Wing, and Silver Bay must be submitted to USEPA by July 1, 1980 for USEPA approval or disapproval by January 1, 1981.

During this extension, the Emission Offset Interpretative Ruling published January 16, 1979 (44 FR 3274) will apply to the five secondary nonattainment areas which are all areas violating only a Secondary National Ambient Air Quality Standard. If during the

extension, however, the State submits and USEPA approves a SIP revision containing preconstruction review provisions which satisfy the requirements of Part D of the Act, the preconstruction review provisions of the revised SIP rather than the interpretative ruling will apply to the five secondary nonattainment areas.

Under Executive Order 12044 EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Dated: August 22, 1979.

Douglas Costle,

Administrator.

Title 40 of the Code of Federal Regulations, Chapter 1, Part 52, is amended as follows:

1. Section 52.1220(c) is amended by adding a new paragraph (13) to read as follows:

§ 52.1220 Identification of plan

(c) * * *

(13) A request for an extension of the statutory timetable for the submittal of the portion of the Minnesota State Implementation Plan implementing the National Secondary Ambient Air Quality Standards for total suspended particulates was submitted by the Executive Director of the Minnesota Pollution Control Agency on January 8, 1979 and was supplemented with additional information on March 9, 1979.

2. A new § 52.1235 is added as follows:

§ 52.1235 Extensions.

The Administrator hereby extends for eighteen months the statutory timetable for submission of Minnesota's plan for attainment and maintenance of the National Secondary Ambient Air Quality Standards for total suspended particulates in Cloquet, East Grand Forks, the Iron Range, Red Wing, and Silver Bay. The plan is due by July 1, 1980.

BILLING CODE 6560-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

42 CFR Part 511

Project Grants for Genetic Diseases Testing and Counseling Programs

AGENCY: Public Health Service, HEW.

ACTION: Confirmation of final rule.

SUMMARY: This document confirms provisions of a final regulation for the administration of project grants for genetic diseases testing and counseling services, as authorized by Title XI of the Public Health Service Act. The regulation provides program requirements for grantees and potential grantees.

EFFECTIVE DATE: April 23, 1979.

FOR FURTHER INFORMATION CONTACT:

Audrey Manley, M.D., Acting Chief, Genetic Services Branch, Office of Maternal and Child Health, Bureau of Community Health Services, Room 6-40, 5600 Fishers Lane, Rockville, MD 20857. Phone: (301) 443-1080.

SUPPLEMENTARY INFORMATION: On April 23, 1979, the Secretary published a final rule to implement the Genetic Diseases Act, Part A, Title XI of the Public Health Service Act (Act) (42 U.S.C. 300b), as amended by section 205 of Public Law 95-626 (November 10, 1978).

The original legislation, enacted in April 1976, authorized grants only for projects to establish and operate genetic diseases testing and counseling programs (section 1101(a) of the Act). The statutory amendments of November 1978 added language which authorizes grants for projects *to plan*, as well as to establish and operate, these programs. Since the amendments authorizing "planning" activities were enacted after publication of a Notice of Proposed Rulemaking (NPRM) on May 5, 1978, the Secretary decided to afford an additional comment period of 45 days regarding the implementation of this authority in the final regulation. The Secretary further indicated that the final rule would be revised as warranted by the comments received.

No comments were received by the close of the comment period, June 7, 1979. Therefore, this issuance notifies the interested public that the final rule governing the administration of grants for projects to plan, establish, and operate genetic diseases testing and counseling programs remains effective as originally published on April 23, 1979.

Dated: August 1, 1979.
Julius B. Richmond
Assistant Secretary for Health.

Approved: August 21, 1979.
Patricia Roberts Harris,
Secretary.

BILLING CODE 4110-04-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[Docket No. 21348]

Private Land Mobile Radio Service; Providing a New Part 90 That Reregulates and Consolidates Parts 89, 91 and 93; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: In an effort to set forth a simple and more manageable set of rules for use by applicants, licensees, and industry users, the Federal Communications Commission published regulations at 43 FR 54788, November 22, 1978 providing for the consolidation and updating of the private land mobile radio services provisions. This document makes necessary corrections because of omissions and inaccuracies which occurred in preparation and printing.

EFFECTIVE DATE: January 2, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Arthur C. King, Rules Division, Private Radio Bureau, (202) 632-6497.

In the matter of amendment of the Commission's rules governing the private land mobile radio service to provide a new Part 90 that reregulates and consolidates Parts 89, 91, and 93. Second Errata.

Released: August 24, 1979.

The appendix to the Report and Order in this proceeding (FCC 78-799, 43 FR 54788), contained a new Part 90 which consolidated the Rules and Regulations formerly contained in Parts 89, 91, and 93. In the process of consolidating, a number of omissions and inaccuracies occurred which are the subject of this errata.

§ 90.17 [Corrected]

1. In § 90.17(b) on page 54795, correct the Local Government Radio Service frequency table entry below to read as follows:

72-76 — Operational fixed — 6

§ 90.19 [Corrected]

2. (a) On page 54797, in § 90.19(d) correct the Police Radio Service frequency table as follows:

37.10 — do. — 9

(b) In § 90.19(d) delete "38.18 — do. — 9" and insert

39.18 — do. — 9

§ 90.21 [Corrected]

3. On page 54800, in § 90.21(b) correct the Fire Radio Service frequency entries below to read as follows:

45.88 — do. — 2

450-470 — fixed — 6

§ 90.23 [Corrected]

4. In § 90.23(b) on page 54801, correct the Highway Maintenance Radio Service frequency table as follows:

450-470 — fixed — 7

§ 90.25 [Corrected]

5. In § 90.25(b) on page 54802, correct the Forestry-Conservation Radio Service frequency table as follows:

450-470 — fixed — 13

470-512 — Base or Mobile — 15

6. In § 90.55, on page 54807, correct the first sentence to read as follows:

§ 90.55 Paging operations.

Effective August 15, 1974, paging operations may be authorized in the Special Emergency Radio Service only on frequencies assigned under the provisions of §§ 90.53(b)(4) and 90.53(b)(25).

7. In § 90.61, on page 54807, correct the second sentence to read as follows:

§ 90.61 General eligibility.

Eligibility is also provided, except in the Business and Special Industrial Radio Services, for a non-profit corporation or association that is organized for the purpose of furnishing a radio communications service to persons actually engaged in any of the eligibility activities set forth in the particular service involved subject to the cooperative use provisions of § 90.181.

§ 90.63 [Amended]

8. In § 90.63(c) on page 54808, correct the Power Radio Service frequency table as follows:

154.45625 — fixed or mobile — 7, 21, 22, 23

9. In § 90.65(a) on page 54809, correct the final sentence to read as follows:

§ 90.65 Petroleum Radio Service.

(a) *Eligibility.* * * * However, persons engaged solely in the containment or cleanup of oil spills will only be assigned those frequencies designated by limitations (6) or (9) in this section.

10. In § 90.65(b) on page 54809, correct the Petroleum Radio Service frequency table as follows:

25.10 — do. — 3, 4, 7

406-413 — operational fixed — 23

11. In § 90.65(c) on page 54810, correct paragraph (1) to read as follows:

(1) Frequencies below 25 MHz will be assigned to base or mobile stations in this service only upon a satisfactory showing that, from a safety of life standpoint, frequencies above 25 MHz will not meet the operational requirements of the applicant.

12. In § 90.65(d) on page 54811, correct paragraph (1) as follows:

(1) Frequencies may be substituted for those available below 25 MHz in accordance with the provisions of § 90.263.

§ 90.73 [Corrected]

13. In § 90.73(c), Frequencies available, on page 54815 delete 27.69 from the Special Industrial Radio Service frequency table and correct the frequency table as follows:

72-76 — Operational fixed — 6

§ 90.79 [Corrected]

14. In § 90.79(c) on page 54822, Frequencies available, correct the Manufacturers Radio Service frequency table as follows:

Delete the 351.375 — do. — 13 entry in its entirety. Insert in proper numerical sequence:

451.375 — do. — 13

451.425 — do. — 13

15. In § 90.79(d), correct paragraph (9) on page 54823, to read:

(9) This frequency is available on a shared basis with other Industrial Radio

Services as follows: Power, Forest Products, Special Industrial, Petroleum, Business, and the Local Government Radio Service and may be used in this service only for the purpose of remote control and telemetering.

§ 90.81 [Corrected]

16. In § 90.81(f), Limitation on number of frequencies assignable, correct paragraph (3) on page 54824, to read:

(3) Frequencies in the 25-50 MHz, 150-170 MHz, and 450-512 MHz bands and the frequency bands 903-904 MHz, 904-912 MHz, 918-926 MHz, and 926-927 MHz may be assigned for the operation of automatic vehicle monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.87 [Corrected]

17. In § 90.87 on page 54824, General Eligibility, correct the final sentence to read:

Eligibility is also provided for a non-profit corporation or association that is organized for the purpose of furnishing a radio communications service to persons actually engaged in any of the eligibility activities set forth in the particular service involved subject to the cooperative use provisions of § 90.183.

§ 90.175 [Corrected]

18. In § 90.175, Frequency coordination requirements, correct paragraph (a)(2) on page 54834 to read:

(2) A statement from a frequency coordinating committee recommending the frequency which, in the opinion of the committee, will result in the least amount of interference to all existing stations operating in the particular area. The Committee's recommendations may appropriately include comments on technical factors such as power, antenna height and gain, terrain, and other factors which may serve to mitigate any contemplated interference. The Committee shall not recommend any adjacent channel frequency 15 kHz removed to existing stations which would result in a separation of less than 10 miles. The frequency advisory committee must be so organized that it is representative of all persons who are eligible for radio facilities in the service concerned in the area the committee purports to serve. The functions of such committees are purely advisory in character, and their recommendations cannot be considered as binding upon either the applicant or the Commission, and must not contain statements which would imply that frequency advisory committees have any authority to grant or deny applications. If the frequency

recommended is in the 150-170 MHz band, is 15 kHz removed from a frequency which is available to another radio service, and is assignable only after coordination, the committee's statement shall affirmatively show that coordination with a similar committee for the other service has been accomplished.

19. In § 90.175(b), correct paragraph (b)(1) on page 54834, to read:

(1) A report showing that the frequencies applied for are available for assignment in accordance with the applicable loading and separation standards, as specified in §§ 90.303 and 90.307, or;

20. In § 90.175, correct paragraph (e)(10) to read:

(10) Applications in the Business Radio Service for a frequency below 450 MHz where both frequencies immediately adjacent (± 20 or 30 kHz) are available for assignment in that service.

§ 90.181 [Corrected]

21. In § 90.181, correct paragraph (b) on page 54835, to read:

(b) A base station licensee who enters into a cooperative arrangement in accordance with the provisions of paragraph (a)(2) of this section shall obtain prior approval from the Commission for each person who proposes to enter into said arrangement.

§ 90.183 [Corrected]

22. In § 90.183, on page 54836, correct the second sentence of the opening paragraph to read:

The installation and use of mobile units, operated under the licensee's station authorization, in the vehicles of other persons furnishing the licensee, under contract, services or facilities within the purview of the established scope of the service in which the station is authorized, in accordance with the provisions of § 90.421 (i) and (j) shall not be considered the rendition of a private radiocommunication service when the communications involved relate solely to the furnishing of such services or facilities to the licensee.

§ 90.233 [Corrected]

23. In § 90.233 on page 54841, correct the first sentence of the opening paragraph to read:

On a secondary basis to voice operations, the use of A2, A9, F2, F9 (audio frequency toneshift or tone phase shift) or F9Y emission may be

authorized to base/mobile operations in accordance with the following limitations and requirements.

§ 90.421 [Corrected]

24. In § 90.421 on page 54867, add a new paragraph (j) as follows:
(j) Mobile units licensed to an eligible in the Railroad Radio Service may be installed in vehicles operated by organizations providing, under contract, facilities or service in connection with railroad operation or maintenance including pickup, delivery, or transfer between stations of property shipped, continued in, or destined for shipment by railroad common carrier: Provided, that the parties to the contract comply with the provisions of § 90.183.

§ 90.425 [Corrected]

25. In § 90.425, correct paragraph (d)(1) on page 54869, to read:

(1) It is a mobile station operating on the transmitting frequency of the associated base station.

Federal Communications Commission,
William J. Tricarico,
Secretary.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Part 214]

Nonimmigrant Alien (H-1) Nurses; Proposed Examination Requirement

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This is a proposal to amend the Immigration and Naturalization Service regulations to require nonimmigrant professional nurses to pass the screening examination given by the Commission on Graduates of Foreign Nursing Schools in order to qualify for the "H-1" nonimmigrant visa classification. This amendment is necessary because at this time there is no way to determine, prior to adjudication of the visa petition, the probability of the nurse beneficiary being able to pass the state licensure examination in the United States. This amendment is intended to provide a test of the capabilities of foreign professional nurses in all the areas of nursing for which American nurse graduates are responsible and thereby to afford an objective estimate of their ability to pass state licensure examinations in the United States and to perform services here of the "exceptional nature" required by the statute.

DATES: Representations must be received on or before October 29, 1979.

ADDRESSES: Please submit written representations, in duplicate, to the Commissioner of Immigration and Naturalization, Room 7100, 425 Eye Street, N.W., Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT: James C. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, Washington, DC 20536. Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION: Section 101(a)(15)(H)(i) of the Immigration and Nationality Act in part defines as a

nonimmigrant an alien having a residence in a foreign country which he has no intention of abandoning, "who is of distinguished merit and ability and who is coming temporarily to the United States to perform services of an exceptional nature requiring such merit and ability." By regulation the Service has provided that the alien professional nurse may meet this definition if, among other things, it is established that he or she is fully qualified under the laws of the place of intended employment in the United States to perform the desired services, e.g., practice professional nursing. This is most often accomplished by a showing that the State in which the nurse is to practice issues temporary permits or licenses to foreign nurses to engage in their profession pending their taking and passing the examination for permanent licensure. Many foreign nurse graduates who have been admitted as nonimmigrants, however, fail the examinations for permanent licensure and then are not permitted to continue practicing professional nursing. Since they can no longer perform the professional services for which they were admitted, they lose their nonimmigrant status and should depart the United States. Those who do not leave are relegated to working in jobs, sometimes menial, and much below the professional status under which they were admitted to the United States. In fairness to nonimmigrant nurses and to achieve a more equitable administration the immigration laws with respect to them, a better means was needed to determine in advance of adjudicating a petition the probability of the nurse-beneficiary being able to pass the State licensure examination and to perform services here of the "exceptional nature" required by the statute. Such a means is now available in the screening examination given both abroad and in the United States by the Commission on Graduates of Foreign Nursing Schools (CGFNS).

The CGFNS is an independent, non-profit organization established at the behest of the Division of Nursing, Bureau of Health Manpower, Department of Health, Education and Welfare, which also had become concerned over the increasing number of foreign nurse graduates in the United States, who could not achieve State licensure. The CGFNS developed this examination to test the capabilities of

Federal Register

Vol. 44, No. 169

Wednesday, August 29, 1979

foreign professional nurses in all the areas of nursing for which American nurse graduates are responsible, and to afford an objective estimate of their ability to pass licensure examinations in the United States. This proposed regulation adds the requirement to pass this examination as a condition for approval of a petition to classify a professional nurse as a nonimmigrant under section 101(a)(15)(H)(i) of the Act.

The examination is given in April and October of each year, in the United States and approximately 30 other countries throughout the world.

Further information may be obtained from the Commission on Graduates of Foreign Nursing Schools (CGFNS), 3624 Market Street, Philadelphia, PA 19104.

In the light of the foregoing, it is proposed to amend Chapter I of Title 8 of the Code of Federal Regulations by revising 8 CFR 214.2(h)(2)(iv) as set forth below.

PART 214—NONIMMIGRANT CLASSES

In Part 214, it is proposed to revise § 214.2(h)(2)(iv) as set forth below:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

(h) *Temporary employees.* . . .
(2) *Petition for alien of distinguished merit and ability.* . . .

(iv) *Nurses.* A petitioner seeking to accord a nurse a classification as a nonimmigrant under section 101(a)(15)(H)(i) of the Act shall attach to the petition (Form I-129B), (A) evidence that the beneficiary has obtained a full and unrestricted license to practice professional nursing in the country where she/he obtained her/his nursing education, or that such education was obtained in the United States or Canada; (B) evidence that the beneficiary has passed the examination given by the Commission on Graduates of Foreign Nursing Schools, Philadelphia, PA 19104; and (C) a statement by the petitioner certifying that the beneficiary is fully qualified and eligible under the laws governing the place of intended employment to engage in the practice of professional nursing immediately upon admission to the United States, and that under those laws the petitioner is authorized to employ the beneficiary to perform services as a professional nurse. If the laws governing the place where the services will be

performed place any limitations on the services to be rendered by the beneficiary, the statement should contain details as to the limitations. The district director shall consider any such limitations in determining whether the services which the beneficiary would perform are of the exceptional nature required by the Act.

(Sec. 103, 8 U.S.C. 1103, Interpret or apply sec. 214, 8 U.S.C. 1184)

Public Comment Invited

Members of the interested public are invited to submit relevant data, views and arguments relative to the provisions of this proposed rule. All relevant comments received on or before October 29, 1979 will be considered.

Dated: August 24, 1979.

Leonel J. Castillo,
Commissioner of Immigration and Naturalization.

BILLING CODE 4410-10-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[10 CFR Part 211]

[Docket No. ERA-R-79-41]

Phased Deregulation of Upper Tier Crude Oil

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Proposed Rulemaking and Public Hearing.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is proposing amendments to the crude oil pricing regulations to implement the President's decision to gradually deregulate domestic upper tier crude oil prices, beginning January 1, 1980 and reaching full decontrol on October 1, 1981, when existing authority to control petroleum prices expires. The proposal would permit market prices to be charged for first sales of a steadily increasing percentage of what would otherwise be upper tier crude oil produced from each property. Comments are requested on this or alternative means of achieving the objective of gradually decontrolling all domestic crude oil prices by October 1, 1981.

DATES: Proposed effective date: January 1, 1980. All requests to speak at a hearing by October 5, 1979, 4:30 p.m. Albuquerque hearing date: October 16, 1979, 9:30 a.m. Washington hearing date:

October 24, 1979, 9:30 a.m. All written comments by October 31, 1979, 4:30 p.m.

ADDRESSES: All written comments and requests to speak at the Washington hearing to: Economic Regulatory Administration, Office of Public Hearings Management, Docket No. ERA-R-79-41, Room 2313, 2000 M Street, NW., Washington, D.C. 20461. All requests to speak at the Albuquerque hearing to: Department of Energy, 2626 West Mockingbird Lane, P.O. Box 352228, Dallas, Texas 75235, Attention: Mack L. Laceyfield. Albuquerque hearing location: Navaho Nambé Room, Albuquerque Inn, Second and Marquette Streets, Albuquerque, New Mexico 87103 (Telephone: (505) 247-3344). Washington hearing location: Room 2105, 2000 M Street, NW., Washington, D.C.

SUPPLEMENTARY INFORMATION:

- I. Introduction
- II. Proposed Amendments
- III. Written Comment and Public Hearing Procedures
 - A. Written Comments
 - B. Public Hearings
- IV. Procedural Requirements

I. Introduction

The President has announced his intention to deregulate all domestic crude oil. He has also submitted to the Congress an initiative to impose a windfall profits tax on oil producer profits generated by OPEC-controlled increases in world market prices and in excess of amounts needed to encourage domestic exploration and development. The program to decontrol crude oil is not dependent, however, on Congressional action on the windfall profits tax.

In order that the national economy may adjust to the effects of deregulation in an orderly fashion, the President's schedule calls for the deregulation of domestic crude oil prices to be phased in gradually so as to be complete by October 1, 1981, the expiration date of

our authority to regulate prices for crude oil and refined petroleum products under the Emergency Petroleum Allocation Act of 1973 (15 U.S.C. 751 *et seq.*, Pub. L. 93-159, as amended). Several steps have already been taken to carry out this schedule. As a result of these steps, producers may currently charge market prices for all production from properties which qualify as newly discovered properties (44 FR 25828, May 2, 1979) or heavy oil properties (Executive Order No. 12153, 44 FR 48949, August 21, 1979). Market prices may also be received for the incremental production resulting from a tertiary project (43 FR 33679, August 1, 1978). In addition, we have provided for the gradual conversion of most lower tier crude oil to upper tier crude oil by October 1, 1979 (44 FR 25168, April 27, 1979).

As the final step in the President's program, we are proposing amendments to the price regulations which would provide, as explained below, for the gradual deregulation of upper tier crude oil between January 1, 1980, and October 1, 1981. The proposal would apply not only to current upper tier production, but also to all lower tier production that is gradually being converted to upper tier levels. On October 1, 1981, the price regulations on all domestic crude oil production will expire.

II. Proposed Amendments

The phased deregulation of domestic crude oil prices could be accomplished either by gradually decreasing the volume of crude oil subject to price controls or by gradually increasing the ceiling price for first sales of price controlled crude oil until that price equals the market price. We believe that a gradual decrease in the volume of crude oil subject to price controls would be simpler and surer; would ease industry's transition to the rigors of unregulated dealings; and would involve less administrative burden than ceiling price adjustments, particularly in view of the uncertainty as to what world market prices for crude oil will be on October 1, 1981. In addition, such action would permit the prices for first sales of an increasing amount of domestic crude oil to be determined by actual market factors without reference to the crude oil pricing regulations, and, thus, ease the transition to a market in which prices are determined solely by market factors. Finally, gradual release of increasing volumes of upper tier oil to market levels would not create an incentive to withhold production, as a gradual increase of upper tier prices to market levels might.

Accordingly, we are proposing that, beginning January 1, 1980, market prices be permitted for first sales of a specified percentage of the crude oil produced from properties that would otherwise be subject to upper tier ceiling prices. This percentage would reflect the gradual phased decontrol of upper tier crude oil production for the 22 months beginning in January 1980 and ending on October 1, 1981. For January 1980 the specified percentage would be 4.6 percent (approximately one twenty-second), and in each succeeding month the specified percentage would be increased by an additional 4.6 percent. Consequently, by October 1, 1981, market price would be permitted for the first sales of all upper tier crude oil.

The above proposal deals with the phased deregulation of upper tier crude oil. We believe this concentration on upper tier crude oil to be appropriate since almost all increased production is either upper tier crude oil or is released to market levels under existing rules. Moreover, as noted, the existing regulations already provide for the gradual conversion of lower tier crude oil to upper tier crude oil.

Comments are requested on this proposal. We will also give consideration in this rulemaking to variant proposals, provided commenters are able to suggest the means by which such alternatives can be implemented without either causing the withholding of production until higher prices can be obtained or having to predict what world oil prices will be at some future date. Comments should address such factors as whether this proposal or some other alternative would provide the greater incentive for increased domestic production, would be easier for DOE to administer and producers to comply with, and would cause the lesser disruption of the economy. Finally, we request comments on other provisions of the crude oil pricing and allocation regulations which should be amended to conform to these amendments.

III. Written Comment and Public Hearing Procedures

A. Written Comments

You are invited to participate in this proceeding by submitting data, views or arguments with respect to any matters relevant to this notice. Comments should be submitted by 4:30 p.m., October 31, 1979 to the address indicated in the "Addresses" section of this notice and should be identified on the outside envelope and on the document with the docket number and the designation: "Crude Oil

Deregulation." Ten copies should be submitted.

Any information or data submitted which you consider to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of such information or data and to treat it according to our determination.

B. Public Hearings

1. *Procedure for Requests to make Oral Presentation.* If you have any interest in the matters discussed in this notice, or represent a group or class of persons that has an interest, you may make an oral request by 4:30 p.m., October 5, 1979, for an opportunity to make oral presentation at either the Albuquerque or Washington hearing on today's amendments. You should provide a phone number where you may be contacted through the day before the hearing.

If you are selected to be heard at a hearing, you will be so notified before 4:30 p.m., October 11, 1979, and will be required to submit one hundred copies of your statement to the Washington hearing location before 4:30 p.m., October 24, 1979 or the Albuquerque hearing location before 9:30 a.m. on the day of the hearing.

2. *Conduct of the Hearings.* We reserve the right to select the persons to be heard at the hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An ERA official will be designated to preside at each of the hearings. These will not be judicial-type hearings. Questions may be asked only by those conducting the hearings. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

If you wish to ask a question at a hearing, you may submit the question, in writing, to the presiding officer. The ERA or, if the question is submitted at a hearing, the presiding officer will determine whether the question is relevant, and whether time limitations permit it to be presented for answer. The question will be asked of the witness by the presiding officer.

Any further procedural rules needed for the proper conduct of a hearing will be announced by the presiding officer.

Transcripts of the hearings will be made and the entire records of the hearings, including the transcripts, will be retained by the ERA and made available for inspection at the DOE Freedom of Information Office, Room GA-152, James Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript of either hearing from the reporter.

IV. Procedural Requirements

We are preparing a regulatory analysis which carefully examines today's proposal and possible alternative actions. Upon completion of a draft of this analysis, we will publish a notice announcing its availability.

As required by section 7(a) of the Federal Energy Administration Act of 1974 (15 U.S.C. 787 *et seq.*) a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency (EPA) for his comments concerning the impact of this proposal on the quality of the environment. The EPA Administrator has responded that EPA does not have any comments on the environmental effects of this proposal at this time.

Pursuant to the requirements of section 404(a) of the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*) we have referred this proposal, concurrently with the issuance hereof, to the Federal Energy Regulatory Commission for a determination as to whether it would significantly affect any matter within the Commission's jurisdiction.

(Emergency Petroleum Allocation Act of 1973, 15 U.S.C. 751 *et seq.*, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, 15 U.S.C. 787 *et seq.*, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385, Pub. L. 95-70, and Pub. L. 95-91; Energy Policy and Conservation Act, 42 U.S.C. 6201 *et seq.*, Pub. L. 94-163, as amended, Pub. L. 94-385, and Pub. L. 95-70; Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95-91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267)

In consideration of the foregoing, Part 212 of Chapter II of Title 10 of the Code of Federal Regulations is proposed to be amended as set forth below, effective January 1, 1980.

Issued in Washington, D.C., August 22, 1979.

David J. Bardin,
Administrator, Economic Regulatory
Administration.

§ 212.72 [Amended]

1. Section 212.72 is revised by the addition between the definitions of "Marginal property" and "New crude oil" of the following new definition of "Market level new crude oil":

"Market level new crude oil" means, with respect to a particular property during a particular month, the product of the market level factor for that month and the volume of new crude oil produced and sold from that property during that month. The market level factor for January 1980 shall be four and six-tenths percent (4.6%) and shall be increased by four and six-tenths percent (4.6%) in each succeeding month.

§ 212.74 [Amended]

2. Section 212.74(a) is revised to read as follows:

(a) Notwithstanding the provisions of § 212.73(a), a producer may in any month charge a price not to exceed the upper tier ceiling price in first sales of new crude oil, except that first sales of market level new crude oil are not subject to the ceiling price limitations of this subpart.

[FR Doc. 79-28918 Filed 8-28-79; 8:45 am]
BILLING CODE 6450-01-M

NATIONAL CREDIT UNION ADMINISTRATION

[12 CFR Part 701]

Organization and Operations of Federal Credit Unions; Debt Collection Practices

AGENCY: National Credit Union Administration.

ACTION: Notice of Intent.

SUMMARY: After examining the comments received in response to its Advance Notice of Proposed Rulemaking, the National Credit Union Administration has decided not to propose a regulation governing the debt collection practices of Federal credit unions at this time.

EFFECTIVE DATE: August 29, 1979.

ADDRESS: National Credit Union Administration, 2025 M Street, N.W., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: John L. Culhane, Jr., Attorney Advisor,

Office of General, or Joseph F. Myers, Consumer Affairs Specialist, Division of Examination and Insurance, National Credit Union Administration, 2025 M Street, N.W., Washington, D.C. 20456. Telephone numbers: (202) 254-8760 (Mr. Myers), (202) 632-4870 (Mr. Culhane).

SUPPLEMENTARY INFORMATION: On April 5, 1979, NCUA published in the Federal Register an Advance Notice of Proposed Rulemaking, 44 FR 20447 (1979). Comments were requested so that NCUA could determine the nature and degree of any abusive debt collection practices and so that NCUA could determine if Federal credit unions were having problems complying with the diverse Federal and state laws and regulations governing debt collection. Comments were also requested as to what NCUA should do, assuming that further actions were warranted. NCUA suggested three alternatives: (1) continue the present practice of investigating and attempting to resolve all complaints, while referring to the FTC cases which suggest that unfair or deceptive practices have been employed; (2) publish a statement of policy stating that certain debt collection practices are considered by the Administration to be unsafe and unsound practices justifying an administrative cease and desist action (This would put Federal credit unions on notice of the collection practices NCUA would challenge, but would leave NCUA with the burden of proving the practices to be unsafe and unsound ones); and (3) publish a regulation. NCUA welcomed suggestions as to other alternatives.

In order to allow all interested persons sufficient opportunity to comment, and to clarify the nature of the steps being taken, the comment period on the Advance Notice was extended from May 15, 1979 to June 30, 1979. 44 FR 32230 (1979). At the same time, a questionnaire was prepared and mailed to all state and selected local consumer affairs offices to determine whether complaints about the collection practices of Federal credit unions were being made to those organizations instead of NCUA.

A total of 95 questionnaires were sent. Thirty-nine responses were received. Five stated that no statistics were kept on the number of complaints received concerning Federal credit unions. Nineteen reported that no complaints had been received. The fifteen remaining commenters reported very few complaints. Most of the responses indicated that the number of complaints about the collection practices of Federal credit unions was substantially less than

the number of complaints received about the practices of other financial institutions.

Based on these responses, the Administration agrees with the assertions made by several commenters that a regulation is not warranted at this time. However, a number of commenters stated that NCUA guidelines as to acceptable collection practices would be welcome. Debt collection guidelines are therefore being prepared, and will be distributed to all Federal credit unions.

Lawrence Connell,
Chairman.

BILLING CODE 7535-01-M

CIVIL AERONAUTICS BOARD

[EDR-351B/SPDR-73, Docket 31788, dated August 23, 1979]

[14 CFR Parts 207, 208, 212, 214, and 380]

Proposed Removal of Limitations on Cargo Charters

AGENCY: Civil Aeronautics Board.
ACTION: Supplemental Notice of Proposed Rulemaking.

SUMMARY: This proposal would allow cargo to be carried on the main deck of the aircraft on split passenger/cargo charters, would eliminate for cargo charters the requirement that the entire aircraft be engaged in the aggregate, and would allow part charters of cargo on scheduled cargo or combination flights. It would also require passenger charter operators to state in their contracts with individual participants, in boldface type, the baggage allowance and charges for each passenger. The proposal is made at the Board's own initiative.

DATES: Comments by: October 29, 1979.

Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

Requests to be put on the Service List: September 10, 1979. Docket Section prepares the Service List and sends it to each person listed, who then serves his comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 31788, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Mark Frisbie, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: On December 5, 1977, Trans International Airlines and World Airways (TIA/World) filed a petition for rulemaking to amend 14 CFR Parts 207, 208, 212, and 214 to permit split all-cargo charters (use of the aircraft by two or more charterers) and also to permit carriage of cargo in the excess belly space of passenger charters. The petition did not request that cargo be allowed on the main deck along with passengers.

The Board issued a Notice of Proposed Rulemaking, EDR-351 (43 FR 14519, April 8, 1978), asking for public comments on the TIA/World petition, and inviting a general examination of the restrictions on charter cargo service. A final rule dealing with split all-cargo charters and split passenger/cargo charters in which cargo is restricted to the belly of the plane is being adopted simultaneously with this proposal.¹ This supplemental notice proposes to allow the carriage of cargo together with passengers on the main deck, to eliminate the requirement that the aircraft be fully engaged in the aggregate, and to allow shippers to charter space on a flight carrying individually-ticketed passengers or individually-waybilled cargo. The notice also proposes a consumer protection provision prompted by some of the comments in response to EDR-351.

Cargo Charter Limitations

As we explained in ER-1145, issued today, we are under no compulsion to maintain special limitations on cargo charters. We favor allowing shippers to choose whatever mix of charter and individually-waybilled service meets their needs. We would therefore remove the requirement that on cargo charters the entire aircraft be engaged, by making the charter flight limitations in 14 CFR § 207.11, 208.6, 212.8, and 214.7 applicable only to passenger charters. Thus, split cargo charters could be operated without all the available space being contracted for. This change would encourage the availability of charter flights in secondary markets and reduce charter cancellations.

Although the question was not raised explicitly by EDR-351, Seaboard World Airlines and Airlift International urged that cargo not be allowed on the main deck along with passengers on split

¹ ER-1145, adopted August 23, 1979, permits split all-cargo charters, and the carriage of cargo charters in the belly of passenger charter flights.

passenger/cargo charters. They did not elaborate on their reasons for this position.

The Board is not aware at this time of any good reason why cargo should not be permitted on the main deck in split passenger/cargo charters. The same considerations favoring split all-cargo charters and split all-passenger charters appear to justify split passenger/cargo charters, without regard to the proportion of passengers to cargo or whether cargo is carried on the main deck or in the belly of the aircraft. Unrestricted passenger/cargo splits will promote fuller use of aircraft capacity, and hence more efficient operations. Consistent with our proposal to eliminate the "full plane" requirement for cargo charters, this proposal provides that the portion of the main deck configured for cargo carriage would not have to be fully engaged.

Since off-route charter restrictions on scheduled carriers are the subject of a separate notice of proposed rulemaking,² we are not proposing to deal with them here.

In EDR-351, we did not propose to amend Part 214, governing charter trips by foreign charter air carriers, to allow split cargo charters. Since the Board has issued permits authorizing cargo charters by foreign charter carriers, we see no reason to restrict the carriers governed by Part 214 to a greater extent than those governed by Parts 207, 208, and 212 with respect to cargo charters, and indeed, granting them comparable freedom should enhance competition and consumer benefits. We are proposing to amend Part 214 to allow split all-cargo charters and split passenger-cargo charters to the same extent as permitted for other carriers in ER- , and to allow the same flexibility as proposed for other carriers in this issuance. Some foreign charter carriers would require an amendment to their permits to take advantage of the proposed change to Part 214, since their permits now make no reference to Part 214. Carriers wishing permit changes should apply for them.

Baggage Allowances

Several of the comments on EDR-351 warned that carriers might restrict free baggage allowances for passengers on split passenger/cargo charters in order to accommodate more cargo. The Board's former Office of the Consumer Advocate suggested in its comment that passengers on the split passenger/cargo charters be guaranteed by regulation a certain minimum baggage allowance, and that cargo on such flights be

² EDR-363, 44 FR 41828, July 18, 1979.

restricted to the residual capacity of the aircraft. It may be true that there will be some incentive for carriers to cut down free baggage allowances so that more cargo can be carried. However, our tentative decision is that the allocation of baggage space is better left to the market, provided that passengers have adequate notice of their baggage limits. Baggage limits will be negotiated between the charter operators and the carriers, and the charter operators will have an interest in assuring their passengers adequate baggage space.

The Board has recently adopted consumer protection provisions for Public Charters in SPR-158, 44 FR 12971, March 9, 1979. Under SPR-156, certain information must be disclosed in the individual participant's contract with the charterer. These items of information are listed in 14 CFR 380.32. This supplemental proposal would add baggage allowances and excess baggage charges for each passenger to that list. The Public Charter rules (14 CFR 380.31(e)) require some of the items listed in § 380.32 to be printed in bold-face type at least 50 percent larger than the type used for the rest of the contract. This proposal includes the baggage allowances and charges in the larger type requirement. Since effectiveness of larger type decreases as more items are printed that way, however, we ask for comments specifically on this aspect of the proposal.

The Federal Aviation Administration has promulgated safety regulations for the carriage of cargo and passengers on the same aircraft (14 CFR 121.285 and 121.286). The Board specifically requests comments about any safety hazard which might result from carrying cargo on the main deck with passengers instead of in the belly.

Part Charters

The Board is proposing to allow part charters of cargo on scheduled flights, which would allow even greater flexibility in offering reduced rates and service alternatives in international cargo transportation. Because we have eliminated the minimum shipment size for cargo charters in ER-1145, a part charter of cargo would be much like a bulk shipment of cargo under a scheduled service tariff. The difference is that with a charter the parties would have a contract in which they could tailor their rights and duties to fit a specific situation. Since cargo charter tariffs have been removed both domestically (ER-1080) and internationally (ER-1125 through 1130, SPR-159, 160), carriers could offer prices and services for charter traffic different from these specified in their scheduled

tariffs. Part charters of cargo would of course have virtually no effect on the domestic cargo market, which is already deregulated and permits a full range of pricing and service options.

Proposed Rules

Accordingly, the Civil Aeronautics Board proposes to amend 14 CFR Parts 207, 208, 212, 214, 380 as follows:

PART 207—CHARTER TRIPS AND SPECIAL SERVICES

1. The Table of Contents would be amended to read as follows:

207.11 Passenger charter flight limitations

207.18 Part charters of cargo.

2. The definitions of "charter trip" and "charter flight" would be deleted from § 207.11. *Definitions*, and the definition of "special services" would be amended to read as follows:

§ 207.1 Definitions.

As used in this part, unless the context otherwise requires:

"Special services" are all services * * * other than (1) services rendered in air transportation over the route or routes designated in its certificate(s), (2) charter services, and (3) services authorized by special exemption under section 416(b) of the Act.

3. Section 207.10 would be amended by revising the introductory paragraph to read as follows:

§ 207.10 Reports of emergency commercial charters for other direct carriers.

Each air carrier that performs an emergency charter transporting commercial traffic for another direct carrier shall file a report with the Bureau of Domestic Aviation within 30 days following each charter trip, containing the following information:

4. Section 207.11 would be revised to read as follows:

§ 207.11 Passenger charter flight limitations.

(a) Passenger charter flights (trips) in air transportation shall be limited to the following:

(1) Air transportation pursuant to contracts with the department of Defense where the entire capacity of one or more aircraft has been engaged by the Department;

(2) Air transportation performed on a time, mileage, or trip basis where the

entire capacity of one or more aircraft has been engaged:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged slowly for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic; *Provided*, That emergency charters for commercial traffic shall be reported in accordance with § 207.10);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services) for the transportation of a group of persons, as agent or representative of such group;

(iii) [Reserved]

(iv) By an overseas military personnel charter operator as defined in Part 372 of this chapter;

(v) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(3) Air transportation performed on a time, mileage or trip basis where less than the entire capacity of an aircraft has been engaged by each of two or more of the following persons, except that such persons in the aggregate must engage the entire capacity of the aircraft in accordance with paragraph (b) of this section:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic; except that emergency charters for commercial traffic shall be reported in accordance with § 207.10);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services), for the transportation of a group of persons as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter;

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(b)(1) Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(3)(iv) of this section shall contract and pay for 20 or more seats. Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section shall contract and pay for

40 or more seats, except that if the main deck capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section for the movement of persons and their baggage, then either one of such persons may contract and pay for a minimum of 20 seats.

(2) [Reserved]

(3) The entire capacity of an aircraft shall be considered as engaged if all of the main deck capacity configured for passenger carriage is engaged, regardless of whether the remaining belly or other capacity is also engaged.

5. A new § 207.18 would be added to read as follows:

§ 207.18 Part charters of cargo.

Cargo may be chartered on any flight for which an air carrier is authorized, either by certificate or by exemption, to carry individually-ticketed or individually-waybilled traffic.

PART 208—TERMS, CONDITIONS, AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN CHARTER AIR TRANSPORTATION

1. The Table of Contents would be amended to read as follows:

208.6 Passenger charter flight limitations.

§ 208.3 [Amended]

2. The definition of "charter flight" in § 208.3(s) would be deleted and the paragraph reserved.

3. Section 208.5(a) introductory text would be revised to read as follows:

§ 208.5 Reports of emergency commercial charters for other direct carriers.

Each supplemental air carrier that performs an emergency charter transporting commercial traffic for another direct carrier shall file a report with the Bureau of Domestic Aviation within 30 days following each charter flight, containing the following information:

4. Section 208.6 would be revised to read as follows:

§ 208.6 Passenger charter flight limitations.

(a) Passenger charter flights in air transportation performed by supplemental air carriers shall be limited to the following:

(1) All transportation pursuant to contracts with the Department of Defense where the entire capacity of one or more aircraft has been engaged by the Department;

(2) Air transportation performed on a time, mileage or trip basis where the entire capacity of one or more aircraft has been engaged:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic; *Provided*, That emergency charters for commercial traffic shall be reported in accordance with § 208.5);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services) for the transportation of a group of persons and/or their property, as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter; or

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(3) Air transportation performed on a time, mileage or trip basis where less than the entire capacity of an aircraft has been engaged by each of two or more of the following persons, except that such persons in the aggregate must engage the entire capacity of the aircraft in accordance with paragraph (b) of this section:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic; except that emergency charters for commercial traffic shall be reported in accordance with § 208.5);

(ii) By a person (no part of whose business is the formation of groups or consolidation of shipments for transportation or the solicitation or sale of transportation services), for the transportation of a group of persons and their personal baggage, as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter; or

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(b)(1) Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(3)(iv) of this section shall contract and pay for 20 or more seats. Each person engaging less than the entire capacity of an aircraft for the movement of persons

and their personal baggage pursuant to paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section shall contract and pay for 40 or more seats, except that if the main deck capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this section for the movement of persons and their baggage, then either one of such persons may contract and pay for a minimum of 20 seats.

(2) [Reserved]

(3) The entire capacity of an aircraft shall be considered as engaged if all the main deck capacity configured for, passenger carriage is engaged, regardless of whether the remaining belly or other capacity is also engaged.

PART 212—CHARTER TRIPS BY FOREIGN AIR CARRIERS

1. The Table of Contents would be amended to read as follows:

212.8 Passenger charter flight limitations.

212.16 Part charters of cargo.

§ 212.01 [Amended]

2. The definitions of "charter trip" and "charter flight" would be deleted from § 212.1. *Definitions*.

3. Section 212.8 would be amended to read as follows:

§ 212.8 Passenger charter flight limitations.

(a) Passenger charter flights (trips) shall be limited to foreign air transportation performed by a foreign air carrier holding a foreign air carrier permit issued pursuant to section 402 of the Act authorizing such carrier to engage in foreign air transportation on an individually-ticketed or individually-waybilled basis—

(1) Where the entire capacity of one or more aircraft has been engaged on a time, mileage or trip basis—

(i) By a person for his own use (including a direct air carrier or direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic, except that emergency charters of commercial traffic shall be reported in accordance with § 212.14);

(ii) By a person (no part of whose business is the formation of groups for transportation or solicitation or sale of transportation services) for the transportation of a group of persons as agent or representative of such group;

(iii) [Reserved]

(iv) By an overseas military personnel charter operator as defined in Part 372 of this chapter; or

(v) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(2) Where less than the entire capacity of an aircraft has been engaged on a time, mileage or trip basis, by each of two or more of the following persons, except that such persons in the aggregate must engage the entire capacity of the aircraft in accordance with paragraph (b) of this section:

(i) By a person for his own use (including a direct air carrier or a direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services), for the transportation of a group of persons as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter;

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(b)(1) Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(2)(iv) of this section shall contract and pay for 20 or more seats. Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii) of this section shall contract and pay for 40 or more seats, except that if the main deck capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii) of this section for the movement of persons and their baggage, then either one of such persons may contract and pay for a minimum of 20 seats.

(2) [Reserved]

(3) The entire capacity of an aircraft shall be considered as engaged if all the main deck capacity configured for passenger carriage is engaged, regardless of whether the remaining belly or other capacity is also engaged.

4. A new § 212.16 would be added to read as follows:

§ 212.16 Part charters of cargo.

Cargo may be chartered on any flight for which a foreign air carrier is authorized to carry individually-ticketed or individually-waybilled traffic.

PART 214—TERMS, CONDITIONS, AND LIMITATIONS OF FOREIGN AIR CARRIER PERMITS AUTHORIZING CHARTER TRANSPORTATION ONLY

1. The Table of Contents would be amended to read as follows:

214.7 Passenger charter flight limitations.

2. Section 214.1 would be revised to read as follows:

§ 214.1 Applicability.

This part establishes the terms, conditions, and limitations applicable to charter foreign air transportation pursuant to foreign air carrier permits authorizing the holder to engage in charter transportation only.

3. Section 214.2 would be amended by revising paragraph (a) and reserving paragraph (b) to read as follows:

§ 214.2 Definitions.

(a) "Charter foreign air transportation" means charter flights of persons or property in air transportation

(b) [Reserved]

4. Section 214.5 would be amended by revising the introductory paragraph and paragraph (d) to read as follows:

§ 214.5 Reports of emergency commercial charters for other direct carriers.

Each foreign charter air carrier that performs an emergency charter transporting commercial traffic for another direct carrier shall file a report with the Bureau of Domestic Aviation within 30 days following each charter flight, containing the following information:

(d) Number of passengers and/or tons of cargo transported;

5. Section 214.7 would be renumbered and revised to read as follows:

§ 214.7 Passenger charter flight limitations.

(a) Passenger charter flights shall be limited to foreign air transportation performed by a direct foreign air carrier on a time, mileage, or trip basis where—

(1) The entire capacity of one or more aircraft has been engaged;

(i) By a person for his own use (including a direct air carrier or direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic; except that emergency charters of commercial

traffic shall be reported in accordance with § 214.5);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services) for the transportation of a group of persons, as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter; or

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(2) Less than the entire capacity of an aircraft has been engaged by each of two or more of the following persons except that such persons in the aggregate must engage the entire capacity of the aircraft in accordance with paragraph (b) of this section:

(i) By a person for his own use (including a direct air carrier or direct foreign air carrier when such aircraft is engaged solely for the transportation of company personnel and their personal baggage, or in cases of emergency, of commercial traffic; *Provided*, That emergency charters for commercial traffic shall be reported in accordance with § 214.5);

(ii) By a person (no part of whose business is the formation of groups or the consolidation of shipments for transportation or the solicitation or sale of transportation services) for the transportation of a group of persons, as agent or representative of such group;

(iii) By an overseas military personnel charter operator as defined in Part 372 of this chapter; or

(iv) By a charter operator or foreign charter operator as defined in Part 380 of this chapter.

(b)(1) Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(2)(iv) of this section shall contract and pay for 20 or more seats. Each person engaging less than the entire capacity of an aircraft for the movement of persons and their personal baggage pursuant to paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii) of this section shall contract and pay for 40 or more seats, except that if the main deck capacity of an aircraft having 80 or fewer seats is engaged by no more than two persons described in paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii) of this section for the movement of persons and their baggage, then either one of such persons may contract and pay for a minimum of 20 seats.

(2) The entire capacity of an aircraft shall be considered as engaged if all the main deck capacity configured for passenger carriage is engaged.

regardless of whether the remaining belly or other capacity is also engaged.

6. Section 214.9a (a) and (b) would be amended to read as follows:

§ 214.9a Statement of Authorization application.

(a) A foreign air carrier shall not perform any charter for the transportation of commercial traffic for another direct air carrier or direct foreign air carrier unless . . .

(b) Application for a Statement of Authorization shall be submitted . . . *Provided, however*, that an application for the performance of a charter transporting commercial traffic for another direct air carrier or direct foreign air carrier must be submitted . . .

PART 380—PUBLIC CHARTERS

1. Section 380.1(e) would be revised to read as follows:

§ 380.31 General requirements for operator-participant contracts

(c) The contract form shall be printed in 7-point or larger type. The statements required by paragraphs (a), (f), (h), (l), (r), (s), and (y) of § 380.32 shall be printed so as to contrast with the rest of the contract, by the use of bold-faced type, capital letters, or a type size that is at least 50 percent larger than that used for the rest of the contract.

2. Section 380.32 would be amended by adding paragraph (y) to read as follows:

§ 380.32 Specific requirements for operator-participant contracts.

Contracts between charter operators and charter participants shall state:

(y) The baggage allowances and excess baggage charges for each passenger. (Secs. 102, 204, 401, and 402 of the Federal Aviation Act of 1958, as amended, 92 Stat. 1706, 72 Stat. 743, 92 Stat. 1710, 72 Stat. 757; 49 U.S.C. 1302, 1324, 1371, 1372.)

By the Civil Aeronautics Board:

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

(File No. 771 0034)

Gant, Inc.; Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, among other things, would require a New Haven, Conn. manufacturer of wearing apparel and related accessories, to cease fixing, maintaining or compelling adherence to suggested resale prices and sales periods for its products. The firm would be prohibited from soliciting the identity of dealers who fail to conform to such prices, and from taking any adverse action against them. Additionally, the firm would be prohibited from restricting the use of product trademarks or other identification in the sale or advertising of its products; and barred from suggesting retail prices and sales periods for its products for a period of two years.

DATE: Comments must be received on or before October 29, 1979.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St. and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: William A. Arbitman, Director, 9R, San Francisco, Regional Office, Federal Trade Commission, 450 Golden Gate Ave., San Francisco, Calif. 94102. (415) 556-1270.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6 (f) of the Federal Trade Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with

§ 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

(File No.

Gant, Inc.,

Agreement Containing Consent Order to Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Gant, Inc., a corporation, and it now appearing that Gant, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Gant, Inc., by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Gant, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Connecticut, with its office and principal place of business located at 40 Sargent Drive, in the City of New Haven, State of Connecticut.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the

Commission's decision contained a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the public records of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of the complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For the purposes of this Order, the following definitions shall apply:

"Product" is defined as any item of wearing apparel or related accessory which is manufactured, offered for sale or sold by respondent.

"Dealer" is defined as any person, partnership, corporation or firm which sells any product in the course of its business.

"Resale Price" is defined as any price, price floor, price ceiling, price range, or any mark-up, formula or margin of profit used by any dealer for pricing any product. Such term includes, but is not limited to, any suggested, established or customary resale price as well as the retail price in effect at any dealer.

"Sale Period" is defined as any time during which any dealer offers to sell any product at resale prices lower than

those in effect during the usual and ordinary course of said dealer's business; or any suggested, authorized or customary time for selling or advertising any product at prices lower than the suggested, established or customary resale prices.

It is ordered, That respondent Gant, Inc., a corporation, its successors and assigns, and respondent's officers, agents, representatives and employees, directly or indirectly, or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, offering for sale, sale or distribution of any product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Fixing, establishing, controlling or maintaining, directly or indirectly, the resale price at which any dealer may advertise, promote, offer for sale or sell any product, or the sale period of any dealer.

2. Requesting, requiring or coercing, directly or indirectly, any dealer to maintain, adopt or adhere to any resale price or sale period.

3. Requesting or requiring, directly or indirectly, any dealer to report the identity of any other dealer who deviates from any resale price or sale period; or acting on any reports or information so obtained by threatening, intimidating, coercing or terminating said dealer.

4. Requesting or requiring that any dealer refrain from or discontinue selling or advertising any product at any resale price.

5. Hindering or precluding the lawful use by any dealer of any brand name, trade name or trademark of respondent in connection with the sale or advertising of any product at any resale price.

6. Making any payment or granting any consideration, service or benefit to any dealer because of the resale price at which any other dealer has advertised or sold any product.

7. Conducting any surveillance program to determine whether any dealer is advertising, offering for sale or selling any product at any resale price, where such surveillance program is conducted to fix, maintain, control or enforce the resale price at which any product is sold or advertised.

8. Terminating or taking any other action to restrict, prevent or limit the sale of any product by any dealer because of the resale price at which said dealer has sold or advertised, is selling

or advertising, or is suspected of selling or advertising any product.

9. Threatening to withhold or withholding earned cooperative advertising credits or allowances from any dealer, or limiting or restricting the right of any dealer to participate in any cooperative advertising program for which it would otherwise qualify, because of the resale price at which said dealer advertises or sells any product, or proposes to sell or advertise any product.

II

1. For a period of two (2) from the date of service of this Order, orally suggesting or recommending any resale price or sale period to any dealer.

2. For a period of two (2) years from the date of service of this Order, communicating in writing any resale price or sale period to any dealer; provided, however, that after said two (2) period, respondent shall not suggest any resale price or sale period on any list, or in any advertising, book, catalogue or promotional material, unless it is clearly and conspicuously stated on each page where any suggested resale price or sale period appears, the following:

The [resale prices or sale periods] quoted herein are suggested only. You are free to determine your own [resale prices or sale periods].

III

It is further ordered, That respondent shall:

1. Within thirty (30) days after service of this Order, mail under separate cover a copy of the enclosure set forth in the attached Exhibit A to each of its present accounts. An affidavit shall be sworn to by an official of the respondent verifying that the attached Exhibit A was so mailed.

2. Mail under separate cover a copy of the enclosure set forth in the attached Exhibit A to any person, partnership, corporation or firm that becomes a new account within three (3) years after service of this Order.

IV

It is further ordered, That respondent shall forthwith distribute a copy of this order to all operating divisions of said corporation, and to present or future personnel, agents or representatives having sales, advertising or policy responsibilities with respect to the subject matter of this order, and that respondent secure from each such person a signed statement acknowledging receipt of said order.

V

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent, such as dissolution, assignment or sale resulting in the emergency of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

VI

It is further ordered, That respondent shall within sixty (60) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

Exhibit A

Dear Retailer: Without admitting any violation of the law, Gant, Inc. has agreed to the entry of an Order of the Federal Trade Commission regulating certain distribution practices. In connection therewith, the Company is required to send you this letter describing the Order. The Order provides, among other things, as follows:

1. You can advertise and sell Gant products at any price you choose.

2. Gant will not take any action against you, including termination, because of the price at which you advertise or sell Gant products.

3. Gant will not suggest retail prices for any product until [2 years from the date of service of the Order].

4. The price at which you sell or advertise Gant products will not affect your right to use Gant trademarks or other identification in your sale or advertising of products bearing Gant trademarks or identification.

5. You are free to participate in any cooperative advertising program sponsored by Gant for which you would otherwise qualify, and to receive any advertising credit or allowance allowed thereunder regardless of the price at which you advertise the Gant product.

If you have any questions regarding the Order or this letter, please call _____.

for Gant, Inc.

Agreement by Gant Corporation, the Proposed Successor to Proposed Respondent Gant, Inc.

IT IS HEREBY AGREED by and between Gant Corporation, by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

1. Gant Corporation is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at 400 Pike Street, in the City of Cincinnati, State of Ohio.

2. Gant Corporation proposes to purchase the business and certain of the assets of proposed respondent Gant, Inc.

3. For purposes of the "Agreement Containing Consent Order To Cease And Desist" as executed between Gant, Inc. and Counsel for the Federal Trade Commission on April 24, 1979, hereinafter referred to as "said Order," and for no other purpose, Gant Corporation, upon completion of said purchase:

(a) Will be a successor to proposed respondent Gant, Inc.

(b) Shall refrain from performing any act which proposed respondent Gant, Inc., is prohibited from performing by said Order; and shall perform all acts which proposed respondent Gant, Inc. is required to perform by said Order.

(c) Will be required to file one or more compliance reports showing that it has fully complied with said Order, and may be liable for civil penalties in the amount provided by law for each violation by it of said Order.

4. A copy of said Order served upon Gant, Inc. shall be mailed by the Federal Trade Commission to Gant Corporation at its above stated address simultaneously with such service on Gant, Inc.

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Gant, Inc., a prominent shirt manufacturer.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint in this matter alleges that Gant, Inc. has restrained trade by fixing the resale prices at which its dealers advertise, offer for sale and sell Gant, Inc. products.

The consent agreement provides as follows:

1. Gant, Inc. cannot fix or otherwise control the resale prices at which its products are sold or advertised.

2. Gant, Inc. cannot take any action against any dealer, including termination, because of the resale prices at which the dealer sells or advertises any Gant, Inc. product.

3. As to products which bear any of its trademarks or other identifications, Gant, Inc. cannot restrict any dealer from lawfully using any such trademark

or other identification in the sale or advertising of such products.

4. Gant, Inc. cannot suggest retail prices for any product for two years from service of the order.

On June 29, 1979, Gant Corporation, a newly formed Delaware corporation, purchased the business and certain of the assets of Gant, Inc. As part of the consent agreement, and solely for purposes of that agreement, Gant Corporation has agreed to:

1. Be bound as a successor to Gant, Inc.

2. Refrain from performing any act which Gant, Inc. is prohibited by the order from performing.

3. Perform all acts which Gant, Inc. is required by the order to perform.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

James A. Tobin,

Acting Secretary.

BILLING CODE 6750-01-M

[16 CFR Part 13]

[File No. 771 0034]

Jaymar-Ruby, Inc.; Consent Agreement with Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, among other things, would require a Michigan City, Ind. manufacturer of wearing apparel and related accessories, to cease fixing, maintaining or compelling adherence to suggested resale prices and sale periods for its products. The company would be prohibited from soliciting the identity of dealers who fail to conform to suggested prices; and from taking any adverse action against them. Additionally, the firm would be prohibited from restricting the use of product trademarks or other identification in the advertising and sale of its products; and barred from suggesting retail prices and sales periods for its products for a period of two years.

DATE: Comments must be received on or before October 29, 1979.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal

Trade Commission, 6th St. and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: William A. Arbitman, Director, 9R, San Francisco Regional Office, Federal Trade Commission, 450 Golden Gate Ave., San Francisco, Calif. 94102. (415) 556-1270.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

[File No.]

Jaymar-Ruby, Inc.

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Jaymar-Ruby, Inc., a corporation, and it now appearing that Jaymar-Ruby, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Jaymar-Ruby, Inc., by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Jaymar-Ruby, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Indiana, with its office and principal place of business located at 5000 South Ohio Street, in the City of Michigan City, State of Indiana.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the

validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of the complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has

fully complied with the order, and that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For the purposes of this Order, the following definitions shall apply:

"Product" is defined as any item of wearing apparel or related accessory which is manufactured, offered for sale or sold by respondent Jaymar-Ruby, Inc.

"Dealer" is defined as any person, partnership, corporation or firm which sells any product in the course of its business.

"Resale Price" is defined as any price, price floor, price ceiling, price range, or any mark-up, formula or margin of profit used by any dealer for pricing any product. Such term includes, but is not limited to, any retail price suggested or established by respondent, any customary resale price or the retail price in effect at any dealer.

"Sale Period" is defined as any time during which any dealer offers to sell any product at resale prices lower than those in effect during the usual and ordinary course of said dealer's business; or any suggested, authorized or customary time for selling or advertising any product at prices lower than the suggested, established or customary resale prices.

It is ordered, That respondent Jaymar-Ruby, Inc., a corporation, its successors and assigns, and respondent's officers, agents, representatives and employees, directly or indirectly, or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, offering for sale, sale or distribution of any product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1.

1. Fixing, establishing, controlling or maintaining, directly or indirectly, the resale price at which any dealer may advertise, promote, offer for sale or sell any product, or the sale period of any dealer.

2. Requesting, requiring or coercing, directly or indirectly, any dealer to maintain, adopt or adhere to any resale price or sale period.

3. Requesting or requiring, directly or indirectly, any dealer to report the identity of any other dealer who deviates from any resale price or sale period; or acting on any reports or information so obtained by threatening, intimidating, coercing or terminating said dealer.

4. Requesting or requiring that any dealer refrain from or discontinue selling or advertising any product at any resale price.

5. Hindering or precluding the lawful use by any dealer of any brand name, trade name or trademark of respondent in connection with the sale or advertising of any product at any resale price.

6. Conducting any surveillance program to determine whether any dealer is advertising, offering for sale or selling any product at any resale price, where such surveillance program is conducted to fix, maintain, control or enforce the resale price at which any product is sold or advertised.

7. Terminating or taking any other action to restrict, prevent or limit the sale of any product by any dealer, because of the resale price at which said dealer has sold or advertised, is selling or advertising, or is suspected of selling or advertising any product.

8. Threatening to withhold or withholding earned cooperative advertising credits or allowances from any dealer, or limiting or restricting the right of any dealer to participate in any cooperative advertising program for which it would otherwise qualify, because of the resale price at which said dealer advertises or sells any product, or proposes to sell or advertise any product.

9. Threatening to withhold or withholding earned cooperative advertising credits or allowances from any dealer, or limiting or restricting the right of any dealer to participate in any cooperative advertising program for which it would otherwise qualify, because said dealer has advertised or sold, or proposes to advertise or sell, any product using or featuring any resale price comparison.

II

1. For a period of three (3) years from the date of service of this Order, orally suggesting or recommending any resale price or sale period to any dealer.

2. For a period of three (3) years from the date of service of this Order, communicating in writing any resale price or sale period to any dealer: *Provided, however,* That after said three (3) year period, respondent shall not suggest any resale price or sale period on any list, or in any advertising, book, catalogue or promotional material, unless it is clearly and conspicuously stated on each page where any suggested resale price or sale period appears, the following:

"The [Resale Prices or Sale Periods] Quoted Herein Are Suggested Only. You Are

Free To Determine Your Own [Resale Prices or Sale Periods]."

III

It is further ordered. That respondent shall:

1. Within thirty (30) days after service of this Order, mail under separate cover a copy of the enclosure set forth in the attached Exhibit A to each of its present accounts. An affidavit shall be sworn to by an official of respondent verifying that the attached Exhibit A was so mailed.

2. Mail under separate cover a copy of the enclosure set forth in the attached Exhibit A to any person, partnership, corporation or firm that becomes a new account within three (3) years after service of this Order.

IV

It is further ordered. That respondent shall forthwith distribute a copy of this Order to all operating divisions of said corporation, and to present or future personnel, agents or representatives having sales, advertising or policy responsibilities with respect to the subject matter of this Order, and that respondent secure from each such person a signed statement acknowledging receipt of said Order.

V

It is further ordered. That respondent notify the Commission at least thirty (30) days prior to any proposed change in respondent, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

VI

It is further ordered. That respondent shall within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

Exhibit A

Dear Customer:

Jaymar-Ruby, Inc. has agreed with the Federal Trade Commission to the entry of an order concerning certain distribution practices. Our agreement was solely for the purpose of settling a dispute with the Commission, and does not constitute any admission on our part that we have violated any law. The agreed-to order provides, among other things, as follows:

1. You are free to charge whatever retail prices you deem appropriate for Jaymar-Ruby products, including Sansabelt, and you may advertise those prices as you see fit.

2. You can be assured that Jaymar-Ruby will not take any action against you for any prices which you may charge or advertise.

3. Jaymar-Ruby will continue not to suggest retail prices for any product until 3 years from the date of service of the Order).

4. You may continue to use our trademarks or tradenames in any legal and lawful manner in your sale or advertising of our products.

5. You continue to be free to participate in our cooperative advertising programs regardless of the prices at which you advertise Jaymar-Ruby products.

If you wish a copy of the full text of the agreed-to order, or if you have any questions concerning it, please call _____. As always, we appreciate your business and we will continue providing you with the finest merchandise available.

for Jaymar-Ruby, Inc.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Jaymar-Ruby, Inc., a prominent manufacturer of men's dress and sport slacks.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint in this matter alleges that Jaymar-Ruby restrained trade by fixing the resale prices at which its dealers advertise, offer for sale and sell Jaymar products.

The consent agreement provides as follows:

1. Jaymar-Ruby cannot fix or otherwise control the resale prices at which its products are sold or advertised.

2. Jaymar-Ruby cannot take any action against any dealer, including termination, because of the resale prices at which the dealer sells or advertises any Jaymar-Ruby product.

3. As to products which bear any of its trademarks or other identifications, Jaymar-Ruby cannot restrict any dealer from lawfully using any such trademark or other identification in the sale or advertising of such products.

4. Jaymar-Ruby cannot suggest retail prices for any product for three years from service of the order.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of

the agreement and proposed order or to modify in any way their terms.

James A. Tobin,
Acting Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

[32 CFR Part 65]

Nomination of Chaplains for the Armed Forces

AGENCY: Office of the Secretary of Defense.

ACTION: Proposed rule.

SUMMARY: This rule provides for selection of chaplains in the Armed Forces of the United States and sets forth a definition using a set of criteria to determine a religious faith group's eligibility to provide chaplains to the Armed Forces. Education requirements are clearly stated. It is the responsibility of the Armed Forces Chaplains Board to recognize a religious faith group and the Military Services to select the nominated chaplains.

DATE: Written comments must be received on or before September 28, 1979.

ADDRESS: Armed Forces Chaplains Board, OASD (MRA&L), Room 3B936, Pentagon, Washington, D.C. 20301.

FOR FURTHER INFORMATION CONTACT: Chaplain Samuel G. Powell, Colonel, USAF, Telephone: 697-9015 or 697-9911.

SUPPLEMENTARY INFORMATION: In Federal Register Doc. 78-2339 appearing in the Federal Register on February 8, 1978 (43 FR 4858) the Department of Defense published Part 65. This proposes the reissue Part 65 to establish criteria to determine a religious group's eligibility for the chaplaincy of the Military Services and to define clearly education requirements.

Accordingly, we propose to revise Chapter I, 32 CFR Part 65, reading as follows:

Sec.

65.1 Reissuance and purpose.

65.2 Applicability.

65.3 Policy.

65.4 Criteria.

65.5 Responsibilities.

Enclosure 1—DD Form 2088, Ecclesiastical Endorsement/Approval.

Authority: Secs. 3293, 5576, and 8293 of 10 U.S. Code and Executive Order 11390.

PART 65—NOMINATIONS OF CHAPLAINS FOR THE ARMED FORCES

§ 65.1 Reissuance and Purpose.

This part is reissued to establish (a) criteria to determine a Religious Group's eligibility for the chaplaincy of the Military Services; and (b) the minimum educational and ecclesiastical endorsement requirements for appointment in the chaplaincy of the Military Services.

§ 65.2 Applicability.

The provisions of this Part apply to the Office of the Secretary of Defense, the Military Departments, and the Organization of the Joint Chiefs of Staff (hereafter referred to as "DoD Components"). As used herein, the term "Military Services" refers to the Army, Navy, Air Force and Marine Corps.

§ 65.3 Policy.

It is DoD policy that military personnel receive direction and guidance in matters of spiritual, moral, religious, and personal well-being in ways and on occasions appropriate to their respective, chosen religious groups. Whenever possible, such guidance should be provided by a chaplain of the military person's religious group. When a chaplain of a religious group cannot be provided, this guidance should be met through the cooperative efforts of other chaplains, civilian clergy, or lay leaders.

§ 65.4 Criteria.

(a) Religious groups of the United States that seek to become ecclesiastical agencies in order to endorse candidates for the chaplaincy must obtain recognition from the Armed Forces Chaplains Board. As a prerequisite to receiving such recognition, each religious group must:

(1) Have ecclesiastical authority to prepare and designate clergy for the chaplaincy.

(2) Have enough adherents to warrant the effective use of chaplains.

(3) Provide ecclesiastical validation, support, and supervision of its chaplains.

(4) Provide chaplains who are willing to respect the integrity of and work in cooperation with other religious groups.

(5) Abide by the regulations and policies of the Armed Forces Chaplains Board and the Military Services.

(b) The Armed Forces Chaplains Board may revoke its recognition of an approved ecclesiastical endorsing agency that fails to comply with any provisions of this Directive by providing the agency with a notice of the reasons for the revocation and a reasonable opportunity to respond in writing.

(c) The following are the educational requirements for chaplain appointments. The applicant shall:

(1) Possess 120 semester hours of undergraduate credits (or the equivalent) from a college or university that is in the *Education Directory—Colleges and Universities* (hereafter referred to as the "Directory"); or have completed 120 semester hours of credit (or the equivalent) from a school not in the Directory but from which credits could be transferred to a school listed in the Directory; and

(2) Possess a Master of Divinity (or an equivalent theological degree) or have completed 3 resident years of graduate-level study in theology or related subjects that lead to ordination and ecclesiastical endorsement and that qualify the applicant to perform professional functions as a chaplain. The applicant must complete professional educational work at a graduate school:

(i) That is (a) a member of the American Association of Theological Schools; (b) listed in the Official Catholic Directory; or (c) independent of a college or university but accredited by a regional accrediting agency or association listed in the Directory; or

(ii) If the graduate school is not included in § 65.4(c)(1) the applicant may be accepted if all other educational requirements are met and if a statement is submitted by a school referred to in § 65.4(c)(1) that the applicant's credits are transferrable to the school issuing the statement.

(d) *Ecclesiastical Endorsement of Chaplains.* As a prerequisite to appointment as a chaplain, an applicant must receive endorsement from an ecclesiastical endorsing agency recognized by the Armed Forces Chaplains Board. In granting ecclesiastical endorsement ecclesiastical endorsing agents are requested to use DD Form 2088.¹ Additional copies of this form may be obtained from the Executive Director, Armed Forces Chaplains Board. This endorsement shall certify that the applicant is:

(1) A fully ordained or qualified priest, rabbi, or minister of religion;

(2) Actively engaged in a denominationally approved vocation; and

(3) Recommended as being spiritually, morally, intellectually, and emotionally qualified to represent the applicant's religious body in the chaplaincy of the Armed Forces.

¹ May be obtained by writing to the Executive Director, Armed Forces Chaplain Board, OASD (MRA&L), The Pentagon, Washington, D.C. 20301.

§ 65.5 Responsibilities.

The Chief of Chaplains of each Military Service shall implement this part.

Dated: August 24, 1979.

H. E. Lofdahl,

Deputy Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed Rulemaking; Proposed Approval of Revision to State Implementation Plan.

SUMMARY: U.S. Environmental Protection Agency proposes to approve an Illinois Pollution Control Board Order submitted by the Illinois Environmental Protection Agency (IEPA) as a revision to the State Implementation Plan (SIP). The Order was issued to Shell Oil Company on December 14, 1978 and extends the date that the company is required to bring sulfur dioxide emissions at its petroleum refinery located in Wood River, Madison County, Illinois into compliance with certain regulations contained in the federally-approved Illinois SIP. The Order extends the date to November 11, 1979. Because the Order has been issued to a major source and extends the date for meeting the sulfur dioxide emissions limitations contained in the SIP, it must be approved by USEPA before it becomes effective as a SIP revision under the Clean Air Act, 42 U.S.C. 7410. If approved by USEPA the extension will constitute a revision to the SIP. The purpose of this notice is to invite public comment on USEPA's proposed approval of the Order.

DATE: Written comments on this proposed revision to the Illinois SIP must be received on or before September 28, 1979.

ADDRESS: send comments to: Steve Rothblatt, Chief, Air Programs Branch, Air and Hazardous Materials Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

The State Order, supporting material and public comments received in response to this Notice may be inspected and copied (for appropriate charges) at the above address during normal business hours or at: Illinois Environmental Protection Agency, 2200 Churchill Road, Springfield, Illinois 62706.

FOR FURTHER INFORMATION CONTACT: David Lueck, Air and Hazardous Materials Division, Air Programs Branch, U.S. Environmental Protection

Agency, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6056.

SUPPLEMENTARY INFORMATION: In April, 1978 Shell Oil Company (Shell) purchased the Anlin Company plant which included one operating sulfur recovery unit, a sulfuric acid plant, and a new sulfur recovery plant under construction at that time. The new plant utilized a Claus Sulfur Recovery Unit (SRU-2), a unique process which was supposed to control tail-gas so as not to exceed the sulfur dioxide emissions limitations contained in Rule 204(f)(1)(A) of the Illinois Air Pollution Control Regulations, Chapter 2. Shell found the system to be mechanically unsound and made substantial modifications in an attempt to meet the sulfur dioxide (SO₂) emission limitation of two thousand parts per million on a dry basis. When tests revealed that in spite of the modifications the plant could not meet the emission limitation, Shell decided to install a Shell Claus Off-Gas Treatment Unit (SCOT Unit). Because installation of this unit takes approximately eighteen months, Shell petitioned the Illinois Pollution Control Board (IPCB) for a variance from Rule 204(f)(1)(A) until November 11, 1979, which would allow time for the construction of the SCOT unit.

A public hearing was held on October 30, 1978 in conformity with a notice and hearing requirements set forth in 40 CFR 51.4. The only individuals testifying at the hearing were those who testified on behalf of the petitioners.

After considering all the testimony and the support material, the IPCB granted the variance on December 14, 1978, by issuing IPCB Order PCB 78-190, which found that operation of the SRU-2 for the duration of the requested variance would not prevent attainment or maintenance of the ambient air quality standards for sulfur dioxide. The Order granting the variance contained the following conditions:

1. This variance shall terminate on July 1, 1979 if it is not submitted to and approved by the U.S. Environmental Protection Agency as a revision to the Illinois State Implementation Plan.
2. Shell Oil Co. shall within 45 days of the date of this Order furnish to the Illinois Environmental Protection Agency a performance surety bond in the amount of \$50,000, to be released upon timely completion of the project on November 1, 1979.
3. Shell Oil Co. shall, by November 1, 1979, apply for an operating permit for SRU-2 and submit to the Agency stack test results which show compliance with the standard.
4. Shell Oil Co. shall at least five days prior to the stack tests notify the Manager, Illinois Environmental Protection Agency Region III, 115A West Main Street,

- Collinsville, Illinois (phone number 618-345-0700) of the dates and times of the stack tests and permit Agency personnel to be present during the stack tests.
5. Shell Oil Co. shall submit progress reports on October 1, 1978; January 1, 1979; April 1, 1979; July 1, 1979; and October 1, 1979 to the Agency's Region III at Collinsville at the address mentioned in paragraph 4 above.
6. Shell Oil Co. is hereby notified that, if compliance is not achieved by July 1, 1979, it may be subject to noncompliance penalties pursuant to Section 120 of the Clean Air Act of 1977.
7. Within forty-five (days) of after (sic) the date of this Board Order Shell Oil Co. shall execute and send to: Mr. John D. Williams, Technical Advisor, 2200 Churchill Road, Springfield, Illinois 62706, a certification of acceptance of this variance by which it agrees to be bound by its terms and conditions.

On March 21, 1979, the Illinois Environmental Protection Agency submitted the Order to USEPA as a proposed revision to the Illinois SIP. Pursuant to section 110 of the Clean Air Act, the Administrator of the United States Environmental Protection Agency must approve the order of the Illinois Pollution Control Board before it may become effective. 42 U.S.C. 7410.

Whenever a State proposes to relax its State Implementation Plan by either increasing allowable emissions or by extending the date by which a source must be in final compliance, the proposed SIP revision must be supported by an air quality demonstration which shows that the relaxation will not interfere with attainment and maintenance of the National Ambient Air Quality Standards (NAAQS).

The more potential the SIP revision has for negatively impacting ambient air quality, the more rigorous the air quality demonstration must be. In determining the acceptability of the air quality demonstration, USEPA considers the following factors: the attainment status of an area in question; the increase in actual emissions, if any, which would result from the revision; the adequacy of ambient air monitoring data; and the use of supplemental control systems or other illegal dispersion enhancement techniques within the impact area of the source in question. Where the revision calls for an extension of a source's final compliance date, the duration of the proposed extension is also a factor.

The air quality demonstration submitted by the Illinois EPA in support of the Order consists of a report detailing monitored ambient air quality data from the Metropolitan St. Louis Air Quality Control Region (AQCR). The monitored data shows that NAAQS have not been exceeded in the Illinois

portion of the AQCR since 1976. USEPA considers this demonstration adequate in light of the limited duration of the Order and the absence of any proposed increase in actual emissions. Today's actions therefore proposes approval of the Order as a revision to the Illinois SIP.

All interested persons are invited to submit written comments on the proposed SIP revision and its proposed approval by USEPA. Written comments received by the date specified will be considered in determining whether EPA will approve the revision. After the public comment period, the Administrator of EPA will publish in the Federal Register the Agency's final action on the Order. (42 U.S.C. 7413, 7601).

Dated: August 20, 1979.

John McGuire,
Regional Administrator.

BILLING CODE 6560-01-M

[40 CFR Part 52]

[FRL 1306-6]

Receipt of Implementation Plan Revision For the State of Rhode Island

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Receipt and Advance Notice of Proposed Rulemaking.

SUMMARY: This notice is to announce the receipt of the Inspection and Maintenance Program portion of the State Implementation Plan revision for the State of Rhode Island which is available for public review and comment.

The Inspection and Maintenance Program is an additional element to the measures for the control of air pollution contained in prior submittals of revisions to the Rhode Island SIP which were described in notices published in the Federal Register on May 29, 1979 (44 FR 30702) and on June 29, 1979 (44 FR 37960).

A Notice of Proposed Rulemaking describing the prior submittals in addition to the Inspection and Maintenance Program, and EPA's intended approval or disapproval action will be published in the Federal Register at a later date.

DATES: See Supplementary Information.

ADDRESSES: Copies of the Inspection and Maintenance Program portion of the SIP revision are available for inspection at the following addresses: Environmental Protection Agency, Region I, Air Branch, Room 1903, J.F.K.

Federal Building, Boston, Massachusetts 02203; Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, DC 20460; and the Rhode Island Department of Environmental Management, Division of Air Resources, Cannon Building, 75 Davis Street, Providence, Rhode Island 02908.

Written comments should be sent to: Frank J. Ciavattieri, Chief, Air Branch, Environmental Protection Agency, Region I, J.F.K. Federal Building, Room 1903, Boston, Massachusetts 02203.

FOR FURTHER INFORMATION CONTACT: Frank J. Ciavattieri, Chief, Air Branch, Environmental Protection Agency, Region I, J.F.K. Federal Building, Room 1903, Boston, Massachusetts 02203, Telephone: (617)223-5609.

SUPPLEMENTARY INFORMATION: On March 3, 1978 (43 FR 8962) and on September 11, 1978, pursuant to the requirements of Section 107 of the Clean Air Act, EPA designated areas in each state as non-attainment with respect to the criteria air pollutants.

Part D of the Clean Air Act requires each state to revise its SIP to meet specific requirements in the non-attainment areas. The State of Rhode Island submitted to EPA on May 14, 1979 and June 11, 1979 revisions to its SIP for areas designated as not attaining the NAAQS for certain pollutants, and described in notices published in the Federal Register on May 29, 1979 (44 FR 30702) and on June 29, 1979 (44 FR 37960). On August 13, 1979 received the Inspection and Maintenance Program portions of the revision, as an additional element to the transportation control strategies for the control of air pollution contained in the prior submissions. EPA is currently reviewing the Inspection and Maintenance Program plan. At the completion of the review a Notice of Proposed Rulemaking describing the prior submittals in addition to the Inspection and Maintenance Program, will be published in the Federal Register proposing approval or disapproval of the revision.

All interested persons are advised that the proposed revision is available for review at the locations listed, and are invited to comment on its approvability. A file of documents explaining EPA's criteria for approval is also available at EPA offices. The proposed notice referred to above will announce the last day for public comment. This public comment period will end not less than 60 days from this date and not less than 30 days from the published date of EPA's proposal for approval or disapproval.

Dated August 20, 1979.

Rebecca W. Hanmer, Acting
Regional Administrator, Region I.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Official Agency Termination

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice and Request for Comments.

SUMMARY: This notice announces that the West Virginia Department of Agriculture's previous designation as an official inspection agency expired November 19, 1978. The Federal Grain Inspection Service requests comments from interested persons on the need for designation of a replacement agency to provide official services in West Virginia.

DATE: Comments by October 29, 1979.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, United States Department of Agriculture, Federal Grain Inspection Service, Compliance Division, 1400 Independence Avenue, SW., Room 2405, Auditors Building, Washington, D.C. 20250, (202) 447-8262.

SUPPLEMENTARY INFORMATION: Pub. L. 94-582, enacted on October 21, 1976, to amend the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (hereinafter the "Act"), provides in Section 27 that any interior inspection agency providing service on November 20, 1976, the date on which the Act became effective, could continue to do so without a designation under the Act until the expiration of a period as determined by the Administrator, but not to exceed two years after the Act's effective date (7 U.S.C. 74 note).

The West Virginia Department of Agriculture (State) chose not to pursue meeting requirements for designation as an official agency under the Act, and accordingly the State's designation to provide official grain inspection services within the State, expired November 19, 1978.

The Administrator, Federal Grain Inspection Service (FGIS) is authorized under the provisions of the Act, to provide official inspection services where the Administrator determines official inspection is needed. (7 U.S.C. 79(h)). In recent years demand for official inspection services in West Virginia have been extremely low. FGIS requests comments from the interested public regarding the need for continuing to provide official grain inspection services in West Virginia through designation of a replacement agency. All comments should be submitted in writing and postmarked no later than October 29, 1979 to the Office of the Director, Compliance Division, Federal Grain Inspection Service, 1400 Independence Avenue, S.W., Room 2405, Auditors Building, Washington, D.C. 20250.

Official inspection services have been and will be provided by the FGIS in the area previously serviced by the State of West Virginia until such time as the necessity of a replacement agency is determined. Persons desiring official inspection services should contact Mr. Harry F. Schadlich, Field Office Supervisor, United States Department of Agriculture, Federal Grain Inspection Service, 200 Granby Mall, Room 425, Norfolk, Virginia 23510, (804) 441-3117.

In making a final determination as to the need for a replacement agency in West Virginia, consideration will be given to all comments filed and to all other information available to the Administrator. All comments submitted pursuant to this notice will be made available for public inspection at the above Office of the Director during regular hours (7 CFR 1.27b) (Sec. 8, Pub. L. 94-582, 90 Stat. 2870, (7 U.S.C. 79) Sec. 27, Pub. L. 94-582, 90 Stat. 2889 (7 U.S.C. 74 Note)).

Done in Washington, D.C. on August 24, 1979.

L. E. Bartelt,

Administrator.

BILLING CODE 3410-02-M

Science and Education Administration

National Agricultural Research and Extension Users Advisory Board; Meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub.

Federal Register

Vol. 44, No. 169

Wednesday, August 29, 1979

L. 92-463, 86 Stat. 770-776), the Science and Education Administration announces the following meeting:

Name: National Agricultural Research and Extension Users Advisory Board.

Date: September 17-19, 1979.

Time: 9:00 a.m.-12:00 Noon—September 17, 9:00 a.m.-5:00 p.m.—September 18 & 19.

Place: Farmers Union Central Exchange (CENEX) Corporate Board Room, 1185 N. Concord, South St. Paul, Minnesota.

Type of meeting: Open to the public. Persons may participate in the meeting as time and space permit.

COMMENTS: Time will be made for non-member statements on September 17, or the public may file written comments before or after the meeting with the contact person below.

PURPOSE: On September 17 the Board will hold an open forum to hear statements by food and agricultural research and extension users regarding the allocations of funds and responsibilities for research and extension for consideration in preparing its October report.

On September 18 and 19 the Board will be drafting its report to the Secretary of Agriculture regarding its recommendations as to levels of funding and allocations of responsibility in food and agricultural research and extension.

CONTACT PERSON FOR AGENDA AND MORE INFORMATION: Mr. James Meyers, Executive Secretary of the Users Advisory Board, Science and Education Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202-447-3684.

Done at Washington, D.C., this 23rd day of August 1979.

James Nielson,

Executive Director, National Agricultural Research and Extension Users Advisory Board.

BILLING CODE 3410-03-M

Joint Council on Food and Agricultural Sciences; Executive Committee Meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Science and Education Administration announces the following meeting:

Name: Executive Committee of the Joint Council on Food and Agricultural Sciences.
Date: September 12, 1979.

Time and place: 8:30 a.m.-4:00 p.m., Room 336-A, Administration Building, U.S. Department of Agriculture, Washington, D.C.

Type of meeting: Open to the public. Persons may participate in the meeting as time and space permit.

Comments: The public may file written comments before or after the meeting with the contact person below.

Purpose: To review and discuss preparation and agenda items for the October 10-12, 1979, meeting of the Joint Council; to discuss mechanisms for setting priorities; to assess the progress in setting into place the organizational structure for planning and coordination adopted by the Joint Council; and to review plans for Joint Council efforts in integrated pest management and other priority areas.

Contact person: Dr. J. C. Torio, Executive Secretary, Joint Council on Food and Agricultural Sciences, Science and Education Administration, U.S. Department of Agriculture, Room 351-A, Administration Building, Washington, D.C. 20250, telephone (202) 447-6651.

Done at Washington, D.C., this 24th day of August 1979.

James Nielson,

Executive Director, Joint Council on Food and Agricultural Sciences.

BILLING CODE 3410-03-M

CIVIL AERONAUTICS BOARD

[Order 79-8-124]

Portland-San Jose/Sacramento/San Francisco Nonstop Authority

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause (79-8-124).

SUMMARY: The Board is proposing to grant Portland-San Jose/Sacramento/San Francisco nonstop authority to Hughes Airwest, to grant Portland-San Jose/Reno/Sacramento/San Francisco authority to USAir (formerly Allegheny Airlines), to grant Portland-Reno/Sacramento/San Jose nonstop authority to Western Air Lines, to grant Portland-San Jose/Oakland/Reno/Sacramento/San Francisco nonstop authority to Air California, and to grant nonstop authority in any of the above markets to any other fit, willing and able applicants whose fitness can be established by officially noticeable data. The complete text of this order is available as noted below.

DATES: Objections: All interested persons having objections to the Board issuing the proposed authority shall file, and serve upon all persons listed below, no later than September 26, 1979, a statement of objections, together with a summary of testimony, statistical data,

and other material expected to be relied upon to support the stated objections. Additional Data: All existing and would-be applicants who have not filed (a) illustrative service proposals, (b) environmental evaluations, and (c) an estimate of fuel to be consumed in the first year are directed to do so no later than September 11, 1979.

ADDRESSES: Objections or Additional Data should be filed in Docket 36441, which we have entitled the *Portland-San Jose/Oakland/Reno/Sacramento/San Francisco Show-Cause Proceeding*. They should be addressed to Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: Arthur B. Wells, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673-5352.

SUPPLEMENTARY INFORMATION: Objections should be served upon the following persons: Air California; USAir; Hughes Airwest; Western Air Lines; the Oregon State Department of Transportation, Aeronautics Division; the California Public Utilities Commission; the Nevada Public Service Commission; the California Department of Transportation, Division of Aeronautics; and the Mayors and airport managers of Portland, San Jose, Oakland, Reno, Sacramento, and San Francisco.

The complete text of Order 79-8-124 is available from the Distribution Section, Room 516, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 79-8-124 to that address.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

[Order 79-8-118]

Rich International Airways, Inc.; New Cargo and Passenger Charter Authority

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause: Order 79-8-118.

SUMMARY: Docket 36439. The Board proposes to grant Rich International Airways, Inc. new cargo and passenger charter authority: (1) Between points in the United States (excluding Alaska); (2) between points in the United States, on the one hand, and points in Canada,

Mexico, the Caribbean, Central America, South America, the Transpacific area, and the transatlantic area (limited to passenger authority), on the other hand; and (3) for overseas and foreign air transportation pursuant to contract with the Department of Defense. This authority is at issue in the *Former Large Irregular Air Service Investigation*, Docket 33362.

OBJECTIONS: All interested persons having objections to the Board's tentative findings and conclusions that the authority described in the order cited above should be granted, shall, no later than October 10, 1979 file a statement of such objections, accompanied by 19 copies, with the Civil Aeronautics Board. A statement of objections must cite the docket number and must include a summary of testimony, statistical data or other supporting evidence.

ADDRESS FOR OBJECTIONS: Docket, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

To get a copy of the complete order, request it from the C.A.B. Distribution Section, Room 516, 1825 Connecticut Ave., NW., Washington, D.C. 20428. Requests may be made by postcard.

FOR FURTHER INFORMATION CONTACT: James Casey, Office of the General Counsel, Civil Aeronautics Board, (202) 673-5792.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

COMMISSION ON CIVIL RIGHTS

District of Columbia Advisory Committee; Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the District of Columbia Advisory Committee (SAC) of the Commission will convene at 10:00 am and will end at 12:30 pm, on September 14, 1979, at 2120 L Street, Washington, D.C. 20037.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Mid-Atlantic Regional Office of the Commission, 2120 L Street, NW., Room 510, Washington D.C. 20037.

The purpose of this meeting is for program planning for new projects.

This meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington D.C., August 23, 1979.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Industry and Trade Administration

University of Arkansas; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially Section 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5:00 p.m. at 666-11th Street, N.W. (Room 735), Washington, D.C.

Docket No. 79-00255. Applicant: University of Arkansas, 325 Administration Building, Fayetteville, AR 72701. Article: Electron Microscope, Model JEM-100CX with Side Entry Goniometer and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to study the structure and function of biological cells and tissues. Included among these will be normal as well as diseased cells or tissues of various animals, plants, and insects; the supramolecular structure of various virus particles; serial sections of virus-induced inclusion bodies; and ultrastructural cytochemistry of diseased cells. Studies of pathogen-specific cytopathological structures and/or inclusion bodies which can be used then as a diagnostic tool are sample objectives that will be pursued. The article will also be used in the course "Introduction to Electron Microscopy" which introduces students to standard preparative techniques for both scanning and transmission electron microscopy. The emphasis is practical, with students preparing and examining their own material throughout the course. Article ordered: March 5, 1979.

Docket No. 79-00262. Applicant: University of Kentucky, Plant Pathology Department, S-305 Agricultural Science Center, N., Lexington, Kentucky 40546. Article: Electron Microscope, Model EM 400 and Accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article:

The article is intended to be used for the study of the ultrastructural aspects of plant pathogenesis. Pathogenic agents to be studied will include fungi, bacteria and viral pathogens of plants and toxins produced by these pathogens. Experiments will involve analysis of the sequence of events during infection of plants by pathogens and host responses to infection including changes in cells, subcellular organelles, and membranes. Article ordered: March 13, 1979.

Docket No. 79-00263. Applicant: National Naval Medical Center, Department of Pathology, Bethesda, Maryland 20814. Article: Electron Microscope, Model EM 10B and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studies of the ultrastructure of diseased cells and tissues. Experiments will be conducted on diseased material to determine if there is any alteration from the normal morphology. Both qualitative measurements are to be used. Morphometric analysis of cell and organelle dimensions will serve as a basis of comparison. In addition, the article will be used in a residency training course in the Department of Pathology designed to (1) familiarize residents with the most up to date procedures and instrumentation available for diagnostic electron microscopy, (2) train residents in the basic operation of the electron microscope, (3) teach residents the skill of interpreting the information available in electron micrographs, (4) review the basic ultrastructure of normal and diseased states of specific cells tissues. Article ordered: December 28, 1978.

Docket No. 79-00265. Applicant: Letterman Army Medical Center—Department of Pathology, Building 1100, Presidio of San Francisco, San Francisco, CA 94120. Article: Electron Microscope, Model EM 10A and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article will be used to study human tissues removed surgically or at autopsy. Research will involve studying ultrastructurally all unusual tumors and many other pathologic states. In addition, the article will be used for post doctoral training of ten residents in the medical specialty of pathology. Article ordered: March 30, 1979.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, was being

manufactured in the United States at the time the articles were ordered.

Reasons: Each foreign article to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each article establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each article described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

(Catalog of Federal Domestic Assistance, Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Richard M. Seppa,

Director, Statutory Import Programs Staff.

[FR Doc. 79-26936 Filed 8-28-79; 8:45 am]

BILLING CODE 3510-25-M

University of California—Los Alamos; Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W., (Room 735) Washington, D.C.

Docket No. 79-00226. Applicant: University of California—Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, NM 87545.

Article: Line Tunable Multigas Laser Model TEA 801A and Accessories.

Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: The article is intended to be used for the study of multiple photodissociation cross section. The experiment to be conducted is the irradiation of polyatomic molecules with extremely high irradiation fluences. The article is to produce the required extremely high ir fluences.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a pulse energy of 1.2 joules per line and multigas (nitrons oxide and carbon monoxide) operation. The National Bureau of Standards advises in its memorandum dated August 2, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Richard M. Seppa,

BILLING CODE 3510-25-M

University of California—Los Alamos; Decision on Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No.: 79-00227. Applicant: University of California—Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, NM 87545. Article: Extended Interaction Oscillator Model VKE 249OG and Accessories. Manufacturer: Varian Associates of Canada, Canada. Intended use of article: The article is intended to be used to cause spin transitions in the electron free radical of cr^+ and thereby to induce proton spin polarization in the hydrogen content of the 1,2 propane dial. The development of proton polarization will allow the propane dial to be used as a polarized target in medium energy neutron-proton scattering experiments such as these

have not been attempted before at these energies.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides power of five watts and a frequency range of 50.0-79.9 gigahertz. The National Bureau of Standards advises in its memorandum dated August 3, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Department of Energy; Decision on Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00230. Applicant: U.S. Department of Energy, EG&G Idaho, Inc., P.O. Box 1625, Idaho Falls, ID 83401. Article: Micro-Metallograph, Model MM5RT and Accessories. Manufacturer: E. Leitz Inc., West Germany. Intended use of article: The article is intended to be used for the study of radiation effects, mechanical stress, the microstructural properties and parameters of materials and their relationship to temperature and other factors. Experiments will be conducted to improve the performance and power burst reactor fuel elements through the

quantitative analysis of their microstructure and correlation with the reactor environment factors and variables.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a gas tight, remote operating hot cell and hardness tester. The National Bureau of Standards advises in its memorandum dated July 13, 1979 that (1) the combination of capabilities of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no combination of domestic instruments or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Environmental Protection Agency; Decision on Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00239. Applicant: U.S. Environmental Protection Agency, Environmental Sciences Research Laboratory, Environmental Research Center, Research Triangle Park, N.C. 27711. Article: Piezoelectric Aerosol Centrifuge. Manufacturer: Fraunhofergesellschaft Institute for Aerobiology, West Germany. Intended use of article: The article is intended to be used for studies of airborne pollution particles. Experiments will be carried

out to study particles emitted from stationary sources (e.g., power plants) and mobile sources (e.g., diesel-power vehicles) as well as particles in the ambient air.

These experiments will be conducted to determine variations in airborne particle size distributions and their dependence on source operating and atmospheric conditions.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign articles provides the capability to record mass distribution of aerosol particles from (0.3 to 5 microns in diameter) on a real time bases. The National Bureau of Standards advises in its memorandum dated August 6, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Geological Survey/Menlo Park; Decision on Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00188. Applicant: U.S. Geological Survey, 345 Middlefield Road, Menlo Park, California 94025. Article: Magnetic Susceptibility Meter. Manufacturer: Ustav uzite geofyziky,

Brno, Czechoslovakia (Geophysical Instrumentation Institute). Intended use of the article: The article is intended to be used to distinguish between the magnetite-free and magnetite-bearing intrusive rocks which are impossible to differentiate in the field by any other means.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides the capability for on site measurements directly on rocks without the need for drill core or crushed rock samples. The National Bureau of Standards advises in its memorandum dated July 12, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

NBS—Washington, D.C.; Decision on Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00249. Applicant: National Bureau of Standards, Washington, D.C. 20234. Article: Automatic Ratio Arm Bridge. Manufacturer: Automatic Systems Laboratories Ltd., United Kingdom. Intended use of article: The article is intended to be used for studies of the

thermodynamic properties of: standard reference materials (SRM's) issued by the National Bureau of Standards as secondary energy standards to calibrate (or check) reaction and heat capacity calorimeters; and key compounds (in the sense that their thermodynamic properties play a critical role in selecting values for the properties of other compounds). The experiments conducted in reaction calorimeters involve measurement of the corrected temperature rise (i.e., corrected for heat absorbed from the environment) of the calorimeter, ΔO_1 caused by the change in interval energy associated with a chemical reaction, ΔU .

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides automatic operation, high resolution (one part in 10^9 , accuracy 3 parts in 10^4 in the range 1,000 to 10,000 ohm range) and a stability of 10 times the accuracy figure. The National Bureau of Standards advises in its memorandum dated August 9, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Purdue University; Decision on Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00238. Applicant: Purdue University, West Lafayette, Indiana 47909. ARTICLE: Three (3) Model HI-1-00 Loading Frames, Three (3) HI-100-1 Weights, and Three (3) 1-200 Consolidometers. Manufacturer: Geonor A/S, Norway. Intended use of article: The article is intended to be used for teaching purposes in the courses CE 383 Geotechnical Engineering I, CE 582 Soil Properties and their Measurement and CE 681 Engineering Properties of Soil. Students will use the equipment for standard and quasi standard incremental loading consolidation tests. The article will also be used for the study of the consolidation properties of soft clay soil (compression index, coefficient of compressibility, and other parameters) for supplemental usage when not scheduled for teaching purposes.

Comments: No comments have been received with respect to this application.

"Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a combination wide range (up to 1000 kilograms) loading frame and consolidometer. The National Bureau of Standards advises in its memorandum dated July 20, 1979 that (1) the combination of capabilities of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

[FR Doc. 79-26942 Filed 8-28-79; 8:45 am]

BILLING CODE 3510-25-M

Surgical Neurology Branch NINCDS/NIH; Decision on Application for Duty Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the

regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. at 666-11th Street, N.W. (Room 735) Washington, D.C.

Docket No. 79-00200. Applicant: Surgical Neurology Branch NINCDS/ National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014. Article: LKB 2088 Ultratome V Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of various biological materials including normal, neoplastic and injured (post traumatic and ischemic) neurons and glia. Scientific problems to be studied will include:

1. The ultrastructural characteristics of gliomas and other types of brain tumors.

2. Quantitative ultrastructural surface and cytoplasmic characteristics of chromatolytic and regenerating neurons and quiescent, hypertrophic and mitotic post-injury microglia, oligodendroglia and astroglia.

3. Quantitative ultrastructural surface and cytoplasmic characteristics of arachnoidal cells under quiescent and various experimental conditions.

4. Surface membrane characterization of gliomas and other brain tumors.

5. Analysis of lectin and other receptor movement after alterations of membrane fluidity and cytoskeletal organization; surface and cytoplasmic events in transformation as well as nerve regeneration.

6. Quantitative analysis of fine structural changes in glioma cells after treatment with various chemotherapeutic agents such as CCNU, BCNU, phenytoin, procarbazine, methotrexate (TEM with quantitative image analysis).

Post-doctoral fellows as well as medical students and neurological and neurosurgical residents will be trained to use the instrument as part of the research training in the laboratory.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (December 22, 1978).

Reasons: The foreign article has a cutting speed range of 0.1 to 50 millimeters/second (mm/sec). The MT/5000 ultramicrotome manufactured domestically by the DuPont/Sorvall Division of the DuPont Company

(Sorvall) became available on April 24, 1979. The MT/5000 has a cutting speed range of 0.1 to 38 mm/sec. However, at the time the foreign article was ordered, the most closely comparable domestic instrument was Sorvall's Model MT-2B ultramicrotome. The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec.

We are advised by the National Bureau of Standards in its memorandum dated June 27, 1979 that (1) cutting speeds in the excess of 4mm/sec. are pertinent to the applicant's research studies and (2) the domestic instrument does not provide the pertinent feature. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the foreign article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Richard M. Seppa,

Director, Statutory Import Programs Staff.

[FR Doc. 79-26938 Filed 8-28-79; 8:45 am]

BILLING CODE 3510-25-M

National Telecommunications and Information Administration

Grants for Planning and Construction of Public Telecommunications Facilities Program; Addendum to List of Applications Accepted for Filing

Notice is hereby given that the application of National Public Radio (NPR) for a construction grant has been accepted for filing under the provisions of Title III, Part IV of the Communications Act of 1934, as amended (47 U.S.C. 390-394, 397), and accordance with 15 CFR Part 2301.

National Public Radio, 2025 M Street, NW., Washington, D.C. 20036, File No. 568R/C790132R to improve production and distribution facilities at National Public Radio, Washington, D.C. Proposal determined acceptable: August 22, 1979. Estimated total project costs: \$556,210. Grant requested: \$417,158. Application signed by: Thomas Warnock, Executive Vice President.

This notice is an addendum to the list of applications accept for filing announced on August 8, 1979. 44 FR 46712-734. It was initially determined that NPR was ineligible for the project

proposed. Upon reviewing that decision on our own motion, it was determined that NPR is an eligible entity.

The acceptance of applications for filing is a procedure designed for making preliminary determinations of eligibility, and for providing the opportunity for public comment on applications. Acceptance of an application does not preclude subsequent return or disapproval of an application if it is found to be not in accordance with the provisions of 15 CFR Part 2301, or if the applicant fails to file any additional information requested by the Administrator, National Telecommunications and Information Administration. Acceptance for filing does not assure an application of being funded; it merely qualifies it to compete for funding with other applications which have also been accepted for filing.

Pursuant to 15 CFR 2301.11 applicants are required to publish in a newspaper of general circulation in the community to be served by the applicant, a notice that such application has been tendered to the National Telecommunications and Information Administration. The notice shall be published once a week for two consecutive weeks within the three week period following the date of this publication in the Federal Register. The notice shall contain substantially the same information concerning the application that is published in this notice of acceptance. In addition, it will include (1) information as to where within the community to be served a copy of the application, and any amendments thereto, may be inspected by the public during normal business hours, and (2) an invitation for parties supporting or opposing the application to file comments with the Administrator, National Telecommunications and Information Administration, Public Telecommunications Facilities Program, Washington, D.C. 20005, under the terms of 15 CFR 2301.14.

Section 2301.14 provides that interested parties may file comments on applications accepted for filing within 30 days of the publication in the Federal Register of the notice of acceptance.

Section 2301.37, permits the Administrator, NTIA, to waive the agency's regulations if good cause exists for the waiver. NTIA believes that good cause exists to shorten the 30 day comment period of § 2301.14 to September 13, 1979. This determination is based on the fact that in order for the NPR application to be considered in the current funding round, NTIA must evaluate and rate the application against the others that have already been accepted. Since the announcement

of grant awards and the acceptance of grants must be made before September 30, 1979, it is imperative that any comments on the applications be received promptly. Adhering to the 30 day standard of § 2301.14 would make such consideration impossible. Additionally, the late notice of acceptance was solely due to internal NTIA review of NPR's eligibility. More specifically, we initially had read section 393(b)(4) of the Act (which corresponds to Priorities III and IV of the Program) to limit improvement and augmentation grants to enhancements to the facilities of individual existing public broadcast stations. Since NPR is not a station, it was ineligible under this construction. Upon closer analysis, however, it was determined that that reading of section 393(b)(4) was too restrictive and that an applicant which is comprised stations was eligible to complete for consideration for improvement and augmentation grants.

Parties wishing to comment on the application are advised that their comments must be accompanied by a certificate demonstrating that a copy of the comments have been mailed to NPR.

(47 U.S.C. 390-394, 397)

(Catalog of Federal Domestic Assistance Program No. 11.550, Public Telecommunications Facilities Program.)

This notice issued in Washington, D.C. on August 23, 1979.

William A. Lucas,

Associate Administrator, National Telecommunications and Information Administration.

[FR Doc. 79-26957 Filed 8-28-79; 8:45 am]

BILLING CODE 3510-60-M

DEPARTMENT OF DEFENSE

Department of the Army

Intent To Prepare a Draft Environmental Impact Statement on the Congressionally Authorized Beach Erosion Control and Hurricane Protection Project from Fire Island Inlet to Montauk Point, N.Y.

AGENCY: U.S. Army Engineer District, New York, DOD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS) on the Congressionally authorized BE-HUR project along the south shore of Long Island from Fire Island Inlet to Montauk Point, New York. The DEIS will be based on reformulation studies of the authorized Federal project which were requested by CEQ.

SUMMARY: 1. History of Authorization: The project, as authorized by the Congress in 1960, would provide beach erosion control and hurricane protection along approximately 80 miles of the Atlantic coast of the south shore of Long Island. Protection would be provided by placement of sand in the form of dunes, 20 feet above Mean Sea Level, suitably planted with vegetation and placement of a berm 14 feet above mean sea level with a naturally sloped forebeach. Up to 50 groins were authorized, if conditions indicated they were necessary.

2. Currently identified alternatives for reformulation include:

- Variations in dune/berm height;
- Various geographic boundaries of protection and control;
- Placement of seawalls;
- Ring levee or enclave protection;
- Offshore breakwaters (for beach erosion only);
- Sand by-passing (for beach erosion only);
- Various levels of evacuation/condemnation;
- Flood proofing/raising structures;
- Various coastal structures;
- Various combinations of the above.

3. Corps' Scoping Process:
a. *Background.* In January 1976 the New York District, Corps of Engineers published a Final Environmental Impact Statement for the Congressionally authorized project. In March 1978, the Department of the Interior, supported by Department of Commerce and U.S.E.P.A., referred the EIS to the Council on Environmental Quality (CEQ) as unacceptable. On 6 June 1978 the CEQ sustained the referral and referred the project back to the Corps for reformulation. The main reasons cited were that plan formulation did not address all alternatives and certain environmental impacts, including geomorphic and impacts due to development were inadequately stated.

b. *Federal Interagency Coordination.* In September 1978 and February and July 1979, in-depth meetings were held at the New York District, Corps of Engineers offices with representatives of Department of the Interior, Department of Commerce, and U.S.E.P.A. attending. Departmental differences were explored at the meetings and by interim correspondence and a series of meetings, scopes of work were produced.

c. *Proposed Public Involvement Program.* A series of frameworks for scoping of the Draft EIS have been produced with a view towards avoiding an agency referral to the CEQ in the future. It is now possible to present these to affected Federal, State and local agencies, and other interested

organizations and parties and invite their input and participation. Specifically, the frameworks of the various sets of scopes of work will be presented to all interested parties, requesting constructive criticism and input. Assistance will be requested in determining what the central issues are, which alternatives are real alternatives, which proposed studies are required to concentrate on the real alternatives, which matters are peripheral only and do not warrant in-depth treatment, where most case assumptions may adequately substitute for studies, whether study time limits are desirable, and how responsibilities for portions of study should be assigned to the various interested agencies.

The first stage of the public review shall be public scoping meetings which are coincidental with the reformulation study initiation meetings. Public notices sent to addresses on a comprehensive mailing list will contain an outline of issues, alternatives and potential studies. These will also be presented at the meetings and public input shall be sought. All input shall be carefully considered by the lead agency (Corps of Engineers) and recommended course(s) of action shall be reviewed by the coordinating Federal agencies and the local cooperating agency (State of New York).

From time to time during the study, additional public meetings or mailings may be accomplished.

d. Significant Issues. The significant issues which the referring agencies have indicated should be analyzed in depth in the DEIS are synopsized below:

(1) Geomorphic Analysis. A four phase study to determine if the barrier island system of the south shore of Long Island is migrating towards the mainland.

(2) Design Reanalysis. Complete reanalysis of studies previously performed by the Corps in determining littoral drift, storm performance and design. Purpose is to verify previous work and current state of art.

(3) Fish and Wildlife Studies. Inventories, sampling, and analysis of marine (borrow area), terrestrial, and back-bay life forms to determine potential impacts.

(4) Man's Impact on Barrier Island. Various real estate and design studies oriented towards development impacts.

(5) Water Quality Studies. Groundwater and surface water studies.

(6) Aeolian (Wind) Study. The role of the wind in the sand transport system.

(7) Alternative Studies. To expand alternatives to be studied.

(8) Relationship of any project to the U.S. Department of Interior Fire Island National Seashore Area.

e. Assignment of Work. Possible assignments for input into the EIS include offers of assistance from the Department of the Interior, and the Department of Commerce, National Marine Fisheries Service. Schedules for tentative assignments of work are available upon request.

f. Time Limits. Although no time limits have officially been set, the reformulation study to follow current requirements by Federal agencies could take 4 to 8 years concluding with an EIS to EPA and also to CEQ. Input on the desirability of a time limit is solicited. Specific recommendations should address the following parameters in regard to study length:

(1) Potential for environmental harm.
(2) State of the art of analytic techniques.

(3) Public need, including consequence of delay.

(4) Availability of data and time required for obtaining additional data.

g. Other Environmental Review and Consultation Requirements.

(1) **Review by the CEQ.** In view of the June 8, 1978 CEQ referral, the recommended course(s) of action mutually agreed upon by participants shall be returned early in the study to the CEQ, requesting advice as to whether the course(s) of action fulfill CEQ directive as contained in the June 1978 referral.

(2) **Review by Local Cooperating Agency.** The local cooperating agency in this project is the State of New York, specifically, the New York State Department of Environmental Conservation (NYSDEC). The Water Resource Development Act of 1974 establishes cost sharing for the project first cost as 70 percent Federal and 30 percent non-Federal to be borne by the local cooperating agency. Since post-authorization studies, such as the proposed reformulation study, are part of the project first cost, 30 percent of the cost associated with the same is a responsibility of NYSDEC. Accordingly, a review of the course of study, identified to date is necessary by the NYSDEC.

4. Scoping Meetings: Two scoping meetings have been scheduled because of the large geographical area to be covered (approximately 80 miles E to W) and to reduce the necessary travel to the meetings. These meetings will cover the same subject matter and will be held as follows:

9 October 1979, 8:00 p.m. (Tuesday), South Hampton College, Montauk Highway, Southampton, New York.

10 October 1979, 8:00 p.m. (Wednesday), Hauppauge High School, Veterans Memorial Highway, Hauppauge, New York.

Should residual differences on scopes remain after the above meetings, it may be necessary to hold workshop sessions with the proponents of the issues in question to resolve positions.

5. Availability of DEIS: The exact date that the DEIS will be made available to the public cannot be determined at this time, since the scoping effort is not yet complete. Best estimates to the present time range from 1983 to 1986, depending on final scope.

ADDRESS: Should additional information about the proposed action (DEIS) be desired, contact the following:

Ms. Linda Monte, NANEN-E or Mr. Bruce Bergmann, Project Manager
NANEN-Cy
New York District, U.S. Army Corps of Engineers, 28 Federal Plaza, New York, New York 10007.

Dated: August 22, 1979.

Clark H. Benn,
Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-06-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Domestic Crude Oil Allocation Program; Entitlement Notice for June 1979

AGENCY: Department of Energy, Economic Regulatory Administration.
ACTION: June 1979 Entitlement Notice.

SUMMARY: Under the Department of Energy's (DOE) domestic crude oil allocation (entitlements) program, this is the monthly entitlement notice which sets forth the entitlement purchase or sale requirements of domestic refiners for June 1979.

DATES: Payments for entitlements required to be purchased under this notice must be made by August 31, 1979. The monthly transaction report specified in § 211.66(i) shall be filed with the DOE by September 10, 1979.

FOR FURTHER INFORMATION CONTACT: Douglas McIver (Entitlements Program Office), Economic Regulatory Administration, 2000 M Street, N.W., Room 6128I, Washington, D.C. 20461. (202) 254-8660.

Kristina Clark (Office of General Counsel), Department of Energy, Forrestal Building, 1000 Independence Avenue, S.W., Room 6A-127, Washington, D.C. 20585, (202) 252-6744.

SUPPLEMENTAL INFORMATION: In accordance with the provisions of 10

CFR § 211.67 relating to the domestic crude oil allocation program of the Department of Energy (DOE), administered by the Economic Regulatory Administration (ERA), the monthly notice specified in § 211.67(i) is hereby published.

Based on reports for June 1979 submitted to the DOE by refiners and other firms as to crude oil receipts, crude oil runs to stills, eligible product imports, middle distillate imports, and imported naphtha utilized as a petrochemical feedstock in Puerto Rico; application of the entitlement adjustment for residual fuel oil production shipped in foreign flag tankers for sale in the East Coast market provided in § 211.67(d)(4); application of the entitlement adjustments for California lower tier and upper tier crude oil provided in § 211.67(a)(4); July 1979 deliveries of crude oil for storage in the Strategic Petroleum Reserve; and application of the entitlement adjustment for small refiners provided in § 211.67(e), the national domestic crude oil supply ratio for June 1979 is calculated to be .220033.

In accordance with § 211.67(b)(2), to calculate the number of barrels of deemed old oil included in a refiner's adjusted crude oil receipts for the month of June 1979, each barrel of old oil is equal to one barrel of deemed old oil and each barrel of upper tier crude oil is equal to .474601 of a barrel of deemed old oil.

The issuance of entitlements for the month June 1979 to refiners and other firms is set forth in the Appendix to this notice. The Appendix lists the name of each refiner or other firm to which entitlements have been issued, the number of barrels of deemed old oil included in each such refiner's adjusted crude oil receipts, the number of entitlements issued to each such refiner or other firm, and the number of entitlements required to be purchased or sold by each such refiner or other firm.

Pursuant to 10 CFR § 211.67(i)(4), the price at which entitlements shall be sold and purchased for the month of June 1979 is hereby fixed at \$13.70, which is the exact differential as reported for the month of May between the weighted average per barrel costs to refiners of old oil and of imported and exempt domestic crude oil, less the sum of 21 cents.

In accordance with 10 CFR § 211.67(b) each refiner that has been issued fewer entitlements for the month of June 1979 than the number of barrels of deemed old oil included in its adjusted crude oil receipts is required to purchase a number of entitlements for the month of June 1979 equal to the difference

between the number of barrels of deemed old oil included in those receipts and the number of entitlements issued to and retained by that refiner. Refiners which have been issued a number of entitlements for the month of June 1979 in excess of the number of barrels of deemed old oil included in their adjusted crude oil receipts for that month and other firms issued entitlements shall sell such entitlements to refiners required to purchase entitlements. In addition, certain refiners are required to purchase or sell entitlements to effect corrections for reporting errors for the months September 1975 through May 1979 pursuant to 10 CFR § 211.67(j)(1).

The listing of refiners' old oil receipts contained in the Appendix reflects any adjustments made by ERA pursuant to § 211.67(h).

The listing contained in the Appendix identifies in a separate column labeled "Exceptions and Appeals" additional entitlements issued to refiners pursuant to relief granted by the Office of Hearings and Appeals (prior to March 30, 1978, the Office of Administrative Review of the Economic Regulatory Administration). Also set forth in this column are adjustments for relief granted by the Office of Hearings and Appeals for 1975 and 1976, which adjustments are reflected in monthly installments. The number of installments is dependent on the magnitude of the adjustment to be made. For a full discussion of the issues involved, see *Beacon Oil Company, et al.*, 4 FEA par. 87,024 (November 5, 1976).

The listing contained in the Appendix continues the "Consolidated Sales" entry initiated in the October 1977 entitlement notice. The "Consolidated

Sales" entry is equal to the June 1979 entitlement purchase requirement of Arizona Fuels. The purpose of providing for the "Consolidated Sales" entry is to ensure that Arizona Fuels is not relieved of its June 1979 entitlement purchase requirement and that no one firm will be unable to sell its entitlements by reason of a default by Arizona Fuels. For a full discussion of the issues involved, see *Entitlement Notice for October 1977* (42 FR 64401, December 23, 1977).

For purposes of § 211.67(d) (6) and (7), which provide for entitlement issuances to refiners or other firms for sales of imported crude oil to the United States Government for storage in the Strategic Petroleum Reserve, the number of barrels sold to the Government totaled 1,520,879 barrels.

For the month of June 1979, imports of residual fuel oil eligible for entitlements issuances totaled 20,107,680 barrels.

For the month of June 1979, imports of middle distillates eligible for entitlement issuances totaled 1,231,388 barrels.

In accordance with § 211.67(a)(4), the number of barrels of California lower tier and upper crude oil as reported by refiners to the DOE, and the weighted average gravity thereof are as follows:

	Volumes	Weighted average gravity
California Lower Tier Crude Oil	7,821,715	18*
California Upper Tier Crude Oil	8,060,219	20*

The total number of entitlements required to be purchased and sold under this notice is 21,325,107.

Based on reports submitted to the DOE by refiners as to their adjusted crude oil receipts for June 1979, the pricing composition and weighted average costs thereof are as follows:

	Volumes	Weighted average cost	Percent of total volumes*
Lower Tier	70,356,093	\$6.47	14.8
Upper Tier	93,651,625	13.66	19.7
Exempt Domestic:			
Alaskan	32,258,891	16.48	6.8
Stripper	45,818,315	20.29	9.6
Naval Petroleum Reserve	3,156,746	18.06	0.7
Tertiary	38,574	13.48	0.01
Newly Discovered	1,407,538	22.23	0.3
Total Domestic	246,787,782	13.29	51.6
Total Imported (incl. SPR)	229,622,658	21.00	48.2
Total Reported Crude Oil Receipts	476,410,440	17.00	100.0
Total Reported Crude Oil Runs to Stills	467,731,749		
Total Uncontrolled (Exempt Domestic and Imported)	312,402,722	\$0.37	65.6

*Volumes may not add due to rounding.

Payment for entitlements required to be purchased under 10 CFR § 211.67(b) for June 1979 must be made by August 31, 1979.

On or prior to September 10, 1979,

each firm which is required to purchase or sell entitlements for the month of June 1979 shall file with the DOE the monthly transaction report specified in 10 CFR § 211.66(i) certifying its purchases and sales of entitlements for the month of

June. The monthly transaction report forms for the month June have been mailed to reporting firms. Firms that have been unable to locate other firms for required entitlement transactions by August 31, 1979 are requested to contact the ERA at (202) 254-3336 to expedite consummation of these transactions. For firms that have failed to consummate

required entitlement transactions on or prior to August 31, 1979, the ERA may direct sales and purchases of entitlements pursuant to the provisions of 10 CFR § 211.67(k). This notice is issued pursuant to Subpart G, 10 CFR Part 205. Any person aggrieved hereby may file an appeal with the Office of Hearings and Appeals

in accordance with Subpart H of 10 CFR Part 205. Any such appeal shall be filed on or before September 28, 1979.

Issued in Washington, D.C., on August 20, 1979.

Barton R. House,
Deputy Administrator for Operations and
Emergency Management, Economic
Regulatory Administration.

See discussion in Notice.

Entitlements issued pursuant to the regulation issued July 24, 1979 (44 FR 31162 May 31, 1979) which provides entitlements benefits for imports of middle distillates for the months May 1979 through August 1979.

Authorization to sell these entitlements to subject to conditions set forth in a DOE Decision and Order issued to Commonwealth Oil and Refining Company on March 20, 1978.

This is consistent with the court's order prohibiting any further entitlement purchase requirements by this firm pursuant to the terms of the court's judgment in *Husky Oil Co. v. DOE, et al.*, Civ. Action No. C77-190-B (D. Wyo., filed March 14, 1978), remanded, F.2d (No. 10-18 TECA, August 10, 1978).

Includes entitlements issued for sales of imported crude oil to the United States Government for storage in the Strategic Petroleum Reserve.

This does not include the purchase obligation stayed by court order in *Texas Asphalt & Refinery Co. v. FEA*, Civ. Action No. 4-75-268 (N.D. Tex., filed October 31, 1975).

Anchor Hocking Corp.

Certification of Eligible Use of Natural Gas To Displace Fuel Oil

Anchor Hocking corporation (Anchor Hocking) filed an application for certification of an eligible use of natural gas to displace fuel oil at its glass manufacturing plant in Winchester,

Indiana, with the Administrator of the Economic Regulatory Administration pursuant to 10 CFR Part 595 on July 23, 1979. Notice of that application was published in the Federal Register (44 FR 45938, August 6, 1979) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The Administrator has carefully reviewed Anchor Hocking's application in accordance with 10 CFR Part 595 and

the policy considerations expressed in the Interim-Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas for Fuel Oil Displacement (44 FR 20398, April 5, 1979). The Administrator has determined that Anchor Hocking's application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C. August 20, 1979.

Barton R. House,
Deputy Administrator, Economic Regulatory Administration.

Appendix I

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the Anchor Hocking Corporation

ERA Docket No. 79-CERT-070

Application for Certification

Pursuant to 10 CFR Part 595, Anchor Hocking Corporation (Anchor Hocking) filed an application for certification of an eligible use of up to 3,200 Mcf of natural gas per day at its glass manufacturing plant in Winchester, Indiana, with the Administrator of the Economic Regulatory Administration (ERA) on July 23, 1979. The application states that the eligible sellers of the gas are the Gas Transport, Inc. and Carl E. Smith, Inc. and that the gas will be transported by the Columbia Gas Transmission Corporation and Panhandle Eastern Pipeline Company. The application and supplemental information indicate, among other things, that the natural gas will be used to displace approximately 198,400 barrels of No. 2, No. 4, and No. 6 fuel oil (.3 to 2.7 percent sulfur) per year and that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the Administrator hereby certifies, pursuant to 10 CFR Part 595, that the use of up to 3,200 Mcf of natural gas per day at Anchor Hocking's glass manufacturing plant in Winchester, Indiana, purchased from Gas Transport, Inc. and Carl E. Smith, Inc. is an eligible use of gas within the meaning of 10 CFR Part 595.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. It is effective during this period of time for the use of up to the same certified volume of natural gas at the same facilities purchased from the same eligible sellers.

Issued in Washington, D.C. on August 20, 1979.

Barton R. House,
Deputy Administrator, Economic Regulatory Administration.

Gulf States Utilities Co.,

Certification of Eligible Use of Natural Gas To Displace Fuel Oil

Gulf States Utilities Company (Gulf States) filed an application for certification of an eligible use of natural gas to displace fuel oil at its Roy S. Nelson Generating Station in Westlake, Louisiana, with the Administrator of the Economic Regulatory Administration pursuant to 10 CFR Part 595 on July 10, 1979. Notice of that application was published in the Federal Register (44 FR 45239, August 1, 1979) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The Administrator has carefully reviewed Gulf States' application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Interim-Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas for Fuel Oil Displacement (44 FR 20398, April 5, 1979). The Administrator has determined that Gulf States' application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C. August 17, 1979.

Barton R. House,
Deputy Administrator, Economic Regulatory Administration.

Appendix I

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the Gulf States Utilities Company

ERA Docket No. 79-CERT-062

Application for Certification

Pursuant to 10 CFR Part 595, Gulf States Utilities Company (Gulf States) filed an application for certification of an eligible use of up to 40,000 Mcf of natural gas per day at its Roy S. Nelson Generating Station in Westlake, Louisiana, with the Administrator of the

Economic Regulatory Administration (ERA) on July 10, 1979. The application states that the eligible sellers of the gas are the Louisiana Resources Company and the Louisiana Intrastate Gas Corporation and that the gas will be transported by the United Gas Pipeline Company. The application and supplemental information indicate, among other things, that the natural gas will be used to displace approximately 8,425 barrels of No. 6 fuel oil (.7% sulfur) per day, and that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the Administrator hereby certifies, pursuant to 10 CFR Part 595, that the use of up to 40,000 Mcf of natural gas per day at Gulf States' Roy S. Nelson Generating Station purchased from the Louisiana Resources Company and the Louisiana Intrastate Gas Corporation is an eligible use of gas within the meaning of 10 CFR Part 595.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. It is effective during this period of time for the use of up to the same certified volume of natural gas at the same facilities purchased from the same eligible sellers.

Issued in Washington, D.C. on August 17, 1979.

Barton R. House,
Deputy Administrator, Economic Regulatory Administration.

[ERA Docket No. 79-CERT-068]

PPG Industries, Inc.

Certification of Eligible Use of Natural Gas To Displace Fuel Oil

PPG Industries, Inc. (PPG) filed an application for certification of an eligible use of natural gas to displace fuel oil at its Lexington Plant, Lexington, North Carolina, and its Shelby Plant, Shelby, North Carolina, with the Administrator of the Economic Regulatory Administration pursuant to 10 CFR Part 595 on July 16, 1979. Notice of that application was published in the Federal Register (44 FR 45989, August 6, 1979) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of

publication. No comments were received.

The Administrator has carefully reviewed PPC's application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Interim-Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas for Fuel Oil Displacement (44 FR 20398, April 5, 1979). The Administrator has determined that PPC's application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C., August 17, 1979.

Barton R. House,

Deputy Administrator, Economic Regulatory Administration.

Appendix I

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the PPG Industries, Inc.—ERA Docket No. 79-CERT-068

Application for Certification

Pursuant to 10 CFR Part 595, PPC Industries, Inc. (PPC) filed an application for certification of an eligible use of up to 1,000 Mcf of natural gas per day at its Lexington Plant, Lexington, North Carolina, and up to 1,000 Mcf of natural gas per day at its Shelby Plant, Shelby, North Carolina, with the Administrator of the Economic Regulatory Administration (ERA) on July 16, 1979. The application states that the eligible seller of the gas is David S. Towner Enterprises and that the gas will be transported by the Columbia Gulf Transmission Company, the Columbia Gas Transmission Company, and the Transcontinental Gas Pipe Line Corporation. The application and supplemental information indicate, among other things, that the combined use of natural gas at both plants will displace approximately 3,000,000 gallons of No. 2 fuel oil (less than .5% sulfur) per year and that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the Administrator hereby certifies, pursuant to 10 CFR Part 595, that the use of up to 1,000 Mcf of natural gas per day at PPC's Lexington Plant and up to 1,000 Mcf of natural gas per day at PPC's Shelby Plant purchased from David S. Towner Enterprises is an eligible

use of gas within the meaning of 10 CFR Part 595.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. It is effective during this period of time for the use of up to the same certified volumes of natural gas at the same facilities purchased from the same eligible seller.

Issued in Washington, D.C. on August 20, 1979.

Barton R. House,

Deputy Administrator, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 79-CERT-045]

Western Massachusetts Electric Co.

Certification of Eligible Use of Natural Gas To Displace Fuel Oil

Western Massachusetts Electric Company (Western Mass) filed an application for certification of an eligible use of natural gas to displace fuel oil at its West Springfield Station, West Springfield, Massachusetts, with the Administrator of the Economic Regulatory Administration pursuant to 10 CFR Part 595 on June 15, 1979. Notice of that application was published in the Federal Register (44 FR 45438, August 2, 1979) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The Administrator has carefully reviewed Western Mass' application in accordance with 10 CFR Part 595 and the policy consideration expressed in the Interim-Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas for Fuel Oil Displacement (44 FR 20398, April 5, 1979). The Administrator has determined that Western Mass' application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C. August 17, 1979.

Barton R. House,

Deputy Administrator, Economic Regulatory Administration.

Appendix I

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the Western Massachusetts Electric Co.—ERA Docket No. 79-CERT-045

Application for Certification

Pursuant to 10 CFR Part 595, Western Massachusetts Electric Company (Western Mass) filed an application for certification of an eligible use of up to 450,000 Mcf of natural gas at its West Springfield Station, West Springfield, Massachusetts, with the Administrator of the Economic Regulatory Administration (ERA) on June 15, 1979. The application states that the eligible seller of the gas is the Fitchburg Gas and Electric Light Company (Fitchburg) and that the gas will be transported by the Tennessee Gas Pipeline Company. The application and supplemental information indicate, among other things, that the natural gas will be used to displace approximately 73,500 barrels of No. 6 fuel oil (2.2% sulfur) from July 15, 1979–October 31, 1979 and that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the Administrator hereby certifies, pursuant to 10 CFR Part 595, that the use of up to 450,000 Mcf of natural gas at Western Mass' West Springfield Station purchased from Fitchburg is an eligible use of gas within the meaning of 10 CFR Part 595.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, Subpart F.

Issued in Washington, D.C. on August 17, 1979.

Barton R. House,

Deputy Administrator, Economic Regulatory Administration.

[ERA Docket No. 79-CERT-073]

Consolidated Edison Co. of New York, Inc.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

Consolidated Edison Company of New York, Inc. (Con Ed) filed an application for certification of an eligible use of natural gas to displace fuel oil at six of its steam and electric generating facilities in New York City, New York, with the Administrator of the Economic Regulatory Administration

pursuant to 10 CFR Part 595 on July 24, 1979. Notice of that application was published in the Federal Register (44 FR 45988, August 6, 1979) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The Administrator has carefully reviewed Con Ed's application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Interim-Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas for Fuel Oil Displacement (44 FR 20398, April 5, 1979). The Administrator has determined that Con Ed's application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C., August 20, 1979.

Barton R. House,

Deputy Administrator, Economic Regulatory Administration.

Appendix I—Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the Consolidated Edison Company of New York, Inc.

[ERA Docket No. 79-CERT-073]

Application for Certification

Pursuant to 10 CFR Part 595, Consolidated Edison Company of New York, Inc. (Con Ed) filed an application for certification of an eligible use of up to 10,000 dekatherms of natural gas per day at six of its steam and electric generating facilities in New York City, New York, with the Administrator of the Economic Regulatory Administration (ERA) on July 24, 1979. The application states that the eligible seller of the gas is UGI Corporation and that the gas will be transported by the Texas Eastern Transmission Corporation, the Consolidated Gas Supply Corporation and the Transcontinental Gas Pipeline Corporation. The application and supplemental information indicate, among other things, that the natural gas will be used to displace approximately 483,000 barrels of residual fuel oil (.3% sulfur) from July 1, 1979–June 1, 1980 and that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the Administrator hereby certifies, pursuant to 10 CFR Part 595, that the use of up to 10,000 dekatherms of natural gas per day at Con Ed's Astoria, East River, Narrows,

Ravenswood, Waterside, and 60th Street steam and electric generating facilities purchased from UGI Corporation is an eligible use of gas within the meaning of 10 CFR Part 595.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. It is effective during this period of time for the use of up to the same certified volume of natural gas at the same facilities purchased from the same eligible seller.

Issued in Washington, D.C. on August 20, 1979.

Barton R. House,

Deputy Administrator, Economic Regulatory Administration.

[ERA-R79-40]

Inquiry Regarding Prescription of Voluntary Guidelines for Solar Energy and Renewable Resources Respecting the Federal Standards Under the Public Utility Regulatory Policies Act of 1978

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Inquiry.

SUMMARY: On June 20, 1979, the President directed the Department of Energy (DOE) to develop and publish within 120 days voluntary guidelines, applying specifically to solar energy and renewable resources, for the ratemaking and other regulatory policy standards established under Title I of the Public Utility Regulatory Policies Act of 1978 (PURPA). This Notice is intended to solicit public comments for consideration by DOE in developing these guidelines.

DATES: Comments must be received by September 28, 1979.

ADDRESS: All comments should be forwarded to: Office of Public Hearings Management, Department of Energy, 2000 M Street, NW. (Room 2313), Docket ERA-R-79-40, Washington, D.C. 20461. Ten (10) copies of each should be submitted.

FOR FURTHER INFORMATION CONTACT:

Dr. Stephen S. Skjel, Office of Utility Systems, Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W. (Room 4016), Washington, D.C. 20461. Telephone: (202) 254-8209.

Mary Ann Masterson, Department of Energy, Office of the General Counsel, 20 Massachusetts Avenue, N.W. Room 3224, Washington, D.C. 20585.

SUPPLEMENTARY INFORMATION: I. Background

On June 20, 1979, the President directed DOE to develop and publish within 120 days voluntary guidelines, applying specifically to solar energy and renewable resources, for the eleven standards established in the Public Utility Regulatory Policies Act of 1978 (PURPA), Pub. L. 95-617, 92 Stat. 3117 *et seq.* (16 U.S.C. 2601 *et seq.*). Solar energy is broadly defined in the President's Domestic Policy Review of Solar Energy (DPR) to be energy received from the sun directly in the form of radiant energy, and indirectly in the form of stored radiant energy in biomass (i.e., wood, vegetation and organic solid wastes), heated surface waters, the potential and kinetic energy of water elevated via the hydrological cycle, and the kinetic energy of the wind.

The eleven standards, established by sections 111(d) and 113(b) of PURPA, relate to ratemaking and other regulatory policy matters. The standards generally provide that:

- (1) Rates to each class of consumer shall be designed to the maximum extent practicable to reflect the costs of providing service to that class;
 - (2) Declining block energy charges that are not cost-based shall be eliminated;
 - (3) Time-of-day rates shall be established, if cost-effective where costs vary by time of day;
 - (4) Seasonal rates shall be established where costs vary by season;
 - (5) Interruptible rates based on the costs of providing interruptible service shall be offered to commercial and industrial customers;
 - (6) Load management techniques shall be offered to consumers where practicable, cost-effective, reliable and useful to the utility for energy or capacity management;
 - (7) Master metering shall be prohibited or restricted for new buildings to the extent necessary to carry out the purposes of Title I of PURPA;
 - (8) Automatic adjustment clauses shall not be allowed unless they provide efficiency incentives and are reviewed in a timely manner;
 - (9) All consumers shall receive and clear and concise explanation of applicable rate schedules;
 - (10) Service shall not be terminated except pursuant to certain enumerated procedures; and
 - (11) Political or promotional advertising shall not be charged to ratepayers.
- PURPA requires each State regulatory authority and certain nonregulated electric utilities to consider the

standards within the time frames, procedures and other requirements established by PURPA. Section 131 of PURPA gives the Secretary of Energy the authority to prescribe voluntary guidelines respecting consideration of the standards. DOE has [recently] issued a Notice of Intent setting forth, among other things, its intentions with respect to the exercise of its authority under PURPA to promulgate voluntary guidelines for the standards.

In light of the President's directive and the determinations set forth in the Notice of Intent, DOE is issuing this Notice of Inquiry to solicit public comments for consideration by DOE in developing guidelines for applying the PURPA standards to solar energy and renewable resources.

II. Comments on Issues Relating to Voluntary Guidelines for Solar/Renewable Resource Applications

Interested persons are invited to participate in this inquiry by submitting data, views or arguments on any aspect of developing guidelines for solar and renewable resources. DOE, however, specifically invites comment on the following questions:

Is the definition of solar energy in the DPR appropriate as a definition of "solar and renewable resources" for the purposes of the guidelines?

What factors should be considered by a regulatory body in determining cost-of-service for solar/renewable resource customers?

What factors should be considered by a regulatory body in assessing the impact of solar/renewable resource loads on other customers?

Should customers with solar/renewable resource assisted end-use loads be treated as a separate tariff class?

What factors should be considered by a regulatory body in assessing the impact of time-of-day, seasonal interruptible and declining block rates on solar/renewable resource customers?

What factors should be considered by a regulatory body in assessing the use of solar/renewable devices for load management?

What factors should be considered by a regulatory body in assessing the impact of master meeting on solar/renewable resource applications in multi-occupant facilities?

What other factors pertinent to solar/renewable resource applications should be addressed in the guidelines?

What interrelationships between these factors are significant enough to merit inclusion in the guidelines?

III. Development and Publication Procedures

All comments should be sent to the Office of Public Hearings Management, Department of Energy, 2000 M Street, NW., Room 2313, Docket Number ERA-R-79-40, Washington, D.C. 20481. Comments should be identified on the outside of the envelope and on the document with the designation "Solar Guidelines, Docket No. ERA-R-79-40." Ten copies should be submitted.

All comments received by DOE by September 28, 1979, and all other relevant information, will be considered by DOE in the development of the guidelines. All comments received by DOE will be retained by DOE and made available for inspection in the DOE Reading Room, Room GA-152, James Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

Pursuant to the provisions of 10 CFR 1004.11, any person submitting information which he or she believes to be confidential and which may be exempt by law from public disclosure should submit one complete copy, and ten copies from which information claimed to be confidential has been deleted. In accordance with the procedures established at 10 CFR 1004.11, DOE shall make its own determination with regard to any claim that information submitted be exempt from public disclosure.

DOE plans to issue proposed solar and renewable resource voluntary guidelines for public comment by October 15, 1979. The guidelines will be published in the Federal Register for comment and a public hearing will be

held in Washington, D.C. The date for this public hearing will be announced in the preamble to the proposed guidelines. The final voluntary guidelines will be published in the Federal Register and will also be mailed directly to State regulatory authorities and nonregulated and regulated electric utilities covered by Title I of PURPA.

(Public Utility Regulatory Policies Act of 1978, Pub. L. 95-617 (16 U.S.C. 2601 et seq.); Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7101 et seq.))

Issued in Washington, D.C., on August 22, 1979.

Richard E. Weiner,
Assistant Administrator for Utility Systems,
Economic Regulatory Administration.

BILLING CODE 6450-01-M

(ERA Case No. 50653-2490-01-82, 50653-2490-02-82)

Consolidated Edison Co. of New York, Inc., Issuance of Proposed Prohibition Order

The Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice pursuant to Section 701(b) of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), 42 U.S.C. 8301 et seq., of the issuance of the following proposed prohibition order which would prohibit the powerplants named below from burning natural gas or petroleum as their primary energy source.

Proposed Prohibition Order

Pursuant to the authorities granted it by Section 301(b) of FUA, ERA issues this proposed prohibition order to the following powerplants owned by the Consolidated Edison Company of New York, Inc. (Con Ed):

ERA No.	Generating station	Powerplant No.	mW	Location
50653-2490-01-82	Arthur Kill	20	335	Staten Island, New York
50653-2490-02-82	Arthur Kill	30	491	Staten Island, New York

Statement of Basis and Rationale for Proposed Prohibition Order

ERA has issued regulations applicable to existing facilities (Regulations) 10 CFR Part 504, to implement the prohibitions contained in Section 301(b)

of Title III of FUA. Section 504.5 of the regulations sets forth the basis upon which ERA will propose to prohibit by order the use of natural gas or petroleum as a primary energy source by a

powerplant where ERA finds that the powerplant has or previously had the technical capability to use an alternate fuel as a primary energy source.

Con Ed reported to the Federal Energy Regulatory Commission (FPC Form 67), for year ending December 31, 1978, that Arthur Kill 20 and 30 burned 13,643 barrels of oil per day (4,980,000 barrels annually) which represents the potential oil displacement in converting Arthur Kill to an alternate fuel.

Finding of Technical Capability

In accordance with Section 301(b) of Title III of FUA, this proposed order is based on a finding by ERA that Con Ed's Arthur Kill powerplants 20 and 30 have or previously had the technical capability to use an alternate fuel (coal) as a primary energy source. This finding is based upon the following facts obtained from Con Ed:

- (1) The boilers at Arthur Kill 20 and 30 were designed and constructed to burn coal as a primary energy source; and
- (2) Arthur Kill burned coal during 1971.

The finding is also based upon information provided by Con Ed to ERA at a meeting in New York on July 5, 1979. In addition, Con Ed reported to the Federal Energy Regulatory Commission (FPC Form 67) that it burned coal at Arthur Kill 20 and 30 during 1971.

The technical capability finding is made in accordance with the requirements of Section 504.5(d) of the Regulations, taking into consideration the ability of the units, from the point of fuel intake, to physically sustain combustion of coal and maintain heat transfer as evidenced by the burning of coal at Arthur Kill during 1971. This finding recognizes, in accordance with Section 504.5(d), that the Arthur Kill units 20 and 30 are capable of burning coal, notwithstanding any required refurbishment of plant equipment in order to burn coal as a primary energy source in the units, or any required installation of air pollution control equipment to meet air quality standards.

Other Required Findings

Section 301(b) of FUA states that prior to the issuance of a final prohibition order ERA must also find that (1) the powerplant has the technical capability to use coal or another alternate fuel as a primary energy source, or it could have such capability without (A) substantial modification of the powerplant or (B) substantial reduction in the rated capacity of the powerplant; and (2) it is financially feasible for the powerplant to use coal or another alternate fuel as its primary energy source in such powerplant.

Proposed Prohibition Under Title III of FUA

Subject to the other required findings that ERA must make, ERA hereby proposes to prohibit Con Ed's Arthur Kill powerplants 20 and 30 from burning petroleum or natural gas as their primary energy source.

Description of Prohibition Order Proceedings

Pursuant to Section 301 of the FUA, ERA has promulgated regulations applicable to the issuance of prohibition orders to existing facilities, a summary of which follows:

(1) ERA has performed its initial information gathering with respect to the question of technical capability to burn alternate fuels (coal) and has informed Con Ed that it is considering issuance of a proposed prohibition order. ERA has also had informal discussions with Con Ed concerning the issuance of a proposed prohibition order.

(2) ERA has made a finding that Con Ed's Arthur Kill 20 and 30 powerplants have or previously had the technical capability of using coal as their primary energy source. ERA is publishing this finding and proposed prohibition order in the Federal Register as required by Section 701(b) of FUA. In accordance with Section 301(b) of FUA, the proposed prohibition order is not required to contain, at this point in the proceeding, the other pertinent findings that ERA must make before a final prohibition order can be issued. These are (1) that the powerplant has the technical capability to use coal or another alternate fuel as a primary energy source, or it could have such capability without (A) substantial physical modification of the powerplant, or (B) substantial reduction in the rated capacity of the powerplant; and (2) that it is financially feasible for Con Ed to use coal or another alternate fuel as a primary energy source in such powerplant.

(3) After publication of this proposed order, a three-month comment period will commence, during which Con Ed will be given an opportunity to challenge ERA's initial finding of technical capability, and to present evidence relevant to financial feasibility. During this three-month public comment period, ERA will request that Con Ed furnish it with such additional evidence as is necessary to enable ERA to make the other statutory findings set forth above, which are required to be made by ERA prior to issuance of a final prohibition order. Con Ed will also be required, during this period, to identify, but not to

demonstrate its entitlement to, any exemptions for which the unit in question may qualify.

(4) Subsequent to the end of the three-month comment period, ERA will issue a notice of whether ERA intends to proceed with the prohibition order proceeding. Within three months of the issuance of the notice of intention to proceed with the prohibition order, an owner or operator of a powerplant that may be subject to an order may demonstrate prior to issuance of a final prohibition order that the powerplant would qualify for an exemption if the prohibition had been established by rule.

(5) Subsequent to the end of the second three month period, ERA will, if it intends to issue a final prohibition order, prepare and publish notice of availability of a tentative staff decision.

(6) Under the provisions of Section 701(d) of FUA, any interested person may request a public hearing on the proposed prohibition order and tentative staff decision. Interested persons wishing a hearing must request a hearing within 45 days after publication of the notice of availability of the tentative staff decision. If a hearing has been requested, ERA shall provide interested persons with an opportunity to present oral data, views and arguments at a public hearing held in accordance with Subpart C of 10 CFR Part 501.

(7) At the hearing, if any, interested persons will have the opportunity to question the parties about ERA's proposed order and tentative staff decision. Con Ed's showing on exemptions and rebuttal of ERA's proposed order, and ERA's rebuttal to any showing of potential qualification for exemption.

(8) After the hearing, if any, and comment period, ERA shall determine whether a final prohibition order will be issued based upon a review of the entire administration record. A final prohibition order, if issued, will be published in the Federal Register. Final orders become effective sixty days after publication.

Comment and Public Hearing Procedures

ERA hereby also gives notice of the opportunity to submit written comments, views, and arguments by interested persons regarding this proposed prohibition order. Comments need not be limited to ERA's technical capability finding, but may include a discussion of all three statutory findings.

The initial comment period shall remain open until November 27, 1979. Comments should make reference to the

docket number set forth in this notice and proposed order. Comments should address the adequacy and validity of the findings and any other aspects or impacts of the proposed prohibition order believed to be relevant. Written comments on the proposed prohibition order should be directed to Public Hearing Management (Case Nos. 50653-2490-01-82 and 50653-2490-02-82), U.S. Department of Energy, Box 4629, Room 3214, 2000 M Street, N.W., Washington, D.C. 20461, and should be received before 4:30 p.m. on November 30, 1979.

In accordance with 10 CFR 501.34, any interested person may request a public hearing on the proposed order. The request must include a description of the person's interest in the proposed prohibition order, an outline of the anticipated content of the presentation to be made at the public hearing, and an address and telephone where the person requesting the public hearing may be reached.

Comments and other documents submitted to DOE Public Hearing Management should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Prohibition Order for the Arthur Kill Powerplants." Fifteen copies should be submitted. All written comments, all oral presentations, and all other relevant information submitted to or available to ERA will be considered by ERA. Any information or data considered to be confidential by the person furnishing it must be so identified in writing in accordance with 10 CFR 303.9(f). ERA reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

BILLING CODE 6450-01-01

[ERA Case No. 50653-2500-01-82, 50653-2500-02-82]

Consolidated Edison Co. of New York, Inc.; Issuance of Proposed Prohibition Order 1978

The Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice pursuant to Section 701(b) of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), 42 U.S.C. 8301 et seq., of the issuance of the following proposed prohibition order which would prohibit the powerplants named below from burning natural gas or petroleum as their primary energy source.

Proposed Prohibition Order

Pursuant to the authorities granted it by Section 301(b) of FUA, ERA issues this proposed prohibition order to the following powerplants owned by the Consolidated Edison Company of New York, Inc. (Con Ed).

ERA No.	Generating station	Powerplant No.	mW	Location
50653-2500-01-82	Ravenswood	30N	454	Queens, N.Y.
50653-2500-02-82	Ravenswood	30S	464	Queens, N.Y.

Statement of Basis and Rationale for Proposed Prohibition Order

ERA has issued regulations applicable to existing facilities (Regulations) 10 CFR Part 504, to implement the prohibitions contained in Section 301(b) of Title III of FUA. Section 504.5 of the

regulations sets forth the basis upon which ERA will propose to prohibit by order the use of natural gas or petroleum as a primary energy source by a powerplant where ERA finds that the powerplant has or previously had the

technical capability to use an alternate fuel as a primary energy source.

Con Ed reported to the Federal Energy Regulatory Commission (FPC Form 67), for year ending December 31, 1978, that Ravenswood 30N and 30S burned 7,937 barrels of oil per day (2,897,000 barrels annually) which represents the potential oil displacement in converting Ravenswood to an alternate fuel.

Finding of Technical Capability

In accordance with Section 301(b) of Title III of FUA, this proposed order is based on a finding by ERA that Con Ed's Ravenswood powerplants 30N and 30S have or previously had the technical capability to use an alternate fuel (coal) as a primary energy source. This finding is based upon the following facts obtained from Con Ed:

- (1) The boilers at Ravenswood 30N and 30S were designed and constructed to burn coal as a primary energy source; and
- (2) Ravenswood burned coal during 1971.

The finding is also based upon information provided by Con Ed to ERA at a meeting in New York on July 5, 1979. In addition, Con Ed reported to the Federal Energy Regulatory Commission (FPC Form 67) that it burned coal at Ravenswood 30N and 30S during 1971.

The technical capability finding is made in accordance with the requirements of Section 504.5(a) of the Regulations, taking into consideration the ability of the units, from the point of fuel intake, to physically sustain combustion of coal and maintain heat transfer as evidenced by the burning of coal at Ravenswood during 1971. This finding recognizes, in accordance with Section 504.5(d), that the Ravenswood units 30N and 30S are capable of burning coal, notwithstanding any required refurbishment of plant equipment in order to burn coal as a primary energy source in the units, or any required installation of air pollution control equipment to meet air quality standards.

Other Required Findings

Section 301(b) of FUA states that prior to the issuance of a final prohibition order ERA must also find that (1) the powerplant has the technical capability to use coal or another alternate fuel as a primary energy source, or it could have such capability without (A) substantial modification of the powerplant or (B) substantial reduction in the rated capacity of the powerplant; and (2) it is financially feasible for the powerplant

to use coal or another alternate fuel as its primary energy source in such powerplant.

Proposed Prohibition Under Title III of FUA

Subject to the other required findings that ERA must make, ERA hereby proposes to prohibit Con Ed's Ravenswood powerplants 30N and 30S from burning petroleum or natural gas as their primary energy source.

Description of Prohibition Order Proceedings

Pursuant to Section 301 of FUA, ERA has promulgated regulations applicable to the issuance of prohibition orders to existing facilities, a summary of which follows:

(1) ERA has performed its initial information gathering with respect to the question of technical capability to burn alternate fuels (coal) and has informed Con Ed that it is considering issuance of a proposed prohibition order. ERA has also had informal discussions with Con Ed concerning the issuance of a proposed prohibition order.

(2) ERA has made a finding that Con Ed's Ravenswood 30N and 30S powerplants have or previously had the technical capability of using coal as their primary energy source. ERA is publishing this finding and proposed prohibition order in the Federal Register as required by Section 701(b) of FUA. In accordance with Section 301(b) of FUA, the proposed prohibition order is not required to contain, at this point in the proceeding, the other pertinent findings that ERA must make before a final prohibition order can be issued. These are (1) that the powerplant has the technical capability to use coal or another alternate fuel as a primary energy source, or it could have such capability without (A) substantial physical modification of the powerplant, or (B) substantial reduction in the rated capacity of the powerplant, and (2) that it is financially feasible for Con Ed to use Coal or another alternate fuel as a primary energy source in such powerplant.

(3) After publication of this proposed order, a three-month comment period will commence, during which Con Ed will be given an opportunity to challenge ERA's initial finding of technical capability, and to present evidence relevant to financial feasibility. During this three-month public comment period, ERA will request that Con Ed furnish it with such additional evidence as is necessary to enable ERA to make the other statutory findings set forth above, which are required to be made by ERA prior to

issuance of a final prohibition order. Con Ed will also be required, during this period, to identify, but not to demonstrate its entitlement to, any exemptions for which the unit in question may qualify.

(4) Subsequent to the end of the three-month comment period, ERA will issue a notice of whether ERA intends to proceed with the prohibition order proceeding. Within three months of the issuance of the notice of intention to proceed with the prohibition order, an owner or operator of a powerplant that may be subject to an order may demonstrate prior to issuance of a final prohibition order that the powerplant would qualify for an exemption if the prohibition had been established by rule.

(5) Subsequent to the end of the second three month period, ERA will, if it intends to issue a final prohibition order, prepare and publish notice of availability of a tentative staff decision.

(6) Under the provisions of Section 701(d) of FUA, any interested person may request a public hearing on the proposed prohibition order and tentative staff decision. Interested persons wishing a hearing must request a hearing within 45 days after publication of the notice of availability of the tentative staff decision. If a hearing has been requested, ERA shall provide interested persons with an opportunity to present oral data, views and arguments at a public hearing held in accordance with Subpart C of 10 CFR Part 501.

(7) At the hearing, if any, interested persons will have the opportunity to question the parties about ERA's proposed order and tentative staff decision, Con Ed's showing on exemptions and rebuttal of ERA's proposed order, and ERA's rebuttal to any showing of potential qualification for exemption.

(8) After the hearing, if any, and comment period, ERA shall determine whether a final prohibition order will be issued based upon a review of the entire administrative record. A final prohibition order, if issued, will be published in the Federal Register. Final orders become effective sixty days after publication.

Comment and Public Hearing Procedures

ERA hereby also gives notice of the opportunity to submit written comments, views, and arguments by interested persons regarding this proposed prohibition order. Comments need not be limited to ERA's technical capability finding, but may include a discussion of all three statutory findings.

The initial comment period shall remain open for a period of 90 days after publication of this proposed order in the Federal Register (November 27, 1979). Comments should make reference to the docket numbers set forth in this notice and proposed order. Comments should address the adequacy and validity of the findings and any other aspects or impacts of the proposed prohibition order believed to be relevant. Written comments on the proposed prohibition order should be directed to Public Hearing Management (Case Nos. 50653-2500-01-82 and 50653-2500-02-82), U. S. Department of Energy, Box 4629, Room 3214, 2000 M Street, NW., Washington, D.C. 20461, and should be received before 4:30 p.m. on November 30, 1979.

In accordance with 10 CFR 501.34, any interested person may request a public hearing on the proposed order. The request must include a description of the person's interest in the proposed prohibition order, an outline of the anticipated content of the presentation to be made at the public hearing, and an address and telephone where the person requesting the public hearing may be reached.

Comments and other documents submitted to DOE Public Hearing Management should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Prohibition Order for the Ravenswood Powerplants." Fifteen copies should be submitted. All written comments, all oral presentations, and all other relevant information submitted to or available to ERA will be considered by ERA. Any information or data considered to be confidential by the person furnishing it must be so identified in writing in accordance with 10 CFR 303.9(r). ERA reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

Proposed Subsequent Arrangements

Pursuant to Section 131 of the Atomic
Energy Act of 1954, as amended (42
U.S.C. 2160), notice is hereby given of
proposed "subsequent arrangements"
under the Agreements for Cooperation
Between the Government of the United
States of America and the Government
of Thailand and with the International
Atomic Energy Agency, and the
Additional Agreement Between the
Government of the United States of
America and the European Atomic
Energy Community (EURATOM)
Concerning the Peaceful Uses of Atomic
Energy.

The subsequent arrangements to be
carried out under the above mentioned
agreements involve conversion of Long-
Term, Fixed-Commitment Uranium
Enrichment contracts to the new
Adjustable, Fixed-Commitment
contracts at the customers option.

Contract No.	Customer	Facility
TH-100	Electricity Generating Authority of Thailand.	Ao-Phai-Nuc-1
YU-100	Savsko Elektrane Ljubljana and Elektropivreda Zagreb.	KRSKO-1
EU-106	European Atomic Energy Community.	ENEL-II.
EU-149	European Atomic Energy Community.	Netherlands III.

In accordance with Section 131 of the
Atomic Energy Act of 1954, as amended,
it has been determined that the
conversion of these contracts to the
Adjustable, Fixed-Commitment contract
form will not be inimical to the common
defense and security.

This subsequent arrangement will
take effect no sooner than fifteen days
after the publication of this notice.

For the Department of Energy.

Dated: August 24, 1979.

[FRL 1306-8]

Water Quality/Water Allocation Coordination Study; Draft Report

Notice is hereby given that a draft
report to Congress, entitled "Water
Quality/Water Allocation Coordination
Study" is available for review.

The draft report, prepared in response
to Section 102(d) of the Clean Water
Act, analyzes the relationship between
water quality programs under this Act
and State and Federal water allocation
programs. The report includes a
discussion of the legislative background,
a summary of the Clean Water Act, and
a summary of the State and Federal
water allocation programs. The analysis
of quality/quantity relationships and
conflicts focuses on four major issue
areas: (1) instream flow; (2) irrigated
agriculture; (3) consumptive waste
treatment technologies; and (4) ground
water and surface water relationships.
Draft alternatives and recommendations
to Congress are also presented.

EPA encourages written comments on
the draft report. Comments will be
accepted until close of business
November 1, 1979. The draft report will
be available from the Project Officer,
Jerry Kotas, Environmental Protection
Agency, Water Planning Division (WH-
554), Washington, D.C. 20460 (202-426-
2474).

Dated: August 23, 1979.

BILLING CODE 6560-01-M

[PF-148; FRL 1307-1]

Pesticide Programs; Filing of Pesticide Petition

Phostoxin Sales, Inc., 2221 Poplar
Blvd., Alhambra, CA 91802, has
submitted a petition (PP 9F2239) to the
Environmental Protection Agency (EPA)
which proposes that 40 CFR 180.225 be
amended by establishing a tolerance for
residues of the fumigant phosphine in or
on the raw agricultural commodity
sesame seed at 0.1 part per million
(ppm) resulting from postharvest

treatment of the commodity with
aluminum phosphide. The proposed
analytical method for determining
residues is a modification of the
procedures of R. B. Bruce, et al., J. Agri.
and Food Chem. 10, 18-21, 1962, in
which the phosphine residues is
oxidized by bromine to phosphate and
determined colorimetrically. Notice of
this submission is given pursuant to the
provisions of section 408(d)(1) of the
Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to
submit written comments on this
petition. Comments may be submitted,
and inquiries directed, to Product
Manager (PM) 16, Room E-343,

Acting Director, Registration Division.

[FR Doc. 79-27002 Filed 8-28-79; 8:45 am]

BILLING CODE 6560-01-M

[FRL 1307-2]

General Motors Corp.; Pontiac, Mich.; Final Determination

In the matter of the applicability of
Title I, Part C of the Clean Air Act (Act),
as amended, 42 U.S.C. 7401 et seq., and
the Federal regulations promulgated
thereunder at 40 CFR 52.21 [43 FR 26388,
June 19, 1978] for Prevention of
Significant Deterioration of Air Quality
(PSD), to General Motors Corporation
(GMC), Central Foundry Division,
Pontiac, Michigan.

On November 19, 1979, GMC, Central
Foundry Division submitted an
application to the United States
Environmental Protection Agency (U.S.
EPA), Region V office, for an approval to
expand the rated melting capacity of the
two existing grey iron cupolas. The
application was submitted pursuant to
the regulations for PSD.

On December 19, 1979, GMC Central
Foundry Division was notified that its
application was complete and
preliminary approval was granted.

On May 9, 1979, U.S. EPA published
notice of its decision to grant a
preliminary approval to Martin Marietta

Aggregates. No comments or requests
for a public hearing were received.

After review and analysis of all
materials submitted by GMC, Central
Foundry Division, the Company was
notified on November 24, 1978, that U.S.
EPA had determined that the proposed
new construction in Pontiac, Michigan,
would be utilizing the best available
control technology and that emissions
from the facility will not adversely
impact air quality, as required by
Section 165 of the Act.

This approval to construct does not
relieve GMC, Central Foundry Division
of the responsibility to comply with the
control strategy and all local, State and
Federal regulations which are part of the
applicable State Implementation Plan,
as well as all other applicable Federal,
State and local requirements.

This determination may now be
considered final agency action which is
locally applicable under Section
307(b)(1) of the Act and therefore a
petition for review may be filed in the
U.S. Court of Appeals for the Seventh
Circuit by any appropriate party. In
accordance with Section 307(b)(1),
petition for review must be filed sixty
days from the date of this notice.

42 U.S.C. 7401 et seq., (the Act), and the
Federal regulations promulgated thereunder
at 40 CFR 52.21 for the Prevention of
Significant Deterioration of Air Quality
(PSD).

Findings

1. The General Motors Corporation (GMC)
proposes to expand the rated melting
capacity of the two existing grey iron cupolas
from 35 tons to 45 tons hourly, at their
Central Foundry Division in Pontiac,
Michigan.

2. The proposed modification of the two
cupolas is subject to the requirements of 40
CFR 52.21 and the applicable sections of the
Act.

3. GMC submitted a completed PSD
application on December 19, 1978. On May 9,
1979, notice was published in the Oakland
Press seeking comments from the public and
giving an opportunity to request a public

hearing on the application and U.S. EPA's
review and preliminary determination to
approve construction of the above-cited
source. No comments or requests for a public
hearing were received.

4. After a thorough review of all the
materials submitted by GMC, U.S. EPA has
determined that emissions from the increased
rated melting capacity of the two cupolas will
not violate the National Ambient Air Quality
Standards nor violate the air quality
increments.

5. GMC presently utilizes high energy
scrubbers and an afterburning system to
control particulate matter and carbon
monoxide respectively. GMC proposes to
retain these controls subsequent to the
modification. The scrubber would be
operated at a pressure drop in excess of 100
inches w.g. The gases would be heated to
approximately 1350°F. in the upper stack with
a retention time of not less than 0.3 seconds.
The control systems as outlined represent
best available control technology. (BACT).

6. A screening analysis indicated that the
actual increases in ground level
concentration for particulate matter would be
insignificant. For carbon monoxide, the one
hour concentration would be approximately 2
micrograms per cubic meter (ug/m³). The
increase is small compared to the national
ambient air quality standards which are 10
and 40 ug/m³ for 8-hour and 24-hour
averages, respectively.

Conditions

7. The particulate matter emission rate
from each of the two cupolas shall not exceed
0.47 pounds per ton of any metal charged.

8. Visible emissions shall be limited to an
opacity of not greater than 20 percent.

9. Input feed to the cupolas shall cease
immediately upon initiation of collector or
afterburner bypass or malfunction. Input feed
to the cupolas shall not be restarted until the
collectors and afterburners are back on line
and operating properly.

10. GMC shall install, operate and maintain
a temperature sensor in the upper stack of the
cupolas. The sensor shall be connected to an
audiovisual system that will monitor and
indicate and afterburner malfunction
whenever the temperature drops below
1350°F.

11. Any such incidence of malfunction in
excess of 15 minutes shall be reported within
10 calendar days to the Director, Enforcement
Division, U.S. EPA, Region V, 230 South
Dearborn, Chicago, Illinois 60604.

12. This report shall include the corrective
measures taken, an estimate of the emissions,
duration of time of the malfunction and an
estimate of the impact on air quality.

13. GMC shall not cause or permit to be
discharged into the atmosphere any visible
fugitive dust emissions from any operation
associated with these cupolas, or building
enclosing these operations. A visible fugitive
dust emission of density not greater than 10
percent opacity may be emitted for not more
than 2 minutes in any 60 minute period. This
includes charging, tapping, pouring, casting
and shakeout.

Approval

14. This approval to construct does not
relieve GMC of the responsibility to comply

with the control strategy and all local, State
and Federal regulations which are part of the
applicable Implementation Plan, as well as
other applicable local, State and Federal
requirements.

15. This approval is effective immediately.
This approval to construct shall become
invalid, if construction or expansion is not
commenced within 18 months after receipt of
this approval or if construction is
discontinued for a period of 18 months or
more. The Administrator may extend such
time period upon a satisfactory showing that
an extension is justified. Notification shall be
made to U.S. EPA 5 days after construction is
commenced.

16. A copy of this approval has been
forwarded for public inspection to the
Pontiac Public Library, 60 East Pike, Pontiac,
Michigan 48058.

17. In addition, the United States Court of
Appeals for the D.C. Circuit has issued a
ruling in the case of *Alabama Power Co. vs.
Douglas M. Costle* (78-1006 and consolidated
cases) which has significant impact on the
EPA Prevention of Significant Deterioration
(PSD) program and approvals issued
thereunder. Although the court has stayed its
decision pending resolution of petitions for
reconsideration, it is possible that the final
decision will require modification of the PSD
regulations and could affect approvals issued
under the existing program. Examples of
potential impact areas include the scope of
Best Available Control Technology (BACT),
source applicability, the amount of increment
available (baseline definition), and the extent
of preconstruction monitoring that a source
may be required to perform. The applicant is
hereby advised that this approval may be
subject to reevaluation as a result of the final
court decision and its ultimate effect.

Dated: July 25, 1979.

John McGuire,

Regional Administrator.

[FR Doc. 79-27001 Filed 8-28-79; 8:45 am]

BILLING CODE 6560-01-M

[OPP-180352; FRL 1307-8]

Crisis Exemption To Use Acephate To Control Citrus Blackfly on Citrus

AGENCY: Environmental Protection
Agency (EPA), Office of Pesticide
Programs.

ACTION: Notice of temporary crisis
exemption.

SUMMARY: EPA gives notice that the
Plant Protection and Quarantine
Programs, Animal and Plant Health
Inspection Service, U.S. Department of
Agriculture, (hereafter referred to as the
"Applicant") has availed itself of a crisis
exemption to use acephate to control the
citrus blackfly on approximately 1,200
acres of citrus in Lee County, Florida.
Since treatment was expected to exceed
fifteen days, the Applicant submitted a
request for a specific exemption for
continuation of this use of acephate.

FOR FURTHER INFORMATION CONTACT:

Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, S.W., Room E-124, Washington, D.C. 20460, Telephone: 202/426-0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: The citrus blackfly (*Aleurocanthus woglumi*) poses a serious threat to the United States citrus production. According to the Applicant, an outbreak of the citrus blackfly was located, identified, and confirmed in the Bonita Springs area of Lee County, Florida. There are no pesticides registered or other means of control presently available to control or eradicate the citrus blackfly. The Applicant claimed that the time element regarding commencement of applications of acephate was so critical that sufficient time was not available to request a specific exemption.

Acephate was used at the rate of 0.5 pound active ingredient (a.i.) per 100 gallons of water applied to wet the foliage thoroughly, using hydraulic sprayers. Continuing treatment will be made using acephate and/or malathion. Malathion is registered for use on citrus, but not for control of the blackfly. The following methods and rates to host trees scattered throughout the urban areas will be used:

1. Three applications of acephate (0.5 pound a.i. in 100 gallons of water) sprayed to the point of run-off, using hydraulic equipment; or

2. Three applications of acephate (1.0 pound a.i. per 100 gallons of water) sprayed throughout, using backpack mist blowers. Applications will not exceed 21-day intervals or 3 pounds a.i. per acre per year; and

3. Repeat applications of malathion at 20 ounces a.i. per 100 gallons of water applied to run-off, using hydraulic sprayers, or 40 ounces a.i. per 100 gallons of water using backpack mist blowers. Malathion may be used where additional treatments are required following applications of acephate, and where potential residues may be a problem, or phytotoxicity or other problems may exist from the use of acephate.

The Applicant stated that all pesticidal applications will be made under the supervision of personnel who meet or exceed the requirements of "knowledgeable experts." The Applicant anticipated that no adverse

effects to man or the environment would occur from this use of acephate. The Applicant advised that all applicable precautions on the EPA-registered labels will be followed and that residents in the treatment area will be notified and procedures implemented to protect pets and livestock.

Since treatment is to exceed fifteen days, the Applicant has submitted a request for a specific exemption for continuation of this program.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975, and 1978 (92 Stat. 819, 7 U.S.C. 1361).)

Dated: August 21, 1979.

James M. Conlon,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc. 79-26896 Filed 8-28-79; 8:45 am]

BILLING CODE 6560-01-M

[Docket No. 407]

Herbicides: Dinitro Technical and Ancrack Herbicide

[FRL 1307-6]

On November 1, 1978, the Assistant Administrator for Toxic Substances published (43 FR No. 212 at 5095-66) Notice of Intent to Hold a Hearing pursuant to Sec. 6(b) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended, to determine whether the registrations of the herbicides Dinitro Technical, EPA Reg. No. 148-213, and Ancrack Herbicide, EPA Reg. No. 19713-23, should be cancelled. The Notice was in response to petitions, dated August 8, 1977 and March 29, 1978, wherein The Dow Chemical Company (Dow) petitioned the Administrator to cancel the registrations of Dinitro Technical, issued to Thompson-Hayward Chemical Company on June 9, 1975, and the registration of Ancrack Herbicide, issued to the Ansul Company on August 20, 1976, but held at the time of the Notice by Drexel Chemical Company. Grounds for cancellation alleged in the petitions were essentially that information, research and test data previously submitted by Dow had been utilized by the Administrator in granting the registrations in question, that no determination had been made as to whether this data was entitled to protection from disclosure in accordance with Sec. 10(b) of FIFRA, that to the extent the data was entitled to confidential treatment in accordance with Sec. 10(b) it could not legally be utilized to issue other registrations

without Dow's consent which had neither been sought nor obtained, and that as to other data, it was incumbent on Thompson-Hayward and Ansul to submit evidence that they had made offers to pay reasonable compensation for the use of such data directly to Dow in accordance with Sec. 3(c)(1)(D) of FIFRA or to obtain Dow's consent, neither of which had been accomplished.

Drexel Chemical Co., Thompson-Hayward Chemical Co. and Gilmore, Inc., on behalf of A. H. Marks and Co. Ltd. responded to the Notice of Intent to Hold a Hearing within the 30-day period specified in the Notice. Registration No. 19713-23, issued to the Ansul Co. on August 20, 1976, concerned control of annual grasses and broad-leaf weeds in soybeans by Ancrack/Surfian tank-mix and Drexel has amended its label to delete that use. Dow has withdrawn its petition for the cancellation of Ancrack Herbicide.

As a result of actions instituted by Dow in the United States District Court for the Eastern District of Michigan, Northern Division (styled *The Dow Chemical Company v. Douglas M. Costle and Thompson-Hayward Chemical Company*, No. 78-10109 and *The Dow Chemical Company v. Douglas M. Costle and The Ansul Company*, No. 78-108110) the time in which interested persons could respond to the Notice of Intent to Hold a Hearing was extended to April 1, 1979 (44 FR 11111, February 27, 1979) and ultimately to August 1, 1979. Dow has now filed a response to the Notice. Thompson-Hayward has filed a motion to dismiss the proceeding asserting that none of the grounds alleged by Dow in its petition afford a legal basis for the Administrator to cancel Thompson-Hayward's registration. Dow and Respondent have filed answers to the motion.

For complete information on the issues involved and the current status of this proceeding, interested persons may examine the file (Herbicides: Dinitro Technical and Ancrack Herbicide, FIFRA Docket No. 407) in the Hearing Clerk's Office, Room 3708, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460.

Dated: August 23, 1979.

Spencer T. Nissen,
Administrative Law Judge.

[FR Doc. 79-26897 Filed 8-28-79; 8:45 am]

BILLING CODE 6560-01-M

[OPP-180349; FRL 1307-8]

Michigan Department of Agriculture; Issuance of Specific Exemption To Use Acephate To Control European Corn Borer on Peppers

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of a specific exemption.

SUMMARY: EPA has granted a specific exemption to the Michigan Department of Agriculture (hereafter referred to as the "Applicant") to use a total of 2,500 pounds of acephate to control the European corn borer on a maximum of 500 acres of peppers (other than bell peppers) in Michigan. The specific exemption expires on September 28, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, S.W., Room E-124, Washington, D.C. 20460, Telephone 202/426-0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: According to the Applicant, the European corn borer is the most significant pest affecting pepper production in Michigan. The first generation of European corn borers begins to emerge the last week of May or the first week of June. The populations peak about the second week of June and then drop sharply through the first two weeks of July. The second generation begins emerging in mid-July and reaches a peak about the second week of August. The second generation moths lay their eggs and the larva bore into the fruit of peppers. Since the hot pepper processors can not sort borer-infested peppers from clean peppers, any shipment received with one percent or greater borer infestation is rejected in total. Shipments of peppers which can not be sold to the processors are generally considered a total loss. The Applicant estimates that 20 percent of the acreage has been lost in past years due to European corn borer infestation. The Applicant estimates that the use of acephate could prevent a loss of \$111,563 to pepper growers. According to the Applicant, the chemicals registered for use on peppers, other than bell peppers, do not give a high enough degree of efficacy to be acceptable.

Acephate is currently registered for use on bell peppers, and permanent tolerances have been established for combined residues of acephate and its metabolite (methamidophos) at 4 parts per million (ppm) in or on bell peppers (of which no more than 1 ppm is the metabolite). EPA has determined that available residue data indicated that the proposed use pattern should not result in residues of acephate in excess of this level in or on peppers other than bell peppers. No unreasonable adverse effects to the environment are expected to result from the proposed use.

The Applicant proposed to make four applications at a rate of 1.0 pound active ingredient per acre at 7- to 10-day intervals until 21 days prior to harvest, beginning when egg masses of the first generation moths appear. Two additional applications will be made within 21 days of harvest at a rate of 0.5 pound active ingredient per acre.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of the European corn borer has occurred or is likely to occur; (b) there is no effective pesticide presently registered and available for use to control the European corn borer on peppers in Michigan; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the pest is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until September 28, 1979, to the extent and in the manner set forth in the application. The specific exemption is subject to the following conditions:

1. The product Orthene 75S Soluble Powder, EPA Registration No. 239-2418, will be used;

2. Acephate will be applied at a rate of 1.0 pound active ingredient per acre at 7- to 10-day intervals. A maximum of 4 applications may be applied at this rate until 21 days before harvest. A maximum of 2 additional applications may be applied at a rate of 0.5 pound active ingredient per acre prior to 7 days of harvest;

3. A maximum of 500 acres may be treated;

4. A maximum of 2,500 pounds active ingredient may be applied;

5. Applications will be made with air and ground equipment, using a minimum spray mixture volume of 25 gallons of water;

6. All applications will be made by State-licensed commercial or certified private applicators;

7. Application will not be made within 7 days of harvest;

8. A residue level of 5 ppm acephate (of which no more than 1 ppm is O,S-dimethyl phosphoramidothioate) in or on peppers has

been judged adequate to protect the public health. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action:

9. All applicable directions and restrictions on the product label must be followed;

10. Every precaution shall be taken to avoid or minimize spray drift to non-target areas;

11. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption; and

12. The applicant shall be responsible for assuring that all of the provisions of this specific exemption are met and must submit a report summarizing the results of this program by February 15, 1980.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 1361).)

Dated: August 21, 1979.

James M. Conlon,
Acting Deputy Assistant Administrator for Pesticide Programs.

[FR Doc. 79-26894 Filed 8-28-79; 8:45 am]

BILLING CODE 6560-01-M

[OPP-180350; FRL 1308-1]

Oklahoma Department of Agriculture; Issuance of Specific Exemption To Use Botran 75W To Control Sclerotinia Blight of Peanuts

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of specific exemption.

SUMMARY: EPA has granted a specific exemption to the Oklahoma Department of Agriculture (hereafter referred to as the "Applicant") to use Botran 75W for the control of *Sclerotinia* blight on 15,000 acres of peanuts in ten counties in Oklahoma. The specific exemption expires on September 30, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, S.W., Room E-124, Washington, D.C. 20460, Telephone: 202/426-0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: According to the Applicant, *Sclerotinia* blight, which is caused by the plant pathogen *Sclerotinia sclerotiorum* (syn. *S. minor*), is a relatively new disease on peanuts in the United States, having been first reported in 1971. *S. sclerotiorum* invades the tap root, lateral branches, and pegs at the soil line and

eventually causes rotting of the peanut pods.

There are no EPA-registered fungicides for the control of *S. sclerotiorum* on peanuts. Several fungicides have been tested and shown to be effective for the control of *Sclerotinia* blight on peanuts. Pentachloronitrobenzene (PCNB) when used at maximal label rates did control *S. sclerotiorum* in some instances, but not in others. Multiple applications of benomyl also provided adequate control. Neither of these fungicides is registered for this use although PCNB has a registration for peanut pod rot complex. Botran 75W was chosen by the Applicant because it was considered to be most efficacious for control of *S. sclerotiorum*. In addition, Botran 75W is registered for the control of *Sclerotinia* on several vegetable crops (beans, celery, cucumbers, lettuce, onions, potatoes, and snap beans).

The Applicant proposed to use Botran 75W, containing the active ingredient 2, 6-dichloro-4-nitroaniline, once, at a dosage rate of 4 to 5 pounds of product per acre, or twice, at a dosage rate of 2 to 2.5 pounds per product per acre. If two applications are made, they will be made 10-14 days apart. Applications of Botran will be made by peanut growers on a maximum of 15,000 acres of peanuts in the counties of Bryan, Caddo, Carter, Grady, Hughes, Johnson, Lincoln, Love, Marshall, and Stephens.

The Applicant estimates that peanut yield losses due to *S. Sclerotiorum* infection could reach \$2,264,850 without a suitable control program.

This use of Botran 75W is not expected to have any adverse effects on the environment. Treated peanut vines or hay may not be use as livestock feed items.

After reviewing the applications and other available information, EPA has determined that (a) a pest outbreak of *Sclerotinia* blight has occurred or is about to occur; (b) there is no effective pesticide presently registered and available for use to control this pest in Oklahoma; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the pest is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until September 30, 1979, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions.

1. Botran 75W (EPA Reg. No. 1023-36) may be applied in the first 30 minutes of an overhead irrigation system set at a dosage rate of 4 pounds product (3 pounds active ingredient) per acre, or by ground equipment at a dosage rate of 4 to 5 pounds of product (3-3.75 pounds active ingredient) per acre or as a split application, 14 days apart, at a dosage rate of 2-2.5 pounds of product (1.5-1.88 pounds active ingredient) per acre. When ground equipment is used, the product should be applied in 30-50 gallons of water over the row, using a flat type spray nozzle that produces large droplets rather than a mist and with sufficient pressure to drive the fungicide to the soil surface;

2. A maximum of 56,250 pounds of active ingredient may be applied;

3. A maximum of 15,000 acres of peanuts located in the counties named above may be treated;

4. All tail water must be contained when Botran 75W is used in irrigation systems; 15. Growers may apply this pesticide provided pesticide dealers disseminate copies of the proper procedures to be followed in applying Botran 75W under this specific exemption. Agricultural Extension agents, plant pathologists, and peanut specialists shall be available to assist growers;

6. All label precautions, directions, and restrictions must be adhered to;

7. Botran 75W-treated peanut fields must not be grazed nor shall the treated vines or hay be used as feed items;

8. A pre-harvest interval of 30 days shall be observed;

9. A residue level of 2,6-dichloro-4-nitroaniline in or on peanut meat and hulls not exceeding 0.1 part per million has been deemed adequate to protect the public health. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

10. Botran 75W is toxic to fish. Care must be taken to prevent contamination of water by cleaning of equipment or disposal of waste or containers. It may not be applied under conditions favoring sheet run-off;

11. The EPA shall be immediately informed of any adverse effects resulting from the use of Botran 75W in connection with this specific exemption; and

12. A full report summarizing the results of this program must be submitted to the EPA by the end of March, 1980. This report should include, but is not limited to the following information:

a. Actual data on the residues of 2,6-dichloro-4-nitroaniline in or on the whole green peanut plant and peanut hay from application of Botran 75W via irrigation systems, and

b. Efficacy data developed using standard research methods and techniques. Particular emphasis should be placed on determining the most effective method of applying the pesticide through sprinkler systems to provide adequate and uniform coverage, to prevent contamination of water sources with the pesticide, and to prevent drift.

Statutory authority: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

Dated: August 21, 1979.

James M. Conlon,
Acting Deputy Assistant Administrator for
Pesticide Programs

(FR Doc. 79-26993 Filed 8-28-79; 8:45 am)

BILLING CODE 6560-01-M

[OPP-180260A; FRL 1308-2]

U.S. Department of Agriculture; Amendment To Specific Exemption To Use Permethrin Coated Bags

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of amendment to a specific exemption.

SUMMARY: EPA has issued an amendment to a specific exemption granted to the Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, (hereafter referred to as the "Applicant") to use permethrin in the treatment of multiwall paper bags used for shipment and storage of processed grain products. The amendment extends the expiration date of the specific exemption to December 19, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, Room: E-124, Washington, D.C. 20460. Telephone: 202/426-0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: On Wednesday, April 11, 1979 (44 FR 21704), EPA published a notice in the Federal Register which announced the granting of a specific exemption to the Applicant to use pemethrin in the treatment of multiwall paper bags used for shipment and storage of processed grain products. Since then the Applicant has requested that the expiration date be extended. According to the Applicant, due to unforeseen production formulation problems by the permethrin manufacturer, specification production and delivery of treated containers to the milling industry did not start until June 1, 1979. The Applicant had anticipated a February 15, 1979 commencement date.

After review the application and other available information, EPA has determined that the requested amendment would not significantly change the specific exemption originally granted and would not result in any additional environmental risks. Accordingly, EPA has granted the

amendment to change the expiration date to December 19, 1979. The Applicant must submit a report summarizing the results of this program by February 28, 1980. All of the remaining provisions and restrictions concerning the use of permethrin under the specific exemption granted on December 20, 1978 remain in force.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136)).

Dated: August 21, 1979.

James M. Conlon,
Acting Deputy Assistant Administrator for
Pesticide Programs.

(FR Doc. 79-26991 Filed 8-28-79; 8:45 am)

BILLING CODE 6560-01-M

[OPP-30171; FRL 1307-7]

Pesticide Programs; Receipt of Application To Register Pesticide Product Containing New Active Ingredient

U.S. Borax Research Corp., 412 Crescent Way, Anaheim, CA 92801, has submitted to the Environmental Protection Agency (EPA) an application to register the pesticide product RYDEX (EPA File Symbol 1624-RRU), containing 50% of the active ingredient prodiamine [2,4-dinitro-N³,N³-dipropyl-6-(trifluoromethyl)-1,3-benzenediamine] which has not been included in any previously registered pesticide product. The application proposes that the pesticide be classified for general use for preemergence control of annual grasses and broadleaf weeds. Notice of this application is given pursuant to the provisions of Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (92 Stat. 819; 7 U.S.C. 136) as amended and the regulations thereunder (40 CFR 162). Notice of receipt of this application does not indicate a decision by the Agency on the application.

Interested persons are invited to submit written comments on this petition. Comments may be submitted, and inquiries directed, to Product Manager (PM) 23, Room E-351, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M St., SW, Washington, DC 20460, telephone number 202/755-1397.

The comments must be received within 30 days from the date of publication of this notice in the Federal Register and should bear a notation indicating the EPA File Symbol "1624-RRU." Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to

the extent possible without delaying processing of the application. The label furnished by U.S. Borax Research Corp., as well as all written comments filed pursuant to this notice, will be available for public inspection in the Product Manager's office from 8:30 a.m. to 4 p.m., Monday through Friday, excluding holidays.

Notice of approval or denial of this application to register RYDEX will be announced in the Federal Register. Except for such material protected by section 10 of FIFRA, the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the Federal Register if an application is approved.

Dated: August 24, 1979.

Herbert S. Harrison,
Acting Director, Registration Division.

[FRL 1307-5]

General Motors Corp.; Three Rivers, Mich.; Final Determination

In the matter of the applicability of Title 1, Part C of the Clean Air Act (Act), as amended, 42 U.S.C. 7401 *et seq.*, and the Federal regulations promulgated thereunder at 40 CFR 52.21 (43 FR 26388, June 19, 1978) for Prevention of Significant Deterioration of Air Quality (PSD), to General Motors Corporation (GMC), Hydra-matic Division, Three Rivers, Michigan.

On August 7, 1978, GMC, Hydra-matic Division submitted an application to the United States Environmental protection Agency (U.S. EPA), Region V office, for an approval to construct two new coal-fired boilers. The application was submitted pursuant to the regulations for PSD.

On April 24, 1979, GMC, Hydra-matic Division was notified that its application was complete and preliminary approval was granted.

On May 10, 1979, U.S. EPA published notice of its decision to grant a preliminary approval to GMC, Hydra-matic Division. No comments or request for a public hearing were received.

After review and analysis of all materials submitted by GMC, Hydra-matic Division, the Company was notified on July 27, 1979, that U.S. EPA had determined that the proposed new construction in Three Rivers, Michigan,

would be utilizing the best available control technology and that emissions from the facility will not adversely impact air quality, as required by Section 165 of the Act.

This approval to construct does not relieve GMC, Hydra-matic Division of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable State Implementation Plan, as well as all other applicable Federal, State and local requirements.

This determination may now be considered final agency action which is locally applicable under Section 307(b)(1) of the Act and therefore a petition for review may be filed in the U.S. Court of Appeals for the Seventh Circuit by any appropriate party. In accordance with Section 307(b)(1), petitions for review must be filed on or before October 29, 1979.

For further information contact Eric Cohen, Chief, Compliance Section, Region V, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604 (312) 353-2090.

John McGuire,
Regional Administrator Region V.

In the Matter of The General Motors Corporation Hydra-matic Division, Three Rivers, Michigan.

Proceeding Pursuant to the Clean Air Act, as amended: approval to construct EPA-5-A-79-20.

Authority

The approval to construct is issued pursuant to the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.* (the Act), and the Federal regulations promulgated thereunder at 40 CFR 52.21 for the Prevention of Significant Deterioration Of Air Quality (PSD).

Findings

1. The General Motors Corporation (GMC) proposes to construct two new coal-fired spreader stoker boilers at its Hydra-matic Division in Three Rivers, Michigan.

2. The proposed construction of the two new coal-fired boilers is subject to the requirements of 40 CFR 52.21 and the applicable sections of the Act.

3. GMC submitted a completed application on April 24, 1979. On May 10, 1979, notice was published in the *Three Rivers Commercial* seeking comments from the public and giving an opportunity to request a public hearing on the application and U.S. EPA's review and preliminary determination to approve construction of the above-cited source. No comments or requests for a public hearing were received.

4. After a thorough review of all the materials submitted by GMC, U.S. EPA has determined that emissions from the two coal-fired boilers will not violate the National Ambient Air Quality Standards nor will they violate the air quality increments.

5. The two new coal-fired boilers will have a heat input of 72.8 million BTU per hour and

will provide steam and compressed air to the Hydra-matic plant. A steam-operated pneumatic ash handling system will be installed for the boilers. A coal handling system capable of unloading crushed coal from railroad cars will also be built.

6. The Hydra-matic plant is located in St. Joseph County, Michigan and is designated attainment for all criteria pollutants. GMC proposes to use low sulfur coal with a sulfur content not greater than 1% and to employ a particulate control system of cyclonic dust collectors in series with a fabric filter to achieve the allowable emission rate. The baghouse system will have an air to cloth ratio of 3.08:1 with pressure-drop of 6 inches w.g. across the system. The system will handle 27,200 cubic feet of air per minute. The baghouse will have 3 modules with 168 fiberglass bags in each module. The bags will be cleaned by reverse pulsed air. GMC will employ best available technology (BACT) for fugitive particulate emissions from their coal storage handling facilities. Unloading of coal rail cars will be done in an enclosed building. Coal handling and processing such as the crusher, transfer points and coal bunker will be enclosed. The storage pile will be sprayed with a surfactant to control fugitive emissions.

Conditions

7. Particulate emissions from the new boilers shall not exceed 0.06 pounds per million BTU heat input.

8. Sulfur dioxide emissions from the new boilers shall not exceed 1.6 pounds per million BTU heat input, based on a 24-hour average.

9. Nitrous oxide emissions from the new boilers shall not exceed 0.6 pounds per million BTU heat input.

10. No waste oil from the plant process shall be fired in the new boilers unless specifically approved by U.S. EPA. Such approval cannot be granted to GMC unless the following information is provided:

- An ultimate analysis of waste oil to be stored and fired.
- An estimate of the quantity of waste oil to be stored and fired.
- An assessment of the air quality impact of the waste oil firing.

11. The unloading of coal rail cars shall be executed in an enclosed building. Coal handling and processing (crushers, conveyors, transfer points and coal bunker) will be enclosed.

12. The coal storage pile(s) shall be sprayed with a surfactant on a regular basis as needed to minimize fugitive dust.

13. A low sulfur coal with a sulfur content not greater than 1% will be utilized to reduce sulfur dioxide emissions.

14. There shall be no visible emissions from the coal conveyor or coal elevators.

15. Visible emissions from the rail car receiving hopper shall not exceed 5 percent opacity.

The control measures stated in conditions 7 through 15 above represent BACT as required by 40 CFR 52.21(d)(i).

Approval

16. Approval to construct two coal-fired spreader stoker boilers is hereby granted to

GMC, subject to the conditions expressed herein and consistent with the materials and dates included in the application filed by the Corporation. Any departure from the conditions of this approval or the terms expressed in GMC's application must receive the prior written authorization of U.S. EPA.

17. This approval to construct does not relieve GMC of the responsibility to comply with the control strategy and all local, State, and Federal regulations which are part of the applicable Implementation Plan, as well as other applicable local, State and Federal requirements.

18. This approval is effective immediately. This approval to construct shall become invalid, if construction or expansion is not commenced within 18 months after receipt of this approval or if construction is discontinued for a period of 18 months or more. The Administrator may extend such time period upon a satisfactory showing that an extension is justified. Written notification shall be made to U.S. EPA 5 days after construction is commenced.

19. A copy of this approval has been forwarded for public inspection to the Three Rivers Public Library, 109 Portage, Three Rivers, Michigan.

20. In addition, the United States Court of Appeals for the D.C. Circuit has issued a ruling in the case of *Alabama Power Co. vs. Douglas M. Costle* (78-1006 and consolidated cases) which has significant impact on the EPA prevention of significant deterioration (PSD) program and approvals issued thereunder. Although the court has stayed its decision pending resolution of petitions for reconsideration, it is possible that the final decision will require modification of the PSD regulations and could affect permits issued under the existing program. Examples of potential impact areas include the scope of best available control technology (BACT), source applicability, the amount of increment available (baseline definition), and the extent of preconstruction monitoring that a source may be required to perform. The applicant is hereby advised that this approval may be subject to reevaluation as a result of the final court decision and its ultimate effect.

Dated: July 27, 1979.

John McGuire,

Regional Administrator.

General Motors Corp., Pontiac, Mich.; Final Determination

In the matter of the applicability of Title 1, Part C of the Clean Air Act (Act), as amended, 42 U.S.C. 7401 *et seq.*, and the Federal regulations promulgated thereunder at 40 CFR 52.21 (43 FR 26388, June 19, 1978) for Prevention of Significant Deterioration of Air Quality (PSD), to General Motors Corporation (GMC), Fisher Body Assembly Plant, Pontiac, Michigan.

On August 9, 1978, GMC, Fisher Body Assembly Plant submitted an

application to the United States Environmental Protection Agency (U.S. EPA), Region V office, for an approval to construct two new coal-fired spreader stoker boilers. The application was submitted pursuant to the regulations for PSD.

On April 23, 1979, GMC, Fisher Body Assembly Plant was notified that its application was complete and preliminary approval was granted.

On May 15, 1979, U.S. EPA published notice of its decision to grant a preliminary approval to GMC, Fisher Body Assembly Division. No comments or request for a public hearing were received.

After review and analysis of all materials submitted by GMC, Fisher Body Assembly Plant, the Company was notified on July 27, 1979, that U.S. EPA had determined that the proposed new construction in Pontiac, Michigan, would be utilizing the best available control technology and that emissions from the facility will not adversely impact air quality, as required by Section 165 of the Act.

This approval to construct does not relieve GMC, Fisher Body Assembly Plant of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable State Implementation Plan, as well as all other applicable Federal, State and local requirements.

This determination may now be considered final agency action which is locally applicable under Section 307(b)(1) of the Act and therefore a petition for review may be filed in the U.S. Court of Appeals for the Seventh Circuit by any appropriate party. In accordance with Section 307(b)(1), petitions for review must be filed on or before October 29, 1979.

For further information contact Eric Cohen, Chief, Compliance Section, Region V, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604 (312) 353-2090.

Dated: August 14, 1979.

John McGuire,

Regional Administrator, Region V.

In the Matter of The General Motors Corporation, Fisher Body Assembly Plant, Pontiac, Michigan. Proceeding Pursuant to the Clean Air Act, as amended. Approval to Construct EPA-5-A-79-19.

Authority

The approval to construct is issued pursuant to the Clean Air Act, as amended, 42 USC 7401 *et seq.* (the Act), and the Federal regulations promulgated thereunder at 40 CFR 52.21 for the Prevention of Significant Deterioration of Air Quality (PSD).

Findings

1. The General Motors Corporation (GMC) proposes to construct two new coal-fired spreader stoker boilers at its Fisher Body Assembly plant in Pontiac, Michigan.

2. The proposed construction of the two new coal-fired boilers is subject to the requirements of 40 CFR 52.21 and the applicable sections of the Act.

3. GMC submitted a completed application on April 23, 1979. On May 15, 1979, notice was published in the *Oakland Press* seeking comments from the public and giving an opportunity to request a public hearing on the application and U.S. EPA's review and preliminary determination to approve construction of the above-cited source. No comments or requests for a public hearing were received.

4. After a thorough review of all the materials submitted by GMC, U.S. EPA has determined that emissions from the two coal-fired boiler will not violate the National Ambient Air Quality Standards nor violate the air quality increments.

5. The two new coal-fired boilers will have a heat input of 245 million BTU per hour respectively and will replace two existing 80,000 pounds steam per hour boilers.

6. The Fisher Body Assembly plant is located in Oakland County, Michigan which is an attainment area for total suspended particulates (TSP) and sulfur dioxide emissions. The plant is located adjacent to and impacts on, a nonattainment area for TSP and is therefore subject to Lowest Achievable Emission Rate (LAER) as well as offsets for TSP.

7. GMC proposes to achieve LAER by employing a particulate control system of cyclonic dust collectors in series with a fabric filter to achieve the allowable emission rate. GMC proposes to also employ LAER controls for fugitive emissions from their coal storage and handling facilities. Unloading of coal cars will be executed in an enclosed building. Coal handling such as the crushers, conveyors, and transfer points will be enclosed. The storage pile(s) will be sprayed with a surfactant to control the fugitive emissions. Offsets will be obtained through shut down of the two existing boilers.

8. GMC proposes to achieve best available control technology (BACT) by utilizing low sulfur coal with a sulfur content not greater than 1%. To meet BACT, GMC proposes to apply combustion modification techniques that will include excess air and overfire air control.

Conditions

9. Particulate matter emissions from the boiler stack shall not exceed 0.03 pounds per million BTU actual heat input.

10. Sulfur dioxide emissions from the boiler stack shall not exceed 1.6 pounds per million BTU actual heat input on a 24-hour basis.

11. Nitrous oxide emissions from the stack shall not exceed 0.6 pounds per million BTU actual heat input.

12. A low sulfur coal with a sulfur content not greater than 1% will be utilized to reduce sulfur dioxide emissions.

13. The unloading of coal rail cars shall be executed in an enclosed building. Coal handling and processing (crushers,

conveyors, transfer points, and bunkers) will be enclosed.

14. The coal pile(s) shall be sprayed with a surfactant on a regular basis as needed to minimize fugitive dust emissions.

15. Visible emissions from the car dumper facility shall not exceed 5% opacity.

16. There shall be no visible emissions from the coal conveyors or coal elevators.

17. Ash shall be wetted as it is loaded on the trucks utilized for disposal. The trucks utilized for ash disposal shall be covered.

18. The operation of the two existing 80,000 pound steam per hour boilers shall cease prior to start-up of the two new coal-fired spreader stoker boilers.

Conditions 9 through 18 represent application of the appropriate control measures as specified in 40 CFR 52.21.

Approval

19. This approval to construct the two new coal-fired spreader stoker boilers is hereby granted to GMC, subject to the conditions expressed herein and consistent with the materials and dates included in the application filed by the Corporation. Any departure from the conditions of this approval or the terms expressed in GMC's application must receive the prior written authorization of U.S. EPA.

20. This approval to construct does not relieve GMC of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable Implementation Plan, as well as other applicable local, State and Federal requirements.

21. This approval is effective immediately. This approval to construct shall become invalid, if construction or expansion is not commenced within 18 months after receipt of this approval, or if construction is discontinued for a period of 18 months or more. The Administrator may extend such time period upon a satisfactory showing that an extension is justified. Written notification shall be made to U.S. EPA 5 days after construction is commenced.

22. A copy of this approval has been forwarded for public inspection to the Pontiac Public Library, 60 East Pike, Pontiac, Michigan 48058.

23. In addition, the United States Court of Appeals for the D.C. Circuit has issued a ruling in the case of *Alabama Power Co. vs. Douglas M. Costle* (78-1006 and consolidated cases) which has significant impact on the EPA prevention of significant deterioration (PSD) program and approvals issued thereunder. Although the court has stayed its decision pending resolution of petitions for reconsideration, it is possible that the final decision will require modification of the PSD regulations and could affect approvals issued under the existing program. Examples of potential impact areas include the scope of best available control technology (BACT), source applicability, the amount of increment available (baseline definition), and the extent of preconstruction monitoring that a source may be required to perform. The applicant is hereby advised that this approval may be subject to reevaluation as a result of the final court decision and its ultimate effect.

Dated: July 27, 1979.

John McGuire,

Regional Administrator.

BILLING CODE 5560-01-M

[FRL 1307-3]

Upjohn Co., Kalamazoo, Mich.; Final Determination

In the matter of the applicability of Title 1, Part C of the Clean Air Act (Act), as amended, 42 U.S.C. 7401 *et seq.*, and the Federal regulations promulgated thereunder at 40 CFR 52.21 (43 FR 26388, June 19, 1978) for Prevention of Significant Deterioration of Air Quality (PSD), to Upjohn Company, Kalamazoo, Michigan.

On August 8, 1978, Upjohn Company submitted an application to the United States Environmental Protection Agency (U.S. EPA), Region V office, for an approval to construct a gas/oil fired boiler. The application was submitted pursuant to the regulations for PSD.

On April 2, 1979, Upjohn Company was notified that its application was complete and preliminary approval was granted.

On May 4, 1979, U.S. EPA published notice of its decision to grant a preliminary approval to Upjohn Company. No comments or request for a public hearing were received.

After review and analysis of all materials submitted by Upjohn Company, the Company was notified on July 12, 1979, that U.S. EPA had determined that the proposed new construction in Kalamazoo, Michigan, would be utilizing the best available control technology and that emissions from the facility will not adversely impact air quality, as required by Section 165 of the Act.

This approval to construct does not relieve Upjohn Company of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable State Implementation Plan, as well as all other applicable Federal, State and local requirements.

This determination may now be considered final agency action which is locally applicable under Section 307(b)(1) of the Act and therefore a petition for review may be filed in the U.S. Court of Appeals for the Seventh Circuit by any appropriate party. In accordance with Section 307(b)(1), petitions for review must be filed on or before October 29, 1979.

For further information contact Eric Cohen, Chief, Compliance Section, Region V, U.S. EPA, 230 Dearborn

Street, Chicago, Illinois 60604 (312) 353-2090.

Dated: August 14, 1979.

John McGuire,

Regional Administrator, Region V.

In the Matter of The Upjohn Company, Kalamazoo, Michigan. Proceeding Pursuant to the Clean Air Act, as amended. Approval to Construct EPA-5A-79-16.

Authority

The approval to construct is issued pursuant to the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., (the Act), and the Federal regulations promulgated thereunder at 40 CFR 52.51 for the Prevention of Significant Deterioration of Air Quality (PSD).

Findings

1. The Upjohn Company (Upjohn) proposes to construct a gas/oil fired boiler (Boiler #8) in Kalamazoo, Michigan.

2. The section of Kalamazoo in which Upjohn proposes to construct is a Class II area as determined pursuant to the Act and has been designated an attainment area for all criteria pollutants except oxidants by the State of Michigan pursuant to Section 107 of the Act.

3. The proposed Boiler #8 is subject to the requirements of 40 CFR 52.21 and the applicable sections of the Act. The application also includes the installation of two 50,000 gallon oil storage tanks to store the #5 fuel oil used in Boiler #8.

4. Upjohn submitted a completed PSD application on April 2, 1979. On May 4, 1979, notice was published in the Kalamazoo Gazette seeking written comments from the public and giving an opportunity to request a public hearing on the application and U.S. EPA's review and preliminary determination to approve construction of the above-cited source. No comments or requests for a public hearing were received.

5. After a thorough review of all the materials submitted by Upjohn, U.S. EPA has determined that emissions from the construction and operation of Boiler #8 will not violate the National Ambient Air Quality Standards, nor exceed the PSD increments.

6. Best Available Control Technology (BACT) for NO_x emissions from a gas or oil fired boiler (rated capacity 120,000 pounds steam per hour) will result in emissions of 0.2 or 0.3 pounds per million BTU respectively. For SO₂, BACT for oil firing corresponds to an emission rate of 0.8 pounds per MMBTU based on a 24-hour average. A low sulfur fuel (#5 fuel oil) with a sulfur content of 0.72% must be fired to attain the emission rate of 0.8 pounds per MMBTU.

Conditions

7. Boiler #8 will be gas fired 245 days per year and oil fired 90 days per year. For the remaining 30 days in the year, Boiler #8 will be shut down for maintenance.

8. The use of proper boiler design and burner placement will be maintained. The burner will be placed in a water cooled combustion chamber and excess air will be limited.

9. A low sulfur #5 fuel oil with a sulfur content not to exceed 0.72% will be used in firing.

10. NO_x emissions from Boiler #8 shall not exceed 0.20 or 0.30 pounds per MMBTU heat input when fired with natural gas or oil, respectively.

11. SO₂ emissions from Boiler #8 shall not exceed 0.80 pounds per MMBTU heat input on a 24-hour average when fired with oil.

12. When Boiler #8 is being fired with a combination of oil and natural gas, the allowable emission rates for NO_x and SO₂ shall be calculated on the basis of the prorated heat input for each fuel consistent with the conditions stated above. In calculating the allowable SO₂ emission rate, the emission rate when natural gas only is used shall be taken to be 0.00 pounds per MMBTU heat input.

The control measures stated above represent BACT [40 CFR 52.21(d)(ii)].

Approval

13. This approval to construct a gas/oil fired boiler (Boiler #8) is hereby granted to the Upjohn Company subject to the conditions expressed herein and consistent with the materials and dates included in the application filed by the Company. Any departure from the conditions of this approval or the terms expressed in Upjohn's application must receive the prior written authorization of U.S. EPA.

14. This approval to construct does not relieve Upjohn of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable Implementation Plan, as well as other applicable local, State and Federal requirements.

15. This approval is effective immediately. This approval to construct shall become invalid, if construction or expansion is not commenced within 18 months after receipt of this approval or if construction is discontinued for a period of 18 months or more. The administrator may extend such time period upon a satisfactory showing that an extension is justified. Notification shall be made to U.S. EPA 5 days after construction is commenced.

16. A copy of this approval has been forwarded for public inspection to the Kalamazoo Public Library, 315 South Rhodes, Kalamazoo, Michigan 49007.

In addition, the United States Court of Appeals for the D.C. Circuit has issued a ruling in the case of *Alabama Power Co. vs. Douglas M. Costle* (79-1006 and consolidated cases) which has significant impact on the EPA Prevention of Significant Deterioration (PSD) program and permits issued thereunder. Although the court has stayed its decision pending resolution of petitions for reconsideration, it is possible that the final decision will require modification of the PSD regulations and could affect permits issued under the existing program. Examples of potential impact areas include the scope of Best Available Control Technology (BACT), source applicability, the amount of increment available (baseline definition), and the extent of preconstruction monitoring that a source may be required to perform. The applicant is hereby advised that this permit may be

subject to reevaluation as a result of the final court decision and its ultimate effect.

Dated: July 12, 1979.

John McGuire,

Regional Administrator.

BILLING CODE 5560-01-M

[FRL 1308-3]

Water Programs; Determination of Primary Enforcement Responsibility; State of Illinois

This public notice is issued under Section 1413 of the Safe Drinking Water Act of 1977, Pub. L. 95-190, (Amending 42 U.S.C. 300f et seq.), and 40 CFR 142.10, National Interim Primary Drinking Water Regulations, published at 41 FR 2918 (January 20, 1976).

An application, dated June 28, 1978, has been received from the Director of the Illinois Environmental Protection Agency, requesting that the Illinois Environmental Protection Agency be granted primary enforcement responsibility for public water systems in the State of Illinois, in accordance with the provisions of this Act.

In response, I have determined, as Regional Administrator of the U.S. Environmental Protection Agency, Region V, that the Illinois Environmental Protection Agency has met all conditions of the Safe Drinking Water Act and subsequent regulations for the assumption of primary enforcement responsibility for public water systems in the State of Illinois.

The State—

(1) has adopted drinking water regulations which are no less stringent than the National Interim Primary Drinking Water Regulations;

(2) has adopted and will implement adequate procedures for the enforcement of such State regulations, including adequate monitoring and inspections;

(3) will keep such records and make such reports as required;

(4) will issue variances and exemptions in accordance with the provisions of the National Interim Primary Drinking Water Regulations and;

(5) has adopted and can implement an adequate plan for the provision of safe drinking water under emergency circumstances.

This determination is based on the understanding that the Illinois Pollution Control Board will follow the Federal variance and exemption regulations set forth at 40 CFR Part 142, Subparts E and F (41 FR 2923-2926, January 20, 1976).

All documents relating to this determination are available for public inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Division of Public Water Supplies

Illinois Environmental Protection

Agency

2200 Churchill Road

Springfield, Illinois 62706

Water Supply Branch

U.S. Environmental Protection Agency,

Region V

230 South Dearborn Street

Chicago, Illinois 60604

All interested parties are invited to submit written comments on this determination. Written comments must be received on or before September 28, 1979.

Further information may be obtained by writing the Water Supply Branch of the U.S. Environmental Protection Agency, Region V, or the Division of Public Water Supplies, Illinois Environmental Protection Agency, or by calling Joseph F. Harrison at (312) 353-2151 or Ira Markwood at (217) 782-9470.

A public hearing may be requested by any interested person. Frivolous or insubstantial requests for a public hearing may be denied; however, if a substantial request is received within 30 days, a public hearing will be held and notice will be given in the Federal Register and newspapers of general circulation. Such requests shall be addressed to me, Regional Administrator, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, and shall include the following information:

(1) The name, address, and telephone number of the individual, organization or other entity requesting a hearing

(2) A brief statement of the requesting person's interest in my determination and information that the requesting person intends to submit at such hearing.

(3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

If no timely request for a hearing is received, my determination shall become effective 30 days after this notice is issued.

Please bring this notice to the attention of any persons known by you to have an interest in this determination.

Dated: August 23, 1979.

John McGuire,

Regional Administrator, U.S. Environmental Protection Agency, Region V.

BILLING CODE 5560-01-M

[FRL 1308-4]

Region II; Groundwater System for the Aquifers of Queens and Kings Counties, New York; Request for EPA Determination Regarding Aquifers

A petition has been submitted by the Jamaica Water Supply Company, Lake Success, New York, pursuant to Section 1424(e) of the Safe Drinking Water Act, P.L. 93-523, requesting the Administrator of the Environmental Protection Agency to make a determination that the aquifer underlying Queens and Kings Counties, New York is the sole or principal drinking water source of Queens County, New York which, if contaminated, would create a significant hazard to public health.

This petition is reprinted in full below:

BEFORE THE U.S. ENVIRONMENTAL PROTECTION AGENCY

Douglas M. Costle, Administrator

Petition

In the Matter of the Petition of the Jamaica Water Supply Company Under Section 1424(e) of the 1974 Safe Drinking Water Act with Respect to the Aquifers of Queens and Kings Counties, New York.

1. Section 1424(e) of the 1974 Safe Drinking Water Act provides as follows:

"(e) If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the Federal Register. After the publication of any such notice, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into plan or design the project to assure that it will not so contaminate the aquifer."

2. The aquifers which underlie Queens County, New York City, are the sole drinking water source for approximately 650,000 people in the southeastern part of Queens County. These aquifers are extensions of the aquifers underlying Nassau and Suffolk Counties, which have already been declared "sole source aquifers". Numerous publications by federal and state agencies, including "An Atlas of Long Island Water Resources," New York Water Resources Commission Bulletin No. 62; "Ground Water and Geohydrologic Conditions in Queens County, Long Island, New York," by Julian Soren, United States Geological Survey Water Supply Paper 2001-A, pages A-19 through A-26 establish the interrelationship between the aquifers underlying Queens County and those underlying Nassau, Suffolk and Kings Counties.

3. The southeastern portion of Queens County has a population of approximately 650,000 people located within an area of approximately 30 square miles. These people are supplied all of their water, both for domestic use and public fire protection, from wells which are operated by the Jamaica Water Supply Company, (the "Company") a private company franchised within the State of New York. Even though the Company has interconnections with the water system maintained by the City of New York, less than 30% of the area's normal daily requirements can be met by the use of City water. There is no expectation that the Company will be able to increase the quantity of water it takes from New York City in the foreseeable future. The Company provides for iron removal, chlorination, fluoridation and corrosion control of most of the water pumped.

4. The area has four principal aquifers, the upper glacial aquifer (the top aquifer), the Jameco aquifer, the Magothy aquifer and the Lloyd aquifer, all of which are utilized for a potable water supply in the southwestern portion of Queens County. Recharge to the aquifers is from precipitation or from adjacent rocks.

5. Since the population of the entire southeastern portion of Queens County is dependent upon these aquifers and since these aquifers are not only contiguous with, but also hydraulically connected to the aquifers in the rest of Queens County, Kings County and Nassau County, contamination of these aquifers would create a significant hazard to public health.

6. Contamination of the upper glacial aquifer, already a problem in Nassau and Suffolk Counties, could become a reality at any time in Queens and Kings Counties where it would pose a far more serious problem to their residents because of greater urbanization and a higher concentration of industrial areas.

7. Preservation of the potability of water in aquifers underlying Queens and Kings Counties will benefit not only present residents but also future generations, because it is the source of approximately 60 million gallons per day required for the Company's customers in Queens and Nassau Counties.

8. Therefore we request that you amend the Nassau/Suffolk designation of June 21, 1978 (FR Vol. 43, No. 120) by adding the determination that Queens and Kings Counties are underlain by aquifers which are "the sole or principal drinking water source for the southeastern part of Queens and if contaminated would create a significant hazard to public health," and that you therefore publish notice of this determination in the Federal Register.

Respectfully submitted,
Jamaica Water Supply Company.

Andrew T. Dwyer,

President.

June 18, 1979.

EPA intends to decide whether to make the requested determination at the earliest time consistent with a complete review of the relevant data and information, and a full opportunity for public participation. In this regard, the Agency is developing a full factual record, and solicits comments, data and references to additional sources of information relevant to the determination required by Section 1424(e). In particular, information is sought concerning the hydrogeology of the Queens and Kings Aquifer System, the boundaries of the aquifer and its recharge areas. In addition, EPA requests information concerning the area or areas dependent upon the aquifer for drinking water, the significance of current or anticipated projects receiving federal financial assistance that may result in contamination of the aquifer, the prospects that such contamination will occur as a result of current activities or even to that may be anticipated, and any other relevant information.

Comments, data, and references in response to this notice should be submitted in writing to Eckardt C. Beck, Regional Administrator, Environmental Protection Agency, Region II, 26 Federal Plaza, New York, NY 10007, attention: Queens and Kings Aquifer, within 60 days of this Notice. Information and maps submitted by the Jamaica Water Supply Company concerning the Queens and King Aquifer System will be available for inspection in the Water Supply Branch office at the above address.

In addition to considering public comments sent to EPA, the Agency will hold a Public Hearing on the afternoon (2:00 pm to 5:00 pm) and evening (7:00 pm to 10:00 pm) of Thursday October 4, 1979, at the Queens Boro Hall, Room 213, 120-55 Queens Blvd., Kew Gardens, N.Y.

Persons who wish to present prepared statements at the public hearing are urged to give notice to Mr. John S. Malleck, Water Supply Branch, Environmental Protection Agency, Region II, 26 Federal Plaza, New York, N.Y. 10007, (212) 264-1347. Written copies of these statements should be submitted at the hearing for inclusion in the record.

Eckardt C. Beck,

Regional Administrator.

BILLING CODE 6730-01-M

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10423; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before September 10, 1979. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Agreement No.: T-3323-1.

Filing Party: Mr. Michael Joseph, Esq., Kominers, Fort, Schlefer & Boyer, 1776 F Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. T-3323-1, among Holt Handling & Warehousing System Inc. (Holt), Retla Steamship Company (Retla) and Pierpoint Management Company, Inc. (Pierpoint), modifies the parties' basic agreement providing for Holt's lease to Pierpoint and Pierpoint's guarantor, Retla, the Pier Seven terminal facility at Gloucester City, New Jersey. The purpose of the modification is to provide 1) that Retla pay Holt the sum of \$500,000, 2) that Agreement No. T-3323 be cancelled, 3) that the proceedings in FMC Docket No. 78-44 be terminated, and 4) that Pierpoint surrender the lease of Pier Seven to Holt.

By Order of the Federal Maritime Commission.

Dated: August 23, 1979.

Francis C. Hurney,

Secretary.

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPR 37]

Federal Procurement; Companies not in Compliance with the Voluntary Wage and Price Standards

To: Heads of Federal agencies.

1. *Purpose.* This bulletin provides, for the information of executive agencies, the names of companies that have been determined to be in noncompliance with the Voluntary Wage and Price Standards formulated pursuant to Executive Order (EO) 12092.

2. *Expiration date.* This bulletin contains information of a continuing nature and will remain in effect until canceled.

3. *Background.* EO 12092, dated November 1, 1978, encourages voluntary noninflationary pay and price behavior by private industry and labor. It also directs Federal agencies to procure personal property and services at prices and wage rates which are noninflationary and consistent with (a) Sections 1-102, 1-103, and 1-104 of EO 12092 and (b) the voluntary wage and price standards formulated pursuant to EO 12092. Further, Section 1-101(c) directs that the names of individuals or companies be published which are determined by the Council on Wage and Price Stability (CWPS) to be in noncompliance with the Voluntary

Wage and Price Standards requirements of EO 12092.

OFPP Policy Letter No. 78-6,

December 27, 1978, which implements Executive Order 12092, provides that companies determined by the CWPS to be in noncompliance shall be ineligible for contract awards anticipated to exceed \$5 million resulting from solicitations or other actions issued on or after February 15, 1979, unless the determination of ineligibility is waived by the agency head.

4. *Substance.* On the effective dates shown below, the Council on Wage and Price Stability has determined that the following companies are not in compliance with the Voluntary Wage and Price Standards formulated pursuant to EO 12092 and are ineligible to be awarded contracts which are expected to exceed 5 million dollars unless the determination of ineligibility is waived by the agency head.

Effective July 17, 1979

Ideal Basic Industries, Inc., Cement Division, P.O. Box 8789, Denver Colorado 80201. The Charter Company, 208 Laura Street, Jacksonville, Florida 32231.

Effective July 24, 1979

Northwestern Steel and Wire Company, 121 Wallace Street, Sterling, Illinois 61081. Mason Contractors of DuPage County, P.O. Box 129, Mount Prospect, Illinois 60056.

Dated: August 17, 1979.

Dale R. Babione

Assistant Administrator for Acquisition Policy.

BILLING CODE 6820-01-M

[GSA Bulletin FPR 38]

Federal Procurement; Current Interest Rate of 10 1/4 Percent Pursuant to Public Law 92-41

To: Heads of Federal agencies.

1. *Purpose.* This bulletin provides, for the information of executive agencies, the current interest rate established by the Secretary of the Treasury pursuant to Pub. L. 92-41 (85 Stat. 97) for the Renegotiation Board.

2. *Expiration date.* This bulletin expires December 31, 1979, unless sooner revised or superseded.

3. *Background.* The interest rate determined by the Secretary of the Treasury, as required by Pub. L. 92-41 for Renegotiation Act purposes, has been applied to various interest payment requirements in the FPR. For the January 1-June 30, 1979, period, the interest rate was announced in GSA; Bulletin FPR 35. Use of the Renegotiation Act rates will be continued for the present. However, the

propriety of this arrangement is being discussed with the Department of the Treasury.

4. *Agency information.* The Secretary of the Treasury has established an interest rate of 10 1/4 percent as applicable to the 6-month period beginning on July 1, 1979, and ending on December 31, 1979. The following sections of the Federal Procurement Regulations are affected by the interest rate: Sections 1-7.203-15, 1-8.212-1(f), 1-8.701, 1-8.702, 1-8.703, 1-8.704-1, 1-8.706, 1-8.804-2(b), 1-8.806-4, 1-30.403, 1-30.414-2(k)(2), and 1-30.414-2(k)(2), and 1-30.414-2(n)(3).

Dated: August 17, 1979.

Dale R. Babione,

Assistant Administrator for Acquisition Policy.

BILLING CODE 6820-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

Pharmaceutical Reimbursement Board; Final Maximum Allowable Cost Determinations

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Final Maximum Allowable Cost Determinations.

SUMMARY: In accordance with 45 CFR 19.5, the Pharmaceutical Reimbursement Board announces the following Final Maximum Allowable Cost (MAC) determinations:

Drug and MAC limit

Diphenoxylate hydrochloride/atropine sulfate 2.5 mg/0.025 mg tablet, \$0.491. Methocarbamol, 500 mg tablet \$0.496. Methocarbamol, 750 mg tablet, \$0.640. Sulfisoxazole, 500 mg tablet, \$0.273. Oxyphenbutazone, 100 mg table, \$0.847. Tetracycline HCl, 125 mg/5 ml syrup, \$0.104. Doxepin, 100 mg capsule, \$2.900. Chlordiazepoxide HCl, 5 mg capsule, \$0.140. Chlordiazepoxide HCl, 10 mg capsule, \$0.211. Chlordiazepoxide HCl, 25 mg capsule, \$0.438. Penicillin G, 400 mu tablet, \$0.237. Penicillin G, 800 mu table, \$0.640.

Note.—These MAC limits do not apply to unit dose packaging.

DATES: The effective date of these MAC limits is October 15, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Spalding, Acting Executive Secretary, Pharmaceutical Reimbursement Board, 6401 Security Boulevard, 1-C-5 East Low Rise, Baltimore, Maryland 21235, (301) 594-5403.

SUPPLEMENTARY INFORMATION: The Pharmaceutical Reimbursement Board has been established within the Health Care Financing Administration to set limits on payment or reimbursement for drug products under HCFA and other HEW programs. On April 10, 1979, the Board proposed MAC limits on 17 drug products. (See 44 FR 21367.) The Board has received written comments and held a public hearing concerning MAC limits on these drugs. The Board now announces final MAC determinations for the products listed above. A summary of the written comments, the presentations at the hearings, other material on which the Board relied in determining each MAC limit, and the Board's reasons for its determinations, follows:

1. General Comments

We received a number of general comments on the proposed MAC limits. One commenter suggested that the April 10, 1979, notice was a significant departure from the previous practice of the Board, in that some of the proposed MACs are based on direct purchase prices and the *Red Book* advertised prices. We note that, by regulation, the Board is to determine the lowest unit price at which a particular multiple source drug is widely and consistently available. The exact method or details of making these determinations are not specified. The Board has relied and continues to rely on the HCFA survey,¹ which shows invoice prices of actual pharmacy transactions. We also believe that *Red Book* advertised prices are an important tool in determining the price levels at which drugs are available in the marketplace; however, the Board has never relied solely on *Red Book* prices. Even where *Red Book* prices are the only figures available for a drug when a MAC is proposed, the Board has not established any MAC limits on such a drug in the absence of supporting information received during the comment period indicating the availability of the drug. With regard to direct prices, the Board will use a direct price only if it is clear that a product is widely and consistently available at the direct price. We do not simply choose the lowest price found. The Board, therefore, does not consider its April 10, 1979 notice to be a departure from its earlier policies.

Another comment claimed that the MAC program was making Medicaid patients "second-class citizens" since

¹The HCFA survey is a summary of pharmacy invoice prices obtained by HCFA under contract with IMS America. The survey price is based on the 70th percentile of invoice prices. The survey is updated monthly.

pharmacists would turn them down on their prescriptions. The underlying premise of the MAC program is that, for those drugs for which FDA has provided the required assurance, the generic products are the equivalent of the brand name products. Thus, the MAC program does not jeopardize the quality of drug therapy for Medicaid recipients. As for availability at the MAC levels, we believe that the MAC procedures, which include a significant element of public participation, provide assurance that MAC limits established are not so low that the product is not widely and consistently available. We do not claim that all sales of a drug are within MAC limits, but rather that there is sufficient availability of the drug at MAC levels and that it can be readily obtained at those levels.

Several comments suggested that the proposed MAC limits should not apply to drug purchased in unit dose packages, since the product costs for these products often exceed the MAC limits, and are often available from only one source in this form. The Board acknowledges that the MAC limits can be inappropriate for drugs purchased in unit dose packaging and has determined that these MAC limits will not apply to unit dose packaging.

A pharmacist asked how frequently MAC limits would be updated. To this point, we have already lowered four existing MACs based on changes in market data, and suspended four other announced limits when it became clear that our information was in error. We will continue to review the market data on all existing MACs, and will adjust the limits as necessary.

A wholesaler from Florida, Lawrence Pharmaceuticals, provided a report on the availability of drugs at the proposed MAC limits. The report gathered information from nine wholesalers and 241 pharmacies in Florida. The findings of this report are included in the comments on specific drugs in this notice.

One pharmacist expressed reluctance to dispense a generic product for which he did not know the manufacturer. This pharmacist expressed the view that the name of the manufacturer should be on each label. The Board itself supports, but does not have the authority to require, manufacturer labeling. In the absence of such labeling, the Board accepts and confidently relies on FDA's assurances that there are no bioequivalence problems with the marketed drug products. As for the practicing pharmacist, if the name of the manufacturer is not on the drug label, he is always free to contact his supplier to ascertain the product manufacturer.

2. Diphenoxylate HCl/atropine sulfate, 2.5 mg/0.025 mg tablet

On February 28, 1979, in response to the Board's request, the Food and Drug Administration notified the Board that all approved manufacturers of diphenoxylate HCl/atropine sulfate, 2.5 mg/0.025 mg tablets had submitted bioequivalence data and that there were no bioequivalence or quality issues which would delay or prevent the establishment of a MAC limit for the product. On April 10, 1979, the Board announced in the *Federal Register* a proposed MAC limit of \$0.491 per tablet.

At \$0.491, this tablet is advertised in the *Red Book* as being available from Smithkline, the sixth largest ethical Pharmaceutical manufacturer in the United States. There are 12 other distributors who advertise this product in the *Red Book* at or below the proposed MAC limit. In addition, three of the six State MAC limits currently in effect are at or below the MAC limit proposed by the Board.

We received the following written comments concerning diphenoxylate HCl/atropine sulfate. Three distributors sent us their price lists, and all of the lists indicated that the product was available below the proposed MAC limit. A wholesaler informed us that it sold the product to hospitals and pharmacies in its trading area below the proposed MAC level. A pharmacist wrote that he could obtain the drug at the MAC level.

Smithkline confirmed that its product was generally available from wholesalers at the proposed MAC price, as was indicated in the notice. The report from Lawrence Pharmaceuticals indicated that eight of the nine wholesalers surveyed stock the product, within the MAC limit, from at least one supplier. One hospital wrote that its purchases of the product were above the proposed MAC levels. However, in view of the strong supporting comments and our original information concerning availability, we are convinced that the product is widely and consistently available at the proposed levels.

Two comments called attention to the fact that the product is a "controlled substance," subject to rules of the Federal Drug Enforcement Administration because of its abuse potential. These comments claimed that the cost of dispensing a controlled substance is greater than the cost of dispensing other drugs because additional records must be kept and certain security requirements must be met. These comments seemed to suggest that a higher dispensing fee should be set for controlled substances. We note

that it is the responsibility of the individual States, rather than the Federal Government, to set dispensing fees for Medicaid programs. (See 42 CFR 447.333.) In establishing these dispensing fees, States are to take into account the costs of handling all of the different types of prescriptions dispensed in pharmacies including both those which require much time, skill and handling and those for which dispensing is more easily handled. The dispensing fee, which is finally established by the State, may well be excessive for some prescriptions, inadequate for those at the other end of the scale but, on balance, will cover the costs the pharmacist incurs in dispensing the total of his prescriptions. Since the MAC program limits the acquisition cost of a drug rather than the dispensing fee, and since it is the responsibility of the State agencies to establish adequate dispensing fees, we do not believe that the "controlled substance" issue should prevent us from establishing a MAC limit on diphenoxylate HCl/atropine sulfate.

Searle Company expressed concern regarding bioequivalence problems, specifically that "diphenoxylate hydrochloride and atropine sulfate clearly meet two of FDA's criteria for bioequivalence. These are (1) that the active drug ingredient has low solubility in water and (2) that this drug product has a high ratio of excipients to active ingredients." Searle claimed that, based upon these facts FDA was obligated to presume bioequivalence with the diphenoxylate HCl/atropine sulfate combination.

In a response dated June 18, 1979, the FDA stated: "We have reviewed the Searle letter and find nothing in it which causes us to change our original recommendation to the Board dated February 28, 1979. Searle's conclusion that FDA erred in its description of the diphenoxylate/atropine drug as therapeutically equivalent in our proposed List of Approved Drug Products with Therapeutic Equivalence Evaluations and as not posing a known or potential bioequivalence problem appears to be based upon a misinterpretation of the agency's bioequivalence regulations (21 CFR 320.52). We will not discuss the validity of Searle's assertion that the product in question meets two of the 12 factors stated in the regulation. However, the presence of these factors, even if substantiated, does not require FDA to presume bioequivalence. Contrary to the suggestion in the Searle letter, the regulation clearly states that the Commissioner shall consider these

factors to identify drugs having potential bioequivalence problems and hence to propose or promulgate bioequivalence requirements. The fact that a drug may meet one or more of the 12 criteria does not necessarily mandate its inclusion as a bioequivalence drug.

"It should also be noted that there are procedures for petitioning the FDA to add drugs in our list of those presenting bioequivalence issues. Searle has not availed itself of these procedures.

"We continue to advise the Board that we know of no reason to delay or prevent the establishment of a MAC limit on diphenoxylate HCl/atropine sulfate tablets."

On June 19, 1979, after reviewing the entire record, the Board voted to establish a proposed final MAC limit of \$0.491 per tablet of diphenoxylate HCl/atropine sulfate, 2.5 mg/0.025 mg. On August 23, 1979, the Administrator of HCFA concurred.

3. Methocarbamol, 500 and 750 mg tablets

On February 28, 1979, in response to the Board's request, regarding methocarbamol, 500 mg and 750 mg tablets, the Food and Drug Administration notified the Board that. "This drug requires an approved new drug application for marketing. We are aware of no known or potential bioequivalence problem with this drug, and no bioequivalence requirement regulation is anticipated. There is a compendial standard for methocarbamol tablets, but we regard the methodology as poor and not as sensitive to the detection of contaminants as is desirable. There are differences of opinion in the Bureau as to the appropriateness of establishing MAC limits for this drug. In the absence of evidence of a known problem with the drug products themselves, we will not recommend against the establishment of a MAC." On April 10, 1979, the Board published in the *Federal Register* the following proposed MAC limits (44 FR 21367).

For the methocarbamol 500 mg tablet, the Board proposed a MAC limit of \$0.0496 per tablet. At this price, the HCFA survey reveals that the product is available from Lederle Laboratories, the 18th largest ethical pharmaceutical manufacturer in the United States. In addition, the product is advertised in the *Red Book* as being available at or below the proposed price from 21 other suppliers. For the methocarbamol 750 mg tablet, the Board proposed a MAC limit of \$0.0595 per tablet. At this price, the HCFA survey reveals that the product is available from Lederle Laboratories, and 18 additional

suppliers advertise this product in the *Red Book* at or below the proposed MAC limit.

We received the following comments concerning methocarbamol tablets. Lederle Laboratories stated that it "will be able to adequately distribute and supply such portions of the methocarbamol (500 and 750 mg) market for those who wish to purchase these products from Lederle." Lederle further stated that it would be able, if deemed appropriate and necessary, to increase capacity to distribute methocarbamol, consistent with its other business commitments and product demands. According to Lederle's submission, the major portion of its products are distributed directly to retailers.

Three wholesalers provided information indicating that the 500 and 750 mg strengths of methocarbamol could be provided at or below the proposed MAC limits. A pharmacist wrote that he could obtain both strengths of methocarbamol at the proposed MAC limit. On the other hand, two wholesalers, three pharmacists, one manufacturer, and one State agency commented that neither strength of methocarbamol tablets was available at or below the proposed MAC limit. The results of the survey from Lawrence Pharmaceuticals were mixed. For the 500 mg tablet, only one of the nine wholesalers and 72 of the 241 pharmacies stocked Lederle's product. Lawrence's study also purported to show that the single unit price of the Lederle product was above the proposed MAC. For the 750 mg tablet, the Lawrence report indicated that four of the nine wholesalers stocked the product at or below the proposed MAC and all pharmacies in the sample stocked one of six available generic brands.

A. H. Robin's Company, a manufacturer of methocarbamol, argued against the establishment of MAC levels on the drug for a number of reasons. Robins raised questions concerning the purity and stability of methocarbamol raw material and claimed that additional testing required of Robins, by FDA, put them at a competitive disadvantage. FDA responded to Robins' contentions as follows:

"(Robin's) letter does raise three points regarding drug quality . . . 1. The currently marketed products contain varying levels of substances which are artifacts of the synthesis or degradation of methocarbamol.

2. Robins has done more work on the chemistry of these substances than other manufacturers, and only the Robins product is subject to testing requirements not imposed on other

manufacturers. As yet, the issues presented by these substances have not been resolved by FDA.

3. The current compendial method for methocarbamol is not adequate to detect these impurities.

"In essence we would agree with all of these points but not with Robins' conclusion that the MAC limits should not be established.

For quite some time we have been aware of some problems with the compendial methodology for methocarbamol. . . . The problem of improving the assay methods to make it stability indicating and to detect artifacts of synthesis is actively being addressed in the context of the Bureau's compendial testing program. There are, so far as we presently know, only three contaminants associated with methocarbamol. The major one, which appears to be a degradation product, is guaifenesin. This chemical is generally at levels below 1 percent and poses no health significance, since it is a commonly used ingredient in non-prescription expectorants (in dosages of 100 mg to 300 mg). It is this 1 percent level that Robins refers to as "additional requirements" imposed by FDA on its products. We do not contemplate instituting across-the-board requirements on all products until we have completed the methods development and survey phase of our compendial testing program for methocarbamol.

"The other major components . . . have been identified, but there is no indication of toxicity from published sources. We have no reason to believe that the secondary isomers, which appear to be artifacts of the methocarbamol synthesis, pose any significant toxicity. In any event, our survey, using preliminary methods which are currently being improved, shows the contaminants to be distributed in all of the raw material tested, including methocarbamol used by Robins.

"In light of these results, it appears that there is no cause for concern regarding the public health consequences of impurities in methocarbamol, and that whatever new requirements may be imposed as a result of our compendial testing program will affect all suppliers of methocarbamol to the same degree.

"Therefore, we do not believe the Robin's letter is persuasive, and we see no reason to delay or prevent the establishment of a MAC limit for methocarbamol tablets."

Robins also argued that the MAC program would stifle future innovations in health care by A. H. Robins. We note

that a major federal incentive towards pharmaceutical innovation is the patent system, and that Robins has already received the benefits of its research and development through its patent on methocarbamol (now expired).

The Medicare and Medicaid programs were established to finance health care for the aged, the disabled, and the poor, not to finance pharmaceutical research. The Board continues to believe that its proper function is to take advantage of existing price differences in the marketplace in order that Medicare and Medicaid patients will continue to receive quality care at competitive prices.

Robins claimed that the Board had overestimated the savings to be gained from the establishment of MAC limits on methocarbamol, since "methocarbamol is not a product which would be indicated for any extensive use by typical Title XIX program recipients." The Board does not believe that there is any evidence whatever that the use of methocarbamol, a muscle relaxant, by Medicaid recipients is different from its use by the general public, and thus we stand by our annual savings estimates of \$29,800 for the 500 mg tablet, and \$323,000 for the 750 mg tablet. Even if these figures were overestimated to some degree, the savings to the government, and to the taxpayers, would still be significant. Robins attempted to break down these savings estimates to a "per pharmacy" figure, and concluded that the savings per pharmacy would be minimal. We consider the overall figure to be the more relevant and consider \$350,000 a year to be a significant amount.

Robins also noted that there had been recent market shifting from the Robins products to a newly introduced, patented, higher priced muscle relaxant. Robins attempted to fix some relationship between the MACing of methocarbamol and the shift to a higher priced alternative. The Board sees no relationship between MAC limits on methocarbamol and this market shift, and does not consider it necessary that it be the protector of Robins' market.

On June 19, 1979, after reviewing the entire record on methocarbamol tablets, the Board voted to establish a proposed final MAC limit of \$.0496 for the 500 mg tablet. At this price the Board is convinced that the 500 mg tablet is widely and consistently available. Also on June 19, 1979, after reviewing the record, the Board voted to increase the MAC limit on the 750 mg tablet to \$.0640 per tablet. The Board believes that this level assures wide and consistent availability and is one which includes

the Lederle product. The Administrator concurred on August 23, 1979.

4. Sulfisoxazole, 500 mg tablet

On February 28, 1979, in response to the Board's request, the Food and Drug Administration notified the Board that, "In a survey three years ago, all marketed products tested were shown to be bioequivalent. All approved firms except one have submitted acceptable bioequivalence data. There is a compendial standard for the drug which appears adequate. We know of no pending regulatory or quality problems which should delay or prevent the establishment of a MAC limit for sulfisoxazole, 500 mg tablets."

On April 10, 1979, the Board proposed a MAC limit of \$.0240 per tablet. At that price, the HCFA survey revealed that the product was available from Smithkline. It was also advertised in the *Red Book* as being available from 14 other suppliers.

During the comment period, Smithkline informed us that it had increased its price since the period of the latest HCFA survey. While its average wholesale price had been \$.0236, a price within the proposed MAC limit, the current AWP was \$.0273 per tablet. In order to assure availability of the product at the MAC level, the Board's proposed final determination of the MAC levels took this information into account, and established the MAC at \$.0273 per tablet.

The Lawrence Pharmaceuticals report indicated that one of the nine wholesalers stocked the product at the proposed level, and that three others stocked the Smithkline product, but above the proposed limit. We believe that the final MAC, which takes into account the Smithkline increase, will cover the Smithkline product at these warehouses. One distributor, three wholesalers, five pharmacists and one hospital commented that the product was available at or below the proposed MAC limit. Another wholesaler stated that the product was available at the proposed price level only with quantity purchases.

On June 19, 1979, after considering the entire record, the Board voted to establish a proposed final MAC determination of \$.0273 per 500 mg tablet. The Administrator of HCFA concurred on August 23, 1979.

5. Oxyphenbutazone, 100 mg tablets

On February 28, 1979, in response to the Board's request, the Food and Drug Administration notified the Board that bioequivalence is not an issue for this drug since only one manufacturer held an approved application for marketing

of the drug. Additionally, FDA knew of no pending regulatory or quality problems which would prevent or delay the establishment of a MAC limit for oxyphenbutazone, 100 mg tablets.

On April 10, 1979, the Board proposed MAC limits of \$.0799 per tablet. At this price, the HCFA survey revealed that the product was available from USV, the 20th largest pharmaceutical manufacturer in the United States.

During the comment period, we received notice from USV Laboratories that, as a result of a price increase effective April 2, 1979, the suggested wholesaler resale price of the product was \$.0847 per tablet, rather than \$.0799 per tablet. The report from Lawrence Pharmaceuticals showed that eight of the nine wholesalers, and 172 of 241 pharmacies, stock the USV product. A wholesaler and one pharmacist commented that the product was available at the MAC level. Six wholesalers, seven pharmacists, and one hospital wrote that the product was not available at the proposed price. However, since the Board has taken into account the USV price increase in its final determination, we believe that the product is widely and consistently available at the higher priced level.

On June 29, 1979, after reviewing the entire record, the Board voted to establish a proposed final MAC limit of \$.0847 per 100 mg oxyphenbutazone tablet. The Administrator of HCFA concurred on August 23, 1979.

6. Tetracycline HCl, 125 mg/5 ml syrup

On February 28, 1979, in response to the Board's request, the Food and Drug Administration notified the Board that tetracycline is a certifiable antibiotic requiring both premarketing approval and batch certification. All approved manufacturers have submitted bioequivalence data on their products. FDA knew of no pending regulatory or quality problem which would prevent or delay the establishment of a MAC limit for tetracycline HCl, 125 mg/5 ml syrup.

On April 10, 1979, the Board proposed a MAC limit of \$.0081 per ml. At this price, the HCFA survey revealed that the product was available from Upjohn, the tenth largest pharmaceutical manufacturer in the United States and that the Upjohn product accounts for 5.8 percent of the market for this drug. Additionally, the product is advertised in the *Red Book* as being available from 22 other suppliers at or below this price.

Several comments claimed that the MAC limit was too low. Two wholesalers and two pharmacists stated that the product was unavailable at the proposed levels. Smithkline stated that the proposed MAC limit appeared to be

based upon the direct deal or volume purchase price of Upjohn, that the proposed price was lower than Upjohn's direct price and that it is inappropriate to set a MAC price that is encumbered by a volume purchase condition. The survey by Lawrence Pharmaceuticals also showed that the proposed limit might be too low.

Although three wholesalers and one hospital did indicate that the product was available at the MAC price, the Board determined that a higher level was necessary to insure wide and consistent availability. The HCFA survey revealed that the Pfipharmecs and Smithkline products would be within the MAC limit if it were raised to \$.0104. The Lawrence survey showed that seven of the nine wholesalers stocked the Pfipharmecs product at or below \$.0104, and five of the nine wholesalers stocked Smithkline's product at or below that price.

On June 19, 1979, the Board voted to establish a proposed final MAC determination of \$.0104 per ml of tetracycline HCl, 125 mg/5 ml syrup. The Administrator of HCFA concurred on August 23, 1979.

7. Doxepin, 100 mg capsules

On October 25, 1978, in response to the Board's request, the Food and Drug Administration notified the Board that the marketed products of doxepin, 100 mg capsules, met bioequivalence requirements. Therefore, FDA saw no problems which would prevent or delay the establishment of a MAC for this drug. On February 28, 1979, in response to an additional request from the Board, the Food and Drug Administration notified the Board that it was not aware of any regulatory or quality issues which would affect the existing MAC limits for doxepin HCl, 100 mg capsules.

The Board proposed a MAC limit of \$.2900 per capsule for doxepin HCl, 100 mg capsules. At this price, the HCFA survey reveals that the product is available from Pennwalt and that the Pennwalt product accounts for 2.9 percent of the market for this drug.

Pfizer, Inc. submitted a statement arguing that a MAC limit should not be set on 100 mg doxepin HCl capsules. Pfizer supported its claim by reference to the extensive materials it had earlier submitted to the Board in opposition to the establishment of MAC limits on 10, 25, and 50 mg doxepin capsules. The Board rejects Pfizer's arguments, for the reasons set forth at 43 FR 57972 (Dec. 11, 1978), where the Board established MAC limits on 10, 25, and 50 mg doxepin capsules.

Two wholesalers and one pharmacist wrote that the product was available at

the proposed MAC limit. However, several other wholesalers and several pharmacists questioned the availability of the product at the MAC limit, since Pennwalt and Pfizer were the only distributors of doxepin HCl and this availability was entirely dependent on the Pennwalt price. The Lawrence Pharmaceuticals survey indicated that all nine wholesalers stock the Pennwalt product, but only three were at the proposed MAC limit while six were above. Two wholesalers wrote that the pricing policy of Pennwalt leaves the establishment of wholesale prices to the wholesaler, and claimed that the product price at \$29.00 per 100 capsules is a minimum price from the wholesalers, based on a minimum gross margin, not average wholesale price.

The Board remains convinced that the Pennwalt product is widely and consistently available; the only question is whether it is available at \$.2900 per 100 mg capsule. Based on the HCFA survey and the supporting comments, we continue to believe that the product is available at that price.

On June 29, 1979, after considering the entire record, the Board voted to establish a proposed final MAC limit of \$.2900 per 100 mg doxepin HCl capsule. The Administrator of HCFA concurred on August 23, 1979.

8. Chlordiazepoxide HCl, 5, 10, and 25 mg capsules

Final MAC limits on chlordiazepoxide HCl, 5, 10, and 25 mg capsules went into effect on May 18, 1978. Since that time, a number of lower prices have appeared in the marketplace, and in response, the Board began proceedings to lower the existing MAC limits on chlordiazepoxide.

On March 5, 1979, FDA notified the Board that it was not aware of any regulatory or quality problem which should affect the MAC limits for chlordiazepoxide HCl 5, 10, and 25 mg capsules. On April 10, 1979, the Board proposed MAC limits for chlordiazepoxide as follows.

For the 5 mg chlordiazepoxide HCl capsules, the Board proposed a MAC limit of \$.0140 per capsule. At this price, the HCFA survey reveals that the product is available from Lederle Laboratories, the 19th largest pharmaceutical manufacturer in the United States. In addition, 13 other suppliers advertise the product in the *Red Book* at prices below the recommended MAC limit.

For the 10 mg chlordiazepoxide HCl capsules, the Board proposed a MAC limit of \$.0211 per capsule. At this price, the HCFA survey reveals the product is available from Lederle Laboratories. In

addition, the proposed MAC limits would cover the HCFA survey prices from Parke Davis, Purepac, Rachele and Generix as well as the advertised *Red Book* prices from 15 additional suppliers.

For 25 mg chlordiazepoxide capsules, the Board proposed a MAC limit of \$.0438 per capsule. At this price, the HCFA survey reveals the product is available from Smithkline, the 18th largest pharmaceutical manufacturer in the United States, as well as from Generix Drug. In addition, 19 other distributors advertise this product in the *Red Book* at prices lower than the proposed MAC limit.

We received the following comments. The Lawrence survey showed that two of the nine wholesalers stock the 5 mg capsule at the MAC price, one stocks the 10 mg capsule at that price, and eight of nine stock the 25 mg capsule at the proposed price. Smithkline stated that its 25 mg capsule was available through wholesalers at the proposed price, but questioned the availability of 5 and 10 mg capsules. Several pharmacists and wholesalers claimed that the drug was available at the proposed levels only when purchased in quantity, or that it was not available at all at the proposed prices. On the other hand, one wholesaler commented that it could supply all three strengths of the product at the proposed level. The Board reviewed the conflicting evidence of availability, and determined that the three strengths of chlordiazepoxide were widely and consistently available at the proposed limit.

Three comments noted that chlordiazepoxide is a controlled substance and expressed concern that the Board had used the 500 count package size rather than the 100 count package size. Although the 500 size is the most frequently purchased, these comments insisted that the Board's action was inconsistent with the Drug Enforcement Administration's recommendation that pharmacies maintain minimal inventories of controlled substances. Although we are sympathetic to this concern, we note that the 500 package is the most frequently purchased package size, so that bottles of 500 are not at all infrequently found in the marketplace. In addition, the MAC regulations require the Board to use the most frequently purchased package size in determining the unit price of a drug. We do not believe that the imposition of MAC limits on a controlled substance will substantially increase the possibilities for its abuse.

On June 19, 1979, after considering the entire record, the Board voted to establish proposed final MAC

determinations of \$.0140, \$.0211, and \$.0438 for the 5, 10, and 25 mg chlorthalidone HCl capsules respectively. The Administrator of HCFA concurred on August 23, 1979.

9. Penicillin G Potassium, 400 and 800 mu tablets

On July 27, 1978, in response to the Board's request, FDA notified the Board with regard to penicillin G potassium 400 and 800 mu tablets: "This drug is a certifiable antibiotic and is subject to the batch certification requirements of the Federal Food, Drug and Cosmetic Act. All but one of the eight approved manufacturers have submitted bioequivalence data. That manufacturer has been asked to submit such data, but we have no reason to believe that any of the marketed products has a bioequivalence problem. In the unlikely event that the bioequivalence study shows a problem, we will notify the Board immediately, but in the interim we see no reason to delay the establishment of MAC limits for this drug.

For the 400 mu tablets, the Board proposed a MAC limit of \$.0237 per tablet. At this price, the product was advertised in the *Red Book* as being available from Smithkline; a later HCFA survey also revealed that the Smithkline product was being sold at this price. For the 800 mu tablet, the Board proposed a MAC limit of \$.0528 per tablet. At this price, the product was advertised in the *Red Book* as being available from Smithkline.

We received the following comments. Smithkline stated that both the 400 mu and 800 mu tablets were available at the proposed MAC level. The Lawrence survey indicated that seven of the nine wholesalers stock the 400 mu Smithkline product at the proposed MAC levels, and all nine wholesalers stock the 800 mu Smithkline tablets at the proposed level. A wholesaler and a pharmacist wrote that both strengths of the product were available at the proposed limit; on the other hand, several pharmacists and a hospital insisted that at least one of the strengths was not available at the proposed price.

On June 19, 1979, the Board voted to establish a proposed final MAC limit of \$.0237 per 400 mu tablet. In order to assure wide and consistent availability of the 800 mu tablet at the MAC level, the Board raised the limit from the proposed price to \$.0640 per tablet, a price which also included the Phipharmecs product. Also on June 19, 1979, the Board voted to establish a proposed final MAC limit of \$.0640 per 800 mu tablet. The Administrator of

HCFA concurred with the 400 and 800 mu tablet limits on August 23, 1979.

10. Erythromycin Ethylsuccinate, 200 mg/5 ml and 400 mg/5 ml oral liquid

On April 10, 1979, the Board proposed MAC limits on 200 mg/5 ml and 400 mg/5 ml erythromycin ethylsuccinate oral liquid. We received 29 comments from pharmacists, wholesalers, manufacturers, and a hospital on the proposed MAC limits. All of the comments stated that the products were not available at the proposed levels. On June 19, 1979, the Board voted not to establish MAC limits on erythromycin ethylsuccinate oral liquid at this time.

11. Hydralazine 25 and 50 mg tablets

On April 10, 1979, the Board proposed MAC limits on 25 and 50 mg hydralazine tablets. A hearing on these proposed MAC's was held on May 30. On May 29, Ciba Geigy Corporation submitted information concerning possible clinical failures of generic hydralazine. Although the comment period for the drug had already closed on May 15, 1979, the Board accepted this submission because it raised the possibility of some danger to the public health. FDA is now reviewing Ciba Geigy's submission. The Board has left open the record on this drug.

12. Minocycline, 100 mg capsules

On April 10, 1979, the Board proposed MAC limits on 100 mg minocycline capsule. Our information indicated that the product was available from two sources—Lederle and Parke Davis. We proposed a MAC limit at the lower (Parke Davis) price.

Lederle has informed us that it is the patent holder for minocycline, that its supply agreement with Parke Davis has been cancelled pursuant to its terms and that Lederle is now the sole source for this product.

On June 19, 1979, the Board voted not to establish MAC limits on minocycline at this time.

Dated: August 9, 1979.

Charles S. Spalding,

Acting Executive Secretary, Pharmaceutical Reimbursement Board.

Approved: August 23, 1979.

Leonard D. Schaeffer,

Administrator, Health Care Financing Administration.

BILLING CODE 4110-35-M

Human Development Services

Developmental Disabilities Program; Intention to Reallocate Funds

Section 132(d) of the Developmental Disabilities Services and Facilities Construction Act, (the Act) as amended by Pub. L. 95-602, provides that the amount of a State's fiscal year allotment which will not be required by that State shall be available for reallocation to other States.

However, reallocations cannot be made until September 28, 1979.

Notice is hereby given that the following allotments reserved for American Samoa, the Northern Mariana Islands and Trust Territory will not be required. The available funds will be reallocated in accordance with the provisions of Section 132(d) of the Act.

Reprogrammed Funds

Basic support	Protection and advocacy
\$150,000	\$30,000

It is the intention of the Secretary that the above amounts be reallocated as follows:

State	Basic support	State	Protection and advocacy
Alabama	\$3,366	Alaska	\$449
Arizona	1,580	Arizona	449
Arkansas	1,899	Arkansas	449
California	12,769	California	1,947
Colorado	1,641	Colorado	449
Connecticut	1,867	Connecticut	449
Delaware	1,196	Delaware	449
Dist. of Col.	1,196	Dist. of Col.	449
Florida	5,623	Florida	876
Georgia	3,820	Hawaii	449
Hawaii	1,196	Idaho	449
Illinois	6,892	Indiana	820
Indiana	3,854	Iowa	449
Iowa	2,132	Kansas	449
Kansas	1,554	Kentucky	524
Kentucky	3,178	Louisiana	534
Louisiana	3,291	Maine	449
Maine	1,196	Maryland	449
Maryland	2,530	Massachusetts	637
Massachusetts	3,880	Michigan	967
Michigan	8,155	Minnesota	456
Minnesota	2,761	Mississippi	449
Mississippi	2,375	Missouri	591
Missouri	3,594	Montana	449
Montana	1,196	Nebraska	449
Nebraska	1,196	Nevada	449
New Hampshire	1,196	New Hampshire	449
New Jersey	4,432	New Jersey	726
New Mexico	1,196	New Mexico	449
New York	11,778	New York	1,927
North Carolina	4,643	North Dakota	449
North Dakota	1,196	Ohio	1,211
Oklahoma	2,161	Oklahoma	449
Pennsylvania	8,698	Oregon	449
Rhode Island	1,196	Pennsylvania	1,444
South Dakota	1,196	Rhode Island	449
Tennessee	3,816	South Carolina	449
Texas	8,818	South Dakota	449
Utah	1,196	Tennessee	580
Vermont	1,196	Texas	1,427
Virginia	3,580	Utah	449
West Virginia	2,100	Vermont	449
Wisconsin	3,418	Virginia	591
Wyoming	1,196	Washington	449
Guam	478	West Virginia	449
Puerto Rico	4,220	Wisconsin	562

State	Basic support	State	Protection and advocacy
Virgin Islands	478	Wyoming	449
		Puerto Rico	621
		Virgin Islands	269

Consideration will be given to any comments on this proposed reallocation of funds if received on or before September 28, 1979. Comments must be in writing and submitted to the Director, Bureau of Developmental Disabilities, Department of Health, Education, and Welfare, 330 C Street, SW., Washington, D.C. 20201.

(Catalog of Federal Domestic Assistance Program No. 13.630 Developmental Disabilities—Basic Support.)

Dated: July 5, 1979.

Evelyn Provitt,

Acting Commissioner of Rehabilitation Services Administration.

Dated: August 23, 1979.

Arabella Marinuz,

Assistant Secretary for Human Development Services.

National Institutes of Health

Annual NIH Instrumentation Symposium

Notice is hereby given that the Division of Research Services, Biomedical Engineering and Instrumentation Branch, National Institutes of Health, will hold the Annual NIH Instrumentation Symposium October 3-5 1979, at the Masur Auditorium, Building 10 Clinical Center, NIH, Bethesda, Maryland. The symposium consists of a morning and an afternoon session each day. The purpose of the symposium is to acquaint NIH researchers with the state-of-the-art in selected areas of research instrumentation development. Each session has three or four speakers discussing related aspects of a particular type of instrumentation, including design and application. The sessions for this year are on Positron Scanning, Particle Separation Methods, Physical Methods of Structure Determination, Picosecond Spectroscopy, Ultrasonic and Field Ionization Microscopy, and Applications of Energy Loss Spectroscopy.

Request for information should be directed to Dr. John I. Peterson, DRS, BEIB, National Institutes of Health, Building 13, Room 3W-13, Bethesda, Maryland, 20014, Telephone: (301) 496-5771.

Dated: August 21, 1979.

Suzanne L. Freneau,
Committee Management Officer, National Institutes of Health.

Arteriosclerosis, Hypertension, and Lipid Metabolism Advisory Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Arteriosclerosis, Hypertension, and Lipid Metabolism Advisory Committee, National Heart, Lung, and Blood Institute, October 12, 1979, Conference Room 6C-01, 6th Floor, Federal Building, 7550 Wisconsin Avenue, Bethesda, MD. The entire meeting will be open to the public from 9:00 a.m. to 5:00 p.m. on Friday, October 12, to evaluate program support in Arteriosclerosis, Hypertension, and Lipid Metabolism. Attendance by the public will be limited on a space available basis.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, NHLBI, Room 4A-21, Building 31, National Institutes of Health, Bethesda, Maryland 20205, Phone (301) 496-4236, will provide summaries of the meeting and rosters of committee members.

Dr. Gardner C. McMillan, Associate Director for Etiology of Arteriosclerosis and Hypertension Program, NHLBI, Room 4C-12, Federal Building, National Institutes of Health, Bethesda, Maryland 20205, Phone (301) 496-1613, will furnish substantive program information.

Dated: August 21, 1979.

BILLING CODE 4110-08-M

Biotechnology Resources Review Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Biotechnology Resources Review Committee, Division of Research Resources, September 24-25, 1979, The Gazebo, Department of Chemistry, Stanford University, Stanford, California 94305. This meeting will be open to the public September 24 from 9:00 a.m. to 5:00 p.m. and on September 25 from 9:00 a.m. to adjournment for (1) introductory remarks, (2) Program status reports, and (3) discussion of the Program. Attendance by the public will be limited to the space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section

10(d) of Pub. L. 92-463, the meeting will be closed to the public on September 24 from 5:00 p.m. until recess and September 25 from 8:30 to 9:00 a.m. for the review, discussion, and evaluation of individual research prospectuses submitted by organizations seeking access to PROPHET System services. These prospectuses and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the prospectuses, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, Bldg. 31, Room 5B-13, National Institutes of Health, Bethesda, Maryland 20205, telephone area code 301 496-5545, will provide summaries of meetings and rosters of Committee members.

Dr. Charles L. Coulter, Executive Secretary, Biotechnology Resources Review Committee, Division of Research Resources, Bldg. 31, Rm. 5B-41, National Institutes of Health, Bethesda, Maryland 20205, telephone area code 301 496-5411, will furnish substantive program information.

BILLING CODE 4110-08-M

Board of Scientific Counselors; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Allergy and Infectious Diseases, October 11, 1979, in Building 10, Room 11N232, and on October 12, 1979, in Building 31, Room 7A-24, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on October 11, from 8:30 a.m.

until 10:00 a.m. During this open session, the permanent staff of the Laboratory of Clinical Investigation will present and discuss their immediate past, and present research activities.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code, and Section 10(d) of Pub. L. 92-463, the meeting of the Board will be closed to the public on October 11 from 10:30 a.m. to adjournment on October 12 for the review, discussion, and evaluation of individual intramural programs and projects conducted by the National Institute of Allergy and Infectious Diseases, including consideration of personal qualifications and performance, and the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A-32, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496-5717, will provide summaries of the meeting and rosters of the Board members.

Dr. Kenneth W. Sell, Executive Secretary, Board of Scientific Counselors, NIAID, NIH, Building 5, Room 137, telephone (301) 496-2144, will provide substantive program information.

BILLING CODE 4110-08-M

Board of Scientific Counselors, NIDR; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Dental Research, on September 24-25, 1979, in Conference Room 117, Building 30, National Institutes of Health, Bethesda, MD. This meeting will be open to the public from 9:00 a.m. to 5:00 p.m. on September 24, and from approximately 9:00 a.m. to 10:00 a.m. on September 25, to discuss program policies and issues. Attendance by the public is limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public

from approximately 10:00 a.m. on September 25 to adjournment for review, discussion, and evaluation of individual programs and projects conducted by the National Institute of Dental Research, NIH, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Marie U. Nylén, Director of Intramural Research, National Institute of Dental Research, National Institutes of Health, Building 30, Room 132, Bethesda, MD 20205 (telephone 301 496-1483), will provide summaries of meeting, rosters of committee members, and substantive program information.

Dated: August 22, 1979.

BILLING CODE 4110-08-M

National Advisory Allergy and Infectious Diseases Council; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Allergy and Infectious Diseases Council, National Institute of Allergy and Infectious Diseases, October 23 and 24, 1979, at Linden Hill Hotel, the Linden Room, Bethesda, Maryland.

On October 22 the Subcommittee on Manpower Development will meet in open session from 2:00 p.m. until recess in Building 31, Room 7A-24. The full Council meeting will be open to the public on October 23 from 9:00 a.m. until 9:30 a.m., and from 1:30 p.m. until recess, and on October 24 from 9:00 a.m. until 1:00 p.m., to discuss program policies and issues. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and Section 10(d), of Pub. L. 92-463, the meeting of the Council will be closed to the public on October 23 from 9:30 a.m. until 1:30 p.m., and on October 24 from 2:00 p.m. until adjournment, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public

Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496-5717, will provide summaries of the meetings and rosters of the Council members.

Dr. William I. Gay, Director, Extramural Activities Program, NIAID, NIH, Westwood Building, Room 703, telephone (301) 496-7291, will provide substantive program information.

Symposium on Molecular Approaches to Vaccine Development

Notice is hereby given to the Symposium on Molecular Approaches to Vaccine Development, National Institute of Allergy and Infectious Diseases (NIAID), October 10, 1979, in Building 1, Wilson Hall, National Institutes of Health, Bethesda, Maryland.

This Symposium will be open to the public from 9:00 a.m. until adjournment. The tentative agenda follows:

- 9:00 a.m.—Welcome by Dr. Richard Krause, Director, NIAID.
- 9:15 a.m.—Introductory Remarks by Dr. Kenneth Sell, Scientific Director, NIAID.
- 9:30 a.m.—Problems of Vaccine Development—Sir Charles Stuart-Harris, University of Sheffield, England.
- 10:00 a.m.—Recombinant DNA Technology and Influenza—Dr. Ching-Juh Lai, Laboratory of Infectious Diseases (LID), NIAID.
- 10:20 a.m.—Recombinant DNA Technology and Hepatitis—Dr. William Robinson, Stanford University.
- 10:40 a.m.—Coffee.
- 11:00 a.m.—Recombinant DNA Technology and Bacterial Diseases—Dr. Stanley Falkow, University of Washington.
- 11:20 a.m.—Eucaryotic Vector Systems—Dr. Dean Hamer, Recombinant DNA Section, NIAID.
- 11:40 a.m.—Discussion.
- 12:40 a.m.—Lunch.
- 1:00 p.m.—Molecular approaches to Immunization—Round Table—Dr. Bernard Fields, Harvard University; Dr. Philip Leder, National Institute of Child Health and Human Development (NICHD), NIH; Dr. Malcolm Martin, NIAID, NIH; Dr. Maclyn McCarty, Rockefeller University; Dr. Daniel Nathans, Johns Hopkins University.
- 2:30 p.m.—Discussion.
- 3:00 p.m.—Coffee.
- 3:30 p.m.—Closing Remarks—Dr. John Seal, Deputy Director, NIAID.

This Symposium is being held in conjunction with the meeting of the Board of Scientific Counselors on October 11 and 12, 1979.

Dr. Kenneth W. Sell, Executive Secretary, Board of Scientific Counselors, NIAID, NIH, Building 5, Room 137, telephone (301) 496-2144, will provide substantive program information.

National Council on Health Care Technology; Announcement Soliciting Comments on Health Care Technology and Technology Assessment

Announcement is made that the National Council on Health Care Technology is soliciting the views and comments of professional health societies and organizations regarding the Department's focus in the field of health care technology and technology assessment. Organizations wishing to make formal presentations to the Council may do so at the October 10 afternoon meeting to be held in Room 800 of the Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201. Participants should plan to limit their presentations to 10 minutes. However, written statements may be filed with the staff before or after the meeting.

Interested parties should contact Mr. Dwight Blankenbaker, Acting Executive Secretary, Office of Health Research, Statistics, and Technology, National Center for Health Care Technology, 5600 Fishers Lane, Rockville, Maryland 20857 (202) 472-4248.

Dated: August 23, 1979.

Office of Education

National Advisory Council on the Education of Disadvantaged Children; Meeting

Notice is hereby given, pursuant to Pub. L. 92-463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held on Friday, September 14 and on Saturday, September 15, 1979.

The Council will meet on September 14 from 9 a.m. until 5 p.m., and on September 15 from 9 a.m. until 12 noon. The two-day meeting will be held at 425 13th Street, NW., Suite 1012, Washington, D.C. 20004.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The purpose of the meeting will be to finalize Council's comments and recommendations on the ESEA, Title I Notice of Proposed Rule Making; review and adopt a Council special report on ESEA, Title I technical assistance and evaluation activities; and, review and comment on a summary of previous council activities and recommendations in the area of compensatory education.

The entire meeting will be open to the public. Because of limited space, all persons wishing to attend should call for reservations by September 10, 1979, area code 202/724-0114 and speak with Mrs. Lisa Haywood.

Records shall be kept of all Council proceedings and shall be available for public inspection at the office of the National Advisory Council on the Education of Disadvantaged Children located at 425 13th Street, NW., Suite 1012, Washington, D.C. 20004.

Signed at Washington, D.C. on August 27, 1979.

Gloria B. Strickland,
Acting Executive Director.

BILLING CODE 4110-02-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Final Decision on Initial Wilderness Inventory of Public Lands in Oregon and Washington

Authority

This decision is issued under the authority of Section 603 of the Federal Land Policy and Management Act of October 21, 1976, and in accordance with the guidelines in the "Wilderness Inventory Handbook," issued by the U.S. Department of the Interior, Bureau of Land Management, on September 27, 1978.

Background

The intent of the initial wilderness inventory is to identify public lands which clearly and obviously do not meet

the criteria for wilderness study areas. These lands are to be released from further consideration in the wilderness review and from the constraints of interim management prescribed by Section 603(c) of the Federal Land Policy and Management Act. Other public lands are to be more intensively inventoried to determine whether they should be designated wilderness study areas or removed from further consideration in the wilderness review.

Public lands are defined as any land and interest in land owned by the United States within the several States and administered by the Secretary of the Interior through the Bureau of Land Management, except lands (a) located on the Outer Continental Shelf, (b) held for the benefit of Indians, Aleuts, and Eskimos, and (c) where the United States retains the minerals but the surface is privately owned.

The beginning of the initial wilderness inventory in Oregon and Washington was announced in the Federal Register on November 3, 1978.

All public lands in the two states which are eligible for wilderness review, and which have not previously been eliminated from wilderness consideration were reviewed. Where there was a possibility of meeting the minimum size criteria listed in the "Wilderness Inventory Handbook", the lands were identified as inventory units. These lands, and all islands of any size, were shown on maps as inventory units, and an initial inventory form (situation evaluation) was prepared for each unit. On the basis of the analysis each unit was placed in one of two categories:

1. Units which clearly and obviously do not meet the criteria for establishment as wilderness study areas.
2. Units in which it appeared more intensive field work was needed to determine whether they should be designated wilderness study areas or eliminated from further wilderness review.

Maps showing these proposed inventory decisions were distributed to over 2,000 individuals, organizations and agencies on April 6, 1979. An accompanying report described the units proposed for elimination from further wilderness review and explained that, in addition, all public lands which were not contained in inventory units because they did not meet the minimum size criteria because of roads or land ownership patterns were also proposed for elimination from further wilderness review. A notice was published in the Federal Register on April 6, 1979, announcing the availability of the maps and report presenting the proposed decision. News releases were sent to

newspapers and radio stations to publicize the availability of the maps and report.

The April 6 announcement opened a 90-day public comment period. Twenty public meetings were held to inform the public of the wilderness review process and receive comments on the proposed initial inventory decision. Approximately 435 comments on the proposed decision were received. Comments which provided information on the presence or absence of wilderness characteristics in specific inventory units were used in developing the final decision on the initial inventory.

Decision

Public lands indicated in paragraphs (a) and (b), below, are eliminated from further consideration as wilderness study areas and are removed from the interim management constraints of Section 603 (c) of the Federal Land Policy and Management Act.

(a) Inventory units shown as being eliminated from further review on maps and a report entitled "Final Decision on Public Lands Obviously Lacking Wilderness Characteristics and Announcement of Public Lands to be Intensively Inventoried for Wilderness Characteristics—Oregon and Washington", dated August 1979 are eliminated from further consideration as wilderness study areas. All lands in this category were proposed on April 6, 1979, for elimination from further wilderness review except Unit 3-204 (9,040 acres) and a portion of Unit 3-157 (12,280 acres) in the Vale District and a portion of Unit 13-1 (700 acres) in the Spokane District. Public comments and a re-examination of these lands verified that they clearly and obviously do not have wilderness characteristics.

(b) All public lands in Oregon and Washington which do not meet the minimum size criteria of the "Wilderness Inventory Handbook" and are not included in inventory units shown on the maps and listed in the report referred to in paragraph (a), above, are eliminated from further consideration as wilderness study areas. These lands do not meet the minimum size criteria either because they are roaded or because they are isolated parcels surrounded by lands not administered by the Bureau of Land Management.

Certain inventory units shown on maps and listed in the August 1979 report referred to in the previous section are identified as units to be intensively inventoried to determine whether they have wilderness characteristics. The interim management provisions of

Section 603(c) of the Federal Land Policy and Management Act remain in effect on these lands. These units will be evaluated under the procedures set forth in Step 4 of the "Wilderness Inventory Handbook."

The above are the State Director's final decisions on the initial wilderness inventory and will not be effective for 30 days subject to appeal under Departmental regulations (Part 4, Subtitle A, Title 43 CFR).

Additional Information

The final decision maps and report mentioned above have been sent to more than 2,400 individuals, organizations, and agencies. You may obtain a copy by writing the Public Affairs Room, Bureau of Land Management, Oregon State Office, P.O. Box 2965, Portland, Oregon 97208.

Muriel W. Storms,
State Director.

[FR Doc. 79-26684 Filed 8-28-79; 8:45 am]
BILLING CODE 4310-84-M

Oregon; Five Instant Wilderness Study Areas in Oregon Do Not Have Wilderness Characteristics

Section 603 of the Federal Land Policy and Management Act of 1976 requires the Secretary of the Interior to report to the President by July 1, 1980, his recommendations on whether primitive and natural areas designated as such prior to November 1, 1975, and administered by the Bureau of Land Management are suitable or unsuitable for preservation as wilderness. These areas have been termed "instant wilderness study areas."

Five instant study areas are located in Oregon. They are:

Area	BLM District	Acres
Lost Forest Research Natural Area.	Lakeview	8,960
Western Juniper Research Natural Area.	Prineville	600
Little Sink Research Natural Area.	Salem	80
Brewer Spruce Research Natural Area.	Medford	210
Douglas Fir Research Natural Area.	Cooze Bay	590

Using procedures prescribed in the Bureau of Land Management's September 27, 1978, "Wilderness Inventory Handbook," a preliminary determination was made that none of the five areas has wilderness characteristics. This was announced in the Federal Register on April 26, 1979, and in a report distributed to over 2,000 individuals, organizations, and agencies on the same date. A 60-day public comment period followed.

After reviewing public comments received, I have concluded that the five areas, in and of themselves, do not have wilderness characteristics. I have also concluded that 1,500 acres of roadless land contiguous to the Brewer Spruce area and 50 acres of roadless land contiguous to the Douglas Fir area do not have wilderness characteristics. However, the Western Juniper Instant Study Area and portions of the Lost Forest Instant Study Area have been included in larger wilderness inventory units which have yet to be inventoried to determine whether they possess wilderness characteristics. Therefore, I will propose, through the Director of the Bureau of Land Management, that the Secretary of the Interior (a) recommend to the President that the Little Sink, Brewer Spruce, and Douglas Fir Instant Study Areas are not suitable for preservation as wilderness; and (b) report to the President that recommendations on the wilderness suitability or nonsuitability of Western Juniper and Lost Forest areas will be deferred until it has been determined whether contiguous inventory units have wilderness characteristics.

A report describing the five areas and summarizing public comments received may be obtained by writing the Public Affairs Rooms, Oregon State Office, Bureau of Land Management, P.O. Box 2965, Portland, OR 97208.
Murl W. Storms,
State Director.

BILLING CODE 4310-04-M

Colorado: Instant Wilderness Study Report; Public Comment Period on Recommendations for Needlerock and High Mesa Grassland

SUMMARY: Notice is hereby given that pursuant to the Federal Land Policy and Management Act of 1976 (Pub. L. 94-579), a 30-day public comment period will begin immediately after publication of this notice on the results of the wilderness characteristics evaluation of the Needlerock and High Mesa Grasslands Instant Study Areas administered by BLM in Colorado.

Comments will be accepted by the Montrose District Office during this 30-day public review regarding the recommendation that the 80 acre Needlerock Natural Area, located near Crawford in Delta County, Colorado, does not meet the wilderness criteria defined by Section 2(c) of the Wilderness Act of 1964 (Pub. L. 88-577).

Comments will be accepted by the Canon City District Office during this 30-day public review regarding the

recommendation that the 680 acre High Mesa Grassland Natural Area, located northwest of Canon City in Fremont County, Colorado, does not meet the wilderness criteria defined by the Wilderness Act of 1964.

A copy of the Needlerock report can be obtained from the Montrose District Office, Bureau of Land Management, P.O. Box 1269, Highway 550 South, Montrose, Colorado 81401; phone 303-249-7791.

A copy of the High Mesa Grasslands report can be obtained from the Canon City District Office, Bureau of Land Management, 3080 East Main Street, Canon City, Colorado 81212; phone: 303-275-7494.

Dated: August 21, 1979.

Dale R. Andrus,
State Director.

BILLING CODE 4310-04-M

Bureau of Reclamation

Contract Negotiations With Laguna Water District, Calif.; Intent to Begin Negotiation of a Water Service Contract

The Department of the Interior, through the Bureau of Reclamation, intends to negotiate a contract with Laguna Water District, Los Banos, California, for the furnishing of 800 acre-feet of water annually for agricultural use from the Central Valley Project (CVP). This supply is part of the Delta-Mendota Canal total water delivery program of 1,555,000 acre-feet, excluding losses, established on February 5, 1973. The proposed contract will be written pursuant to section 9(e) of the Reclamation Project Act of 1939. The initial water rate will be \$8.10 per acre-foot and will be adjustable at 5-year intervals.

Laguna Water District is in the trough of the San Joaquin Valley in southwestern Merced County, California, just southwest of the community of Dos Palos. There are about 427 gross acres in the district of which about 370 acres have been irrigated under temporary CVP contracts and by use of other non-firm water supplies. The provision of this long-term CVP water supply contract will supplement the other non-firm supplies of water. The principal district crops consist of cotton, corn, milo, and barley.

All meetings between the Bureau of Reclamation and Laguna Water District for the purpose of negotiating the proposed water service contract shall be open to the general public as observers. Advance notice of any meeting shall be

furnished only to those parties having previously furnished a written request for such notice to the office identified below at least 1 week prior to the meeting. The public is invited to submit written comments on the form of the proposed agreement not later than 30 days after the completed draft is declared to be available to the public. All written correspondence concerning the proposed contract shall be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

For further information about scheduled meetings and copies of the proposed contract, please contact Mr. A. J. Thayer, Repayment Branch, Division of Water and Power Resources Management, Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825, telephone No. (916) 484-4498.

Dated: August 22, 1979.

Clifford L. Barrett,
Assistant Commissioner of Reclamation.

BILLING CODE 4310-09-M

Salmon Falls Division, Upper Snake River Project, Idaho-Wyoming; Intent to Prepare an Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior intends to prepare an environmental statement on the proposed Salmon Falls Division. The proposal is to construct an irrigation and wildlife enhancement project, and the necessary support facilities, south of the Snake River in Twin Falls and Cassia Counties, Idaho. The Salmon Falls Division was authorized by Congress in Public Law 92-514, October 20, 1972. To be implemented, the proposal will require the authorization of construction funding. If constructed, the Salmon Falls Division would supply water to approximately 57,210 acres of cropland. Wildlife habitat would be upgraded on about 1,570 acres of land, and 20 watering areas would be constructed to enhance local wildlife populations.

An environmental statement on the project was filed with the Council on Environmental Quality before authorization; however, due to the evolving nature of the environmental statement process since that time, the decision has been made to prepare an updated statement in conjunction with the definite planning report. The new environmental statement will address the impacts of constructing the operating

facilities in the project area, the impacts associated with alternative locations for a well field to pump water from the Snake Plain aquifer, and other alternatives considered to meet the water-related needs of the project area.

Environmental studies and preparation and processing of an environmental impact statement for this proposed project will be in accordance with provisions of the National Environmental Policy Act of 1969, and will be accomplished under the new Council on Environmental Quality (CEQ) regulations published in the Federal Register on November 29, 1978.

No specific scoping meeting is planned. Pertinent issues have been discussed with various groups and agencies on several occasions. Letters have also been sent to known interested parties and agencies indicating that an environmental statement is being prepared and inviting their comments.

To assure that the full range of issues related to this proposal are discussed in the statement and all significant issues are identified, comments and suggestions are invited. Anyone with suggestions as to significant environmental issues associated with this project should contact: Robert A. Adair, Environmental Specialist, Pacific Northwest Region, Bureau of Reclamation, Box 043, 550 W. Fort Street, Boise, Idaho 83724, Telephone: (208) 384-1209.

Dated: August 22, 1979.

R. Keith Higginson,
Acting Commissioner.

Having received advice from the Department of the Treasury on August 7, 1979, that titanium dioxide (provided for in item 473.70 of the Tariff Schedules of the United States (TSUS)) from Belgium, France, the United Kingdom, and the Federal Republic of Germany, with the exception of that sold by Bayer AG of the Federal Republic of Germany and ceramic grades of titanium dioxide sold by LaPorte Industries of the United Kingdom,¹ is being, or is likely to be,

¹ For purposes of the Department of the Treasury's determination, ceramic grades of

sold at less than fair value, the United States International Trade Commission, on August 23, 1979, instituted investigations Nos. AA1921-206, AA1921-207, AA1921-208, and AA1921-209, under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Public hearing. A public hearing in connection with these investigations will be held on Thursday, September 27, 1979, in the Commission's Hearing Room, U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. 20436, beginning at 10 a.m., e.d.t. All interested persons will be afforded an opportunity to be present, to appear by counsel or in person, to provide information, and to be heard at such hearing. Requests to appear at the hearing should be received in writing in the office of the Secretary to the Commission, United States International Trade Commission, 701 E Street NW., Washington, D.C., not later than noon, Friday, September 21, 1979.

Written statements. Interested parties may submit statements in writing in lieu of, or in addition to, appearing at the public hearing. A signed original and 19 true copies of such statements should be submitted. Requests for confidential treatment should be directed to the attention of the Secretary. Any business information which a submitter wishes the Commission to treat as confidential should be clearly marked "Confidential Business Data." Submitters seeking confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). Should a request for confidential treatment be denied, the submission will be returned to the submitting party.

All written submissions, except for confidential business data, will be made available for inspection by interested persons. To assure that such statements are given due consideration by the Commission, such statements should be received not later than the close of business, Friday, October 5, 1979.

Issued: August 24, 1979.

titanium dioxide are titanium dioxide pigments (provided for in TSUS item 473.70), having an average minimum primary particle size exceeding eight microns in diameter.

By order of the Commission.

Kenneth R. Mason,
Secretary.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meeting

August 10, 1979.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Humanities Panel will be held at 806 Fifteenth Street, N.W., Washington, D.C. 20506, in room 807, from 9:00 a.m. to 5:30 p.m. on September 13 and 14, 1979.

The purpose of the meeting is to review Higher Education Projects applications submitted to the National Endowment for the Humanities for projects beginning after December 1, 1979.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 Fifteenth Street, N.W., Washington, D.C. 20506, or call area code 202-724-0367.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7530-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Subcommittee on Fluid Dynamics; Meeting

The ACRS Subcommittee on Fluid Dynamics will hold a meeting on September 13 and 14, 1979, at the Quality Inn, 5249 West Century Boulevard, Los Angeles, CA 90045 to review NRC acceptance criteria for the

Boiling-Water Reactor (BWR) Mark I and II Containment Systems. Notice of this meeting was published August 23, 1979.

In accordance with procedures outlined in the Federal Register, Oct. 4, 1978 (43 FR 45926), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

Thursday and Friday, September 13 and 14, 1979.

8:30 a.m. until the conclusion of business each day.

The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full committee.

At the conclusion of the Executive Session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC Staff, and their consultants, pertinent to this review. The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

In addition, it may be necessary for the Subcommittee to hold one or more closed sessions for the purposes of exploring matters involving proprietary information. I have determined, in accordance with Subsection 10(d) of Public Law 92-463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Dr. Andrew L. Bates, (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: August 22, 1979.

John C. Hoyle,
Advisory Committee Management Officer.

[Docket No. 50-289]

Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit No. 1); Order

On August 9, 1979 (44 FR 47821, August 15, 1979), the Commission issued an Order and Notice of Hearing in this proceeding and provided that the licensee's answer to the Order and any petitions to intervene were to be filed with the Secretary of the Commission by September 4, 1979. Pursuant to 10 CFR 2.772, those deadlines are hereby extended until September 14, 1979.

It is so ordered.

Dated at Washington, D.C., this 23d day of August, 1979.

Samuel J. Chilk,
Secretary of the Commission.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Privacy Act; Notice of New Systems

August 24, 1979.

The purpose of this notice is to give members of the public an opportunity to comment on Federal agency proposals to establish or alter personal data systems subject to the Privacy Act of 1974.

The Act states that "each agency shall provide adequate advance notice to Congress and the Office of Management and Budget of any proposal to establish or alter any system of records in order to permit an evaluation of the probable or potential effect on such proposal on the privacy and other personal or property rights of individuals * * *"

OMB policies implementing this provision require agencies to submit reports on proposed new or altered systems to Congress and OMB 60 days prior to the issuance of any data collection forms or instructions, 60 days before entering any personnel information into the new or altered systems, or 60 days prior to the issuance of any requests for proposals for computer and communications systems or services to support such systems—whichever is earlier.

The following reports on new or altered systems were received by OMB between July 23, 1979 and August 17, 1979. Inquiries or comments on the

proposed new systems or changes to existing systems should be directed to the designated agency point-of-contact and a copy of any written comments provided to OMB. The 60 day advance notice period begins on the report date indicated.

Department of Defense

System Name: Losses of Public Funds Files.

Report Date: July 23, 1979.

Point-of-Contact: Mr. William T. Cavaney, Executive Secretary, Defense Privacy Board, 1735 N. Lynn Street, Arlington, VA 22209.

Summary: The Navy Department proposes this new system as a means of controlling the liquidation of losses of public funds by accountable disbursing personnel. The system will include a file on each accountable individual, maintained until losses have been repaid or relief has been granted and the case closed.

System Names: (1) Work Measurement Labor Distribution Card. (2) Marine Corps Locator Files.

Report Date: August 7, 1979.

Point-of-Contact: Mr. William T. Cavaney, Executive Secretary, Defense Privacy Board, 1735 N. Lynn Street, Arlington, VA 22209.

Summary: Both of these are existing systems maintained by the Marine Corps. The first system, currently used to provide a data base on Marine Corps work activities, will be used not only to determine labor distribution, but also to produce productivity reports. The second system will be altered to include additional information about USMC officer, enlisted, and civilian personnel.

System Name: Recruiting Research and Analysis System.

Report Date: August 9, 1979.

Point-of-Contact: Mr. William T. Cavaney, Executive Secretary, Defense Privacy Board, 1735 N. Lynn Street, Arlington, VA 22209.

Summary: The Air Force proposes this system as a statistical tool for the management, monitoring, and analysis of Air Force recruiting. The information will be used to determine the need for procedural and policy changes in recruiting.

System Name: Automated Systematic Recruiting Support System.

Report Date: August 7, 1979.

Point-of-Contact: Mr. William T. Cavaney, Executive Secretary, Defense Privacy Board, 1735 N. Lynn Street, Arlington, VA 22209.

Summary: The Marine Corps proposes this new system of records, which is intended to provide a data of the recruiting information to keep track of

recruits, including those who join, the Marines on a delayed entry basis.

Office of Administration, Executive Office of the President

System Name: Interagency Information Exchange.

Report Date: August 1, 1979.

Point-of-Contact: Ms. Carol L. Caldwell, Information Systems Development Division, Office of Administration, Washington, D.C. 20500.

Summary: This new system of records is to be a subsystem of an information system called Congressional Liaison Activities Status System (CLASS). CLASS is intended to track the progress of important Administration issues through the legislative, budgetary, and implementation stages. The Interagency Exchange subsystem will provide information on key figures in the process, such as Members of Congress, Executive Branch officials, and State and local government officials.

Department of Energy

System Names:

(1) Time and Accountability Records. (2) Emergency Locator Records.

(3) Automatic Data Processing (ADP) Management Records.

(4) Congressional Profiles.

(5) Environmental Impact Document Monitoring, Processing, and Correspondence Tracking System.

(6) Historical Files—Published Information Concerning Selected Persons in the Energy Field.

(7) Energy Extension Service Records. (8) Minority Energy Technical Assistance Program Records.

Report Date: August 8, 1979.

Point-of-Contact: Milton Jordan, Director, Division of FOI and Privacy Act Activities, Department of Energy, Washington, DC 20585.

Summary: In this report DOE presents a consolidation of all of its systems of records, including those transferred from DOE's predecessor agencies and the eight new systems listed above. The first three systems will be internal management tools for the Department. The fourth Congressional Profiles, will be used by DOE staff to facilitate dealings with the Congress by making available information on Members' views on energy issues and other background information. All information in the system will be drawn from public sources. The next system will be used by DOE in carrying out its role under the National Environmental Policy Act, including the distribution of copies of environmental impact statements, reviewing comments and evaluating such statements. The DOE Historical Files will maintain records on the

history of the Federal role in U.S. energy development. Energy Extension Service records will be used to account for State contacts with EES clients under the Energy Extension Service program. Finally, the Minority Energy Technical Assistance Program records will be used in the administration of a DOE funded program intended to encourage energy conservation programs by minority and low-income persons and to educate State and local officials in energy conservation.

Waiver Requests

OMB procedures permit a waiver of the advance notice requirement when the agency can show that the delay caused by the 60 day advance notice would not be in the public interest. It should be noted that a waiver of the 60 day advance notice period does not relieve an agency of the obligation to publish notice describing the system and to allow 30 days for public comment on the proposed routine uses of the personal information to be collected. A waiver of the 60 day advance notice provision was requested by agencies for the following reports received between July 23, 1979 and August 17, 1979. Public inquiries or comments on the proposed new or altered systems should be directed to the designated agency point-of-contact and a copy of any written comments provided to OMB. Comments on the operation of the waiver procedure should be directed to OMB.

Nuclear Regulatory Commission

System Name: Special Inquiry File.

Report Date: July 25, 1979.

Point-of-Contact: J. M. Felton, Director, Division of Rules and Records, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Summary: This system is to be established to facilitate the investigation of the accident at the Three Mile Island Nuclear Plant and any similar incidents which may occur. It will include correspondence, audit reports and data interview, questionnaires, etc., which may be accessed by individual name or identifier.

Status: Granted, August 3, 1978.

David R. Leuthold,

Acting Assistant to the Director for Administration.

BILLING CODE 3110-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 02/02-0370]

AMEV Capital Corp.; Issuance of a License to Operate as a Small Business Investment Company

On June 18, 1979, a Notice was published in the Federal Register (44 FR 35071) stating that AMEV Capital Corporation, 5 World Trade Center—Suite 6281, New York, New York 10048, had filed an application with the Small Business Administration pursuant to § 107.102 of the SBA Rules and Regulations governing small business investment companies (13 CFR 107.120 (1979)), for a license to operate as a small business investment company.

Interested parties were given until the close of business July 3, 1979, to submit their comments. No comments were received.

Notice is hereby given that, having considered the application and all other pertinent information, SBA, on August 14, 1979, issued License No. 02/02-0370 to AMEV Capital Corporation pursuant to Section 301(c) of the Small Business Investment Act of 1958, as amended.)

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: August 20, 1979.

BILLING CODE 8025-01-M

[Proposed License No. 02/02-5376]

Intergroup Funding Corp.; Application for License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.), has been filed by Intergroup Funding Corporation (applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1979).

The officers and directors of the applicant are as follows:

Ben Hauben, president and director, 876 Park Avenue, New York, New York 10021.

Oscar Hauben, vice president and director, 306 West 236th Street, Bronx, New York 10463.

Cyla S. Goodman, secretary, treasurer, director, 81 Penn Road, Scarsdale, New York 10583.

The applicant will maintain its principal place of business at 230 Park Avenue, New York, New York 10017.

It will begin operations with \$510,000 of private capital derived from the sale of 1,500 shares to Benco International Importing Corporation (Benco) at the same address as the applicant. Ben Hauben owns 75 percent and Cyla S. Goodman has a 25 percent beneficial interest in Benco.

The applicant will conduct its operations principally in the State of New York.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, on or before September 13, 1979, submit to SBA written comments on the proposed applicant. Any such communications should be addressed to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in New York, New York.

[Proposed License No. 04/04-5161]

First Florida Capital Corp.; Application for License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company

under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by the First Florida Capital Corporation (applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1979).

The officers, directors and stockholders are as follows:

Stanley L. Seligman, president and director, 125 North 46th Avenue, Hollywood, Florida 33021, 40 percent.

Sol Klein, secretary, treasurer and director, 4052 Estepona Avenue, Miami, Florida 33166, 8.57 percent.

Joel A. Pinsky, vice president and director, 1 Westmount Square, Suite 1212, Montreal, Quebec, Canada.

Shai Calvert Kogan, 157 Edgehill, Westmount, Quebec, Canada, 8.57 percent.

Commercial Investments Corp., c/o Joel A. Pinsky, 1 Westmount Square, Suite 1212, Montreal, Quebec, Canada, 12.86 percent.

John Alper, 33 Glenmore, Hampstead, Quebec, Canada, 10 percent.

Bernard Palevsky, 72 Summit Crescent, Westmount, Quebec, Canada, 10 percent.

Paul Hubscher, 5703 Whitehorn Avenue, Westmount, Quebec, Canada, 10 percent.

The applicant will maintain its principal place of business at 125 North 46th Avenue, Hollywood, Florida 33021.

It will begin operations with \$500,000 of private capital derived from the sale of 50,500 shares to stockholders shown above.

The applicant will conduct its operations in the Dade and Broward Counties of Florida.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, on or before September 13, 1979, submit to SBA written comments on the proposed applicant. Any such

communication should be addressed to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Hollywood, Florida.

[Proposed License No. 01/01-0292]

Great Northern Capital Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an Application has been filed with the Small Business Administration, pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1979)), under the name of Great Northern Capital Corporation (Applicant) for a License to operate as a Small Business Investment Company under the provisions of the Small Business Investment Act of 1958, as amended (Act), and the Rules and Regulations promulgated thereunder.

The Applicant was incorporated on March 2, 1978, under the laws of the State of Maine and under the name of First Maine Capital Corporation. At a meeting of shareholders held on August 13, 1979, it was resolved that the Corporation change its name from First Maine Capital Corporation to Great Northern Capital Corporation and its Articles of Incorporation have been amended accordingly, effective August 16, 1979.

The Applicant will commence operations with a capitalization of \$504,000, which amount has been raised through the sale of its issued and outstanding Common Stock, No Par Value, and its issued and outstanding Preferred Stock, No Par Value, to Barry M. Goldman, President and Director of the Applicant, and to C.G.T. Trust, c/o Clickman and Fuller, P.C., 14 Howard Street, Worcester, Massachusetts 01608, respectively.

The Applicant will have its principal place of business at 97A Exchange Place, Portland, Maine 04111, and it intends to conduct its operations principally in the States of Maine,

Massachusetts, New Hampshire and Vermont.

The officers and directors of the Applicant will be:

Nome, address, and title

Barry M. Goldman, 30 Spruce Hill Ave., Boston, Mass., president, secretary, and director.

Alexander S. Goldman, 15 Vannah Ave., Portland, Maine, clerk and director.

Alan R. Atkins, 19 Rocky Hill Road, Cape Elizabeth, Maine, director.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management, including adequate profitability and financial soundness in accordance with the Act and SBA Regulations.

Notice is hereby given that any person may, on or before September 13, 1979, submit written comments on the Applicant to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this Notice shall be published by the Applicant in a newspaper of general circulation in Portland, Maine.

Agency for International Development

Advisory Committee on Voluntary Foreign Aid; Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(a)(2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the meeting of the Advisory Committee on Voluntary Foreign Aid which will be held on September 17 and 18, 1979, from 9:30 a.m. to 5:00 p.m., at Tarrytown House Executive Conference Center, East Sunnyside Lane, Tarrytown, New York 10591.

The Committee will be examining the relationship between the Agency for International Development and the private and voluntary organizations. It will examine all aspects of the present relationship with the view to arriving at conclusions and making suggestions for use in an Executive Branch report to the Congress required by House Report 96-79 and Senate Report 96-137 in the International Development Cooperation Act of 1979.

The meeting will be open to the public. Any interested person may attend, appear before, or file statements with the Committee in accordance with procedures established by the Committee. Written statements should be filed prior to the meeting and should be available in twenty copies.

Mr. John A. Ulinski will be the A.I.D. representative at the meeting. It is suggested that those desiring further information contact Mr. Ulinski at 202-632-8937, or by mail c/o the Advisory Committee on Voluntary Foreign Aid, Agency for International Development, Washington, D.C. 20523.

AGENCY: U.S. Treasury Department.

ACTION: Initiation of Antidumping Investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether imports of countertop microwave ovens from Japan are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended. There is substantial doubt that imports of the subject merchandise, allegedly at less than fair value, are causing, or are likely to cause, injury to an industry in the United States. Therefore, the case is being referred to the U.S. International Trade Commission for a determination as to whether there is no reasonable indication of injury because of such imports.

EFFECTIVE DATE: August 29, 1979.

FOR FURTHER INFORMATION CONTACT: Richard Rimlinger, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: On July 23, 1979, a petition was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel representing the Association of Home Appliance Manufacturers, Chicago, Illinois, alleging that countertop microwave ovens from Japan are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended (19 U.S.C. 160 *et seq.*) (hereinafter referred to as "the Act").

Countertop microwave ovens are

electronic cooking devices which heat food by the application of very high frequency energy. For purposes of this investigation, the term "countertop microwave ovens" means countertop microwave ovens classifiable under item 684.3010, Tariff Schedules of the United States Annotated.

Most Japanese microwave oven manufacturers are related, within the meaning of the Act, to the U.S. importing companies. Therefore, it will be necessary to establish the exporter's sales price of the merchandise in the U.S. market.

Based upon the information supplied by the petitioner through a descriptive presentation of similar models sold in both the U.S. and home market, it appears that the margins of dumping may range from 27 percent to 107 percent.

The petitioner has presented information to substantiate the allegation that the U.S. microwave oven industry is being injured or is likely to be injured from the less than fair value imports from Japan.

The petition cites a substantial loss of market share, price suppression or depression, underemployment, declining profitability, underutilization of capacity, declining capital investment and a static industry structure.

The information presented, however, does not clearly establish that the alleged injury has taken place or is threatened or that it is by reason of the alleged sales at less than fair value.

The claim of a loss of market share depends largely upon the choice of base year and period of comparison. While higher now than in 1975, the Japanese share of the market is now lower than either in 1972, when the product was relatively new on the market, or 1978, U.S. manufacturers' share of the market is below historic highs but above both 1972 and 1978 levels.

Similarly, evidence concerning lower prices of both U.S. and Japanese microwave ovens appears attributable to lower costs of production due to increases in worker productivity, technological advances, standardization of production and the capture of economies of scale due to greater volumes of production. Decreases in employment appears to reflect greater productivity of labor in the microwave oven industry.

Although the U.S. industry's capacity utilization rate has apparently declined, it has been accompanied by an expansion in capacity and heavy capital investment. Finally, a number of large, Japanese manufacturers of microwave ovens intend to begin production in the

U.S. in the near future. Some facilities will begin production as early as December 1979. The effect should be a sharp decline in microwave oven imports as U.S. made models substitute for Japanese produced ovens.

Therefore, on the basis of the information currently available, there is substantial doubt of injury or likelihood of injury to an industry in the United States by reason of such imports from Japan. Accordingly, the U.S. International Trade Commission is being advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29), and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value. Should the U.S. International Trade Commission, within 30 days of receipt of this referral, advise the Secretary that there is no reasonable indication that an industry in the United States is being, or is likely to be, injured by reason of the importation of such merchandise into the United States, this investigation will be terminated. Otherwise, the investigation will continue to conclusion.

This notice is published pursuant to § 153.30, Customs Regulations (19 CFR 153.30).

David R. Brennan,
Acting General Counsel of the Treasury.

BILLING CODE 4810-22-M

U.S. RAILWAY ASSOCIATION

[Docket 211-22]

Consolidated Rail Corp.; Application for a Loan

Subsection (h) of Section 211 of the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 721) (the Act), authorizes the United States Railway Association (Association) to enter into loan agreements with the Consolidated Rail Corporation (Conrail), the National Railroad Passenger Corporation, and any profitable railroad to which rail properties are transferred or conveyed pursuant to Section 303(b)(1) of the Act under conditions and for purposes set forth in this Subsection. Subsection (b) of Section

211 requires that the Association publish notice of the receipt of any application thereunder in the Federal Register and afford interested parties an opportunity to comment thereon.

Conrail submitted two Borrowing Applications dated August 23, 1979 requesting new borrowings of \$1,193,365.80 in one and \$300,000 in the other. Conrail states that it will use the \$300,000 to pay wage claims of The Penn Central Transportation Company, and that it will use the \$1,193,365.80 to pay the following: (i) \$700,000 of Federal Employer's Liability Act (FELA) Claims of The Penn Central Transportation Company, (ii) \$324,788.80 of FELA claims of the Lehigh Valley Railroad Company, and (iii) \$168,577.00 of FELA claims of the Erie Lackawanna Railroad Company.

The Borrowing Application includes the certification and exhibits required by the Loan Procedures.

Interested parties are invited to submit written comments relevant to this application. Any such submissions must identify, by its Docket No., the application to which it relates, and must be filed with the Office of General Counsel, United States Railway Association, 955 L'Enfant Plaza North, SW., Washington, D.C. 20595, on or before September 10, 1979, to enable timely consideration by USRA. The docket containing the original application will be available for public inspection at that address Monday through Friday (holidays excepted) between 8:30 a.m. and 5:00 p.m.

Dated at Washington, D.C. this 24th day of August, 1979.

David Kleypas,
Assistant Secretary, U.S. Railway Association.

BILLING CODE 3410-03-M

INTERSTATE COMMERCE COMMISSION

[No. MC-123048 (Sub-No. 412) F]

Operating Rights Application; Diamond Transportation System, Inc., Extension—Bay Saint Louis, MS (Racine, WI)

Decided: August 10, 1979.

Applicant seeks a certificate of public convenience and necessity authorizing the transportation of (1) aluminum articles, and (2) materials, equipment, and supplies used in their manufacture, distribution, and sale, between Tucker, GA, and Bay Saint Louis, MS, on the one hand, and, on the other, points in the United States (except Alaska and

Hawaii). The evidence has been considered under the modified procedure. Protestant Bowman Transportation, Inc., a motor common carrier, filed a statement in opposition. Applicant submitted a reply statement.

Pertinent Facts

Alcan Aluminum Corporation of Cleveland, OH, the supporting shipper, is the fourth largest aluminum fabricator in the United States. It has recently acquired a facility at Bay Saint Louis, MS, and it produces at this facility and its Tucker, GA, facility, electrical cable and aluminum rods. The Bay Saint Louis facility also produces various other unidentified aluminum articles. The aluminum rods are 3/4 inches in diameter and shipped in coil form. The electrical cable, which may be made of aluminum or copper, is similar to the rods, but of small dimension. The cable may be shipped bare or covered with a polyethylene coating. The cable is shipped as a coil or on a reel; reels average 14,000 to 20,000 pounds each.

Shipper receives a wide variety of commodities used in the manufacture, distribution, and sale of its products.

The Tucker facility had a total production in 1978 of 20.18 million pounds. The Bay Saint Louis facility is new, but production of 12 million pounds a year is projected. These figures are expected to increase substantially. Alcan's inbound tonnage is approximately 10 percent less than the outbound. A representative list of product destination points and supply material origin points in all contiguous States was provided. Shipper's traffic also moves wholly within Mississippi prior or subsequent to a movement in foreign commerce.

Shipper is now using a combination of rail carriers, and common, contract, and private motor carriage. Rail has been found unsatisfactory because of delays. The contract carrier and common carriers serving shipper have been unable to provide it with sufficient equipment, and, with the exception of the contract carrier, no carrier possesses the broad geographic authorization sought here. Alcan requires a carrier with broad territorial coverage, capable of providing timed deliveries, as well as multiple stopoff delivery service. Carriers must be able to protect shipper's products from the elements by providing van trailers, sided trailers with covers, or, in some instances, tarpaulined flat-bed equipment.

¹ Shipper indicates it is referred to as "aluminum coil." In order to avoid any misunderstanding, we will refer to these commodities as "aluminum rods and coil."

If this application is granted, applicant will be tendered three to four outbound truckloads a week from each of the two facilities. Shipper was unable to estimate the inbound volume, but will use applicant to the extent possible. Alcan's business is continually expanding, and it will continue to use existing carriers.

Bowman is a general commodities carrier operating primarily over regular routes. It is authorized to provide service between Alcan's Tucker facility, on the one hand, and, on the other, points in six southern States, Indiana, Illinois, Ohio, Massachusetts, Rhode Island, the District of Columbia, and other specified points in 14 eastern and southern States over a combination of regular and irregular routes. Bowman stands ready to provide service, but has been tendered "little" of the traffic. It offers both less-than-truckload (LTL) and truckload service under tariffs permitting multiple stopoff deliveries.

Bowman argues that authorizing service to Tucker, will allow applicant to serve shippers located throughout the Atlanta, GA, commercial zone. It asserts that this, in combination with the broad commodity description sought, requires the imposition of a restriction limiting any grant to traffic originating at or destined to the facilities of shipper.

Bowman also directs our attention to applicant's equipment, claiming applicant is not primarily a van service carrier and operates few van trailers in comparison with the flat-bed and lowboy trailers operated. Protestant further argues that the grant of this authority will allow applicant to divert profitable traffic which is essential to protestant's policy of having truckload and large LTL shipments subsidize small LTL shipments.

Discussion and Conclusions

The application will be granted to the extent set forth in the appendix. The supporting shipper has demonstrated a need for the outbound transportation of electrical cable and aluminum rods and coil and for the inbound transportation of the materials and supplies used in the manufacture, distribution, and sale of those commodities. Alcan has been unable to obtain an adequate supply of motor vehicle equipment capable of providing a flexible, geographically broad expedited service with timed deliveries, and multiple stopoff deliveries.

Applicant has demonstrated its ability to meet shipper's service requirements through its service to one of shipper's other facilities. Applicant has sufficient equipment capable of providing

shipper's product with the proper degree of protection.

Bowman is unable to provide the geographically comprehensive service being sought. Its combination of regular and irregular routes will impede its ability to provide the shipper with the multiple stopoff service required. Protestant has been tendered little of this traffic, and shipper will continue to use existing carriers to the extent possible.

Contrary to Bowman's contention, authorizing service to Tucker, will not allow applicant to serve shippers located throughout the Atlanta, commercial zone. While Tucker, is within the Atlanta commercial zone, Atlanta is not within the Tucker commercial zone and applicant may not back the two zones to serve shippers located outside the Tucker zone. Compare 49 CFR 1041.20. Furthermore, the evidence in support warrants a more detailed, but narrowed commodity description. In view of the above, we will not restrict the grant to traffic originating at or destined to the facilities of shipper and we conclude that this will not materially adversely affect protestant contrary to the public interest.

Alcan has demonstrated a need only for the transportation of the identified aluminum articles which it produces at its Bay Saint Louis facility. Further, it has not demonstrated a need for the movement to its facilities of aluminum rods and coil, and electrical cable. Therefore, we have limited the grant set forth in the appendix to the transportation for which a need has been shown. However, need has been shown for the transportation of both copper and aluminum electrical cable. Because copper electrical cable is not within the scope of the commodity description in the **Federal Register** notice of the application, it is possible persons who relied upon the notice of the application as published may have an interest in and would be prejudiced by the lack of proper notice of the authority described in the appendix. Accordingly, a notice of the authority actually granted will be published in the **Federal Register** and any interested person prejudiced by the lack of proper notice may file a petition to intervene in this proceeding during the 30 days following the new publication and no certificate will be issued until the extension of the 30 day period and disposition of any petition filed with that time.

Finally, we note that electrical cable and aluminum rods and coil are not susceptible to bulk handling and the

restriction against bulk commodities will not be imposed with respect to these commodities in part (1) of the appendix.

We find:

The present and future public convenience and necessity require operation by applicant, performing the service described in the appendix. Applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. An appropriate certificate should be granted subject to the republication condition in the appendix. This decision does not significantly affect the quality of the human environment.

It is ordered:

The application is granted to the extent set forth in the appendix.

Operations may begin only following service of *certificate* which will be issued if applicant complies with the following requirements set forth in the Code of Federal Regulations: insurance (49 CFR 1043), designation of process agent (49 CFR 1044), and tariffs (49 CFR 1310).

Compliance with these requirements must be made within 90 days after the date of service of this decision or the grant of authority shall be void.

By the Commission, Review Board Number 2, Members Boyle, Eaton, and Liberman.
Agatha L. Mergenovich,
Secretary.

Appendix

Authority to conduct the following operations will be issued in an appropriate document. This decision does not constitute authority to operate.

To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular route, transporting: (1) *aluminum rods and coil, and electrical cable*, from Tucker, GA, and Bay Saint Louis, MS, to points in the United States (except Alaska and Hawaii), and, (2) *materials, equipment, and supplies used in the manufacture, distribution, and sale of the commodities in (1) above*, (except commodities in bulk), from points in the United States (except Alaska and Hawaii) to Tucker, GA, and Bay Saint Louis, MS.

Special Condition:

Issuance of a certificate in this proceeding is conditioned on prior publication in the **Federal Register** of a notice of the authority actually granted. Issuance of a certificate will be delayed until 30 days after such publication and the disposition of any petitions for leave to intervene filed within that time.

BILLING CODE 7035-01-M

[Amdt. 6, Exemption No. 149]

Exemption Under Provision of Rule 19 of the Mandatory Car Service Rules Ordered in Ex Parte No. 241.

Upon further consideration of Exemption No. 149 issued April 28, 1978.

It is ordered, That under authority vested in me by Car Service Rule 19, Exemption No. 149 to the Mandatory Car Service Rules ordered in Ex Parte No. 241 is amended to expire November 30, 1979.

This amendment shall become effective August 15, 1979.

Issued at Washington, D.C., August 14, 1979.

Interstate Commerce Commission.

Joel E. Burns,
Agent.

BILLING CODE 7035-01-M

Fourth Section Application for Relief

August 24, 1979

This application for long-and-short-haul relief has been filed with the I.C.C. Expedited handling of the application has been granted.

FSA 43740, Southwestern Freight Bureau, Agent No. B-23, reduced rates on furniture from stations in Southern Territory to stations in Southwestern Territory published in Supplement 251 to Tariff ICC SWFB 2007-H to be effective September 19, 1979 and to expire with September 30, 1979. Grounds for relief—motor competition and improved car utilization. Authority has been requested to advance effective date to earliest date possible. Protests against grant of relief are due at the offices of the Commission, Suspension and Fourth Section Board, in Washington, D.C., not later than noon, September 6, 1979. Telegraphic filing with indication of notarization is acceptable.

By the Commission,
Agatha L. Mergenovich,
Secretary.

[FR Doc. 79-26400 Filed 8-28-79, 8:45 am]
BILLING CODE 7035-01-M

[No. MC-129701 (Sub-No. 7) F]

Operating Rights Application; Jasper Furniture Forwarding, Inc., Extension—Santa Claus, IN (Huntingburg, IN)

Decided: August 16, 1979.

Applicant seeks a certificate of public convenience and necessity transporting general commodities (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in

bulk, and those requiring special equipment), between Evansville and Indianapolis, IN, Louisville, Owensboro, and Princeton, KY, Cincinnati, OH, Chicago, IL, and the facilities of Soundesign Corp., at or near Santa Claus, IN, restricted to the transportation of traffic having a prior or subsequent movement by rail. The application is opposed by Intermodal Transportation Services, Inc., and R-W Service System, Inc., motor common carriers.

The application is supported by Soundesign Corp. of Santa Claus, a major manufacturer of phonographs and stereo systems. Soundesign requires the services of a carrier to transport its finished products from its Santa Claus plant to rail facilities at Evansville, Indianapolis, Louisville, Owensboro, Princeton, Cincinnati, and Chicago (hereinafter rail facilities). From these points the goods are moved in trailer-on-flatcar or container-on-flatcar service to points throughout the country. Similarly, shipper requires the movement of supplies and materials from these rail facilities to its Santa Claus plant.

Shipper estimates that 1,200 trailer loads of supplies and materials will move to its facility in 1979 and an equal number of trailer loads of product will move outbound. If this application is granted, applicant will be tendered 80 to 90 percent of this traffic, which is now moving by a combination of motor common carrier, private carriage, and rail. Shipper argues existing motor carriers lack either the capacity or the willingness to satisfy its requirements. Regular-route common carriers are reluctant to transport traffic having a prior or subsequent rail movement, and shipper's private carriage operation is burdened. Shipper has previously supported carriers seeking authority between applicant's facility and Cincinnati and Louisville.

Applicant will provide a short-haul shuttle service moving containers and piggyback trailers both empty and loaded from shipper's facility to the rail facilities and vice-versa.

A large percentage of shipper's inbound materials arrive in foreign owned containers which may not be used for domestic movements. In addition, the number of inbound loads moving in piggyback trailers is insufficient to provide shipper with an adequate supply of piggyback trailers for outbound movements. Because of these equipment imbalances and the need to return equipment to the railroads as expeditiously as possible, applicant argues it requires the authority to transport general commodities between the points for which authority is sought. This broad grant would allow applicant the flexibility of filling empty

equipment with the freight of other shippers, thus preventing empty, unproductive movements.

Protestant Intermodal is authorized, as here pertinent, to transport general commodities, with named exceptions, having a prior or subsequent movement by rail between points in Indiana, on the one hand, and, on the other, Cincinnati. It also holds temporary authority between Louisville and points in Indiana. Intermodal has not "recently" been serving shipper, and has no objection to a grant of radial authority from and to shipper's facility at Santa Claus. Protestant argues shipper has not demonstrated the movement of any traffic other than that moving from and to its plant.

Protestant R-W is authorized, as here pertinent, to transport the involved commodities between Chicago and Indianapolis, and between Chicago and Cincinnati. Protestant is not authorized to serve Santa Claus. Protestant is ready to serve shipper within the confines of its authority, but argues applicant is seeking "non-radial" authority when the only support is for "radial" authority.

Applicant has demonstrated that shipper has a substantial volume of phonographs, stereo systems, and stereo components moving from shipper's Santa Claus plant to railroad facilities at the named cities, and materials and supplies used in the manufacture of the above commodities moving from the rail facilities, in the reverse direction. Shipper has demonstrated the inadequacy of existing service and applicant has, through its service under temporary authority, demonstrated its ability to provide the required service.

Applicant justifies its request for general commodity, non-radial authority by arguing its must have the flexibility to balance the flow of equipment moving to shipper's plant. However, applicant has failed to present evidence of any traffic other than that of the supporting shipper.

While we recognize that authorizing general commodity, non-radial authority will allow applicant greater flexibility and present the possibility of more efficient and economical operations, applicant has failed to present a prima facie case with respect to the broad authorization sought. Accordingly, we have limited the grant of authority set forth in the appendix to that for which a need has been shown; that is, generally, the outbound movement of shipper's products, and inbound movement of the supplies and equipment used in the manufacture of those products, and the movement of empty containers, trailers, and trailer chassis between the shipper's plant and the rail facilities.

Because the authority granted does not conflict with that of protestant R-W

System and because protestant Intermodal has no objection to a grant of radial authority from and to the shipper's plant, we need not discuss protestants' evidence.

Applicant has demonstrated a need for the movement of empty containers, trailers, and trailer chassis between shipper's plant and the rail facilities. Because these commodities are not embraced by the "general commodities" with exceptions description employed in the **Federal Register** publication of the authority sought, and because it is possible persons who have relied upon the notice as published may have an interest in and would be prejudiced by the lack of notice of the authority described in the appendix, a notice of the authority actually granted will be published in the **Federal Register** and issuance of a certificate in this proceeding will be withheld for a period of 30 days from the date of such publication. During that period, any proper party in interest may file an appropriate petition for leave to intervene in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

We find:

The present and future public convenience and necessity require operation by applicant, performing the service described in the appendix. Applicant is fit, willing, and able properly to perform such service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. This decision does not not significantly affect the quality of the human environment. An appropriate certificate should be granted.

It is ordered:

The application is granted to the extent set forth in the appendix. Operations may begin only following the service of a *certificate* which will be issued if applicant complies with the following requirements set forth in the Code of Federal Regulations: insurance (49 CFR 1043), designation of process agent (49 CFR 1044), and tariffs (49 CFR 1310).

Compliance with these requirements must be made within 90 days after the date of service of this decision or the grant of authority shall be void.

By the Commission, Review Board Number 1, Members Carleton, Joyce, and Jones (Member Carleton did not participate).
Agatha L. Mergenovich,
Secretary.

APPENDIX

Authority to conduct the following operations will be issued in an appropriate document. This decision does not constitute authority to operate.

To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *phonographs, stereo systems, and stereo components* from the facilities of Soundesign Corp., at or near Santa Claus, IN, to Evansville and Indianapolis, IN, Louisville, Owensboro, and Princeton, KY, Cincinnati, OH, and Chicago, IL, (2) *materials and supplies used in the manufacture of the commodities in (1) above*, in the reverse direction, and (3) *empty containers, trailers, and chassis* between the facilities of Soundesign Corp., at or near Santa Claus, IN, on the one hand, and, on the other, Evansville and Indianapolis, IN, Louisville, Owensboro, and Princeton, KY, Cincinnati, OH, and Chicago, IL, restricted in (1), (2), and (3) above to the transportation of traffic having a prior or subsequent movement by rail.

Condition:

The above service is subject to prior publication in the *Federal Register* of a notice of the authority actually granted by this decision.

[Volume No. 29]

Petitions, Applications, Finance Matters (Including Temporary Authorities), Alternate Route Deviations, Intrastate Applications, Gateways, and Pack & Crate.

Dated: August 17, 1979.

Petitions for Modification, Interpretation or Reinstatement of Motor Carrier Operating Rights Authority

The following petitions seek modification or interpretation of existing motor carrier operating rights authority, or reinstatement of terminated motor carrier operating rights authority.

All pleadings and documents must clearly specify the suffix numbers (e.g., M1 F, M2 F) where the docket is so identified in this notice.

The following petitions, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR 1100.247). These rules provide, among other things, that a *petition to intervene either with or without leave* must be filed with the Commission within 30 days after the date of publication in the *Federal Register* with a copy being furnished the applicant. Protests to these applications will be *rejected*.

A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that if (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points.

MC 29643 (Sub-7) (M1F), filed March 19, 1979. (Notice of filing of petition to modify certificate.) Petitioner: WALSH TRUCKING SERVICE, INC., 50 Burney Avenue, Massena, NY 13662. Representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York,

NY 10048. Petitioner holds motor *common carrier* certificate in MC 29643 (Sub-7), issued April 28, 1978, which authorizes, as pertinent, the transportation of *general commodities* (usual exceptions), between points in St. Lawrence and Franklin Counties, NY, on the one hand, and, on the other, points in Connecticut, Maryland, Massachusetts, New Jersey, New York, Rhode Island, Delaware, New Hampshire, Vermont, and those points in Pennsylvania on and east of a line beginning at the New York-Pennsylvania State line and extending along U.S. Hwy 11 to junction U.S. Hwy 15, then along U.S. Hwy 15 to the Pennsylvania-Maryland State line, restricted against the transportation (1) of traffic originating at or destined to points in Canada, (2) of milk and milk products, except those in hermetically sealed containers, from and to designated points, and (3) of food and food products, in vehicles equipped with mechanical refrigeration, between designated points. By the instant petition, petitioner seeks to eliminate the first restriction, "restricted against the transportation of traffic originating at or destined to points in Canada."

MC 107403 (Sub-744) (M1F), filed May 7, 1979. (Notice of filing of petition to modify certificate.) Petitioner: MATLACK, INC., 10 W. Baltimore Avenue, Lansdowne, PA 19050. Representative: Allen H. Knouft (same address as petitioner). Petitioner holds motor *common carrier* certificate in MC 107403 (Sub 744) issued October 2, 1968, and revised June 17, 1970, which authorizes the transportation, as pertinent, of *acids and chemicals* (not including liquefied petroleum gases), in bulk, from Lake Charles, LA, and points within 5 miles thereof, to points in Alabama, Arkansas, Florida, Georgia, Mississippi, Oklahoma, Tennessee (except Kingsport), Texas, restricted against the transportation of (1) paints, paint materials, and resins, to Garland, TX, (2) new catalyst, in covered-hopper vehicles, to points in Arkansas, Oklahoma, and Texas, (3) spent catalyst, in covered-hopper vehicles, to points in Arkansas and Oklahoma, (4) soda ash, in hopper-type vehicles, to the plant site of Jefferson Chemical Company, Inc., at Port Neches, TX, (5) barite ore, in tank or hopper-type vehicles, to points in Texas, and (6) nitric acid, to points in Texas within 350 miles of Lake Charles, LA. By the instant petition, petitioner seeks to remove restriction (6) which restricts against the transportation of nitric acid, to points in Texas within 350 miles of Lake Charles,

LA. (Hearing site: Washington, DC, or Philadelphia, PA.)

MC 114552 (Sub-32) (M1F), filed April 17, 1979. (Notice of filing of petition to modify certificate.) Petitioner: SENN TRUCKING COMPANY, P.O. Box 220, Newberry, SC 29108. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., P.O. Box 1240, Arlington, VA 22210. Petitioner holds motor *common carrier* certificate in MC 114552 (Sub-32), issued April 2, 1968, and reissued August 6, 1975, which authorizes the transportation of *citrus pulp, citrus meal, shells, and shell products*, (1) from points in Florida to points in Alabama, South Carolina, those in North Carolina west of U.S. Hwy 1, points in Georgia (except Atlanta, Macon, and Waycross and points in their commercial zones as defined by the Commission), and Tennessee (except Chattanooga and Nashville and points in their commercial zones as defined by the Commission), restricted against the transportation of oyster shells, crushed, from Jacksonville, FL, to those points in Georgia on and north of U.S. Hwy 80, and (2) from points in Mobile county, AL, to points in Georgia, North Carolina, South Carolina, and Tennessee. By the instant petition, petitioner seeks to eliminate the exceptions against serving particular points and also to eliminate the restriction, and make the certificate read as follows: *citrus pulp, citrus meal, shells, shell products*, (1) from points in Florida to points in Alabama, Georgia, North Carolina, South Carolina, and Tennessee, and (2) from points in Mobile County, AL, to points in Georgia, North Carolina, South Carolina, and Tennessee.

MC 114552 (Sub-158) (M1F) (Notice of filing of petition to modify certificate), filed May 21, 1979. Petitioner: SENN TRUCKING COMPANY, a corporation, Newberry, SC 29108. Representative: Gerald E. Jessup, 3426 North Washington Boulevard, P.O. Box 1240, Arlington, VA 22210. Petitioner holds a motor *common carrier* Certificate in MC 114552 (Sub-158F) issued March 13, 1979, to transport in interstate or foreign commerce, over irregular routes, *Commodities of the type dealt in by retail home improvement and home furnishing and lumber stores* (except in bulk), Between points in AL, AR, DE, FL, GA, IL, IN, KY, LA, MD, MS, NJ, NC, OH, PA, SC, TN, VA, WV and DC, restricted to the transportation of traffic originating at or destined to the facilities of the Wickes Corporation in the above-named territories. By the instant petition, petitioner seeks to modify the

authority as follows: removal of the above restriction.

MC 115215 (Sub-13) (M1F) (Notice of filing of petition to modify certificate), filed March 1, 1979. Petitioner: NEW TRUCK LINES, INC., P.O. Box 639, Perry, FL 32347. Representative: Sol H. Proctor, 1101 Backstone Bldg., Jacksonville, FL 32202. Petitioner holds *common carrier* authority in MC 115215 (Sub-13), served August 11, 1975, and expires March 7, 1980. Said certificate authorizes the transportation over irregular routes, of (1) *explosives, explosive components, and explosive products* (except commodities in bulk and commodities because of their size or weight require the use of special equipment), from the plant site of Martin Electronics, Inc., at or near Perry, FL, to points in AL, AZ, AR, CA, CO, DE, FL, GA, IL, IN, IA, KS, KY, LA, MD, MA, MI, MN, MS, MO, MT, NE, NV, NJ, NM, NY, NC, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, WA, WV, and WI; and (2) *Materials and supplies* used in the manufacture of the above-named commodities (except commodities in bulk and commodities because of their size or weight require the use of special equipment), in the reverse direction. By this instant petition, petitioner seeks to modify the territorial description in (1) above to read "from points in Taylor County, FL," in lieu of from the plant site of Martin Electronics, Inc., at or near Perry, FL.

MC 116323 (M1F), filed April 9, 1979. (Notice of filing of petition to modify certificate.) Petitioner: STECALL MILLING CO., INC., P.O. Box 607, Marshville, NC 28103. Representative: Sol H. Proctor, 1101 Blackstone Bldg., Jacksonville, FL 32202. Petitioner holds motor *common carrier* certificate in MC 116323, issued June 10, 1957, and reissued November 17, 1975, which authorizes, as pertinent, *lumber and forest products*, except veneer and veneer products and plywood and plywood products, (1) from those points in North Carolina on and west of U.S. Hwy 301 to points in Georgia, Florida, Alabama, and South Carolina, and (2) from points in South Carolina to points in Georgia, Florida, Alabama, and those points in North Carolina on and west of U.S. Hwy 301. By the instant petition, petitioner seeks to remove the restriction as to the transportation of veneer and veneer products and plywood and plywood products.

MC 123233 (Sub-11) (M1F), filed March 15, 1979. (Notice of filing of petition to modify certificate.) Petitioner: PROVOST CARTAGE INC., 7887, Rue Grenache, Ville D'Anjou, Quebec, Canada H1J 1C4. Representative: J. P.

Vermette (same address as petitioner.) Petitioner holds motor *common carrier* certificate in MC 123233 (Sub-11), issued October 19, 1964, which authorizes the transportation of *zinc slabs and ingots*, from the port of entry on the United States-Canada Boundary line located at or near Fort Covington, NY, to Massena, NY. By the instant petition, petitioner seeks to have his certificate modified to read as follows: *zinc slabs and ingots*, from the ports of entry on the international boundary line between the United States and Canada, to Massena, NY.

MC 123233 (Sub-12) (M1F), filed March 15, 1979. (Notice of filing of petition to modify certificate.) Petitioner: PROVOST CARTAGE INC., 7887, Rue Grenache, Ville D'Anjou, Quebec, Canada H1J 1C4. Representative: J. P. Vermette (same address as petitioner.) Petitioner holds motor *common carrier* certificate in MC 123233 (Sub-12), issued August 25, 1965, which authorizes the transportation of *alcoholic beverages*, in bulk, in tank vehicles, from the ports of entry on the United States-Canada Boundary line at Champlain, Trout River, Ogdensburg, Alexandria Bay, and Buffalo, NY, and Detroit, MI, to Pekin, IL, Owensboro and Bardstown, KY, Pennington, NJ, and New York, NY, restricted to the transportation of traffic originating at points in the Province of Quebec, Canada. By the instant petition, petitioner seeks to modify his certificate to read as follows: *alcoholic beverages*, in bulk, in tank vehicles, from the ports of entry on the international boundary line between the United States and Canada to Pekin, IL, Owensboro, KY, Bardstown, KY, Pennington, NJ, and New York, NY.

MC 123233 (Sub-16) (M1F), filed March 15, 1979. (Notice of filing of petition to modify certificate.) Petitioner: PROVOST CARTAGE INC., 7887, Rue Grenache, Ville D'Anjou, Quebec, Canada H1J 1C4. Representative: J. P. Vermette (same address as petitioner.) Petitioner holds motor *common carrier* certificate in MC 123233 (Sub-16), issued February 11, 1966, which authorizes the transportation of *limestone*, in bulk, in tank and hopper vehicles, from points in VT to ports of entry on the United States-Canada Boundary line located at or near Champlain and Rouses Point, NY, and Highgate Springs, Derby Line, and Norton, VT, restricted to the transportation of traffic destined to points in the Province of Quebec, Canada. By the instant petition, petitioner seeks to modify the certificate to read as follows: *limestone*, in bulk, in tank vehicles, from points in VT to the ports of entry on the international

boundary line between the United States and Canada.

MC 123233 (Sub-20) (M1F), filed March 15, 1979. (Notice of filing of petition to modify certificate.) Petitioner: PROVOST CARTAGE INC., 7887, Rue Grenache, Ville D'Anjou, Quebec, Canada H1J 1C4. Representative: J. P. Vermette (same address as petitioner). Petitioner holds motor *common carrier* certificate in MC 123233 (Sub-20), issued November 25, 1968, which authorizes the transportation of *starch*, in bulk, in tank vehicles, from Massena, NY, to the port of entry on the United States-Canada boundary line located at or near Roosevelttown, NY. By the instant petition, petitioner seeks to modify the certificate to read as follows: *starch*, in bulk, in tank vehicles, from Massena, NY, to the ports of entry on the international boundary line between the United States and Canada.

MC 123233 (Sub-25) (M1F), filed March 15, 1979. (Notice of filing of petition to modify certificate.) Petitioner: PROVOST CARTAGE INC., 7887, Rue Grenache, Ville D'Anjou, Quebec, Canada H1J 1C4. Representative: J. P. Vermette (same address as petitioner). Petitioner holds motor *common carrier* certificate in MC 123233 (Sub-25), issued May 11, 1971, which authorizes the transportation of *chemicals*, in bulk, in tank vehicles, from ports of entry on the United States-Canada Boundary line at or near Trout River, Alexandria Bay, Roosevelttown, Ogdensburg, and Champlain, NY, Highgate Springs, Derby Line, and Norton, VT, Jackman, Van Buren, Houlton, Vanceboro, and Calais, ME, to Livermore Falls, Rumford, Lincoln, Great Works, and Cumberland Mills, ME, and points in VT, NH, MA, CT, RI, NY, NJ, DE, MD, PA, and OH, restricted to the transportation of traffic originating at the plant site of Brockville Chemical Industries, Limited, at Maitland, Ontario, Canada. By the instant petition, petitioner seeks to modify the certificate to read as follows: *chemicals*, in bulk, in tank vehicles, from the ports of entry on the international boundary line between the United States and Canada, to Livermore Falls, Rumford, Lincoln, Great Works, and Cumberland Mills, ME, and points in VT, NH, MA, CT, RI, NY, NJ, DE, MD, PA, and OH.

MC 123233 (Sub-50) (M1F), filed March 15, 1979. (Notice of filing of petition to modify certificate.) Petitioner: PROVOST CARTAGE INC., 7887, Rue Grenache, Ville D'Anjou, Quebec, Canada H1J 1C4. Representative: J. P. Vermette (same address as applicant). Petitioner holds motor *common carrier* certificate in MC 123233 (Sub-50), issued

September 11, 1974, which authorizes the transportation of *liquid chemicals*, in bulk, in tank vehicles, from ports of entry on the United States-Canada Boundary line located in ME, NY, and VT, to points in CT, DE, ME, MD, MA, NH, NJ, NY, PA, OH, RI, and VT, restricted to the transportation of traffic originating at the plant site of Canadian Industries Limited or Cornwall Chemicals Limited at Cornwell, Ontario, Canada.

By the instant petition, petitioner seeks to modify the certificate to read as follows: *liquid chemicals*, in bulk, in tank vehicles, from the ports of entry on the international boundary line between the United States and Canada to points in CT, DE, ME, MD, MA, NH, NJ, NY, PA, OH, RI, and VT.

MC 133532 (Sub-1) (M1F) (Notice of filing of petition to modify permit) filed May 29, 1979. Petitioner: BENRUS TRUCKING DIVISION, INC., Box 2665, Newburgh, NY 12550. Representative: Ronald I. Shapps, Esq., 450 Seventh Avenue, New York, NY 10001. Petitioner holds a motor *contract carrier* Permit in MC 133532 (Sub-1), issued February 18, 1970, to transport in interstate or foreign commerce, over irregular routes, (1) *Pallet and storage racks, shelving, and shelving sections*, (2) *Metal tubing, panels, grating, and angles*, (3) *accessories, supplies and equipment* used in the installation and erection of the commodities described in (1) and (2) above, and (4) *advertising materials and displays* used in connection with the commodities described in (1) and (2) above, from Newburgh, NY, and points in the New York, NY Commercial Zone, as defined in the fifth supplemental report in *Commercial Zones and Terminal Areas*, 53 M.C.C. 451, within which local operations may be conducted under the exemption provided by section 203(b)(8) of the Act (the exempt zone), to points in AL, CT, DE, FL, GA, IL, IN, KY, MD, MA, MI, MS, NJ, NY, NC, OH, PA, RI, SC, TN, VA, WV, WI, and DC, with no transportation for compensation on return except as otherwise authorized.

Restriction: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts, with the following shippers: Dexion Incorporated, and Dexion Manufacturing Co., Inc.

By the instant petition, petitioner seeks to modify the authority as follows: (1) to allow for the means of production (materials and supplies), to be brought in the reverse direction of what is now strictly outbound freight, and (2) to indicate that Dexion, Inc., the contract

shipper is now a wholly owned subsidiary of Interlake, Inc.

Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the Federal Register.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission on or before September 28, 1979. Such pleading shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 128273 (Sub-299F) (Republication), filed April 14, 1978, published in the FR issue of July 27, 1978, and republished this issue: Applicant: OLYMPIC FREIGHTWAYS, INC., 1801 West 31st Place, Chicago, IL 60608. Applicant's representative: Elden Corban (Same as above). A Decision of the Commission, *Review Board No. 3*, decided March 26, 1979, and served April 18, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, transporting *animal food and animal food ingredients* (except commodities in bulk, in tank vehicles), from the facilities Star-Kist Foods, Inc., at Perham, MN, and Muscatine, IA, to points in the United States (except Alaska and Hawaii), restricted to the transportation of shipments originating at the named facilities of the shipper; that applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. The purpose of this republication is to change the route description and add the restriction.

MC 139673 (Sub-4F) (Republication), filed July 17, 1978, published in the FR issue of September 12, 1978, and republished this issue: Applicant: JAMES H. STEGER, d.b.a. STEGER BUS LINES, 4150 Aldebaran Way, Mobile, AL 36609. Representative: Robert E.

Tate, P.O. Box 517, Evergreen, AL 36401. A decision of the Commission, *Review Board No. 2*, decided May 23, 1979, and served June 22, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, over irregular routes, as a *common carrier*, by motor vehicle, transporting passengers and their baggage, in charter operations, beginning and ending at Mobile and Prichard, AL, and extending to points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas (except Alabama); that applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. The purpose of this republication is to add "Prichard, AL" to the route description.

MC 142692 (Sub-4F) (Republication), filed March 13, 1978, published in the FR issue of May 11, 1978, and republished in this issue: Applicant: OHIO VALLEY REGIONAL TRANSPORTATION AUTHORITY, a public transit operator, P.O. Box 311, Wheeling, WV 26003. Representative: Terry A. LaBar, P.O. Box 311, Wheeling, WV 26003. A Decision of the Commission, *Review Board No. 3*, decided April 9, 1979, and served April 25, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, transporting passengers and their baggage, in charter operations, beginning and ending at Wheeling, WV, and points in its commercial zone, and extending to points in Pennsylvania, Ohio, and West Virginia; that applicant is fit, willing, and able properly to perform this service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. The purpose of this republication is to change the commodity and route descriptions.

MC 143456 (Sub-3F) (Republication), filed September 11, 1978, published in the FR issue of November 28, 1978, and republished in this issue: Applicant: THEODORE ROSSI TRUCKING CO., INC., P.O. Box 332, Barre, VT, 05641. Representative: William L. Rossi (same address as applicant). A Decision of the Commission, *Review Board No. 3*, decided August 1, 1979, and served August 8, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign

commerce, as a *contract carrier*, by motor vehicle, over irregular routes, transportation of (1) *stone, stone working materials, stone working equipment, and stone working supplies*, between the facilities of Rock of Ages Corporation, at Barre, Bethel, and Graniteville, VT, and the facilities of Rock of Ages Building Granite Corporation at Concord, NH, (2) *building stone* (a) from the facilities of Rock of Ages Corporation, at Barre, Bethel, and Graniteville, VT, to points in Maryland, Ohio, Pennsylvania, Virginia, and the District of Columbia, and (b) from the facilities of Rock of Ages Building Granite Corporation, at Concord, NH, to points in Texas, and those in the United States in and east of Wisconsin, Illinois, Kentucky, Tennessee, Mississippi, and Louisiana, and (3) *rough granite and stone working manufacturing materials, equipment, and supplies*, from points in Texas, and those in the United States in and east of Wisconsin, Illinois, Kentucky, Tennessee, Mississippi, and Louisiana, to the facilities of Rock of Ages Corporation, at Barre, Bethel, and Graniteville, VT, and the facilities of Rock of Ages Building Granite Corporation at Concord, NH, restricted in (1), (2), and (3) to service under a continuing contract(s) with Rock of Ages Corporation, of Barre, VT, or Rock of Ages Building Granite Corporation, of Concord, NH, will be consistent with the public interest and the national transportation policy. The purpose of this republication is to modify the authority as originally published.

Motor Carrier Operating Rights Applications

The following applications, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's *General Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a *petition to intervene either with or without leave* must be filed with the Commission within 30 days after the date of publication in the Federal Register with a copy being furnished the applicant. Protests to these applications will be rejected.

A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that it (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities

of particular shippers, from and to, or between, any of the involved points.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(l). In deciding whether to grant leave to intervene, the Commission considers, among other things, whether petitioner has (a) solicited the traffic or business of those persons supporting the application, or, (b) where the identity of those supporting the application is not included in the published application notice, has solicited traffic or business identical to any part of that sought by applicant within the affected marketplace. Another factor considered is the effects of any decision on petitioner's interests.

Samples of petitions and the text and explanation of the intervention rules can be found at 43 FR 50908, as modified at 43 FR 60277. Petitions not in reasonable compliance with these rules may be rejected. Note that Rule 247(e), where not inconsistent with the intervention rules, still applies. Especially refer to Rule 247(e) for requirements as to supplying a copy of conflicting authority, serving the petition on applicant's representative, and oral hearing requests.

Superhighway

MC 1515 (Sub-262F), filed April 2, 1979. Applicant: GREYHOUND LINES, INC., Greyhound Tower, Phoenix, AZ 85077. Representative: W. L. McCracken (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over regular routes, transporting *passengers and their baggage, and express and newspapers*, in the same vehicle with passengers, (1) between Elmhurst, IL, and Madison, WI, from Elmhurst, IL over Interstate Hwy 90 to junction U.S. Hwy 12, then over U.S. Hwy 12 to Madison, WI, and return over the same route, (2) between junction IL Hwy 25 and Interstate Hwy 90 north of Elgin, and junction IL Hwy 31 and Interstate 90 north of Elgin, from junction IL Hwy 25 and Interstate Hwy 90 over IL Hwy 25 to Elgin, IL, then over IL Hwy 31 to junction Interstate Hwy 90, and return over the same route, (3) between junction unnumbered hwy and Interstate Hwy 90 south of Belvidere, IL, and Belvidere, IL, over unnumbered hwy, (4) between junction unnumbered hwy and Interstate Hwy 90 north of Cherry Valley, IL and Cherry Valley, IL, over unnumbered hwy, (5) between junction unnumbered hwy and Interstate Hwy 90 east of Rockford, IL and Rockford, IL, over unnumbered hwy, (6) between junction IL Hwy 75 and Interstate Hwy 90 near the IL-WI State

line and Beloit, WI, from junction IL Hwy 75 and Interstate Hwy 90 over IL Hwy 75 to junction U.S. Hwy 51, then over U.S. Hwy 51 to Beloit, WI, and return over the same route, and (7) between junction WI Hwy 11 and Interstate Hwy 90 east of Janesville, WI and Janesville, WI, over WI Hwy 11, serving in (1) through (7) above all intermediate points.

Note.—Applicant requests that MC 1515 Deviation No. 163 be coincidentally cancelled upon grant of the requested authority. Common control may be involved.

Permanent Authority Decisions; Decision-Notice

Decided: August 15, 1979.

The following broker, freight forwarder or water carrier applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the Federal Register. Failure to file a protest within 30 days will be considered as a waiver of opposition to the application. A protest under these rules shall comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, as specifically noted below), and specify with particularity the facts, matters, and things relied upon. The protest shall not include issues or allegations phrased generally. A protestant shall include a copy of the specific portion of its authority which it believes to be in conflict with that sought in the application, and describe in detail the method whether by joinder interline, or other means—by which protestant would use this authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission. A copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, the request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intent timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an

application under the procedures of the Commission will result in its dismissal. Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service is either (a) required by the public convenience and necessity, or, (b) will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly noted, this decision is neither a major environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 1, Members Carlson, Jones, and Joyce. Member Jones not participating.

Freight Forwarder Authority

FF-515F, filed March 30, 1979. Applicant: CAL HONO FREIGHT FORWARDERS, INC., 3532 Katella Ave., Los Alamitos, CA 90720. Representative:

David P. Christianson, 707 Wilshire Blvd., Suite 1800, Los Angeles, CA 90017. Authority granted to operate as a *freight forwarder*, in interstate commerce of food, between points in the United States, including HI, but excluding AK, restricted to the use of facilities of common carriers by rail and motor vehicle. (Hearing site: Honolulu, HI.)

Broker Authority

MC 130199 (Sub-9F), filed June 15, 1979. Applicant: GADABOUT TOURS, INC., d.b.a. ANDERSON TRAVEL SERVICE, 700 East Tahquitz-McCallum Way, Palm Springs, CA 92262. Representative: L. C. Major, Jr., Overlook Building, Suite 400, 6121 Lincoln Road, Alexandria, VA 22312. To engage in operations, in interstate or foreign commerce, as a *broker*, at Phoenix, AZ, and Oceanside, CA, in arranging for the transportation, by motor vehicle, of *passengers and their baggage*, in special and charter operations, in round-trip tours, between points in the United States, including AK and HI. (Hearing site: Phoenix, AZ, or Palm Springs, CA.)

MC 130578F, filed June 13, 1979. Applicant: KARL STORCH, d.b.a. SUN TOURS, 2420 Broadway, NE, Albuquerque, NM 87103. Representative: Michael Casey, 313 Sixth Street, Albuquerque, NM 87103. To engage in operations, in interstate or foreign commerce, as a *broker*, at Albuquerque, NM, in arranging for the transportation, by motor vehicle, of *passengers and their baggage*, in special and charter operations, beginning and ending at points in Bernalillo and Sante Fe Counties, NM, and extending to points in the United States, including AK and HI. (Hearing site: Albuquerque, NM.)

MC 130579F, filed June 13, 1979. Applicant: MARILYN M. POTTER, d.b.a. VAGABOND COACH TOURS, 3725 3rd Street, NW, Rochester, MN 55901. To engage in operations, in interstate or foreign commerce, as a *broker*, at Rochester, MN, in arranging for the transportation by motor vehicle, of *passengers and their baggage*, in round-trip charter operations, beginning and ending at points in that part of MN bounded by a line beginning at the WI-MN State line, and extending over U.S. Hwy 61 to junction MN Hwy 19, then over MN Hwy 19 to junction MN Hwy 13, then over MN Hwy 13 to Albert Lea, then over U.S. Hwy 69 to the MN-IA to points in the United States including AK, but excluding HI. (Hearing site: Minneapolis, MN.)

MC 144537 (Republication), filed April 5, 1978, published in the FR August 17, 1978 and July 16, 1979, and republished

this issue. Applicant: MARVIN Y. NEELEY and NANCY B. NEELEY, a partnership d.b.a. SHUN PIKE TOURS, 100 South County Line Road, Telford, PA. 18969. Representative: Dennis Helf, Sixth and Chestnut Streets, Perkasie, PA. 18944. A decision of the Commission, Administrative Law Judge, dated April 6, 1979, and served April 13, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate and foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, transporting, passengers, including baggage of passengers when transported in the same vehicle, in non-scheduled, door to door service in charter operations, limited to the transportation of not more than twelve passengers in any one vehicle, not including the driver thereof, between points in Bucks, Montgomery, Lehigh and Northampton Counties, PA., on the one hand, and, on the other, La Guardia Airport and John F. Kennedy International Airport, New York, NY, that applicant is fit, willing and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity and territorial description.

Finance Applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to Sections 11343 (formerly Section 5(2)) or 11349 (formerly Section 210a(b)) of the Interstate Commerce Act.

An original and one copy of protests against the granting of the requested authority must be filed with the Commission on or before September 28, 1979. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's *General Rules of Practice* (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

Each applicant states that approval of its application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation Act of 1975.

MC F-14005F, Applicants: BOWMAN TRANSPORTATION, INC., P.O. Box 17744, Atlanta, GA 30316 and

CONNECTICUT FAST FREIGHT, INC., 1441 No. Colony Road, Meriden, CT 06450. Representative: Maurice F. Bishop, 601-09 Frank Nelson Bldg., Birmingham, AL 35203. Application under Section 5(1) of the Interstate Commerce Act for approval of an agreement for the pooling of services and traffic in interstate commerce to and from points in CT. Each of the applicants is a certificated motor common carrier. Connecticut Fast Freight, Inc. holds and operates under Certificate MC-120152 and subs, authorizing transportation of general commodities, with usual exceptions, serving multiple points in CT. Bowman Transportation, Inc. holds certificate MC-94201 and subs, authorizing transportation of general commodities, with usual exceptions, in the States of MA, RI, CT, NY, NJ, PA, KY, DE, VA, NC, SC, GA, FL, AL, TN, OH, IA, IL, MO, AR, MS, LA, KS, OK, TX and DC, and special commodities in states east of the Mississippi River. Applicants propose that traffic will be interlined or pooled at Meriden, CT and at other terminal points served by the parties as may be agreed. The proposal contemplates that Connecticut Fast Freight, Inc. will generally pickup and deliver freight in CT, but Bowman Transportation, Inc. has the right and will also originate and deliver freight, as is feasible. Copy of the application and the pooling agreement are on file in the Offices of the Commission for inspection of any interested party. Any party desiring to intervene in this proceeding must file a petition under Rule 247. Petitions not in compliance with the requirements of the rules will be rejected. An original and one copy of petitions to intervene shall be filed with the Commission and one copy shall be served concurrently upon applicant's representative. The application states that it does not involve a major action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975. In the absence of legally sufficient petitions for intervention filed within 30 days of publication, approval of the application will be entered.

MC F-14007F, Applicants: BOWMAN TRANSPORTATION, INC., P.O. Box 17744, Atlanta, GA 30316 and ART LOU TRUCKING, INC., Wood End Road, Stratford, CT 06497. Representative: Maurice F. Bishop, 601-09 Frank Nelson Bldg., Birmingham, AL 35203.

Application under Section 5(1) of the Interstate Commerce Act for approval of an agreement for the pooling of services and traffic in interstate commerce to

and from points in CT. Each of the applicants is a certificated motor common carrier. Art Lou Trucking, Inc., holds and operates under Certificate MC-98998 and subs, authorizing transportation of general commodities, with usual exceptions, serving multiple points in CT. Bowman Transportation, Inc. holds certificate MC-94201 and subs, authorizing transportation of general commodities, with usual exceptions, in the States of MA, RI, CT, NY, NJ, PA, KY, DE, VA, NC, SC, GA, FL, AL, TN, OH, IA, IL, MO, AR, MS, LA, KS, OK, TX and DC, and special commodities in states east of the Mississippi River. Applicants propose that traffic will be interlined or pooled at Stratford, CT and at other terminal points served by the parties as may be agreed. The proposal contemplates that Art Lou Trucking, Inc. will generally pickup and deliver freight in CT, but Bowman Transportation, Inc. has the right and will also originate and deliver freight, as is feasible. Copy of the application and the pooling agreement are on file in the Offices of the Commission for inspection of any interested party. Any party desiring to intervene in this proceeding must file a petition under Rule 247. Petitions not in compliance with the requirements of the rules will be rejected. An original and one copy of petitions to intervene shall be filed with the Commission and one copy shall be served concurrently upon applicant's representative. The application states that it does not involve a major action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975. In the absence of legally sufficient petitions for intervention filed within 30 days of publication, approval of the application will be entered.

Proposed Federal Register Notice

MC F-14040F. Authority sought for acquisition of control of EAST SOUTH EXPRESS, INC., 3070 Nicholas Drive, N.E., Statesman Industrial Park, Roanoke, Virginia 24034, through acquisition of its capital stock by United Transport Industries, Inc., Post Office Box 1161, Akron, Ohio 44306, and control of such rights and properties by John J. Brutvan through the acquisition. Applicants' attorney: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. Operating rights sought to be controlled under MC 138773 authorize *common carrier service*, over irregular routes, transporting *electric controllers and instruments* requiring special equipment or special handling by reason of size or weight, and *parts and*

attachments therefor when moving in connection therewith, from points in Roanoke County, VA to points in the U.S. (except AK, HI, VA, NC, SC, GA, WA, OR, CA, MT, ID, UT, NV, and FL); and authority sought in pending applications in MC 138773 Sub 2 F and MC 138773 Sub 3 F. United Transport Industries, Inc. is a non-carrier which controls Miller Transfer & Rigging Co., an irregular route common and contract carrier of specified commodities in 48 states. Application has not been filed for temporary authority.

MC F-14060F, filed June 15, 1979.

Authority sought for control by NATIONAL FREIGHT, INC., 57 West Park Avenue, Vineland, NJ, 08360, of Northeastern Trucking Company, P.O. Box 26276, Charlotte, North Carolina, 28213. Operating rights sought to be controlled: *general commodities*, except those of unusual value and except Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between points in Philadelphia, Pa.; between Philadelphia, Pa., on the one hand, and, on the other, Rahway and Newark, N.J., and New York, N.Y.; between points and specified parts of North Carolina and Baltimore, Md., Bridgeton, N.J., certain points in Virginia and Pennsylvania. *General commodities*, except those of unusual value, Class A and B explosives, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between Philadelphia, Pa., and certain points in Connecticut; and certain points in New Jersey and Pennsylvania; between Spartanburg, S.C. and Darlington, S.C. serving specified intermediate and off-route points; between the North Carolina-South Carolina state line on U.S. highway 521 and Lancaster, S.C., serving no intermediate points. *General commodities*, except those requiring special equipment, household goods as defined by the Commission, cement in bulk, and unmanufactured leaf tobacco; between points in specified parts of North Carolina; *general commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading; between points within 50 miles of Fairmont, N.C.; *general commodities*, except those of unusual value, and except dangerous explosives, household

goods (when transported as a separate and distinct service in connection with so-called "household movings"), commodities in bulk, commodities requiring special equipment and those injurious or contaminating to other lading; between points and places in Sumter County, S.C., and Augusta, Atlanta and Columbus, Ga.; *general commodities*, except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, over irregular routes: between points and places in Georgia within fifteen miles of Savannah, Ga.; including Savannah. *Pianos*, other than pianos included within the description of household goods, as defined by the Commission, from Chicago, Ill., New York, N.Y., Newark, N.J., and Philadelphia, Pa., to points in South Carolina; *cotton textiles*, from Yadkin, Norwood, Albemarle, and Salisbury, N.C., to Baltimore, Md., and points in Pennsylvania on and east of U.S. Highway 15; *lawn mowers*, from Primos, Pa., to points in North Carolina and South Carolina; *used pianos*, other than used pianos included within the description of household goods as defined by the Commission, from points in Pennsylvania (except Philadelphia) to points in South Carolina; *fertilizer and fertilizer materials* (other than in bulk), from Charlotte, N.C., to points in that part of Tennessee on and east of U.S. Highway 127 except Knoxville, Tenn. *Pulpboard and Fiberboard*, not corrugated or indented, from the plant site of the Riegel Paper Corp., at Riegelwood, N.C., to Fayetteville, Laurinburg, Raleigh, and Rocky Mount, N.C.; *fertilizer*, from points in Charleston County, S.C., to points in Chesterfield, Darlington, Dillon, Marion and Marlboro Counties, S.C. *Cotton in bales and livestock*, between points in South Carolina; *textile machinery, equipment and supplies*, between points in Spartanburg County, S.C., and between points in Spartanburg County, S.C. and other points in South Carolina; *unfinished cotton piece goods*, between points in South Carolina and certain plants in Aiken, Anderson, Darlington, Greenville, Greenwood, Spartanburg and York Counties, S.C.; *plywood*, from Weldon, N.C., to Nashua, N.H.; *textiles* from Farmville, N.C. to Pen Argyl, Pa.; *paper*, from Plymouth, N.C., to points in Connecticut, Massachusetts, Rhode Island, New Jersey, New York (except those points on Long Island east of the

New York, N.Y., commercial zone as defined by the Commission), and certain points in Pennsylvania; *animal and pet food* (except in bulk, in tank vehicles), from Woburn, Boston and Lawrence, Mass., to points in Virginia, Tennessee, and Kentucky; *animal feed*, except in bulk, from the plant site at or near Golden Meadow, La., and storage facilities at or near Lockport, La., to points in Alabama, Georgia, Florida, North Carolina, South Carolina, Virginia, Tennessee, Kentucky, Ohio, Indiana, West Virginia, Maryland, Pennsylvania, and the District of Columbia; *paper*, from Plymouth, N.C. to Concord, N.H., and Portland, Maine; *candy and confectionery products*, except in bulk, *advertising materials and premium merchandise*, moving and mixed loads with candy and confectionery products, except commodities in bulk, *and materials and supplies* used in the manufacture, sale and/or distribution of candy and confectionery products except commodities in bulk; between plant sites and storage facilities at or near Campbellsville, Ky., and points in Alabama, Connecticut, Florida, Georgia, Illinois, Indiana (except Anderson, Evansville, Fort Wayne, Indianapolis, and Marion), Louisiana, Maine, Massachusetts, Michigan (except Detroit, Flint, Lansing, Pontiac, and Saginaw), Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio (except Cincinnati and Dayton), Pennsylvania, Rhode Island, South Carolina, Tennessee (except Memphis and Knoxville), Texas, Vermont, Virginia, and the District of Columbia. *Malt beverages and related advertising materials*, from Newark, N.J., to Bristol and Norton, Va.; *petroleum and petroleum products*, in containers, from the plant site and storage facilities of Exxon Corporation at Baton Rouge, La., to points in North Carolina; *paper bags*, from Richmond, Va., to Champaign, Ill.; *paper*, from Riegelwood and Roanoke Rapids, N.C., to points in Connecticut, Massachusetts, Rhode Island, New Jersey, certain points in Pennsylvania, Concord, N.H., Portland, Maine, and certain points in New York; *groceries*, from Asheville, N.C., to Copperhill, Tenn., from Richmond and Norfolk, Va., Chattanooga, Tenn., Charleston, Greenville and Columbia, S.C., Cincinnati, Ohio, Louisville, Ky., Indianapolis, Ind., and Chicago, Ill., to Asheville, N.C., and certain points in North Carolina; *paper and paper products*, from Canton and Asheville, N.C., to certain specified points in Virginia, Ohio, Tennessee, and South

Carolina; from Cincinnati, Hamilton, Middletown and Troy, Ohio and Richmond and Norfolk, Va., to Asheville, N.C.; from Chicago, Ill. and Halltown, W. Va., to points in that part of North Carolina on and west of U.S. Highway 29; from Roanoke Rapids, N.C. to points in Illinois, Indiana, Kentucky, Michigan, Ohio, and Wisconsin, and to St. Louis, Missouri; such merchandise as is dealt in by wholesale grocery and food business houses, except fresh meat, eggs, poultry, and products of food-processing and meat packinghouses, and packinghouse by-products, and advertising material and premiums for food-processing and meat packinghouses, from Charleston, S.C., Wilmington, N.C., and Norfolk, Va., to Charlotte, N.C.; from Charlotte, N.C. to points in South Carolina; *pipe, machinery, and machinery parts*, from Charlotte, N.C., to points in South Carolina; *animal feed*, in containers, from the storage facilities of Lipton Pet Foods, Inc., at or near New Orleans, La., to points in Alabama, Georgia, Florida, North Carolina, South Carolina, Virginia, Tennessee, Kentucky, Ohio, Indiana, West Virginia, Maryland, and Pennsylvania, and the District of Columbia; *Forest products*, from Scotland Neck, N.C., to points in Connecticut, New Jersey and Virginia and certain points in New York and Pennsylvania; *fabricated sheet metal products* (except commodities which because of size and weight require the use of special equipment), from the plant site and storage facilities of Acme Manufacturing Co., at Philadelphia, Pa., to points in that part of Tennessee located on and east of U.S. Highway 27 and points in Virginia; from the plant site and storage facilities of Acme Manufacturing Co., at Atlanta, Ga., to points in Alabama, Kentucky, Mississippi and Tennessee. Application has been filed for temporary authority under Section 11349.

MC F-14084F. Authority sought for control by NATIONAL FREIGHT, INC., 57 West Park Avenue, Vineland, NJ 08360, of CROSS TRANSPORTATION, INC., Carl's Corners, Bridgeton, N.J. 08302, and for acquisition by BERNARD A. BROWN, also of Vineland, N.J. of control CROSS TRANSPORTATION, INC., through the acquisition by NATIONAL FREIGHT, INC. Applicant's Attorney: Peter J. Nickles, 888 16th Street, Washington, D.C. 20006. Operating rights sought to be controlled: *General commodities*, except those of unusual value, and except liquors, dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*,

17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, as a *common carrier* over regular routes, between Philadelphia, Pa., and Bridgeton, N.J.; *general commodities*, except those of unusual value, and except dangerous explosives, bakery products and containers, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between New Brunswick, N.J., and Philadelphia, Pa.; *general commodities*, except those of unusual value, livestock, Classes A and B explosives, household goods, as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between Boston, Mass., and Newark, N.J., serving all intermediate points in Massachusetts, and the off-route points of Salem, and Fall River, Mass., Staffordville, Conn., and Trenton, and Farmingdale, N.J., between Boston, Mass., and Newark, N.J., serving no intermediate points, between Lawrence, Mass., and Boston, Mass., serving all intermediate points, and the off-route points of Lowell, Haverhill, and Methuen, Mass.; *General commodities*, except livestock, Classes A and B explosives, inflammables, commodities in bulk other than fertilizer, articles of unusual size or value, and household goods as defined by the Commission, between Richmond, Va., and New York, N.Y., with service to and from the intermediate and off-route points of Washington, D.C., Baltimore, Md., Philadelphia, Pa., Trenton, Newark, Carleer, and North Bergen, N.J., restricted to traffic moving to or from Richmond; *excelsior*, from Montross, Va., to New York, N.Y., serving the intermediate points of Washington, D.C., Baltimore, Md., and Philadelphia, Pa., from Montross, Va., to New York, serving the intermediate points Baltimore, Md., and Philadelphia, Pa., and the off-route point of Washington, D.C.; *general commodities*, with exceptions specified, over irregular route, between Elizabeth, N.J., and points within 30 miles of Elizabeth, on the one hand, and on the other, Philadelphia, Pa., New York, N.Y., points in New Jersey, and those in Nassau and Westchester Counties, N.Y.; *general commodities*, excepting among other Classes A and B explosives, household goods, and commodities in bulk, between Boston, Mass., and certain

specified points in New York and New Jersey; *general commodities*, except those of unusual value, liquors, Classes A and B explosives, bakery products and containers, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between Bridgeton, N.J., on the one hand, and, on the other, points in New Jersey (except those within 30 miles of Elizabeth, N.J.), with restriction; *general commodities*, except those of unusual value, and except Classes A and B explosives, furs, alcoholic beverages, household goods as defined by the Commission, livestock, silk, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between New York, N.Y., and certain specified points in New Jersey, on the one hand, and, on the other, Baltimore, Md., and Washington, D.C.; *glass containers*, from New York, N.Y., and Hoboken, N.J., to certain specified points in New York, and New London Counties, Conn., from Bridgeton, N.J., to certain specified points in Delaware, Boston, and Roxbury, Mass., and Relay, Md., from Bridgeton, N.J., to Bridgeport, Conn., Philadelphia, Pa., Wilmington, Del., Yonkers, and New York, N.Y., Baltimore, Md., and the District of Columbia; *boxes (with or without partitions), paper fiberboard or pulpboard in sheets or rolls and paper, fiberboard or pulpboard lines or fillers*, from Bridgeton, N.J., to certain specified points in New York, Seaford, Del., Boston, and Roxbury, Mass., and Relay, Md., from Bridgeton, N.J., to certain specified points in New York; *boxes*, from Baltimore, Md., to Salem, N.J., from Bridgeton, N.J., to Philadelphia, Pa., between Bridgeton, N.J., and Baltimore, Md.; *caps and closures for glass containers*, from Glassboro, N.J., to certain specified points in New York, Seaford, Del., and Boston, Roxbury, Mass., and Relay, Md.; *Materials and supplies necessary for the manufacture and packing of glass containers*, from Philadelphia, Pa., to Bridgeton, N.J.; *canned goods*, from Bridgeton, N.J., to Philadelphia, Pa., Baltimore, Md., Hartford, Conn., Somerville, Mass., and points in the New York, N.Y., commercial zone, as defined by the Commission in 1 M.C.C. 665; *malt beverages*, from New York, N.Y., to certain specified points in Connecticut; *drugs*, from New York, N.Y., to Bridgeport and Stamford, Conn.; *tin plate*, from Baltimore, Md., to Paulsboro, N.J.; *fertilizer, fertilizer materials, seeds, and insecticides*, from New York, N.Y.,

and Hoboken, N.J., to Bridgeport and Stamford, Conn., Spring Valley, N.Y., and points on Long Island, N.Y., except those in Nassau County; *glass bottles, glass jars and packing glasses, bottle carrying boxes with or without partitions, corrugated fiber- and pulpboard paper in sheets or rolls, and fiberboard and pulpboard paper liners and fillers*, from Bridgeton, N.J., to certain specified points in Delaware, Maryland, Massachusetts, New York, Pennsylvania, and Virginia; *caps and closures* for glass containers, from Glassboro, N.J. to the destination points specified; cans, not exceeding 1 gallon capacity, and boxes not exceeding 1 quart capacity, from Baltimore, Md., to Hammonton and Minotola, N.J.; *glass containers and boxes* (with or without partitions), *paper, fiberboard or pulpboard in sheets or rolls and paper, fiberboard or pulpboard liners and fillers*, from Bridgeton, N.J., to points in Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia, and the District of Columbia; *caps, closures, and accessories* for same, from Glassboro, N.J., to points in the above-described destination territory; *wooden pallets*, from points in Massachusetts, Rhode Island, and that part of New York which is located west of U.S. Highway 15 from the New York-Pennsylvania State line to Springwater, N.Y., and New York Highway 15-A from Springwater to Rochester, but not including Rochester, to Bridgeton, N.J.; *glass containers*, and, when moving as part loads in connection therewith, *corrugated boxes, knocked down, caps and closures*, from Jersey City, N.J., to certain specified points in New York and Connecticut; *wooden pallets*, from points in Connecticut and New York, except New York, N.Y., and those in Nassau and Westchester Counties, N.Y., to Jersey City, N.J.; *plastic containers, plastic caps, plastic closures, and accessories* for the aforementioned commodities, from Glassboro, N.J., to points in Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, Delaware, Maryland, Virginia, and the District of Columbia; *wooden pallets*, from the above-specified destination points to Glassboro, N.J.; *malt beverages, brewers' supplies, and empty containers*, excepting malt beverages and brewers' supplies, in bulk, in tank vehicles, between points in the described New York-New Jersey territory, on the one hand, and, on the other, points in Massachusetts, between Lawrence, and Boston, Mass., on the one hand, and, on the other, points in Connecticut, Rhode Island, and

Massachusetts; *glass and plastic containers, carboys, demijohns, jars, bottles, packing glasses, caps, covers, stoppers, closures, or tops, boxes, paper, fiberboard or pulpboard in sheets or rolls, fiberboard or pulpboard liners and fillers, and empty containers*, from Bridgeton and Glassboro, N.J., to points in Maine, New Hampshire, and Vermont; *glass containers and paper, fiberboard, or pulpboard boxes, liners, fillers, sheets and rolls*, from the plantsites, warehouses, or other facilities of Owens-Illinois, Inc., at North Bergen, N.J., to points in that part of Pennsylvania on the east of U.S. Highway 15 (except points in the Philadelphia, Pa., commercial zone as defined by the Commission, and York, Pa.), over one alternate route for operating convenience only. National Freight, Inc., is authorized to operate as a common carrier in New Jersey, Pennsylvania, Connecticut, New York, Massachusetts, Rhode Island, Delaware, Maryland, Florida, New Hampshire, Ohio, Vermont, Virginia, West Virginia, Wisconsin, Illinois, Indiana, Maine, Michigan, Minnesota, Missouri, North Carolina, South Carolina, Georgia, Arkansas, Iowa, Kansas, Kentucky, Nebraska, Louisiana, Alabama, Mississippi, Oklahoma, Texas, Tennessee, and the District of Columbia. Application has been filed for temporary authority under section 11349.

MC F-14085F. Applicants: CRST, INC., 3930 16th Avenue S.W. P.O. Box 68, Cedar Rapids, IA 52406, and WESTERN TRANSPORTATION COMPANY, 1300 West 35th Street, Chicago, IL 60609. Applicants' representatives: Robert E. Konchar, 2720 First Avenue N.E., P.O. Box 1943, Cedar Rapids, IA 52406, and Carl L. Steiner, 39 South LaSalle Street, Chicago, IL 60603. Authority sought for CRST, Inc. of Cedar Rapids, IA, to purchase a portion of the operating rights of Western Transportation Company, of Chicago, IL, and for acquisition of control of such rights through the transaction by Herald A. Smith, Jr. and Miriam G. Smith, both of Cedar Rapids, IA. The operating rights sought to be purchased involve general commodities with the usual exceptions over the following regular routes: (1) From Chicago, IL, over U.S. Hwy. 34 to junction IL Hwy. 65, then over IL Hwy. 65 to Aurora, IL, then over IL Hwy. 31 to Oswego, IL, then over U.S. Hwy. 34 to junction IL Hwy. 92, then over IL Hwy. 92 to Moline, IL, then across the Mississippi River to Davenport, IA, and return over the same route; then over U.S. Hwy. 61 to junction IA Hwy 92, then over Hwy 92 to junction U.S. Hwy 218, then over U.S. Hwy 218 to Mt.

Pleasant, IA, then over U.S. Hwy. 34 to Ottumwa, IA, then over U.S. Hwy. 63 to Oskaloosa, IA, and then over IA Hwy. 63 to Oskaloosa, IA, and then over IA Hwy. 163 to Des Moines, and return over the same route. (2) From Waterloo over U.S. Hwy. 218 to junction U.S. Hwy. 18, then over U.S. Hwy. 18 to Mason City, IA, and return over the same route. Service is not authorized to or from intermediate points. (3) Between Keokuk, IA and Mt. Pleasant, IA, serving all intermediate points; from Keokuk over U.S. Hwy. 61 to junction U.S. Hwy. 218, then over U.S. Hwy. 218 to Mt. Pleasant, and return over the same route. (4) Serving Farmington, Bonaparte, Cantril, Milton, Keosauqua, Birmingham, Fairfield, Stockport, Hillsboro, Salem, Houghton, West Point, Fort Madison, Denmark, Douds, Pilot Grove, and Argyle, IA as off-route points in connection with the regular route authority in (3) above between Keokuk, IA and Mt. Pleasant, IA, over U.S. Hwy. 61 and 218. Vendee is authorized to operate pursuant to certificate MC 114273 and various subs thereunder as a common carrier in the states of CO, CT, DE, IL, IN, IA, KS, KY, MD, ME, MA, MI, MN, MO, NE, NH, NJ, NY, ND, OH, OK, PA, RI, SD, VA, VT, WV, and WI. Application has been filed for temporary authority under Section 210a(b).

MC F-14087F. Authority sought for purchase by North Iowa Express, Inc., 1921 N.E. 58th Ave., Des Moines, IA 50313, of a portion of the operating rights of Western Transportation Company, 1300 West 35th Street, Chicago, IL 60609, and for acquisition of control of such rights by Donald E. Schneider, 1921 N.E. 58th Ave., Des Moines, IA 50313 through the purchase. Applicant's Attorney: Carl L. Steiner, 39 South LaSalle St., Chicago, IL 60603. Operating rights sought to be transferred are as a common carrier, over regular routes, as follows: *General Commodities*, with the usual exceptions, between Waterloo, IA and Ft. Dodge, IA, over U.S. 20, serving all intermediate points. Application has been filed for temporary authority under Section 210a(b).

Note.—North Iowa Express, Inc. proposes to tack the authority sought to be acquired with its existing authority.

MC F-14088F. Authority sought for purchase by Sunderman Transfer Inc., Box 63, Windom, MN 56101, of a portion of the operating rights of LTL Perishables, Inc., 550 East 5th Street South, South St. Paul, MN 55075, and for acquisition by Sunderman Transfer Inc., of control of such rights through acquisition. Applicants representatives: Carl E. Munson, 469 Fischer Building,

Dubuque, IA 52001, and Paul Nelson, 550 East 5th Street So., So. St. Paul, MN 55075. Operating rights sought to be purchased are those contained in MC 135874 Sub No. 16, which authorize the transportation of: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk and hides). From Minneapolis, MN, to points in IA, NE and SD, restricted to the transportation of traffic originating at the named origins and destined to the indicated destinations. No duplicating authority involved but possible dual operations. Application has been filed for temporary authority under 49 U.S.C. 11349. (Hearing Site: Minneapolis, MN.)

MC FC-14089, F, Transferee: ADAMS LINES, INC., 2619 "N" Street, Omaha, NE 68107. Transferor: Pennsylvania & Illinois, Ltd., 654 West 21st Street, Chicago, IL 60600. Representative: D. Douglas Titus, of Titus, Holman, Myers & Teichgraber, 510 Benson Building, Sioux City, IA 51101. Attorney for Transferor: A. Charles Tell, George, Greek, King, McMahon & McConaughy, 110 East Broad Street, Columbus, OH 43215. Authority sought for purchase by transferee of operating rights of transferor as common carrier as follows: MC-129176 regular routes: *General Commodities* with the usual exceptions, From New Castle, PA and points within 20 miles of New Castle, to Gary, IN and Chicago and Cranston, IL, with no transportation for compensation on return except as otherwise authorized.
